AGENDA

11:30 - Get Lunch

11:40 - Introductions

Welcome - Thank you for being here in person!

Since the IPC is tasked with monitoring results and evaluating the progress of our community, it is important for the IPC to be made up of people with different backgrounds and different knowledge areas.

Please introduce yourself by sharing:

Name

A bit about your background and knowledge areas

An indicator you use in your personal life (looking back at a week or a year - how would you monitor your own progress)

12:10 - Overview of IPC and Introduction to the Day

12:15 - Rotations

Teams of two or three

5 minutes at each station

1:00 - Debrief and Discuss

1:25 - Next Steps and Closing

OVERVIEW OF IPC and STRUCTURE

IPC =12 members selected and approved by Mayor and Council
Not an advisory board → The IPC is tasked with monitoring results and evaluating the progress of our community.
City Council identifies goals (there are 8) and goal statements. IPC then responsible for measuring progress - DCCs and Indicators

SOME DEFINITIONS

A **RESULT** is a population-condition of wellbeing for children, adults, families, and communities, stated in plain language.

An **INDICATOR** (or benchmark) is a measure that helps quantify the achievement of a result. Indicators answer the question "How would we recognize this result if we fell over it?"

It should be noted that a **PERFORMANCE MEASURE** is a measure of how well a program, agency, or service system is working. Performance measures capture customer results. These are not the focus of the IPC.

COMMUNITY WELLBEING vs. PROGRAM/AGENCY PERFORMANCE
For communities, the ends are conditions of wellbeing for children, adults, families, and the community as a whole. For programs, the ends are how customers are better off when the program works the way it should.

GOALS FOR TODAY
The past two months smaller groups have engaged working sessions - diving into each goal. Today we will review and build on that work with the following goals in mind:
1) Finalize Desired Community Conditions
2) Provide guidance to the research team that will be researching potential indicators for each Desired Community Condition
3) Determine which organizations we would like to get input from in the coming month

One sticky color = feedback on DCC
One sticky color = additional context/direction for research team
One sticky color = who to get input from
