- 2.3. When new property is acquired or when property is transferred from or within the MFSC, it is the responsibility of the employee handling the transaction to notify the Crime Lab's administrative assistant.
- <u>4. Managers will complete a quarterly inventory of all equipment valued at \$5,000.00</u> or higher and will return it to the Crime Lab's administrative assistant.
- G.F. Records and Reports
 - All examinations or investigations performed by Crime Lab and Major Crime Scene staff will be appropriately documented in the case file. A direct supervisor (or designee) who responded to the crime scene will review a crime scene case report. Corrections and/or modifications of reports will be agreed upon and completed prior to the release of the report. The documentation in the case file must support the conclusions of the final report. Reports must be completed and reviewed promptly after the examination(s) or investigation(s) performed.
 - 2. The SED maintains a variety of records. The basic categories of records are:
 - a. Administrative
 - i. Budget requests, expenditure logs, inventory of property items, data on work performed, monthly reports, equipment loan log, subpoena receipt logs (kept for 6 months only), etc.
 - b. Latent files/envelopes
 - i. Fingerprint evidence from crime scenes, as well as selected inked impressions, will be maintained in the Evidence Unit.
 - c. Photographic negatives and original digital photograph CDs
 - i. Images taken at crime scenes, latents captured by photography, and other incidents of interest to the Department are kept in the Photography Laboratory until approved for disposition.
 - d. Case Files
 - i. Case files will be located in the MFSC case file room unless a case is being actively examined. This includes case files from Major Crime Scene investigations. These files may contain a copy of the examiner's report and/or a CD with crime scene or firearms photographs. Only Crime Lab and Major Crime Scene staff, have access to this room. Case files are stored in the MFSC case file room for at least three years. After three years, they may be transferred to another approved location where they will be stored until deemed no longer necessary.

H. Training		
-		be conducted by a qualified examiner with ervisor and/or Technical Leader.

ALBUQUERQUE POLICE DEPARTMENT **INVESTIGATIVE BUREAUGENERAL ORDERS** SOP 5-51-87 **OPA DRAFT** 2. Training guidelines are outlined and maintained by each discipline. A training checklist and competency test(s) will be completed and documented for each new examiner to be retained in the individual's training and development file. 3. Crime Scene Specialists will attend a Crime Scene Specialist Training Course conducted by various members of the SED. This course will generally last approximately two weeks, The length of the training course will be determined by the SED Command Staff, depending on the candidate's experience, and a final test must be successfully completed at the end of the course. Other personnel new to the SED may also attend all or selected segments of this training course. 4. All in-service courses, schools, seminars, lectures or meetings that employees wish to attend must be coordinated through the appropriate supervisor. All pamphlets or materials that members receive announcing these opportunities should be shared throughout the division and posted. 5. All employees must stay current and maintain competency in their field of expertise. This involves keeping in contact with other experts both through personal communication, organizational membership and by reading current professional literature. 6. In addition to in-house training, personnel should attend outside training on a regular basis. Outside training should be conducted by a regionally or nationally recognized organization, when available. Web-based courses are an additional type of outside training. It is recognized that budget constraints may limit travel/training. 7. Employees are encouraged to share new information about training and/or procedures with other personnel at staff meetings. 8.7. Documentation of training shall be kept for all Crime Lab personnel. Training documentation records may take the form of individual checklists certificates from training courses, CEU credits, transcripts, etc. All training must be documented and kept up to date on resume/CV for inclusion in the employee's training and development file. Remedial training, if necessary, is addressed on a case-by-case basis and may include all or portions of a discipline's training program. I. Equipment

