The bill R-25-122 means that AFR will not be able to get a paramedic on every call in these districts, or it will take longer. This seems like a bad idea. Why are you co-sponsoring this bill?

Good afternoon,

Attached is the Letter of Introduction with all the writeup assignments notated in red under each bill. The bill number within the pdf is a live link that will take you directly to the item in Legistar. I've also included the Legistar link below so you can find your assigned bills that way.

If your bill is for holdover to the March 17th Council meeting, your write up's are due to your supervisor for review by March 11th, and due to me on March 12th.

Bills referred to FGO will be heard at the FGO meeting on April 14th. Your writeups are due to your supervisor for review by April 8th, and to Jessica on April 9th.

Bills referred to LUPZ will be heard at the LUPZ meeting on March 12th. Your writeups are due to your supervisor for review by March 4th and due to Ernesto by March 5th.

Legistar link: https://cabq.legistar.com/Legislation.aspx

Thanks!

Council EMS Changes Memo 2.25.25.pdf; Outlook-AFR Maltes.png;

Good morning City Councilors,

AFR has been working on some very exciting operational changes that we will be implementing in the coming month. I have included a memo with the background and explanation of how these changes are going to improve our service delivery across Albuquerque using existing resources. This is something that I started working on as a Deputy Chief and thus there are years of research and effort that have been put into these changes that are outlined in this memo. Please reach out to me if you have any questions or need more information.

Counselor Bassan,

Are you aware of what the AFR Fire Chief is implementing to R15 and R20 in our district. They are splitting the rescue from to 2 Paramedics to one on the Rescue! R15 is one of the busiest rescues in the city, there is no benefit to splitting the rescue, they state that a medic will respond to every call but what is a Medic going to do on a Suppression truck! I challenge you to talk to the members at Station 15 and 20.

Thanks for your time and look forward to your response! =

AFR Staffing Model Change R-25-122
Enter Your Message Here
Dear City Councilors,

As a fire wife I felt compelled to write you along with my fellow peers in hopes of you voting yes to resolution R-25-122. I am also a Registered Nurse with very diverse background in Pediatric nursing. Specifically, in Pediatric Emergency. Being married to a firefighter is challenging, humbling, and sometimes terrifying. Along with many other families in this dept. we are standing united to advocate for them and quite honestly our community as our civic duty. AFR currently operates their rescues staffed with two licensed paramedics. This means these individuals carry the highest level of Emergency training. These individuals are truly the individuals who hold the line between the community and the Emergency Room. They are the most essential link of EMS care for our community. AFR administration seeks to change this strictly based on an idea that sounds efficient but will prove to be detrimental in the long run. They seek to make all rescues staffed by one

Paramedic and one EMT-Basic. The equivalent to this in the Emergency Room is an Attending Physician and a 1st year Resident. The difference as you can see being without all the other positions in the room to come to their aide. Even the most experienced Paramedic will be faced with incredibly difficult decisions to make solely because they lack equal support. This is especially true in the stations along Central who have high acuity calls day in and day out. There are plenty of stories you can reference yourself of how having two paramedics has saved lives in some of the worst situations. This change would also affect the Engines as well. These four positions are imperative to hold with fire response and containment times. Switching roles for the sake of the EMS needs is not efficient. It leaves a detrimental risk for those in the field responsible for the fire side if you will of things. These men and women dedicate themselves every single day to helping this community. They deserve a voice in this. They sacrifice so much of themselves for a job they so deeply love. A national Flordia State University study of more than 1,000 firefighters found nearly 505 had suicidal thoughts at some point during their career, and about 16% reported one or more attempts. Of EMTs and paramedics in the U.S found that 37% had contemplated suicide and a 6.6% had attempted it. These numbers speak for themselves. They deserve better and a change like this will only contribute to this. So please, I humbly ask that you vote YES to resolution R-25-122. Thank you so much for your time and consideration.

AFR Staffing Resolution
Enter Your Message Here
Councilors,

I have been made aware of a Resolution being considered that will specify two paramedics on AFR Rescue units. I DO NOT support this resolution.

R-16-41, establishing minimum staffing for AFR has been in place for almost 9 years. It contains the language of two rank specific firefighters on rescues. I was an active member of the Union Board at the time and remember that the only reason it passed was because a floor substitute was approved removing the two paramedic language. The Fire Chief at the time did not support the two medic language. The Fire Chief also met with each City Councilor prior to the resolution being voted on and the CAO was involved to ensure the legality of such a resolution.

That language was removed knowing that the two medic rescue model wasn't sustainable then and it is not sustainable

now. R-16-41 paved the way for the ALS expansion the Fire Chief is currently implementing. This model has also been in service at Stations 2 and 3 for years. Other pilot models have been implemented and based on results have been altered. All of these changes are data driven and intended to increase ALS service delivery and improve fire response.

In my humble opinion, as an 18 year member of this department and member of Local 244 in good standing, this is a last ditch effort of the union to undermine the Fire Chief and stop the progress being made that aligns with the language in the recently ratified, three year Union contract.

The Fire Chief has made herself very available and accessible to council. She is the subject matter expert on this and has the support of the AFR medical director. All parties would benefit from having an informed dialogue on matters related to emergency response and public safety staffing.

Council has likely heard from a very vocal monitory of the department but the current expansion has the potential to benefit far more residents and department members than it harms. I urge you to vote no on this resolution.

I am always available for question or comment about this resolution or issues regarding AFR. I plan to be at the Council Meeting in my union shirt to oppose this resolution.

Thanks,

Jason Fejer

To: Grout, Renee
Subject: AFR Staffing Resolution
Importance: Normal
Sensitivity: None

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

Ms. Grout,
Thank you for all your hard work with our community and the city as a whole. I am employed as a chief officer for a metro area fire department but am writing today as a concerned resident of council district 9.. I have spent over 20 years working in fire and EMS in the ABQ metro area and am very familiar with past and present EMS operations here. I am writing today in response to an Albuquerque Journal article I read today regarding a resolution that would require AFR to staff two paramedics on every rescue/ambulance.

During my career I was always perplexed why AFR staffed two paramedics on every rescue. The benefit in doing so provides a mentor for new paramedics to work next to. However, staffing two rescue paramedics is wasteful and mentors may easily be served by paramedics working at the same station even though not on the same truck. Additionally, paramedics in the Albuquerque system do not get routine opportunities for advanced skill performance as high acuity scenes are flooded with as many as 5 paramedics when scenes could be effectively managed by one or two paramedics. This leads to a degradation in their ability to perform these perishable skills. Paramedics in all other systems in the metro area are staffed one per unit, two being unique to AFR. I firmly believe splitting the paramedics to provide ALS coverage on engines and rescues will enhance the fire department's ability to effectively respond and care for the residents of Albuquerque. Personally, I felt relieved when I read about the fire department's plans to split the paramedics. I live within the primary response area for station 12 and my elderly parents also live within station 12s running area. Rescues commonly transport patients to the hospitals when Albuquerque Ambulance is not available. Knowing a paramedic is available to respond to my family from our closest station, regardless of transports the rescue may be on, is reassuring. Otherwise ALS response would be delayed, while a rescue is dispatched from stations 5, 8 or 9, much further away.

I am concerned the IAFF union felt it necessary to take the issue to council rather than work with their administration on their concerns, as described in the newspaper article. I am also concerned that city councillors felt it necessary to run around fire department administration and not discuss the matter with the chief before drafting the resolution. I share the chief's concerns that the day to day operations of the fire department should be performed by the department, allowing the council to focus on higher level problems of the city, especially with the continuing problems with crime.

I respectfully urge you to vote against the upcoming resolution to require AFR to staff two paramedics on rescues. Thank you for your time reading my concerns and if you should have any questions I can answer, please don't hesitate to ask.

Thank you,

John Grassham

Dear Mr. Sanchez,

My name is Carole Miles and my husband George and I have been residents of Santa Fe Village for 32 years.
We do not want to lose any level of care with our emergency services. Unfortunately, I have in the past had to use ambulance 911 services, and I was confident that I was taken care of until I got hospital treatment. My hope is for anyone who has to call 911 for an ambulance will know that they will receive the best care possible until they get to a hospital. Please vote to keep our services as they are , with no staffing cuts. We need to know our emergency care can meet our needs if we have to call for help.Thank you for your representation.

Respectfully,
Carole Miles

Dear City Councilors,
As a fire wife, I hear a lot of "behind the scenes" that many people in our city don't think about such as how the fire department operates. Currently, AFR operates with 2 paramedic levels on the rescues. This is the gold standard for EMS throughout the country preferred more to any other model. AFR administration would like to switch to 1 paramedic and 1 basic emt on the rescues. The plan is intended to spread out the paramedics and was proposed after upper administration began to fear the retirement of paramedics in upcoming years— and there's not enough paramedics in the department. The split does not add or take away from the amount of paramedics the department has, it just moves one paramedic to another seat on a different truck. The sale is "a paramedic is on every apparatus" or "improved response times" but from those in the field, not at a desk, it isn't a benefit for the department or the community. A paramedic doesn't need to run a 2 am call for "my fridge light bulb isn't working" —true story. And a basic emt is not as much help to a paramedic in need

of someone with equal training to bounce ideas during an intense call or a medical anomaly or mentor a new paramedic in the field. Imagine the pressure to brand new paramedics— not only could it be their first day as a paramedic, but they're left to their own limited scope of training if things get crazy instead of having another experienced paramedic to mentor them through it. With the current system, 911 calls are triaged for the reason of the call so that the appropriate level of care is dispatched. AFR is one of few departments to have sworn uniformed members dispatching calls. The department has already improved response times, arrival times, and time on-scene standards and continues to do so. The system in place is gold standard for a reason. Firefighters on the ground, doing the work, helping the community, don't want the change. AFR administration has had the opportunity to discuss concerns and different approaches with the body of personnel and they continue to ignore the body's concerns to push their own agenda. For these reasons, I ask that you please vote yes to pass resolution R-25-122. Thank you.

Hello Albuquerque,

Cold, wet weather arrived in the Duke City, and our team is ready to help people stay safe as the temperatures drop. When power outages lingered last week after the winter storm, we were out with Albuquerque first responders, knocking on doors to do welfare checks and offering folks rides to warming centers if they needed a place to go.

We've revitalized our Winter Sheltering Plan and created a new **Shelter Connect Dashboard** to connect people experiencing homelessness to a warm bed out of the elements. These are both part of our **Metro Homelessness Initiative (MHI)**, an all-in approach to help get folks off the street and on to a better path.

It's been an eventful fall, with meaningful developments across the city. We've enhanced safety on our buses, and increased our APD and ACS presence Downtown. We've created housing opportunities for veterans in need and converted a hotel into affordable housing. We continue improvements on the Westside, making roads safer and bringing folks together.

Earlier this week, we honored the brave men and women who served this country with our annual Veterans Day parade and ceremony. We've announced our next set of **Constructive Conversations** with the community, and broke ground on a new fire station that will soon be serving our residents along Route 66.

As we look forward to the opportunities the next season will bring, I appreciate you all as

partners in shaping the future of our city.

Sincerely,
Mayor Tim Keller

City Enhances Transit Safety, Adding APD and ACS Resources Downtown

The City of Albuquerque is taking a holistic approach to transit safety. The bus should be safe and easy for everyone. Efforts to reduce criminal behavior include enforcing updated Rules to Ride, ramping up security, having PSAs on city buses in areas with higher incident concentrations, using real-time public reporting technology, and creating a permanent base for APD Transit Safety Officers and Albuquerque Community Safety (ACS) at the Alvarado Transportation Center (ATC).

The ATC is an ideal location to house a dedicated team of ACS supervisors and responders professionally trained to connect individuals experiencing mental health issues, homelessness and addiction to resources.

Building More Housing for ABQ

We're tackling the housing crisis from all angles in Albuquerque, from modernizing zoning, to converting underutilized properties to housing, to supporting new affordable housing projects.

