COMMITTEE AMENDMENT NO. 1 TO O-26-47

AMENDMENT SPONSORED BY Daniel Champine

1. Beginning on page 3, line 16, amend Section 1 as follows:

(D) *COORDINATION AND JOINT TRENCHING.*

...

(2) The City shall not impose a moratorium on Fiber Infrastructure construction due to the concentration of Licensees in a work area~~[.] [unless] [If]~~ Licensees fail to coordinate schedules, traffic control plans, and staging with one another and the City~~[. In such circumstances]~~, the City may impose a~~[n] [44-] [80]-~~ day deployment delay on further fiber construction within that ROW once construction has been completed.

Explanation: This amendment does two things. First, it clarifies that the City shall not impose a moratorium on Fiber Infrastructure construction due to Licensee concentration in a work area but permits deployment delays when Licensees fail to coordinate their schedules, traffic control plans, and staging with each other and the City. Second, it lengthens the deployment delay time from 44 to 80 days. This amendment is proposed to encourage Licensees to coordinate with each other and the City to minimize neighborhood disruption as much as possible during deployment. A Licensee's failure to coordinate schedules, traffic control plans, and staging with each other and the City would result in longer delays for a Licensee to deploy further fiber construction.

THIS AMENDMENT PASSED ON A 5-0 VOTE.

COMMITTEE AMENDMENT NO. 2 TO O-26-47

AMENDMENT SPONSORED BY: Daniel Champine

1. Beginning on page 2, line 16, amend Section 1 as follows:

**(C) NOTICE AND TIMING OF FIBER OPTIC CONSTRUCTION, WORKING
HOURS.**

(1) Licensees and their agents are required to deliver two written notices of upcoming work to affected residents. The first notice shall be delivered at least thirty (30) days before construction and a second notice at least 48 hours before construction. Notice shall not include any advertisement for services. The first notice shall include a general description of the work to be performed and the approximate construction date. The second notice shall describe the work to be performed, traffic control set-up, dates and times of activities, and the name and telephone number of the Licensee's local representative. Licensee will not receive a Barricade or Excavation Permit, or combination thereof, until it has provided the City with documentation showing that the first required written notice has been delivered. Proof of delivery of the second notice shall be required prior to the ~~[first field-meeting]~~ [pre-construction meeting or any other meeting] scheduled by the City's Design Review and Construction section and/or prior to the start of construction. Documentation may include, but is not limited to, photographic or video evidence that the written notice was provided to affected residents or set via certified mail.

Explanation: This amendment clarifies the procedure used by the City's Design, Review,

and Construction Section prior to the start of construction. After consultation with City Design, Council Staff was notified that the subject meeting is not a “field meeting” but a “pre-construction meeting.” This amendment corrects this misnomer.

THIS AMENDMENT PASSED ON A 5-0 VOTE.

COMMITTEE AMENDMENT NO. 3 TO O-26-47

AMENDMENT SPONSORED BY Daniel Champine

1. Beginning on page 1, line 10, add the following to Section 1 as follows:

**§ 6-5-2-30. FIBER OPTIC INFRASTRUCTURE SPECIFIC EXCAVATION AND
BARRICADING PROVISIONS.**

(A) DEFINITIONS.

(1) “Fiber Infrastructure” is the fiber optic cable network and related equipment that facilitates high-speed data transmission. This includes infrastructure as defined as a “Facility” in the applicable license agreement[, but does not include any internal communication, control, and data systems of utilities with an easement or franchise agreement].

Explanation: This amendment clarifies the extent of fiber infrastructure, exempting certain systems used by utilities with an easement or franchise agreement.

THIS AMENDMENT WAS WITHDRAWN.

COMMITTEE AMENDMENT NO. 4 TO O-26-47

AMENDMENT SPONSORED BY Daniel Champine

1. Beginning on page 3, line 6, amend Section 1 as follows:

3) In the event a Licensee is placing fiber within City ROW, fiber micro trenching, boring, and excavating within residential neighborhoods and streets shall only be allowed Monday through Saturday between the hours of ~~[7:00 A.M. and 6:00 P.M.]~~ [6:00 A.M. and 5:00 P.M.], unless otherwise limited by permit-specific conditions for safety or traffic control. In no event shall a Licensee continue any construction or perform any duties at a specified site, including clean up, within the scope of their license past 8:00 PM. Nothing in this section shall be construed to permit unsafe or unduly disruptive work practices.

Explanation: Based on feedback from utility providers and their concerns related to the corrective actions that they must take when Licensees damage utility lines, this amendment adjusts working hours to place more corrective actions within standard working hours. This amendment will attempt to adjust the bell curve of corrective actions that require utility workers to work overtime and outside of normal working hours, thereby incurring significant operational costs and expenditure of utility resources.