ALBUQUERQUE POLICE DEPARTMENT **INVESTIGATIVE BUREAUGENERAL ORDERS** SOP 5-51-87 **OPA DRAFT** 1. Personnel shall ensure that equipment and instrumentation used in their unit is properly maintained and calibrated, as appropriate. Appropriate records shall be maintained for each item of equipment significant to the quality of the test. 2. Equipment that is not in use or needs repair shall be isolated or clearly marked to prevent unintended use. J. Safety 1. It is the responsibility of each employee of the SED to follow the safety guidelines as outlined in the following documents: a. Safety Plan b. Exposure Control Plan c. Chemical Hygiene Plan d. Emergency Evacuation Plan e. Fire Prevention Plan 2. The SED Commander or designee Laboratory Director will designate a Safety Manager for the Division. 3. It is also the responsibility of each employee of the SED to notify the Safety Manager when concerns are not covered in the above plans, or when suggested procedures in the above plans are incorrect. 4. A copy of the Safety Plan, Exposure Control Plan, Emergency Evacuation Plan, Fire Prevention Plan and Chemical Hygiene Plan are located within each laboratory area. The Safety Manager annually reviews all laboratory safety documents. Any revisions will be posted and distributed to staff. 5. Exposure to Potentially Infectious Material a. There are specific procedures that must be followed-When an employee has been exposed to potentially infectious material such as blood or body fluids, refer to SOP - Exposure to Blood or Bodily Fluids. APD Exposure Control Plan, referenced under "Reporting Exposures." K. Facility Security 1.- Physical access to the interior of the MFSC laboratory is restricted. INVESTIGATIVE BUREAUGENERAL	ORDERS

SOP 5-5<u>1-87</u>

OPA DRAFT

- Before disturbing items of evidence at a crime scene, the scene should be properly photographed, including the use of indicator cards and scales when appropriate. Measurements are taken that permit the item to be accurately located in either a reconstruction or in a crime scene diagram. The item should be depicted in its proper place on the rough sketch or within a point cloud of the scene.
- 2. In most instances, all of the evidence will be collected. In some cases, such as pools of blood or paint from a wall, only carefully selected specimens need be taken. When specimens are taken, the investigator should document the reasons why only that which was collected are needed to establish the facts of the case.
- As it is often crucial to have Comparison standards such as hairs, tools, and paint, appropriate materials will be collected from known sources whenever possible. As much of the evidence entering the SED is collected without SED control, SED personnel performing such analysis will request known standards when necessary.
- 4. The collected evidence must be properly documented in the report, on the evidence label (tag), and on the evidence container (heat-seal bag, paper bag, envelope, etc.). Documentation includes the date, time, and place the item was found, the name (or traceable number) of the investigator collecting it, and a sufficient description of the item. When the item is contained in a bag, the bag should be sealed, and the collecting officer should initial and date the seal. If the container is opened at a later time for scientific examination, it should be opened at a location other than any existing seals to maintain such seals. The examiner should re-seal the item when the examination is complete, putting his/her initials and date across the new seal. Refer to SOP Collection, Submission, and Disposition of Evidence and Property.
- 5. All evidence will be packaged in appropriate containers (with the exception of #6 below) and secured to prevent access to the contents. Paper bags and other containers that cannot be heat-sealed will be sealed with tamper- evident seals (latents are an exception; moisture seal with initials across the seal are acceptable when receiving latent packets). Staples are not to be used in lieu of tamper-evident seals, but may be used in addition to applying a proper seal. Initials and date should be placed across the seal.
- B. Drying Evidence

examiners, officers, and detectives as the need arises.

SOP <u>5-51-87</u>

OPA DRAFT

- 2. Evidence may be stored short term within the limited access laboratory or working areas. In general, evidence is stored under these conditions while examinations are being performed on the items. Once transported, evidence is to remain in the laboratory areas, with the exception of latent fingerprint lifts or similar evidence, and photographs.
- E. Evidence Reporting
 - Investigators should assess the case and the evidence for input concerning which examinations should be conducted on each item of evidence. This assessment should be communicated to the requestor of the examination, as well as to the DA and any other involved investigators.
 - 2. It is desirable that as few persons be involved in the handling of items of evidence as possible. Careful records must be kept that document the chain of custody for each item. All evidentiary items should be tagged into the Evidence Section promptly after the collection or examination process is complete.
- F. Evidence from Outside Agencies
 - On occasion, requests are received from other law enforcement departments, governmental agencies, or the military to examine evidence. Evidence may be received by mail or delivered in person to the examiner, following standard chain of custody procedures. The evidence will be stored in the laboratory area. A report does not have to be released until the submitting agency has picked up its evidence.
- G. Evidence to Outside Agencies
 - On occasion, it is necessary to send evidence to other agencies or laboratories. Prior to sending the evidence, the SED <u>Commander Laboratory Director</u> or designee may be notified and written or telephonic approval will be obtained from an agent of the courts, if appropriate. Evidence will be sent to another laboratory for re-analysis only upon court order. The written approval and/or court order will be filed in the case file.
 - 2. The evidence will be packaged securely, with appropriate preservation and safety precautions, and sealed to prevent tampering.
 - 3. A Service Request Form (to document chain of custody) or another equivalent form will be filled out. The original form will be filed in the case file after the appropriate

