

CITY OF ALBUQUERQUE

Building a Sustainable, Healthy Future for Albuquerque Families

The City of Albuquerque's is dedicated to creating a future worth fighting for—one where Albuquerque families thrive in a sustainable, and healthy environment. Our departments champions environmental sustainability as a cornerstone of community well-being, focusing on protecting our shared environment, addressing social and environmental inequities, and fostering responsible economic development that benefits every generation.

ALBUQUERQUE BY THE NUMBERS

The City of Albuquerque is on track to achieve 100% renewable energy for municipal operations by 2025, reaching 80% in 2024.

52 METRIC TONS

Approximately 52 Metric Tons of CO₂ emissions was reduced through lighting upgrades.

15,000

Trees Planted as part of our 100,000-Tree Goal by 2030.

20

Electric Buses purchased in an effort to modernize City transit.

CABQ.GOV

What We've been Doing to Foster Positive Growth in Albuquerque

Driving Toward Sustainability

- **Energy Efficiency:** Lighting upgrades in City facilities saved energy and reduced CO₂ emissions by 52 metric tons.
- **Fleet Transition:** Purchased 5 electric vans and 20 electric buses, advancing the transition to low- and zero-emission vehicles.
- **Tree Planting Initiative:** Planted 15,000 new trees, progressing toward our goal of 100,000 trees by 2030.

Innovative Mobility Solutions

- **Affordable Car-Share**

Program: Launched a new car-sharing platform, increasing equitable access to sustainable transportation.

- **Electric Vehicle Expansion:** Added infrastructure to support a growing fleet of electric vehicles.

Environmental Protection

- **Air Quality Monitoring:** Provides real-time data to residents and emergency health alerts via text when air quality becomes unsafe.
- **Food Safety Retail Ordinance:** Updated the ordinance to enhance compliance and

protect public health.

- **Urban Wildlife Team:** Promotes coexistence with wildlife and mitigates health risks through effective mosquito management

Waste Management & Climate Action

- **Biowaste Program:** Launched in April 2024, addressing human waste hazards with efficient cleanup services.
- **Methane Reduction:** Implemented food separation and composting programs to decrease landfill methane emissions.
