Mr. Hershberger:

Thanks to both you and Mr. Zumwalt for taking the time to review and to provide comments regarding the proposed 20.11.47 NMAC, Emissions Inventory Requirements. The Air Quality Division is responding to your questions and comments you have provided regarding the proposed 20.11.47 NMAC, Emissions Inventory Requirements in your 4/27/2009 2:29 pm e-mail and in your 4/29/2009 11:15 am email.

In your 4/27/2009 2:29 pm email you inquired about a stakeholder meeting and/or regulation rollout/explanation meeting. The Air Quality Division would like to offer to either set up a conference call or meeting with you to answer any questions you have regarding the proposed 20.11.47 NMAC, Emission Inventory Requirements. If you are interested in conducting either a conference call or a meeting please provide your availability so that a date and time can be set up.

In your 4/29/2009 11:15 am e-mail you provided two comments posed by Mr. Jeffrey Zumwalt. Regarding Mr. Zumwalt's first comment the Air Quality Division will add pounds per year to Section 20.11.47.15.C. Regarding Mr. Zumwalt's second comment the 20.11.47 NMAC, Emission Inventory Requirements, regulation provides the emission inventory reporting requirements for both criteria pollutants and for greenhouse gas emissions. These emission inventory requirements are listed separately since greenhouse gas emissions inventory reporting will not be required for all sources. The Air Quality Division will make every effort possible to make the emissions inventory reporting requirements as efficient as possible to eliminate the waste of time and to eliminate the waste of paper.

Thank you again for providing your questions and comments.

Subject: RE: 20.11.47 NMAC, Emissions Inventory Requirements Stakeholder Letter & Stakeholder Review Draft

Hi Janice,

I like the "if required by the department" proposed change from "annual" GHG reporting requirement in 20.11.47 NMAC.

At a stakeholder meeting on the initial version of this regulation, I remember asking if AQD had a plan to roll out/explain to the regulated community AQD's regulatory intent, AQD's expectation of regulated sources, and answer questions from the regulated community. The answer at that time was "yes, we'll certainly do that". However, I don't remember seeing any AQD notice for such a roll out meeting since then.

Given the scope of the GHG reporting regulations, I respectfully request a stakeholder meeting and/or regulation rollout/explanation meeting so AQD can explain the regulatory intent, AQD's expectation of regulated sources, and answer questions from the regulated community regarding GHG reporting.

Thx,

Vernon Hershberger, LEED AP, CHMM

PLEASE DO NOT RESPOND DIRECTLY TO THIS LISTSERVE ANNOUNCEMENT

Dear Stakeholders,

Please see the attached Stakeholder Letter, and the Stakeholder Review Draft for the above-mentioned regulation.

Thank you,

Janice C. Amend