ALBUQUERQUE POLICE DEPART	MENT
INVESTIGATIVE BUREAUGENERAL	ORDERS

SOP 5-51-87

OPA DRAFT

APD personnel completes the form. A copy of the form will be packed with the evidence and sent to the outside agency, with instructions for completing the form. When the evidence is mailed, it will be sent by certified, return receipt requested, restricted mail. The purpose is to have the evidence delivered only to the person for whom it was intended and to have a record of the delivery for the case file.

- 4. If evidence is transferred in person, a Service Request Form or other equivalent form is filled out (for chain of custody), and accompanies the evidence for original signatures of the receiver and sender. The form is immediately returned to the SED and filed in the case file.
- 5. The shipping of firearms will follow Federal Rules and Regulations meaning that firearms may only be shipped to:
 - a. Law enforcement agencies
 - b. Persons possessing Federal Firearms Licenses (FFL). A copy of the FFL with an original signature must be obtained at the Crime Lab prior to shipping.
- H. Evidence and Quality Control
 - The MFSC frequently receives items of evidence from investigating officers and from Crime Scene Specialists. On occasion, the evidence <u>that may</u> appears to have been improperly packaged <u>will be</u>:
 - a. The evidence technician will Collected by the evidence technician from the evidence room of from the secondary site (substation) and bring it to the main Evidence Room.
 - b. A notice will be left for the primary officer to come to Evidence and correct the discrepancy.
 - c. Rejected evidence will not be left for correction at the collection site.
 - d.c. If the problem is not corrected within 20 days, or if recurrent problems with a particular officer's evidence packaging continues, his/her immediate supervisor will be contacted to resolve the matter An officer not responding after 20 days and the officer may be removed from the OIM and required to tag all evidence at the MFSC.
- I. Chain of Custody
 - 1. When SED personnel remove evidence from the Evidence Section, both the Detective or Scientist and Evidence personnel will appropriately document the transfer. Chain of custody documentation will be filed in the case file.

SOP 5-51-87

OPA DRAFT

- 2. When evidence is transferred from one examiner to another within the Crime Lab, the chain of custody portion of the Service Request Form or equivalent will be completed. A copy of the chain of custody form will be filed with both the receiving and transferring examiner's files. In the case of latent print verifications, the verifier does not need to keep a copy of the chain of custody documentation.
- 3. When evidence is received from an outside agency by mail, SED personnel will provide documentation on the chain of custody portion of the Service Request Form. The form will be retained in the case file.
- J. Biological Fluids and Hair Standards
 - 1. Body standards will be collected only if accompanied by one of the following authorizing documents: Court Order, Search Warrant, or Permission to Search. A copy of the document will be kept in the case file. An appointment should be made for the collection of the standards. Unless accompanied by a corrections officer or detective, the identity of the individual providing the standard should be verified (driver's license, date of birth, social security number, etc.). The person who collects the standard(s) will note on the authorizing document: case number, date and time the standard was collected, verification of identity (if needed) and who collected the standard.

A copy of the document will be kept in the case file.

- 4.2. The dried saliva standard will be packaged, sealed and tagged into the Evidence Section by the individual who collected them (unless transferring to the case working analyst). The resulting chain of custody will be filed in the case file.
- 2.3. Blood standards are generally not collected. If a Court Order or Search Warrant is received designating blood, the document, and subsequent collection should not be completed. The investigator or District Attorney should be contacted and a new Court Order or Search Warrant should be requested designating the collection of saliva standard in lieu of blood. In the alternative, the individual can be asked if they are willing to sign a Permission to Search form for the collection of a saliva standard instead.
- K. Sexual Assault Evidence Kits (SAEK)
 - SANE nurses collect and tag SAEKs into the FAC evidence collection lockers. the evidence for and transport. All SAEK directly to the Evidence Section.

