---

<u>Project Title</u>	<u>2021</u>	<u>Scope</u>
		<i>Planning</i>
<b>Electronic Plan Review (ePlan)</b>	\$100,000	Design, plan, purchase, construct, deploy and otherwise improve Electronic Plan Review (ePlan) equipment, software, and peripherals and provide for associated facilities, improvements, and data for the electronic acceptance and review of development, building and construction plans. Further expand electronic plan review capabilities to improve existing and implement into new business areas in the Planning Department and other City plan review functions.
<b>Planning Hardware &amp; Software Upgrades</b>	\$255,000	Plan, design, purchase and otherwise improve Planning Department electronic equipment, hardware, software, data, training and functional capabilities to support and further improve Planning Department business lines and to further improve efficiencies for the department and more importantly the department's customers. Further expand the Planning Departments online offerings to allow more business lines to be conducted remotely with emphasis on electronic service offerings but still allowing for person to person interaction when necessary.
<b>Albuquerque Geographic Information System (AGIS)</b>	\$275,000	Plan, design, purchases, upgrade, expand, and otherwise improve computerized maps and associated geographic information to support essential Planning Department functions, including department functions that require providing digital geographic information to the public. This scope may include large format plotters, servers, and associated server hardware, software, data, aerial photography, training, and technical assistance.
<b>Total</b>	<b>\$630,000</b>