Project updates include:

- **New Mexico Veterans Integration Center**

The City has been a key supporter of the New Mexico Veterans Integration Center (NMVIC) Transitional Living Facility. The "VIC" is a space for veterans that provides rapid rehousing, therapy, and life skills training in addition to emergency and transitional housing. In 2023, the City provided more than $1 million to purchase the land for the VIC. The 20,000-square-foot facility opened in August of this year. It has 42 units for veterans and has provided transitional housing services to 38 individuals to date.

- **Los Altos Lofts**

Los Altos Lofts is a former hotel that was converted to permanent housing this year. All 90 units are complete and can be leased through Monarch Properties by calling **505-548-6054.**

Connecting Folks to Shelter this Winter

Cold weather puts unsheltered individuals at risk of cold-related injuries. To help get people inside and safe, Albuquerque Community Safety (ACS) will again operate its emergency, after-hours

IPRA Response 000407

transportation service. Between **8pm and 7am**, the public can call **(505) 418-6178** to request transportation to shelter. The first Responder Receiving Area at the Gateway Center is open and has already served 234 people, getting warm and on the path to stability.

As part of the **Metro Homelessness Initiative (MHI)**, the City created a new **Shelter Connect Dashboard** to help connect people experiencing homelessness to shelter. The dashboard shows first responders where shelter beds are available throughout the city. The City will provide a warm bed to anyone experiencing homelessness.

Learn more about how we're ready to help folks during winter weather.

Veterans Day Ceremony in Albuquerque

Constructive Conversations: Focus on Housing and Homelessness

Mayor Tim Keller invites you to join the second installment of Constructive Conversations, a series of community meetings to foster dialogue between residents and city leaders. This session will spotlight the **Metro Homelessness Initiative (MHI)**, an all-in approach to get folks connected to resources and shelter. Join our discussion as we work together to create a better Albuquerque for all. Let's share

IPRA Response 000408

discussion as we work together to create a better Albuquerque for all. Let's shape our city's future, one conversation at a time.

There are three meeting session options available:

- Register for the session on Tuesday, December 3, from 6–8 p.m. at **Bear Canyon Community Center**.
- Register for the session on Saturday, December 7, from 1–3 p.m. at the **Albuquerque Convention Center**.
- Register for the session on Thursday, December 12, from 6–8 p.m. at **Westgate Community Center**.

For more information, visit **cabq.gov/connectabq**.

The City is asking for donations of winter clothing — hats, gloves, coats, blankets and scarves — to help our neighbors in need. Consider bringing a donation when you attend the event.

New Route 66 Fire Station Coming to Albuquerque's Southeast

Albuquerque Fire Rescue is expanding resources in the far southeastern corner of the city with the construction of a new Fire Station 12 near Central and Juan Tabo—situated on historic Route 66 and serving as one of the busiest stations in the nation.

Once completed, this new station will introduce Albuquerque's first-ever baby box, a safe and climate-controlled option for young parents in crisis to bring their newborns to firefighters for care. Replacing the original 1960s building nearby, the upgraded station will also feature a three-bay design, enhancing emergency response capabilities for the community.

“With today’s groundbreaking ceremony, we lay the foundation to rebuild Fire Station 12, we was originally constructed in 1960,” **said Fire Chief Emily Jaramillo**. “This is one of Albuquerque’s busiest areas and the new station will serve as a crucial lifeline, ensuring quality service and protection for our community.”

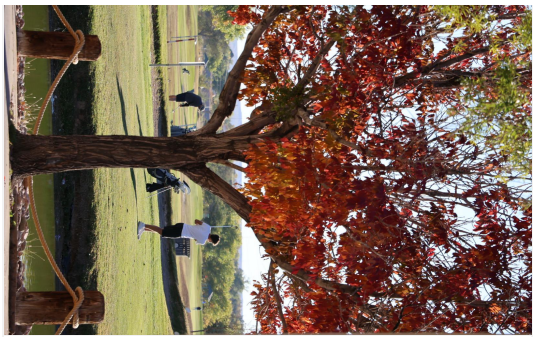

Westside Connections

The City of Albuquerque continues to make investments on the Westside. Improvements include repairing and building roads, landscaping medians, adding new streetlights and automated

speed enforcement cameras. Last week

IPRA Response 000410

speed enforcement cameras. Last week, construction began for a median landscaping project on Coors Bypass from 7 Bar to Ellison, which will be seen by 100,000 cars daily on their commute. The project is continuation of the median project from Ellison to Westside Blvd and will help welcome visitors to the future Northwest Multigenerational Center.

The City also opened a new cantina at Ladera Golf Course, enhancing the Westside's premier 27-hole facility. The 1,000-square-foot remodel features a cantina space that connects to an outdoor patio and banquet room, providing more room for golfers and events.

"Creating an area that's not only friendly, but safe and beautiful helps all of us in business welcome people to the Westside," said **Melissa Sanchez, President and CEO of the Westside Business Association**

What's good about Albuquerque?

Our **nationally awarded** BioParks, where you can explore exciting new exhibits and attractions. And over **30,000** acres of open space, just waiting for your next adventure.

Now, you can be part of **what's good**! The City of Albuquerque is looking for talented people to join our team.

Join us and **experience Albuquerque** from the inside.

It's not everyday I receive a message from the fire department urging contact of the city council because of a bill they say will not allow paramedics on calls. My father was a firefighter and growing up the vast majority of calls he went on were medical needs, not fires and often the first responder on the scene. To not have paramedics on calls seems like a disaster and feels like it will threaten saving lives. I don't know where you stand on this and if for it can you please explain to me why and how this is a good thing, maybe I am misunderstanding but as it sounds I would urge you not to support this change.

I'm assuming the proposed bill to roll back the presence of paramedics and EMTs on Fire Trucks is a budget issue, and if it is, allow me to say as one of your constituents, that it's worth the expense.

Faster assistance, *better* assistance, to a family that has just lost their home, who may be injured and is most certainly in shock, is more important than just about anything else that money could be spent on.

Take some from the police budget if you need to. While there is an eternal debate about whether cops stop crime or have a duty to protect and serve (legally, they do not), fire fighters fight fires and EMTs and paramedics save lives.

Your duty as a city Councillor is put the effort into ensuring that your constituents are provided for. Not letting their houses burn down is a good start and have medical professionals on hand as fast as possible is an extremely important next step.

Cheers,
Aki Grisham

Dear Councilman Baca,

I respectfully request that you oppose Bill R-25-122. We need a sufficient level of staffing for paramedics to adequately respond to the needs of our community. This bill seems to have been drafted without consultation with experienced first responders. If they are concerned that paramedics will not be on every call, or that there will be longer response times, we all should be concerned. Please vote against R-25-122.

Sincerely,

Joni Pierce

Please vote AGAINST bill R-25-122 so Albuquerque Fire Rescue can provide the best services to our community. I am a member of the Los Griegos Neighborhood, an historic neighborhood with many families with elderly members. Your constituents deserve the best care possible & this bill goes against that. Please consider the needs of your people over the budget.
Thank you,
Debra Baxter

Change in EMTs on emergency calls
Enter Your Message Here
Ms. Hassan,
I do not support the City Council's proposed change to how ambulances and fire trucks are staffed with regard to paramedics. As one of your retired constituents, if I had a serious emergency, called 911, and an EMT-basic showed up, I'm pretty sure I'd be toast. Would you want the same for your family? Furthermore, this proposed change seems to have been dreamed up with absolutely no input from the people who actually respond to emergency calls; why was that? That is certainly not an example of transparency.

I assume this was someone's idea of a way to save money, but I believe emergency response is not the place to do that and urge you to vote against this change.
Thank you,
Mike Goodrich

Dear Councillor Baca,
I am a constituent of yours living in the North Valley for over 45 years. It is important that you support R-25-122 at tonight's Council meeting. This bill supports the Firefighters and Paramedics which is vital to our community. This bill is supported by the firefighters union. Thank you for being responsive and responsible for our community.
Respectfully, S. Salvi=

TWENTY-SIXTH COUNCIL - TWENTY-SEVENTH MEETING

Public Comment Sign Up for March 3, 2025 City Council Meeting

To provide public comments to the Council, in person or virtually, everyone must sign up by 4:00 pm on the day of the meeting by completing this web form: https://www.cabq.gov/mar-3-2025-comment. For members of the public without internet service, you may call our office at 505-768-3100 for assistance.

The Council will take General Public Comment on any topic and on the meeting's specific agenda items, from up to a maximum of 30 people, on a first-come first-serve basis. Per Council rules, persons signing up to speak before the Council can sign up for General Public Comment and up to two agenda items per meeting. If speaking on a specific agenda item, comments must be germane to the item. Participants will have a maximum of 2 minutes to present, but the time limit can be lowered, per discretion of the Council President.

General Public Comment is near the beginning of the meeting. If you sign up to speak on a specific agenda item, your name will be called when that item is heard.

City Council Vote RE EMT Staffing
Enter Your Message Here
Please vote against a rollback of the fire department's excellent EMT staffing approach. As a long time resident of Los Duranes (24 years +), living on a street that shares city and county boundaries, I have struggled with calls to APD because we are identified as being in the county when we are not. This confusion has resulted in delayed responses to domestic violence concerns across the street but affecting my home and the well-being of the woman being violated and to a stolen car. Please don't let something happen regarding emergency medical treatment associated with a fire or other similar emergency. Convince other Councilors to vote no! Thank you!

Hi,

I live in your city council district and I'm asking that you support the fire department having two paramedics on every rescue call. Please support this measure for safety in our community.

Thank you,

Jas Goldbarg

Construction of Fire Station 12 Kicks into Gear on Route 66

New, modern station will replace firehouse built in 1960

ALBUQUERQUE – On October 22, 2024, Mayor Tim Keller, Fire Chief Emily Jaramillo, City Councilor Renee Grout, State Representative Debra Sarinana, State Senator Mimi Stewart, and community members gathered to celebrate the construction of Fire Station 12 with a site clearing ceremony. The $12 million, three-bay station, will replace the current two-bay station built in 1960. The old station sits just north of the new site. Funding was secured from multiple sources including GO Bonds, Gross Receipt taxes and State Capital Outlay.

Fire Station 12 is consistently one of AFR's busiest houses. Station 12 has a response area of 8.1 square miles which includes Interstate 40, the commercial occupancies of the East Central Corridor, and many neighborhoods including Four Hills, Buena Ventura and South Juan Tabo. It is home to Engine 12, AFR's 2nd busiest engine company, and Rescue 12, AFR's busiest rescue company. In 2023, Station 12 answered almost 9,000 calls for service.

AFR continues to modernize old stations and build new ones to serve the growing city. The brand-new Station 23 currently being built to take calls in southwest Albuquerque, the fastest growing part of town. In addition to Station 12, the Station 4 groundbreaking is expected to take place in December.

“Securing a suitable site to modernize Station 12 was a tough climb, but the need was clear so giving up on it was never an option,” **said Mayor Tim Keller. “**A renewed AFR presence here will bring new life to East Central as we continue building a safer, better future for our families.”

“With today’s groundbreaking ceremony, we lay the foundation to rebuild Fire Station 12, we was originally constructed in 1960,” **said Fire Chief Emily Jaramillo.** “This is one of Albuquerque’s busiest areas and the new station will serve as a crucial lifeline, ensuring quality service and protection for our community.”

“Fire Station 12, one of the busiest stations in Albuquerque, is long overdue for an expansion and

upgrade," **said Senator Mimi Stewart**. "This year I was proud to contribute capital funds to keep this project on track. We can all look forward to a state-of-the-art station that offers greater capacity and opportunity for more services to better serve our community".

"This new building for Station 12 is important for public safety," **said City Councilor Renee Grout, District 9.** "It's also an important piece of a larger redevelopment effort for this stretch of Central Avenue near Juan Tabo. I am looking forward to seeing this beautiful new fire station, along with the additional development that is sure to follow."

"House District 21 covers the historic and challenging east Central corridor," **said Representative Debra Sarinana**. "Supporting the rebuilding of Station 12 to improve public safety and promote the redevelopment of this area is something I am proud to be a part of."

