

Community Meeting

ALBUQUERQUE RAIL YARD / SAN JOSE NEIGHBORHOOD NOISE AND VIBRATION ASSESSMENT

Please join City Councilor Isaac Benton and Albuquerque Council Services at a neighborhood meeting to discuss the findings of a rail yard noise and vibration assessment performed for the San Jose Neighborhood.

The City of Albuquerque Council Services Department, in collaboration with Rio Metro Regional Transit District and New Mexico Department of Transportation, has completed an assessment of noise and vibration impacts and potential abatement measures for the area within the San Jose Neighborhood adjacent to the Albuquerque rail yard. The assessment identified the specific rail yard activities that produce intrusive sound levels and vibrations between Woodward Rd. and Trumbull Ave., the times of day these activities occur and their intensity, and identified and evaluated potential measures to reduce rail yard noise levels within the neighborhood.

A meeting will be held to discuss the assessment and its findings, as well as obtain community input to determine next steps.

DATE / TIME

June 16, 2022 / 6:00 – 7:30 PM

PLACE

Herman Sanchez Community Center,
1830 William St. SE, Albuquerque, NM 87102
