

# APD update 19-11

January 27, 2023

APD continues to evaluate emerging technology and how it can be used to improve efficiency, As with any technology, what works for one agency does not mean that it will work for all. We have replaced the Records Management System and a Computer Aided Dispatch System. Both are designed to streamline efficiency for officers.

## DENIED

APD has piloted speech to text technology with limited success. We are currently exploring this option with our on body recording system but it is not ready to test at this time. We concur with the value of this technology and once it reached maturation we are looking at implementing contingent upon funding.