Albuquerque Fire Rescue continues to be one of the busiest and most active departments in the nation. Established in June of 1900, it now has 22 fire stations, 760 full-time firefighters and 39 civilian personnel. In addition to fire suppression, AFR provides emergency medical services, emergency dispatch services, fire prevention, arson investigation, special operations response, community paramedicine, and public education.

CIP Requests

APD Bob Cat $53,608.45

AFR Special Ops

AFR SAR/HTR Collateral

Mission: To support CABQ Open space operations and demands that relate to rescue and EMS in austere environments that the CABQ and immediate areas present. We would like to start a minimum of 2 year pilot program to support a new process of participating in rescues with on-duty resources and call-in option as Fire chief approves. These individuals will have requirements to maintain status within the collateral program. They will supplement on duty resources when needed

$64,896 for Clothing and Gear to outfit all the team

AFR Spec Ops collateral model

13 members are out fitted and trained and compensated for response. Mirroring APD response.

4 seasons capable for response and IMAS.

Increase in REM capability

Shift commanders can Deploy as needed with on duty resources to support operations.

- What are the realistic initial investment costs of this?
  - $64,896 for Clothing and Gear to outfit all the team
    - More than half of this is reusable for future members
    - This is Retail cost and is expected to be an over estimate
- What are the realistic initial investment costs of this?
  - $64,896 for Clothing and Gear to outfit all the team
    - More then half of this is reusable for future members
    - This is Retail cost and is expected to be an over estimate

AFR Rehab Facility $500k for study

Bands of Enchantment $400k - Visit Abq committed to $100k

Eisenhower Splash Pad –$500k, also asking State Capital

Bear Canyon Workout Facility - $500k

AFR SAR/HTR Collateral

Mission: To support CABQ Open space operations and demands that relate to rescue and EMS in austere environments that the CABQ and immediate areas present. We would like to start a minimum of 2 year pilot program to support a new process of participating in rescues with on-duty resources and call-in option as Fire chief approves. These individuals will have requirements to maintain status within the collateral program. They will supplement on duty resources when needed

Program Objectives

- ✓ 4 season response
- ✓ Support of Dive Operations
- ✓ Support of River Search and Rescue operations
- ✓ Support of other HTR events
- ✓ All weather response
- ✓ Support REM and HTR programs
- ✓ Safety
- ✓ Physical fitness expectation
- ✓ Joint operations with APD Open space
- ✓ Joint operations with valley partners
- ✓ Technical Rescue
- ✓ Rapid Medical stabilization
- ✓ Rapid technical access
- ✓ Integration with local SAR at NMDPS to provide support and receive support
- ✓ Sustainability
- ✓ Provide AFR level of Rescue and EMS service to all locations and to all citizens

Other organization reports for average years:

- APDOS reports 60 callouts a year (handled by just a few units)
- 20 of those are prolonged callouts per year (joint operations)
- Mountain Rescue reports 41 local Callouts a year
- AFR estimates around 30 Wilderness rescues a year
- BCFD estimates 70 callouts a year
- NMSP Estimates 80 Rescues in the Rio Grande valley, their busiest area. Total in the state 300.

Estimate that this program will support approximately 25 prolonged callouts within CABQ and the surrounding area.

It is the recommendation of HTR Program to move forward.

AFR Spec Ops collateral model

13 members are out fitted and trained and compensated for response. Mirroring APD response.

4 seasons capable for response and IMAS.

Increase in REM capability

Shift commanders can Deploy as needed with on duty resources to support operations.

IPRA Response 000463

For 12-member team	
Comp/Overtime	384 CTA hours for training for each year Additional OT/CTA if utilized as a call in
Initial Investment	$4992 for each member, Compete outfit clothing and gear; $64,896 for initial Gear is reusable when members change
Recurring costs	$1700 for new member clothing $1500/year for consumables $EMS supplies as needed
Level of Service	EMS and Rescue services provided 24/7 and mutual aid request able to be honored. Working along side partner agencies for when we need to call on them.

Questions to clarify for moving forward:

- Will there be comp time given for on-call status of 2-4 individuals?
    - No expectation of on-call status during pilot program. If program shows the need and want for this feature will revisit in the future with C-Suite
- Gear issuing
    - Would be tracked
    - More then half the cost per person is reusable for future participants
- Who gets to be on the collateral program?
    - Members must apply to join and meet criteria laid out in the SOG that would be written, reviewed and approved.
    - Physical fitness assessment. If members do not pass at first go they will have up to 6 months to train and complete before being removed from the team
    - Expected to be Rescue operations level or higher and to achieve their Rescue technician level while in the program
    - Quarterly training requirements
    - It also comes with a 2 year participation expectation.
- Will they receive comp time or over time
    - Yes when called out in a off-duty manner pending Chief or Chiefs designee
- Will they be called out on everything?
    - No, will intend on utilizing these members that are on duty first.
    - If the event is a Mutual aid, or large incident they may be called in pending chief approval per event.
- Who will call them out?
    - We can establish the criteria for automatic call out within the Rio Grande metro river valley by Shift commander, spec ops, HTR1. Wilderness rescue event that cannot be handled by on duty resources or inclement weather.
    - Additional criteria for callouts per shift or DCOps. Such as for out of valley, state/federal requests.
- Equipment demands
    - Members will be issued a determined clothing layout that supports year around all-weather response that is not intended for station use, just event callouts and trainings
    - Members will be issued basic PPE for responding to incidents that will allow them be an safe and effective team member
    - Additional specialty equipment or high value equipment will be stored at station 8 where they can access it when needed
- Will this support and work with Open space?
    - Yes, we will share our training opportunities and disciplines

IPRA Response 000464

    - APD will be LE
    - AFR will be medical
    - We both will do rescue
    - We need a LE component to deploy on some National Disasters via IMAC/EMAC requests
- What are the realistic initial investment costs of this?
    - $64,896 for Clothing and Gear to outfit all the team
        - More then half of this is reusable for future members
        - This is Retail cost and is expected to be an over estimate
    - CTA for training: 384 hours/year. Based on 12 members attending 4 trainings/year at 8 hours each
- How will this affect AFR operations
    - Rare shift relief issues
    - Medium Initial investment costs, with low reoccurring costs
    - Program Admin
    - Support responses
    - Increased training
    - Partner relationships
    - Reduce stress on primary responses
    - Test for collateral program needs and alternate response model
- Will this support other AFR divisions?
    - It can if wanted to, for example all members are red carded and can support the REM or Wildland program needs
    - Other callout requests per Shift/Ops requests for those “who knows what to do needs”
    - Large River Searches that span days
    - Other what ifs
- Funding opportunities
    - City council Approach
    - Fire fund grant with State
    - Direct 110 Operations funding

Hello Tanya,

Cynthia Serna with the Metropolitan Parks and Recreation Advisory Board noticed that I am not listed on the agenda tonight. Will my appointment be at a later date?

Thank you,
--

TWENTY-SIXTH COUNCIL - TWENTY-SEVENTH MEETING

Public Comment Sign Up for March 3, 2025 City Council Meeting

To provide public comments to the Council, in person or virtually, everyone must sign up by 4:00 pm on the day of the meeting by completing this web form: https://www.cabq.gov/mar-3-2025-comment. For members of the public without internet service, you may call our office at 505-768-3100 for assistance.

The Council will take General Public Comment on any topic and on the meeting's specific agenda items, from up to a maximum of 30 people, on a first-come first-serve basis. Per Council rules, persons signing up to speak before the Council can sign up for General Public Comment and up to two agenda items per meeting. If speaking on a specific agenda item, comments must be germane to the item. Participants will have a maximum of 2 minutes to present, but the time limit can be lowered, per discretion of the Council President.

General Public Comment is near the beginning of the meeting. If you sign up to speak on a specific agenda item, your name will be called when that item is heard.

Hi, I've received notice that the City Council is putting forward a bill to cut the staffing of trained medical personnel on ambulances and fire engines. I trust these staff members to know what's best for the city and I hope you'll listen to them too. They actually know what they're talking about, and what they need to provide lifesaving services to the rest of us. Please support them.

Thanks. All the best,

Karen Umland

Subject: Fire Chief Jaramillo unable to enforce written policy
Importance: Normal
Sensitivity: None
Attachments:
Uniform and Appearance Policy 10.01.2024 (1).pdf

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

Hello Mr. Lewis and Mr. Baca,

I am am former Driver/Engineer with AFR and retired in 2020 8 years into my career because of a spinal injury I sustained as a result of developing a rare-autoimmune disease known as NMO/Devic's Disease. I am writing because I am greatly concerned about Chief Jaramillo's lack of ability to enforce written policy.

According to page 16 of the current uniform and appearance policy tattoos above the shoulder line cannot be displayed while on duty. I know this so well because this tattoo was written immediately after I got a tattoo on my neck while working for AFR. I cannot prove it was written as a direct response to my tattoo, but being that AFR members, such as Casey Duree and Ron Benavidez, already were displaying tattoos on the neck and head prior to me receiving a tattoo on my neck and no such policy was in place, I believe it was written to prevent me from displaying my tattoo. In accordance with the policy I covered my tattoo with a navy-blue sleeve around my neck while on duty and in uniform.

Recently I became aware of several firefighters violating said policy, one of them being Casey Duree who is currently an instructor at the academy. I am not sure if you are aware but the difference between policies and guidelines is great. Guidelines are general rules that allow flexibility while written-policies are to be followed as written. I called 311 and reported this and after waiting over a month for a call back I finally was able to speak to HR Chief Sotelo as well as Chief Jimmy Mellick. They informed that they had been unaware of said policy despite signing off on Target Solutions (a computer system utilized by the fire department to track training) that they had read the policy and were aware of it in full. Mellick then complained that it would be difficult for the tattooed firefighters to which I explained I was fully aware as it was difficult for me to follow it, yet I was able to. I reminded them that policies are not-hierarchical and are supposed to be treated equally to which they agreed yet said Chief Jaramillo has decided not to enforce it despite the fact it has not yet gone to committee to be re-written.

While it may seem like a minor issue based around a non-important policy the precedent it sets scares me. I am in a unique position as a disabled civilian who relies on AFR for my safety yet was a former member of AFR myself which allows me more insight into their inner-workings. Having Chief Jaramillo set the precedent that she can arbitrarily decide what policies she enforces without going to committee is a community safety issue as she could next decide not to enforce policies designed to keep the community safe, specifically something like having two paramedics on a rescue. I myself sympathize with the firefighters who will be affected by enforcement of this policy as I was one of them, but as a community member I also recognize the dangerous path the Chief is leading AFR down by selectively enforcing written-policies and think if she continues to go down this route it could lead to a potentially dangerous situation for both firefighters and civilians. A secondary concern I have is that the

Chief may not command enough respect or authority to have this policy enforced. It is no secret New Mexico public services have a "machismo" attitude and it makes me wonder if it is because the Chief is female that the rank and file does not respect her enough to listen to her when she must enforce AFR's policies. Not only does it look bad because our firefighter's don't respect a female chief, it could also present a life-safety issue if they are not following policies because the Chief is unable to earn their respect.

Thank you for your time, please reach out to me with any questions or concerns. Attached is the uniform policy, page 16 contains the section the Chief is claiming she can choose to ignore simply because it would be hard to enforce.

-Matthew Ezzard

ALBUQUERQUE FIRE RESCUE
ADMINISTRATIVE POLICY

Uniform and Appearance Policy

Date Implemented:	Date Revised:
07/12/2017	10/01/2024

PURPOSE

All personnel must present themselves in such a way as to generate trust, confidence, and respect from the public and the citizens of Albuquerque. It is not the goal of this policy to regulate or dictate matters of personal style and taste, except to the degree that individual appearance decisions would lessen public confidence in the organization. Personal appearance must be commensurate with the high standards traditionally associated with the fire service.

SCOPE

This policy shall apply to all Albuquerque Fire Rescue (AFR) members while on duty, performing assigned job functions, or appearing in public as department representatives. The Policy shall cover all aspects of the AFR uniform and appearance standards and officer/member responsibilities in maintaining the professional appearance of a uniform service.