OPA DRAFT

- 2. When evidence is examined in the laboratory by an examiner, (whether it is received from the Evidence Section or directly from a Detective) each individual item of evidence is marked with a unique identifier (i.e. barcode, barcode and item designator or case number and item designator), whenever practical. The individual item of evidence must also be identifiable to the examiner. This will be accomplished by the examiner placing his/her initials on the individual item of evidence. If the item of evidence does not lend itself to being marked, the container shall be marked with a unique identifier and initials.
- 3. Following the examination, the evidence is packaged and sealed with a tamper evident seal, with initials and date across the seal. The initials and date on seals from persons having prior access to the evidence should be maintained intact whenever possible. If it is not possible, the seal will be packaged with the evidence when the evidence is re-packaged. If additional evidence marking procedures are required by a discipline, those procedures can be found in the discipline's procedures manual(s).

1-87-6 Division Units

- A. Latent Fingerprint Analysis Group Human Identification Unit
 - 1. The Latent Fingerprint Analysis Group processes, examines and compares latent/patent and inked fingerprints.
 - a. Examination of incoming latent cases includes:
 - i. Pickup of latent cases and service requests
 - ii. Standards examination to determine the workability of a specific latent
 - iii. Preparation of a report of results
 - iv. Review and agreement of results, reports, and notes by another competent fingerprint examiner as outlined in the Latent Fingerprint Unit Procedures Manual.
 - v. Scheduled proficiency testing
 - vi. Courtroom testimony
 - b. Typical results
 - i. Workable and filed
 - ii. Not workable
 - iii. Eliminated
 - iv. Identified

2. Refer to the Latent Finger Print Unit Procedures Manual

2. Processing items of evidence

ALBUQUERQUE POLICE DEPART	MENT
INVESTIGATIVE BUREAUGENERAL	ORDERS

SOP 5-5<u>1-87</u>

OPA DRAFT

 The Latent Fingerprint <u>Unit Technician</u> processes items of evidence (which have been submitted by officers or representatives of outside agencies) for latent fingerprints.

4. Processing items of evidence includes:

- i. The examiner will take custody of the item to be processed from the Evidence Section, or from the individual requesting processing.
- ii. Processing is done with the appropriate powder or chemical, as defined by the situation.
- iii. Upon completion of the processing, items are returned to the Evidence Section.
- iv. Reports will be prepared to indicate the status of the case.
- v. Reports, results, and notes will be reviewed by another qualified fingerprint examiner as outlined in the Latent Fingerprint Analysis Group Procedures Manual.
- vi. Reports with the exception of violent crimes are entered into ICRIIS by the Unit Supervisor or designee and may be viewed by authorized APD personnel in the ICRIIS database.
- vii. Courtroom testimony.

b. Typical results

- i. Workable latents developed.
- ii. No workable latents developed.

5.4. <u>Comparisons</u> The Latent Fingerprint Analysis Group visually compares each workable latent(<u>s</u>) with each record print of a known subject.

