Project Description:

Provide transportation planning and conceptual design services, including travel demand modeling and evaluation of multi-modal alternatives, formulation of an access management plan, recommendations for intersection and traffic operation improvements, estimation of right-of-way needs, preparation of concept drawings (anticipate 10-30% design level-of-effort), preparation of an evaluation matrix including engineering, environmental, and community factors and cost estimates for each alternative, assembly of an alternatives analysis report and recommendation of a locally-preferred alternative, and other related services as necessary in updating the Issue 1 transportation section of the 1984 Old Coors Corridor Plan. High capacity transit, multi-lane at-grade and grade-separated express arterial, local circulation street, pedestrian and bikeway modes of transportation, in varying degrees, shall be included in each alternative. A public involvement plan will be prepared and followed throughout the duration of the project. This scope of work will also include preparing the necessary application documents to the EPC and participation in the hearing process before both the EPC and City Council. Because federal funding is anticipated, all services for the project must generally be consistent with New Mexico Department of Transportation and Federal Highway Administration/Federal Transit Administration guidelines and procedures for conducting a corridor alternatives analysis.

CORRECTION: ATTENDANCE IS NOT MANDATORY at the pre-submittal meeting on **Monday, October 26, 2009 at 10:00a.m. in Room 7096, 7th floor, City/County Building, One Civic Plaza, N.W., Albuquerque, New Mexico 87102**, at which time and place additional information will be presented and project related questions will be addressed.