I. GENERAL RULES

Members shall always keep themselves properly uniformed while on duty. Any item not issued or approved by AFR shall not be worn as or with the uniform.

1. During roll call, members shall be in the prescribed Class B or C Uniform.
2. When appearing in public, a member's uniform shall be neatly pressed and clean, buttons and badges polished, shoes polished, and shirts tucked in.
3. Any Chief Officer, or those acting in their absence, has the authority to condemn any part of the uniform that is unfit for service. Any uniform condemned will be replaced according to the current collective bargaining agreement, if applicable.
4. It shall be the member's responsibility to dispose of all condemned uniforms; uniforms shall be disposed of in a fashion that prevents further use. A member or non-fire department member shall not wear, on or off duty, any part of a condemned uniform. This requirement maintains security and prevents the unauthorized wearing of AFR uniforms.
5. Membership may purchase additional uniforms or parts of the uniform whenever they wish, subject to provisions of these specifications. It is the duty of each member to ascertain that the uniform (including headwear) he/she purchases is an AFR approved uniform item according to department specifications.
6. During off-duty hours, members shall not wear any portion of the uniform, except when specified or approved by the Fire Chief or the Fire Chief's designee. Non-fire department members shall not wear any part of the uniform at any time.
7. Uniform Material: Shorts, Exercise Shorts, Polo Shirts, T-shirts, Sweatpants, and Sweatshirts that contain less than 50% cotton material shall not be worn while on duty. Synthetic fabrics that have more than 50% synthetic materials pose an increased risk of bum injuries when worn beneath firefighting personal protective equipment.

IPRA Response 000485

8. The front of the t-shirts, polo shirts, and sweatshirts shall have the approved Albuquerque Fire Rescue Maltese logo on the front left breast. The logo shall be 4" -4 ¼" tall and 4"- 4 ¼" wide. The Maltese shall read "ALBUQUERQUE" in the top ribbon and "FIRE RESCUE" in the bottom ribbon in IFC RAILROAD font. There shall be two crossed axes behind the Maltese. The top panel of the Maltese shall read "Established" in Times New Roman Bold Italic, the left panel shall have the approved fire hydrant artwork, the right panel shall have the approved crossed hook and latter and the bottom panel shall read "1900" in Times New Roman Bold Italic. The "Star of Life" Shall be placed in the center seal. The logo may be one color, white, or may be white with a red "Star of Life".

   a. Members may substitute the approved AFR Maltese cross with an approved station-specific logo on the left breast area of any Class C duty t-shirt. This station-specific logo will not be allowed on the backside of any Class C duty t-shirt.
      i. Each station can only have 1 approved station logo
      ii. Must have a Maltese cross incorporated into the design
      iii. Must have top and bottom "Albuquerque Fire Rescue" banners incorporated into the design with "ALBUQUERQUE" in the top banner and "FIRE RESCUE" in the bottom banner
      iv. Members will seek input from all members assigned to that station before presenting their logo to the Uniform Committee
      v. All station logos will be submitted to the Uniform Committee first, for vetting
      vi. Once the Uniform Committee vets the proposed station logo, they can either reject the station logo, send it back to the AFR member to modify it, or forward it to the Fire Chief for final approval. Only the Fire Chief can approve and rescind fire station logos
      vii. All t-shirts, stickers, hats, patches, and other paraphernalia containing approved station logos will be purchased by the individual member as per the Union Contract.

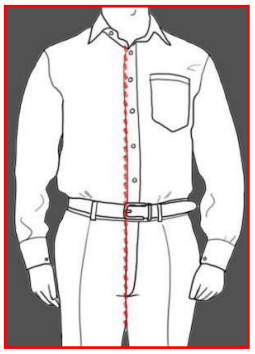

IPRA Response 000486

9. The front of t-shirt over the right breast area will have three lines of lettering. The first line will be the member's rank spelled out in its entirety. The second line will be the members name, which shall have the first and second initials with the full last name, or the first name and last name. The third line will be the member's medical specialty (EMT-B, EMT-I, or Paramedic) in 3/8" white block letters, centered beneath the member's name.
10. The back of t-shirts and sweatshirts will have "ALBUQUERQUE" silk-screened in white Arial Bold outlined in red. The dimensions shall be 1 ¼" high and 12" long. "FIRE" will be silk-screened in red Swis721 Hv BT Heavy outlined in white, ¼" below "ALBUQUERQUE". The dimensions shall be 3 ¾" high and 12" long. "RESCUE" will be silk-screened ¼" below "FIRE" in white Arial Bold outlined in red. The dimensions shall be 1 ¼" high and 12" long. "ALBUQUERQUE FIRE RESCUE" will be centered at approximately shoulder blade height.

11. Maintain your gig line - The gig line is the imaginary line that runs straight down the center of your body from your neck to the bottom of your crotch. Everything shall line up to it. The gig line is simply lining up the edges of your uniform items. Take the right edge of the fly on your trousers/pants, the right edge of your belt buckle, and the right edge of your shirt button flap and line them up on the center of your body.

II. CLASS A UNIFORM

1. Class A Uniforms must be clean, pressed, altered to fit, and kept in a manner to be ready for immediate use or inspection.
2. Class A uniforms must be worn to:
   a. Funerals
   b. Court proceedings when representing the Department
   c. Department graduations and promotional ceremonies
   d. When ordered or Approved by the Fire Chief or Designee
3. The Class A uniform for all members includes a dress coat with badge and lapel buttons, bell cap, and high gloss Oxford-style shoes.
4. Dress Coat: shall be Albuquerque style, 16 oz., and dark blue serge, double-breasted with three buttons.
   a. For the Fire Chief, there shall be five gold ½" texturized braids, ¼" apart. Deputy Chiefs & Shift Commanders, four gold ½" texturized braids, ¼" apart.

Battalion Chiefs, three gold ½" texturized braids, ¼" apart. Captains, two gold ½" texturized braids ¼" apart. Lieutenants, one silver ½" texturized braid. Drivers, one royal blue ½" texturized braid. Firefighters, one black ½" texturized braid.

b. AFR members that are past or current military may have a red band ¼" just above their highest braid.
c. The official AFR patch will be sewn centered 1" below the upper seam of the left shoulder. Specialty patches will be sewn as directed in Section IX.
d. Time in service markings shall be the 5/8" Maltese crosses, one (1) for each five (5) years of service completed. The Maltese crosses shall be gold for those with gold braids and silver for all other members.
e. The rank insignia button will be placed on the upper collar portion of the jacket. This button will be positioned towards the lowermost outer portion of the collar with the side of the button touching the side seam and the bottom of the button touching the bottom seam. The button will sit exactly the way it does on the Class B uniform collar.

5. Dress shirt: for all members shall be white in color with long sleeves and accommodate a badge.
6. Dress Pants: shall be dark blue serge to match the dress coat. The pant pocket style is optional. Dress pants must be un-cuffed.
7. Dress Skirt (for women): Optional for women, the skirt shall be 100% Dacron, dark blue serge 11-11 ½" oz. with no scarlet braids and the bottom of the skirt shall be l" above or below the middle of the kneecap.
8. Bell Cap: Caps for the Fire Chief, Deputy Chiefs, Shift Commanders, Battalion Chiefs, and Captains shall be Albuquerque-style, white leatherette, black visor, and a ½" gold sliding strap with two gold buttons. The Lieutenant's cap shall be Albuquerque-style, blue serge, black visor and a ½" silver sliding strap with two buttons and a perforated band. All other member's caps shall be Albuquerque-style, blue serge, black visor, and black ½" sliding strap with two buttons and a perforated band.
    a. Personnel shall always wear the bell cap while outdoors and remain covered until crossing the threshold of a structure or entering a vehicle.

b. If personnel are attending an outdoor ceremony, caps are to remain on at all times during the Pledge of Allegiance, National Anthem, Taps, and Prayer.
c. When entering any indoor and/or covered venues, personnel shall remove the cap at the door's threshold and carry it under the left arm. This includes apparatus bays, tents, outdoor pavilions, funeral homes, churches, etc. The Color Guard is exempt from this requirement.
d. The cap shall be worn squarely on the head, with the bottom edge of the cap (not visor) parallel to and approximately 1-1/2 inches above the eyebrows.
e. Place the bell cap on your head so that the seam in the front of the cap is centered with the bridge of your nose. No hair should be visible from the forehead. Rank insignia is always centered on this front seam.

f. Adjust the cap so that the band of the cap is parallel to the ground. A good trick to use is to place your index and middle fingers together and place them on the bridge of your nose. The bell cap visor should be just touching the top edge of your middle finger.

9. Ties: Firefighters of all ranks will wear black fore-in-hand ties. The tip of the tie must cover a portion of the belt buckle, but not extend below the bottom of the belt buckle. Tie tacks or pins may be worn, style optional. When tie tacks are worn with the Class A uniform, they will be evenly parallel with both pocket flap buttons. Female firefighters of all ranks may wear a black crossover tie or the black fore-in-hand tie. The tie will be worn with the Class A uniform.

10. Gloves: Gloves are only to be worn during funerals or parades, or as directed by the Fire Chief or designee.
11. Shoes: All shoes will be of Oxford style and a black high gloss.

III. CLASS B (NOMEX BADGE SHIRT & PANTS)

1. Class B uniforms must be worn to:
   a. Community Involvement Assignments
   b. Training at the Fire Academy
   c. Pre-Incident Planning Activities
   d. City Hall
   e. When otherwise directed by the Fire Chief or designee
   f. Support Division's standard daily uniform will be Class B unless approval to wear Class C has been obtained from the Fire Chief or designee via the chain of command.

2. The Class B uniform shall consist of a Nomex badge shirt and pants as well as a plain black belt and all-black leather or all-black synthetic leather or all-black nylon mesh tactical boots or all-black tactical shoes.

IPRA Response 000489

a. Uniform shorts are not part of the Class B uniform.
b. Athletic style workout shoes are not allowed with the Class B uniform (see also Footwear and Socks).
c. The service jacket may be worn with the Class B uniform as weather permits.

3. Members shall not wear badge emblems, buttons, pins, or insignia of any kind, except those specified or approved in writing by the Fire Chief. Members may wear up to two badge emblems, buttons, pins, or insignias on the right breast pocket flap of the Nomex shirt. Religious symbols are not allowed on any AFR uniform. These shall be limited to items like the Maltese cross, U.S. and N.M. flags, etc. The size shall be no larger than a quarter. While it is not possible to list all acceptable items, good judgment and discretion is expected. The Fire Chief retains the right to determine what is acceptable.

   a. The following picture will be used for standard alignment. When wearing one pin, the pin will be placed directly under the middle of the nameplate halfway between the nameplate and the pocket flap button.
   b. When wearing two pins, the pins will be placed directly under the nameplate with the outer ends of each pin vertically aligning up with the outer ends of the nameplate. Both pins will be halfway between the nameplate and the pocket flap button.

4. Members may wear a bar that displays one Maltese cross for each five years of completed service with AFR. The bar is worn above the left breast pocket seam, under the badge. The length of the bar shall not exceed the length of the nameplate.
   a. The top of the bar will align horizontally with the uppermost pocket flap seam with the middle of the bar directly underneath the middle of the AFR badge.

IV. CLASS C (DUTY UNIFORM: T-SHIRT or POLO & NOMEX PANTS or SHORTS)

1. The Class C uniform may be worn to:
   a. Emergency incidents
   b. Dining establishments
   c. Station attire
   d. When otherwise directed by the Fire Chief or designee
   e. Community events such as Summerfest or Isotopes games will require Class B uniforms to be worn unless approval to wear Class C is granted from the Fire Chief or designee via the chain of command.

2. The Class C uniform shall consist of AFR approved T-shirts, approved polo shirts, Nomex pants or Navy-Blue uniform shorts, a plain black belt, and all-black leather or all-black synthetic leather or all-black nylon mesh tactical boots or black tactical shoes.

