<th>1. SOP 2-18 Contact with Individuals With Disabilities</th>

**Discussion:** An overview of the draft policy was presented to the Office of Policy Analysis (OPA) for review. This policy was due for an annual review. It was decided that the SOP needed to be rewritten and the title of the SOP changed to better capture the scope of disabilities experienced by individuals who live in our community of whom may be encountered by Officers while working in the field. The policy was also rewritten so that the Department would be in greater compliance with the Americans With Disabilities Act (ADA). There was a discussion about how Officers could be more immediately informed about an individual’s disability, especially when the disability renders an individual incapable of speaking directly with the Officer. Solutions were suggested such as, placards carried in a disabled individual’s vehicle, a sticker present on the vehicle or license plate, a symbol placed on a driver’s license, or information given to the Officer by the Motor Vehicle Department (MVD) – since this is the initial point of contact made when a vehicle is stopped. Currently, specialized training is being developed for Officers to better equip them with the skills needed when they encounter an individual with a disability.
