Subject: Emissions Inventory Requirements

I received the letter from the city about the proposed changes in the Emissions Inventory Requirements. I think it is a solid idea to go from annually to if required by the dept. My reasons for this are simple when I do my annual reports it requires alot of my time and a lot more of the City's time. The Air Quality division was very helpful to me but it did take a lot of the city's personnel time to assist me and make sure it was done properly.

I think the cost savings would be dramatic to the city in man hours used because I am very confident that there are many other people that needed much more time and help with their reports than I did. Any questions please feel free to call me.