Athletic-style workout shoes are not allowed with a Class C uniform.

3. Uniform Shorts
   a. **Uniform shorts are only allowed to be worn from April 1st through September 30th.**
   b. Badge shirts will never be worn with shorts.
   c. Length of shorts shall be no shorter than 2" above the knee and no lower than mid-knee when standing.
   d. Shorts will be either Nomex or cotton blend. Refer to section I. General Rules, 7 for uniform material specifications.
   e. Uniform shorts will not be worn with high-top boots taller than 6 inches.
   f. For sock guidance, refer to Section XIII Footwear/Socks: Subsection 3.
   g. Vans or similar style low-top skate shoes or athletic sneakers are prohibited. Examples of all-black leather/synthetic leather/nylon mesh tactical style boots/shoes that are allowed with uniform shorts (6" boot on far right).

4. Polo Shirts: Refer to section I. General Rules, 7 for uniform material specifications.
   a. Front of Polo Shirt: Will have the approved embroidered Maltese cross on the left breast. Members may substitute a red station number inside the Maltese cross. Refer to section I. General Rules, 8 for Maltese specifications.
      i. Right breast area will be the member's rank spelled out in its entirety on the first line. The second line will be the members name, which shall have the first and second initials with the full last name, or the first name and last name. The third line will be the member's medical specialty (EMT-B, EMT-I, or Paramedic) embroidered in 3/8" block letters, centered beneath the member's name. These three lines will be embroidered in white; for Battalion Chiefs and above, the embroidery will be gold.
      ii. Only station-specific logos/mascots that are approved by the Fire Chief shall be allowed on the front side of polo shirts. Station-specific logos/mascots will only be allowed over the left breast area; not on the back side of any polo shirt.
   b. Back of Polo Shirt: There shall be nothing placed on the back of polo shirts.
5. Coveralls: Members of the Training Division, Fire Marshal's Office, and Heavy Technical Rescue task force may wear coveralls when their duties warrant their use. The approved patch shall be sewn on the left sleeve 1" below the upper seam and centered.
6. The service jacket may be worn with the Class C uniform as weather permits.

IPRA Response 000491

V. CLASS D (PHYSICAL TRAINING ATTIRE)

1. The Class D uniform will only be worn during:
    a. Physical training
    b. Hydrant inspections
    c. Landscape maintenance
    d. Within the fire station
    e. When otherwise specified by the Fire Chief or designee
2. T-shirts: The same guidelines as mentioned in Section IX will apply to exercise T-Shirts.
    a. The use of a dry fit type T-shirt poses an increased risk of burn injuries due to the possibility of melting when exposed to high heat. Dry-fit T-shirts are not allowed to be worn while on duty at any time.
3. Exercise Shorts: Shorts shall be solid dark blue in color and mid-thigh to above the knee. Refer to section I. General Rules, 7 for uniform material specifications.
4. Sweatpants: shall be solid dark blue in color. Refer to section I. General Rules, 7 for uniform material specifications.
5. Class D uniforms are dark blue. No other colors will be worn within the station.

Note: It is the officer's discretion to determine the appropriate times to allow members to wear their Class D uniform within the fire station. At no time will members be in their Class D uniform during station visits, retirement gatherings, photos for social media, or formal visits from fire administration.

VI. CIVILIAN/FIRE INVESTIGATOR ATTIRE

1. Civilian attire may be worn by members in certain divisions or circumstances with the permission of the Fire Chief or designee.
    a. It is impossible to describe all acceptable civilian attire. However, if civilian attire is worn, it shall be neat, clean, and present a professional, businesslike appearance.
2. Men may wear dress slacks and button-up collar shirts, a leather belt, and black or brown shoes.
3. Women may wear dress slacks or a skirt and dress shirt, blouse, or sweater. The skirt should be approximately knee length. Shoes should be black, brown, or navy, and conservative in appearance.
4. Jeans, athletic and sandal-type footwear are not permitted at any time.
5. AFR Fire Investigators can wear BDUs and button-up collar shirts as their Class C uniforms. This uniform will only be worn while working in the capacity of an AFR Fire Investigator. Station-specific logos/mascots are not allowed on AFR Fire Investigator uniforms.
    a. AFR Fire Investigators shall receive the same uniform allotment as per the CBA. Each investigator shall decide on whether they order Class B uniforms, Class C uniforms, or a mixture of both, not to exceed the normal allotment per rolling calendar year.

IPRA Response 000492

6. The Fire Chief or designee may determine what acceptable civilian attire is.

VII. SPECIAL OPERATIONS RESPONSE/TRAINING ATTIRE

1. Special Operations personnel may wear an alternate uniform for specified response, training, or situations upon approval from the Fire Chief or designee. The alternate uniform shall not be worn on duty as a replacement for the Class B, C, or D uniform.
    a. Alternate uniforms shall be neat, clean, applicable to the environment, and present a professional appearance.
    b. Alternate uniforms shall be made of materials suitable for operations, environment, and expected conditions to ensure protection. When thermal (fire) conditions are expected, all materials must adhere to Class B, C, and D uniform material requirements and safety standards as outlined in this policy.
    c. Alternate uniform will consist of:
        i. Shirt: Solid in color. Either short or long sleeve. Black, dark blue, or gray.
        i. Pants: Solid in color. Black, dark blue, or tan. Trousers with straight legs that shall match the uniform standards or department-approved tactical/BDU style pants. A black belt shall be worn with pants. Jeans are not permitted at any time.
        ii. Shorts: Solid in color. Material and style shall be applicable for the environment and expected conditions. Black, dark blue, tan, or gray. Shorts shall be mid-thigh to above the knee.
        iii. Shoes: Shall be appropriate for the environment

VIII. SERVICE JACKETS

1. The following are the only service jackets approved for on-duty wear (Removable liners may not be worn as part of the duty uniform)
    a. Tactical 5-11, 5 in 1 Jacket, Stock #48017
    b. Tactical 5-11, 4 in 1, Stock#48027DN
    c. Carhart jacket, model OJ0140-M.
    d. Spiewak, Stock #1775
    e. Gerber # 30G
    f. 160 Denier Cordura Nylon wrap and fill, finished with a non-ravel coating
    g. Game -1221-J the Bravest Diamond Quilt Jacket
    h. Red Kap, Soft Shell Jacket
        i. Navy: JP68NV
        ii. Black: JP68BK
2. A 2” x 5” patch of silver reflective material with ½” red embroidered letters is required over the right breast. Rank is required across the top of the patch. Name is required underneath. The name shall have the

IPRA Response 000493

first initial (second initial optional), with the full last name or the full first and last name, with a matching merrowed border.

3. The badge patch is to be sewn over the left breast. A silver badge patch is required for Firefighters, Drivers, and Lieutenants. A gold badge patch is required for Captains, Battalion Chiefs, and Chief Officers. The AFR patch is to be sewn on the left sleeve 1" below the epaulet and centered. Specialty patches are to be sewn on the right sleeve 1" below the epaulet and will be centered.
4. A 4" X 11" patch of silver reflective material with 3 ½" red embroidered letters with "FIRE RESCUE" will be sewn on the back of the jacket. It will be centered no more than 6" from the top.

IX. T-SHIRTS AND SWEATSHIRTS

1. The T-shirt and/or crew sweatshirt may be worn as an outer garment. The T-shirt/polo may be worn only as a part of the Class C or Class D uniform. The sweatshirt may be worn with the Class B, Class C, or Class D uniform.
    a. Personnel shall keep a Nomex uniform shirt on their response unit to avoid having to return to the station to retrieve it for any appearance in public other than emergency response.
    b. No modifications to the T-shirt or sweatshirt are permitted unless approved by the Fire Chief or designee.
2. T-shirts shall be made of at least 50% cotton fabric, navy blue in color, no pocket, round collar, short or long sleeve. Refer to section I. General Rules, 7 for uniform material specifications.
    a. Front of Shirt: Will have the approved embroidered Maltese cross on the left breast. Members may substitute a red station number inside the Maltese cross. Refer to section I. General Rules, 8 for specific Maltese specifications.
        i. The member's, rank, and licensure level will be silk-screened in white 3/8" block letters on the right breast. The first line will be the member's rank spelled out in its entirety; centered above the member's specialty. The second line will be the member's medical specialty (EMT-B, EMT-I, or Paramedic) silk-screened in 3/8" block letters, centered beneath the member's rank.
        ii. Members may have one of the following specialty designations under the Maltese Cross: HAZMAT, TRAINING, HEAVY TECHNICAL RESCUE, WILDLAND, EMD, TECH SERVICES, or FMO. The dimension shall be 3/8" solid white block letters centered directly below the Maltese cross.
    b. Back of Shirt: Will be silk screened with the have the approved "Albuquerque Fire Rescue" language. Refer to section I. General Rules, 9 for silk-screening specifications.
3. Sweatshirts must be nothing less than 70% cotton and 30% polyester cross grain weave with ribbed inserts and under the arms. Sweatshirts shall be 11 oz., solid navy-blue crew neck or hooded. Hooded sweatshirts may come with or without a zipper. All sweatshirts will have long sleeves.
    a. Front of Sweatshirt: Will have the approved embroidered Maltese cross on the left

IPRA Response 000494

breast. Members may substitute a red station number inside the Maltese cross. Refer to section I. General Rules, 8 for specific Maltese specifications.

i. The first line will be the members rank spelled out in its entirety. The second line will be the member's medical specialty (EMT-B, EMT-I, or Paramedic) silk-screened in 3/8" block letters, centered beneath the member's rank.

ii. Only station-specific logos/mascots that are approved by the Fire Chief shall be allowed on the front side of Class C sweatshirts. Station-specific logos/mascots will only be allowed over the left breast area; not on the back side of any Class C duty sweatshirt.

b. Back of Sweatshirt: Will Follow General Rules Will be silk screened with the have the approved "Albuquerque Fire Rescue" language. Refer to section I. General Rules, 9 for specific silk-screening specifications.

4. Optional Sweatshirts: New York style "job shirt" with or without the denim collar and denim patches on the elbows with chest zipper and the approved embroidered colored Maltese cross on the left breast.
   a. Will have the approved embroidered Maltese cross on the left breast. Members may substitute a red station number inside the Maltese cross. Refer to section I. General Rules, 8 for specific Maltese specifications.
5. At the discretion of the Fire Chief or designee, specialty shirts may be used for special events (i.e. Cancer Awareness Month, Month of July for 4th of July, Month of September in honor of 9/11, for example). Specialty shirts will not be worn outside of the timeframes for wear specified by the Fire Chief

X. BADGES/BUTTONS/IDENTIFICATION NAMEPLATE

1. The Fire Chief, Deputy Chief, Battalion Chief, and Captain Bell Cap badges, lapel buttons, breast badges, and jacket buttons shall be gold. The jacket buttons will read "FD". The badges and lapel buttons shall be as follows:
   a. Fire Chief – five crossed trumpets
   b. Deputy Chiefs – four crossed trumpets
   c. Shift Commanders – three crossed trumpets with a center star
   d. Battalion Chiefs – three crossed trumpets
   e. Captains – two parallel trumpets
   f. Lieutenants – one trumpet
   g. Drivers – fire truck emblem
   h. Albuquerque style pike pole, axe, and ladder emblem
2. The AFR badge shall be worn on the left breast. Badges shall be worn at all times while wearing the Class A or Class B uniforms.
3. AFR members may replace the "AFR" in the upper top banner area of their AFR badge with their man number. Given that the department already furnishes all members with a badge, this will be at the sole expense of the member who chooses to do so.