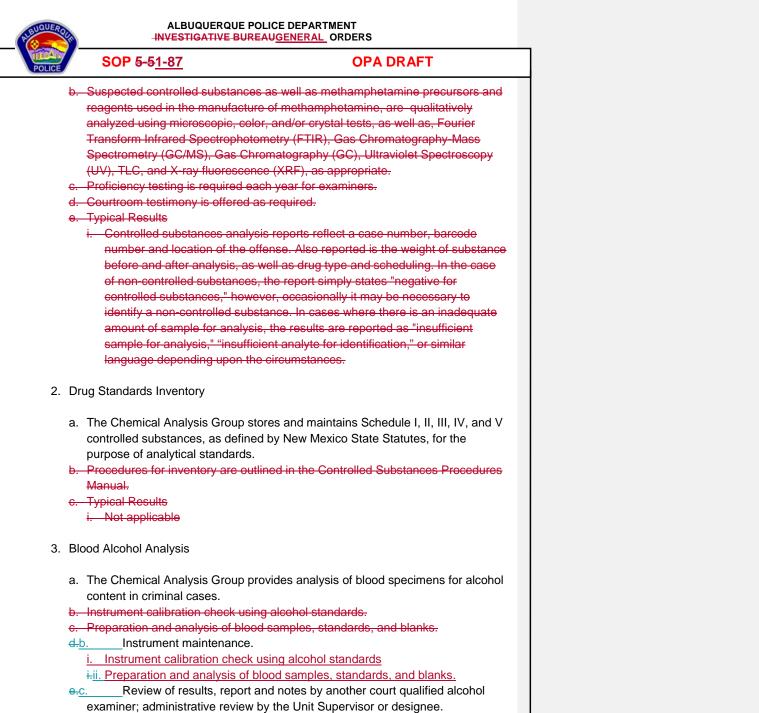

- a. When a request for fingerprint comparison has been received, the examiner will:
 - i. Obtain latents from SED files.
 - ii. Obtain inked fingerprints of the subject(s) from the Identification Section files. If not on file, a report will be prepared to advise the requestor of the case status.
 - iii. Compare latents and record prints using a standard fingerprint magnifier or comparator.
 - iv. Prepare a report indicating the status of the case.
 - v. Obtain review and agreement of notes, report, and results by another qualified examiner as outlined in the Latent Fingerprint Analysis Group Procedures Manual.
 - vi. Provide courtroom testimony if required.

ALBUQUERQUE POLICE DEPARTMENT INVESTIGATIVE BUREAUGENERAL ORDERS

OPA DRAFT

- g. Special materials processing and printing
- h. Typical Results
 - i. Results will vary depending upon service, procedure, or request.
- I. Digital Photography / Imaging Photography Detail
 - This policy is to establish guidelines and procedures for the capture, storage, processing, and transmission of digital images by Crime Scene Specialists (CSS) or any other MFSC personnel when using digital imaging technologies to document items of evidentiary value during the course of their duties. The important thing to remember is that a digital image used in a legal context is evidence and must be treated as such. The goal of any effective image-tracking procedure should be to eliminate the opportunity for unauthorized persons to access images, thus avoiding the argument that someone could have altered or substituted any image.
 - 2. Detectives or CSS assigned to the MFSC will utilize photo equipment issued to them by the Photography Detail. The issuance of a different camera and or any other digital imaging equipment and software by the Photography Detail denotes implied authorization for field use. No other digital camera shall be used without prior approval of the Photo Lab Supervisor or designee. Cameras issued to Field Service or Special Investigative officers will follow the same procedures as the detectives or CSS.
 - 3. Photo Evidence disposition will follow the same policy as case evidence to include disposition based on the accelerated policy.
 - 4. Image acquisition
 - a. Images will be captured via digital cameras authorized by the Photography Detail.
 - b. All images of evidentiary value will be captured using a JPEG or TIFF format.
 - c. Evidence requiring possible future analysis, i.e. fingerprints, blood spatter, or tire and shoe impressions, will be captured using a small TIFF image. The photographer will use discretion to determine if a TIFF image is required.
 - 5. Image Storage
 - Digital images recorded onto a temporary media will not be deleted or viewed (other than by the camera's built-in monitor) until all of the images have been transferred to a permanent media.
 - b. Images captured directly onto a CD-R will not need to be transferred to another type of media.

C. Location and Scheduling

SOP 5-51-87

- All Crime Laboratory personnel will conduct their interviews at the Crime Lab or via telephonic means after determining a time and date agreeable to all parties at a location determined by the DA's office. Contact information for all Crime Laboratory personnel can be obtained by contacting the Crime Lab's Administrative Assistant at (505) 823-4200.
- 2. All pre-trials will be scheduled to begin between the hours of 9AM-3PM with the pre-trial ending by close-of-business (4 PM).

D. Crime Laboratory Subpoena Policy

- 4.3. Crime Laboratory staff will schedule pretrial meetings upon request. These requests shall be mailed, hand-delivered, faxed, or emailed to the individual being served, or to the Crime Laboratory's Administrative Assistant. Individuals who choose to fax subpoenas should call to verify receipt at the Laboratory.
- 2.4. All served subpoenas will be responded to by Crime Laboratory personnel.
- **3.5.** Other than administrative personnel, Crime Lab employees will not accept subpoenas for individuals other than themselves.
- 4.6. Hand-delivered subpoenas are only accepted on site during business hours.
- 5.7. Once received, subpoenas will be printed, time stamped, and logged at the front administration desk of the Crime Laboratory.
