Project Description:

The scope of work is to design road geometry modification on Zuni Road from Washington to Central to provide a total of 3 lanes (single lane in each direction and a center two-way left-turn lane or median). The three lanes will be re-striped on the existing pavement with mill and overlay keeping sidewalks at their existing width and new bike lanes in both directions. This will also include bus stop shelters, relocation of utilities on sidewalk, landscaping, public meetings, drainage work, reduction of posted speed, tentative project schedule and estimated construction cost.

The exact right-of-way will be established from the records and off the map.

The design approach will be flexible but the consultant will design with reference to Alternate 1A as mentioned and recommended in the Zuni Road Study (Washington Street to Central Avenue), prepared by the City of Albuquerque Department of Municipal Development in August 2011. **The study is available**