IPRA Response 000495

4. The fire department shall furnish cap badges, breast badges, and lapel buttons. Replacement of these items shall be furnished by the fire department but may result in the employee bearing the replacement cost.
5. All officers will wear collar insignias on their fatigues and dress shirts to designate their rank. Lieutenant insignia shall be a nickel-plated trumpet. Captain, Battalion Chiefs, Shift Commanders, and Chief Officer insignia shall be gold plated with corresponding trumpets of rank. All collar insignias worn by AFR Officers shall be worn with the bell of the talking trumpet(s) pointing toward the center (tip) of the collar and centered.
6. The nameplate with rank and date of hire with AFR (serving since) will be made of metal, Albuquerque style, gold plate finish for Captains, Battalion Chiefs, and Chief Officers, and nickel plate finish for other ranks. The nameplates shall have the first and second initials with the last name engraved or the first name and last name engraved in black lettering. The nameplate shall be worn on the upper seam of the right breast pocket of the shirt with the pin or clutch and post directly above the pocket seam. The entire nameplate shall be worn at all times while wearing the Class A and Class B uniforms. The entire nameplate will consist of the name bar and pin and clasp, which displays a member's rank and years of service with AFR.

XI. PATCHES

1. Patches shall be worn on jackets, Nomex shirts, and Class A uniforms. The Albuquerque Fire Rescue patch shall be centered on the left sleeve 1" from the upper seam. The patch will be 3.75" tall and 3.75" wide, and will have a red Maltese 100% embroidered and a gold center with a red Zia 100% embroidered. The border will be a black merrowed border with a silver border detailed on the inside of the black border and around the center seal. The lettering will be in white Arial bold to read "ALBUQUERQUE FIRE RESCUE NEW MEXICO". No more than one specialty patch will be worn on the right sleeve of any jacket or shirt. The specialty patch shall be centered on the right sleeve, 1" from the upper seam.
    a. The approved AFR patch is found below:

2. All specialty patches shall be removed once the individual no longer meets the certification of that specific division.

3. No more than one specialty patch shall be worn on the right sleeve of any Nomex shirt, dress shirt, or jacket.
4. Members that are certified and/or assigned to a division or with a skill level of Paramedic, EMT Basic, Hazardous Material Task Force, Heavy Technical Rescue Task Force, Wildland Task Force, Fire Academy, Emergency Medical Dispatchers, Technical Services, and Fire Marshall's Office (FMO) are authorized to wear their approved patch.

XII. HEADWEAR

1. A hat/cap may be worn with the Class B, Class C, and Class D uniforms. All hats/caps may be adjustable back or fitted. **All hats/caps will be worn brim forward at all times during emergency response, during station visits by civilians or fire administration, for photos and videos and when in public (i.e., shopping, dining, etc.)**.
2. All hats/caps shall be embroidered only with Albuquerque Fire Rescue, "Albuquerque" and "Rescue" ¼" high in silver lettering, "Fire" 1¼" high in red lettering on the front OR the old English style with overlapping red lettering outlined in silver. Optionally, a member's rank, man number, name, or nickname, (as approved by the Fire Chief), is permitted on the back of the cap in ¼" embroidered block lettering.
    a. If a member wants to purchase a hat with alternative lettering/logo/patch, they shall first get approval from their Station or Division Captain. In all instances, the hat worn shall be clean, professional, and appropriate so as to reflect well on AFR.
3. Hats/caps for all ranks will be solid blue in color with the above-approved logos.
    a. The bush hat may be worn with the Class B, Class C, or Class D uniforms. The bush hat shall be navy blue with the official embroidery to match the Class B or Class C hat/cap.
    b. Knit caps shall be solid navy blue, skull style, with the official embroidery to match the hat/cap. The knit cap may be worn as weather permits.

XIII. FOOTWEAR/SOCKS

1. With the Class B and Class C uniform, all ranks shall wear a department-provided all-black leather or all-black synthetic leather or all-black nylon mesh tactical boot or all-black tactical style shoes.
2. Athletic shoes will be permitted with the Class D uniform only.
3. All ranks will wear plain white or black socks. Socks will be visible above the uniform boot or shoe. Socks shall be worn no higher than mid-calf. Socks will not be worn knee-high.

XIV. JEWELRY AND SUNGLASSES

1. Rings are limited to one unadorned metal band only.
2. One bracelet is permitted.
3. Members will be allowed to wear one pair of earrings, posts, or studs.
4. No gauges are permitted.
5. No tongue or body piercings are permitted.

IPRA Response 000497

6. One medallion is permitted on a lightweight (thin) metal chain. This medallion must be worn under the shirt at all times.
7. Sunglasses and frames will be of neutral tones and not have ornate frames.

XV. HAIRCUT AND GROOMING

1. All members are required to be well-groomed and present a neat and clean appearance at all times while on duty.
    a. Management retains the right to use discretion in deciding if a particular hairstyle, facial hair, or sideburns are acceptable. This is a Management right and will not be grounds for a grievance.
    b. AFR is a paramilitary uniformed service; therefore, a neat and well-groomed appearance by firefighters is important and contributes to building the pride and spirit essential to an effective Fire Department.
    c. It is the responsibility of all Officers to ensure that members under their command present a neat and orderly appearance.
2. While it is not possible to list all possible hairstyles, there are many hairstyles which are acceptable to the department, so long as a member's hair is kept in a neat manner. There may be occasions when a supervisor believes a hairstyle is ragged, unkempt, or extreme in appearance. In these cases, the supervisor shall correct the violation. If the member disagrees, he/she will be allowed to appeal to Management, who will then make a final determination.
3. There are times when a member may wish to request an exception to the policy in advance. All requests for exceptions will be submitted by members in writing to the Fire Chief prior to haircut and shall be evaluated on a case-by-case basis. Approval authorizes exceptions to the rule for one year. A disapproval of an exception is a Management right and will not be grounds for a grievance.
4. The length and or bulk of the hair will not be excessive or present a ragged, unkempt, or extreme appearance. Hair will present a tapered appearance and when combed, it will not fall over the eyebrows.
5. In all cases, the bulk or length of hair will not interfere with the normal wearing of caps, helmets, and the SCBA face piece.
6. Firefighters:
    a. Have no minimum hair length. They are permitted to have a maximum bulk of 4 inches from the scalp and allow proper wearing of helmet and SCBA face piece. Hair will end above the bottom edge of the collar and will not extend below an invisible line drawn parallel to the ground, both front to back and side to side unless pulled back and secured or worn in an authorized ponytail or equivalent, bun, or long braid(s). One or two braids or a single ponytail or equivalent may be worn down the member’s back. Bangs, or side-swiped hair, may touch eyebrows but will not touch or cover eyes. Hair will be pinned with simple unadorned barrettes or hairpins, bands, or plain scrunchies.

IPRA Response 000498

b. Locs, braids, twists, micro-braids, French braids, Dutch braids, and cornrows are authorized. Locs are defined as portions of hair that have been intentionally or unintentionally fused together to form a loc or locs. A braid or twist is two or more portions of interwoven hair. If adding additional hair, it must be a natural-looking color (similar to the individual's hair color) and conservative (moderate, being within reasonable limits; not excessive or extreme). Multiple locs, braids, twists, or cornrows may come together down the back in one or two braids or a single ponytail. Hair must not exceed bulk standards as described above and must not interfere with wearing a helmet and SCBA face piece. The locs, braids, and twists must present a neat, professional, and well-groomed appearance. When worn, multiple locs, braids, or twists shall be of uniform dimension, small in diameter (approximately ¼ inches), show no more than ¼ inch of scalp between the locs, braids, or twists, and must be tightly interwoven to present a neat, professional appearance. A braid/twist must continue to the end of the hair without design and following the contour of the head and may be worn loose or in a secured style within the hair standards in the paragraph above. Exception: Micro-braids or twists are not required to continue to the end of the hair.
c. Sideburns will be keep neatly trimmed and the base will be clean-shaven. No portion of the sideburn will extend downward beyond the bottom of the ear lobe.
d. Will be clean-shaven. No facial hair, except mustaches, will be allowed. No facial hair is allowed under the lower lip in the labiodental crease. This includes soul patches and goatees.
e. Facial hair must not interfere with the sealing surface of the SCBA facepiece and/or the N95 respirator as per NFPA 1500 Standard on Fire Department Occupational Safety, Health, and Wellness Program, and OSHA 1910.134 Respiratory Protection.
    i. The length of the mustache will not extend beyond, or wrap under, the bottom of the chin or jaw line. There must be a minimum three-finger gap between the mustache. The width of the mustache will not go beyond the outside corner of the eye.

Note: Members who do not successfully pass the respirator fit test, and/or do not maintain compliance, will be instructed to shave immediately as set forth in this policy. Units will remain out-of-service until all assigned members have successfully passed the respirator fit test, and/or achieved compliance. For

members with questions and/or concerns regarding compliance, they shall immediately notify their Battalion Chief

XVI. TATTOOS, SCARIFICATION, BRANDING, AND BODY MODIFICATION

1. While on duty, tattoos, scarifications, brandings, and other body modifications may only be displayed on the extremities. Tattoos, scarifications, brandings, and other body modifications may not be displayed on the neck, face, or head.
2. The display of ANY unprofessional or offensive tattoo, scarification, brandings, and/or body and dental modification including but not limited to tooth filing, grills, tongue splitting, transdermal/micro-dermal implants, nudity, violence, sexually explicit or vulgar art, words, phrases, profane language, symbols that incite negative reactions, initials or acronyms that represent criminal or oppressive organizations, regardless of its location, is prohibited while on duty.
3. Tattoos, scarifications, branding, and/or other body modifications that are prohibited from display while on duty must be covered with the approved AFR long sleeve Nomex badge shirt, long sleeve T-shirt or sweatshirt, a navy-blue sleeve, or makeup concealer that matches the individual's skin tone. Bandages and skin shields will not be permitted for covering tattoos, scarifications, brandings, or other body modifications.

XVII. MOURNING BAND

1. All bands will be solid black and worn in a straight line across the badge.
2. For a Line of Duty Death of an AFR member, the band will be worn for 30 days following the passing of the Firefighter. In the event of an off-duty death of a department member or a member of an outside public safety agency, the band will be worn for up to 24 hours following the funeral.

XVIII. CADET UNIFORM

1. Bell Cap: will be Albuquerque- style, blue serge, black visor and black ½" sliding strap will two buttons and perforated band.
2. Shirt: will be 4.25 oz. poplin, 65/35 poly/ cotton, medium blue in color, center pleat pockets, functional epaulets, badge tab, buttonhole eyelets and sling and seven buttons w/ vertical buttonholes. The shirt will be pressed and clean at all times.
    a. The approved Albuquerque Fire Rescue patch will be sewn on the left sleeve.
3. Pants: will be 8.5 oz., 65/35 poly/ cotton twill, dark navy blue in color, welt back pockets, 2-inch inner lined waistband and finished with wrinkle and stain release. Pants will be pressed with a crease down the middle of each leg.
4. Belt: will be 10-11 oz., black in color, 1-1 ½" wide, plain full grain leather and silver buckle.
5. Tie: will be a 3" polyester clip- on, black in color, 14.5", 18" or 20" in length.
    a. Tie Clip: will be 3/8"X2 ¼", silver in color. Tie clip will be worn between the pockets.

IPRA Response 000500

6. Nameplate: will be made of metal, silver in color, Albuquerque style with rank, first initial, middle initial, last name and serving since year.
7. Boots: will be 8" soft toe, black polishable leather, moisture wicking nylon mesh lining, rubber bottom and EVA cushion midsole with YKK side zipper. Boots will be polished to a high gloss.
8. Short sleeve t- shirt: will be 5.2 oz., 50/50 poly/ cotton, gold in color, double- needle stitching, set- in ribbed collar and shoulder to shoulder taper.
    a. T-Shirt will have the approved Albuquerque Fire Rescue Maltese on the left breast and Cadet screen printed on the back in white.
9. Long sleeve t- shirt: will be 6oz., 100% cotton, gold in color, double- needle stitching, set- in ribbed collar, shoulder to shoulder taper and ribbed cuffs.
    a. T- Shirt will have the approved Albuquerque Fire Rescue Maltese on the left breast and Cadet screen printed on the back in white.
10. Hats/Caps: will be solid blue in color with the approved Albuquerque Fire Rescue hat logo embroidered on the front of the cap, centered.
    a. Knit caps shall be solid navy blue, skull style, with the official embroidery to match the hat/cap. The knit cap may be worn as weather permits.
11. Exercise shorts: will be 100% cotton, navy blue in color, elastic waist with inner drawstring, side seam pockets and a 7.5" inseam.
12. Sweatshirt: will be 8 oz., 50/50 poly/ cotton, navy blue in color, 1X1 ribbed collar, cuffs and waistband and seamless body.
    a. Sweatshirt will have the approved Albuquerque Fire Rescue Maltese on the left breast and Cadet screen printed on the back in white.
13. Sweatpants: will be 8 oz., 50/50 poly/ cotton, navy blue in color, elastic bottom leg opening, and elastic waistband and inside drawstring.
14. Gear Bag: will be 840 denier polyester, 27 X 11 X 12 in dimensions, black in color, two large side pockets, two large front and back pockets and adjustable shoulder strap.
15. Jacket: will be 10.3 oz., 96/4 softshell/ spandex, navy blue in color, 100% polyester fleece lining, water and wind resistant, full zip front closure, stand up collar with fleece lining, chest pocket and two on- seam hand pockets all with zipper closure.

