

# CANDELARIA NATURE PRESERVE

6-22-19 Public Input Meeting Comment Card

Current management of the Preserve through contract farming is cost effective for the city. The proposed 20 year habitat plan will be more costly to maintain and operate without contract farming, however it is anticipated that it will provide more wildlife habitat. Please comment.

The Technical Advisory Group (TAG) envisions transitioning away from all crops, including wildlife crops to a restored natural habitat. Please comment.

### RESOURCE MANAGEMENT PLAN STUDY AREAS

- Candelaria Nature Preserve
- Rio Grande Nature Center State Park

What are your thoughts on the limited and increased outdoor recreation access options? Are there any programs or activities that should be included or excluded?
