Rio Grande Blvd is truly multimodal

Nearly as many people report walking and biking on Rio Grande between Indian School and Griegos as driving.

Who responded to the survey

210 Survey respondents	**98%** Live in area	**57%** Age 65 or older	**67%** White/ Caucasian
125 Written Comments	**96%** Travel Rio Grande Blvd daily	**14 %** Age 44 or younger	**18%** Hispanic/ Latino

Top Concerns and Goals

Speeding Vehicles

Bike Safety

Illegal Passing

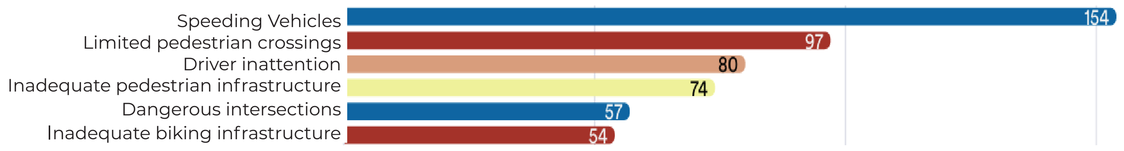

Limited Pedestrian Facilities

Dangerous intersections

Survey respondents' two top goals correspond to top concerns:

- Reduce speeding
- Improve pedestrian facilities

Rio Grande Blvd Traffic Calming Study

Overview

This study aims to improve safety and mobility on Rio Grande Blvd between Indian School and Los Griego. The project team analyzed data related to traffic and crashes, bicycle and pedestrian facilities, and roadway geometry.

Engagement

Community members were invited to provide input through an online survey and at an event held at La Montañita Co-Op. See the Community Engagement Board for a summary of community responses to this project.

Design Intent and Next Steps

Based on data analysis, public input, and an evaluation of traffic-calming measures suitable for this stretch of Rio Grande Blvd, the project team is proposing a multi-phase approach.

Phase 1 Design Alternatives would focus on the use of medians and protected bike lanes to:

- **Visually narrow the roadway**
- **Reduce speeding**
- **Discourage illegal passing**
- **Improve bicyclist safety**

Additional low-cost safety measures will be considered in Phase 1 which improve signage and visibility.

- **Retroreflective signposts**
- **Larger street name signs**
- **Two-way left-turn signs**
- **“Stop Ahead” warning signs**

In Phase 2, additional safety countermeasures and streetscape enhancements will be considered:

- **Pedestrian safety measures such as mid-block crossings and pedestrian refuges**
- **Median landscaping**