XIX. FSA UNIFORM

1. Shirt: will be a Polo style shirt and will be made of 65/35 poly/cotton pique, red in color, flat knit collar and cuffs, 3-button placket Metal buttons with dyed-to-match plastic rims and side vents.
    a. Front of Polo will have the approved embroidered Maltese cross on the left breast. Members may substitute a red station number inside the Maltese cross. Refer to section I. General Rules, 8 for specific Maltese specifications.
    b. The back of the T-Shirt will have the approved Albuquerque Fire Rescue FSA back logo.

IPRA Response 000501

2. Pants: will be made of 8.5 oz. 65/35 poly/ cotton twill, Dark navy blue in color, 2-inch inner lined waistband, welt back pockets and will be finished wrinkle resistant stain release.

I am opposed to R-25-122 and in favor of the AFR proposal for operational and staffing by ABQ fire and rescue.
The traffic conditions in Albuquerque are dangerous because of inattentive drivers, those who run red lights, do not stop at stop signs.
Also as a result of bicyclists, pedestrians, and riders of scooters who are inattentive, do not cross at intersections, but anywhere without looking.
Rather than blame all of these folks, we need to protect both those who obey these laws and those who do not.
We also need look out for the disabled and those in wheel chairs who cannot easily navigate the city because of scooters parked in the middle of sidewalks.

Subject: [EXTERNAL] Important Update from Albuquerque Fire Rescue

You don't often get email from abqoutreach@cabq.gov. Learn why this is important

Dear friends & neighbors,

As one our city's firefighters, I would like to take a moment and share an important update from the City of Albuquerque's fire department. Albuquerque Fire Rescue (AFR) recently announced new operational and staffing changes to better serve Albuquerque residents and improve response times in high demand areas. These changes were made to ensure increased response capabilities lead to better outcomes for residents. Unfortunately, there is city council proposal to roll this effort back, **which will either delay response times to residents, or make that response less effective at saving lives.**

AFR Engines have traditionally been staffed with four personnel at the EMT-Basic level. AFR Rescues (ambulances) have been staffed with two personnel at the EMT-Paramedic level. In 2021, AFR began a pilot program that placed one paramedic on AFR Rescues alongside one EMT basic, effectively doubling the response capability of highly trained paramedic professionals in our community. This change has proven to be safe and effective in the delivery of quality clinical care, and most importantly, means you will receive a faster response from a paramedic when you need it most.

Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills. This staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country.

The City Council is set to hear legislation tomorrow that would undo this progress. The bill R-25-122 means that **AFR will not be able to get a paramedic on every call in these districts, or it will take longer**. These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field. Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

We humbly ask for your support and to make your voice heard by signing up for public comment and opposing R-25-122. Reckless legislation like this directly impacts the people we took an oath to serve. If you cannot sign up for public comment, you can call and email your Councilor here.

Subject: AFR Operational Changes Update

Good morning City Councilors,

AFR has been working on some very exciting operational changes that we will be implementing in the coming month. I have included a memo with the background and explanation of how these changes are going to improve our service delivery across Albuquerque using existing resources. This is something that I started working on as a Deputy Chief and thus there are years of research and effort that have been put into these changes that are outlined in this memo. Please reach out to me if you have any questions or need more information.

Respectfully,

Re: AFR Operational Changes Overview

Albuquerque Fire Rescue is in the process of implementing critical operational and staffing changes to better serve residents of Albuquerque. These operational changes help AFR ensure that when a resident calls 911 the chance of a paramedic arriving to provide medical care will increase. I have been working on these changes for several years using input from multiple committees, a department-wide survey conducted over two years ago, EMS response data, and best practices in health care delivery. This staffing model will increase AFR's ability to respond with the highest skilled personnel in areas of the community that need it most, using existing resources. In the memo below, I am providing important background information and an explanation of these operational and staffing changes that will increase and improve our response to the community.

AFR is the largest employer of Emergency Medical Technicians (EMTs) in the State of New Mexico. EMTs are recognized at three different levels within AFR, EMT Basic, EMT Intermediate, and EMT Paramedic. These three levels are differentiated by the clinical skills they have been trained to perform.

Our approximately 341 EMT Basics (captain and below) assigned to field operations are trained healthcare professionals who provide basic life support and emergency medical care to patients at the scene of an incident and during transport to the hospital.

An EMT-Intermediate (EMT-I) is a mid-level emergency medical professional who performs advanced medical procedures like intravenous access and delivering advanced medications. They respond to a variety of medical emergencies, including cardiac, trauma, and respiratory emergencies. AFR began recognizing and providing compensation for this level of licensure with our last CBA with IAFF L244, going into effect July 2024. We currently have 31 intermediates assigned to field operations (captain and below). Our goal is to train at least 24 more by the end of 2025, through a collaboration with UNM's EMS Academy.

An EMT paramedic is the highest level of EMT and can perform even more advanced medical procedures. This includes cardiac monitoring, advanced airway device placement and a broader scope of life saving medications. The current IAFF L244 CBA outlines that all paramedics will receive equal compensation for their licensure, regardless of the apparatus to which they are

IPRA Response 000514

assigned. AFR has approximately 161 Paramedics assigned to field operations (Captain and below). This pay goes into effect July 2025.

Historically, AFR has maintained a staffing model that places two paramedics on each transport capable Rescue (AFR Ambulance). We have maintained this model since the inception of Advanced Life Support (ALS) by AFR in the late 1970s-early 1980s and are the only agency (both EMS or fire department) that uses this model. From that time, until 2015, AFR was only licensed as a Medical Rescue through the NM EMS Bureau. This allowed us to transport patients to the hospital but did not allow us to bill for service. During those years, we would typically transport less than 100 times per year.

In 2015 we obtained our certification through the NM Public Regulation Commission as a certificated ambulance provider which allows us to bill for our transports. Albuquerque Ambulance Service (AAS) is our contracted ambulance provider who performs approximately 95%-97% of the total transports for our system. This agreement helps keep AFR Rescues available for response to their assigned districts.

In just the last 5 years, AFR has seen a dramatic increase in the number of transports that we perform:

- *2020: 478 transports*
- *2021: 1,509 transports*
- *2022: 3,263 transports*
- *2023: 2,271 transports*
- *2024: 2,791 transports*

AAS is also facing the impacts of increasing volume and a taxing of resources. AAS transports for the 911 system in the last 5 years is as follows:

- *2020: 52,960 transports*
- *2021: 55,473 transports*
- *2022: 53,177 transports*
- *2023: 52,544 transports*
- *2024: 54,089 transports*

The EMS environment has changed since the inception of our dual medic Rescue model, and we must adapt to ensure we have the ALS resources available for the citizens we serve.

Over a decade ago, the administration tried to start a similar program, and settled with one ALS Engine, Engine 10. This apparatus has been operating with a single paramedic driver and three EMT-Basics for over 10 years. In 2021, we began expanding our service delivery by staffing our Basic Life Support (BLS) engines with paramedics to meet the need. In conjunction with Engine 10, we incorporated Engines 2 and 3, which are now staffed with an ALS provider to help reduce response times for ALS care and provide earlier lifesaving treatments to acutely ill patients in those districts. This was accomplished by moving one paramedic from the Rescue and replacing them with an EMT basic or intermediate, essentially doubling the ALS response capability for units in those districts. This change has proven to be safe and effective in the delivery of quality clinical care. When we made this change, we entered into an MOU with the IAFF L244 to ensure proper pay for members on these apparatus. It is important to note that the staffing levels of

trained firefighters ***remain the same***, four personnel on the Engine and two personnel on the Rescue.

In 2025, AFR is expanding this strategy to four additional stations under the same model while also incorporating an EMT Intermediate level response at five additional engines. Essentially providing 9 total districts with an expanded scope of ALS/ILS level care for the citizens we serve. Our bid process now includes stations 9, 12, 15 and 20 with Paramedic coverage on an engine, by reallocating a paramedic position from the Rescue. Rescues will continue to be staffed with the two firefighters as required by resolution. Our greatest need is at the paramedic officer level, and we can meet this need by utilizing paramedics at the rank of Captain on transport capable units. These stations were selected as areas with the highest need to expand ALS coverage using transport and ALS intervention data.

Stations 8, 11, 14, 16, and 22 will now have an EMT intermediate firefighter assigned, which will allow for an advanced level of care that has never been operationalized within AFR. Not only can these firefighters deliver a higher level of care, but they will also free up paramedic resources who can then respond to higher acuity calls for service. These stations were also selected using data as well as their distance from the core hospitals in downtown Albuquerque.

The primary goal of these changes is to enhance our service delivery to the public. As demands on EMS services in Albuquerque continue to increase, it is critical that we expand the utilization of our current resources of Paramedics and Intermediates to meet this need. These changes will help ensure that there is critical coverage in areas with the highest need, when AAS units are depleted and AFR Rescues are transporting or on task with other emergency calls.

A secondary benefit to these changes is the increased career longevity through job sharing for our members. Many of our paramedics have not had the opportunity to work on engines or ladders and labor has expressed the need for more prospects for job sharing and avoiding the perception of being "stuck" on a rescue for an entire career. With these changes, members who desire more flexibility and jog sharing will have the chance to bid to one these expanded service stations. Other members whose seniority affords them the option, may bid to station that still has the traditional model if that is their preference. As long as a minimum of one paramedic is assigned to a transport capable unit as well as the ALS engine, there are options to rotate between apparatus to ensure that all members are maintaining proficiency in all aspects of fire suppression and EMS service delivery.

Since 2021, these operational changes have bolstered our members interest in paramedic school. In years past, we had to resort to forcing members to attend this yearlong training. The overwhelming consensus was that the prospect of being able to work on any apparatus and not be forced to remain only on a transport capable unit was the deciding factor in their educational development.

Fire Administration has worked on these changes for years, including multiple committees that were comprised of our frontline personnel, a department wide survey that validated the desire of our firefighters to have more flexibility in job choices, as well a thorough analysis of city-wide data to determine the areas with the highest needs for initial expansion.

I understand that our department is complex and there is often clarification needed to fully understand how and why we are making changes. Please reach out with any questions that you

may have related to our EMS staffing changes. We are very excited to use our existing resources to expand ALS coverage for our residents.

Council EMS Changes Memo 2.25.25.pdf; Outlook-AFR Maltes.png; Outlook-AFR Maltes.png;

Good afternoon Councilor Lewis,

I am sorry that I missed your call yesterday evening. Sometimes my phone goes straight to voicemail and I noticed a missed call from you when I was making a call earlier. I will try to catch you later this afternoon.

I also received your email and wanted to bump up the memo that I sent to Councilors on Tuesday last week detailing our operational changes. I did receive some phone calls from some members of Council with follow up questions after I sent this memo. You mention my "PIOs" advising me in your email and I also wanted to let you know I just have one PIO who is a sworn AFR Lieutenant, I don't have a team like some of the other departments do. My PIO's job is to work with me on how I would like to release communications, but in this instance I was very clear on my stance on this issue.

I'd love to have the opportunity to discuss the resolution with you so I will try to connect with you later today or tomorrow.

Respectfully,

Emily Jaramillo

Historically, AFR has maintained a staffing model that places two paramedics on each transport capable Rescue (AFR Ambulance). We have maintained this model since the inception of Advanced Life Support (ALS) by AFR in the late 1970s-early 1980s and are the only agency (both EMS or fire department) that uses this model. From that time, until 2015, AFR was only licensed as a Medical Rescue through the NM EMS Bureau. This allowed us to transport patients to the hospital but did not allow us to bill for service. During those years, we would typically transport less than 100 times per year.

In 2015 we obtained our certification through the NM Public Regulation Commission as a certificated ambulance provider which allows us to bill for our transports. Albuquerque Ambulance Service (AAS) is our contracted ambulance provider who performs approximately 95%-97% of the total transports for our system. This agreement helps keep AFR Rescues available for response to their assigned districts.

In just the last 5 years, AFR has seen a dramatic increase in the number of transports that we perform:

- *2020: 478 transports*
- *2021: 1,509 transports*
- *2022: 3,263 transports*
- *2023: 2,271 transports*
- *2024: 2,791 transports*

AAS is also facing the impacts of increasing volume and a taxing of resources. AAS transports for the 911 system in the last 5 years is as follows:

- *2020: 52,960 transports*
- *2021: 55,473 transports*
- *2022: 53,177 transports*
- *2023: 52,544 transports*
- *2024: 54,089 transports*

The EMS environment has changed since the inception of our dual medic Rescue model, and we must adapt to ensure we have the ALS resources available for the citizens we serve.

Over a decade ago, the administration tried to start a similar program, and settled with one ALS Engine, Engine 10. This apparatus has been operating with a single paramedic driver and three EMT-Basics for over 10 years. In 2021, we began expanding our service delivery by staffing our Basic Life Support (BLS) engines with paramedics to meet the need. In conjunction with Engine 10, we incorporated Engines 2 and 3, which are now staffed with an ALS provider to help reduce response times for ALS care and provide earlier lifesaving treatments to acutely ill patients in those districts. This was accomplished by moving one paramedic from the Rescue and replacing them with an EMT basic or intermediate, essentially doubling the ALS response capability for units in those districts. This change has proven to be safe and effective in the delivery of quality clinical care. When we made this change, we entered into an MOU with the IAFF L244 to ensure proper pay for members on these apparatus. It is important to note that the staffing levels of

trained firefighters ***remain the same***, four personnel on the Engine and two personnel on the Rescue.

In 2025, AFR is expanding this strategy to four additional stations under the same model while also incorporating an EMT Intermediate level response at five additional engines. Essentially providing 9 total districts with an expanded scope of ALS/ILS level care for the citizens we serve. Our bid process now includes stations 9, 12, 15 and 20 with Paramedic coverage on an engine, by reallocating a paramedic position from the Rescue. Rescues will continue to be staffed with the two firefighters as required by resolution. Our greatest need is at the paramedic officer level, and we can meet this need by utilizing paramedics at the rank of Captain on transport capable units. These stations were selected as areas with the highest need to expand ALS coverage using transport and ALS intervention data.

Stations 8, 11, 14, 16, and 22 will now have an EMT intermediate firefighter assigned, which will allow for an advanced level of care that has never been operationalized within AFR. Not only can these firefighters deliver a higher level of care, but they will also free up paramedic resources who can then respond to higher acuity calls for service. These stations were also selected using data as well as their distance from the core hospitals in downtown Albuquerque.

The primary goal of these changes is to enhance our service delivery to the public. As demands on EMS services in Albuquerque continue to increase, it is critical that we expand the utilization of our current resources of Paramedics and Intermediates to meet this need. These changes will help ensure that there is critical coverage in areas with the highest need, when AAS units are depleted and AFR Rescues are transporting or on task with other emergency calls.

A secondary benefit to these changes is the increased career longevity through job sharing for our members. Many of our paramedics have not had the opportunity to work on engines or ladders and labor has expressed the need for more prospects for job sharing and avoiding the perception of being "stuck" on a rescue for an entire career. With these changes, members who desire more flexibility and jog sharing will have the chance to bid to one these expanded service stations. Other members whose seniority affords them the option, may bid to station that still has the traditional model if that is their preference. As long as a minimum of one paramedic is assigned to a transport capable unit as well as the ALS engine, there are options to rotate between apparatus to ensure that all members are maintaining proficiency in all aspects of fire suppression and EMS service delivery.

Since 2021, these operational changes have bolstered our members interest in paramedic school. In years past, we had to resort to forcing members to attend this yearlong training. The overwhelming consensus was that the prospect of being able to work on any apparatus and not be forced to remain only on a transport capable unit was the deciding factor in their educational development.

Fire Administration has worked on these changes for years, including multiple committees that were comprised of our frontline personnel, a department wide survey that validated the desire of our firefighters to have more flexibility in job choices, as well a thorough analysis of city-wide data to determine the areas with the highest needs for initial expansion.

I understand that our department is complex and there is often clarification needed to fully understand how and why we are making changes. Please reach out with any questions that you

may have related to our EMS staffing changes. We are very excited to use our existing resources to expand ALS coverage for our residents.

Dear City Councilors,
As a fire wife, I hear a lot of "behind the scenes" that many people in our city don't think about such as how the fire department operates. Currently, AFR operates with 2 paramedic levels on the rescues. This is the gold standard for EMS throughout the country preferred more to any other model. AFR administration would like to switch to 1 paramedic and 1 basic emt on the rescues. The plan is intended to spread out the paramedics and was proposed after upper administration began to fear the retirement of paramedics in upcoming years— and there's not enough paramedics in the department. The split does not add or take away from the amount of paramedics the department has, it just moves one paramedic to another seat on a different truck. The sale is "a paramedic is on every apparatus" or "improved response times" but from those in the field, not at a desk, it isn't a benefit for the department or the community. A paramedic doesn't need to run a 2 am call for "my fridge light bulb isn't working" —true story. And a basic emt is not as much help to a paramedic in need of someone with equal training to bounce ideas during an intense call or a medical anomaly or mentor a new paramedic in the field. Imagine the pressure to brand new paramedics— not only could it be their first day as a paramedic, but they're left to their own limited scope of training if things get crazy instead of having another experienced paramedic to mentor them through it.
With the current system, 911 calls are triaged for the reason of the call so that the appropriate level of care is dispatched. AFR is one of

few departments to have sworn uniformed members dispatching calls. The department has already improved response times, arrival times, and time on-scene standards and continues to do so. The system in place is gold standard for a reason. Firefighters on the ground, doing the work, helping the community, don't want the change. AFR administration has had the opportunity to discuss concerns and different approaches with the body of personnel and they continue to ignore the body's concerns to push their own agenda. For these reasons, I ask that you please vote yes to pass resolution R-25-122. Thank you.

Subject: Important Update from Albuquerque Fire Rescue
To: <gjavachip@gmail.com>

Dear friends & neighbors,

As one our city's firefighters, I would like to take a moment and share an important update from the City of Albuquerque's fire department. Albuquerque Fire Rescue (AFR) recently announced new operational and staffing changes to better serve Albuquerque residents and improve response times in high demand areas. These changes were made to ensure increased response capabilities lead to better outcomes for residents. Unfortunately, there is city council proposal to roll this effort back, **which will either delay response times to residents, or make that response less effective at saving lives.**

AFR Engines have traditionally been staffed with four personnel at the EMT-Basic level. AFR Rescues (ambulances) have been staffed with two personnel at the EMT-Paramedic level. In 2021, AFR began a pilot program that placed one paramedic on AFR Rescues alongside one EMT basic, effectively doubling the response capability of highly trained paramedic professionals in our community. This change has proven to be safe and effective in the delivery of quality clinical care, and most importantly, means you will receive a faster response from a paramedic when you need it most.

Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills. This staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country.

The City Council is set to hear legislation tomorrow that would undo this progress. The bill R-25-122 means that **AFR will not be able to get a paramedic on every call in these districts, or it will take longer**. These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field. Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

We humbly ask for your support and to make your voice heard by signing up for public comment and opposing R-25-122. Reckless legislation like this directly impacts the people we took an oath to serve. If you cannot sign up for public comment, you can call and email your Councilor here.

Chief,

Taking this to the media and then having your staff run a PR campaign with letters calling us reckless? This is not going to go well for you.

I didn't get a call from you today and would have been happy to discuss.

Subject: Ordinance proposal data

Talking points and data

- This is an ordinance we can not guarantee we are able to follow.
- We have been staffing this way since 2023.
- We are violating the ordinance today if it passes and would need to move personnel from their spots.

- If resolution was in place:
  - YTD violations over 250 times.
  - YTD - even if staffing was changed to put 2 paramedics on every rescue, 24 would have been unavoidable. (This removes Station 2 and 3 staffing)
  - Since 2024 -ordinance violations would be over 2,000 violations.
  - Since 2024 - even if staffing was changed to put 2 paramedics on every rescue, 656 violations would have been unavoidable. (This removes station 2 and 3 staffing)

- Field Paramedic positions daily at 141.
    - Backfill needs to be added to numbers for when paramedics are off vacation, sick, FMLA, PLF, or for training. Historically we have used a multiplier of 1.33 to the needed positions to ensure we are able to meet staffing needs. Adding this means we need 187 firefighters assigned to field to ensure coverage on a daily basis.
    - We have 161 paramedics assigned to the field including all Captains.
        - We would still be short 22 paramedics short. This would need to be covered by overtime/support fill.
        - This would cause us to shut down support divisions to ensure staffing is met.
            - Support Paramedics at 30. Includes paramedics in HEART, RMS, Training Academy, Pharmacy, PAO, Professional Development, Alarm, FMO
            - Non paramedic positions support paramedics at 8 (this includes captains who promoted to their positions)
            - Removing captains (ensuring services/departments are not disrupted) gives 5 paramedics that could be reassigned to the field.
            - 2 paramedic lieutenants currently in the field not in the system because they took suppression exam. Moving them to ALS units would violate past practice and policies/CBA.
- Would need to fill shortages with overtime and/or support fill. Support fill is not an option on nights or weekends. Support fill takes personnel from their regular job duties resulting in loss of services.
    - Paramedic support fill last year was 60% of total support fill.
        - Paramedic support fill last year was used to cover 100 shifts in paramedic positions
        - Some non paramedics were used on Rescues/Medic units to equitably utilize support personnel so this number would have been higher for paramedics.
- Average paramedics added each year vary from around15 to 20
- Paramedic Retirements
    - 48 paramedics are currently eligible to retire.
    - 47 paramedics are eligible to retire in the next 5 years.

Thank you,

Jimmy Melek

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

Dear Tanya: Thank you for taking on the job of City Councilor. I'm an elder living with my son and his wife near Lomas and Washington. He's a firefighter and has emailed me relating to the upcoming vote affecting the organization of the department.
I would urge, if possible, to delay passing this change so that further negotiations can take place. It sounds like the firefighters are solidly against this change, and that the conversation has been going on for some time now. Undoubtedly the City Council has budgetary issues to deal with also.
This would be my initial thought, not knowing the details involved.
Thank you again for "stepping up": to the challenge to work through these issues.
Take Care, Walt Epley

Councilors,

I have attached a memo outlining our concerns, compliance issues, and the AFR operational changes that would occur if R-25-122 is passed. Thank you for your time. I am available to address any questions you may have or if you would like more information.

Thank you,

Jimmy Melek
Deputy Chief of Operations
Albuquerque Fire Rescue
11500 Sunset Gardens SW
Albuquerque, NM 87121

Albuquerque Fire Rescue

Emily V. Jaramillo, Fire Chief

To: City Councilors
From: Jimmy Melek, Deputy Fire Chief
Date: March 2, 2025
Re: AFR Operational Changes Overview

It is Fire Administration's stance that we will not have the ability to comply with R-25-122 without increasing rates of force hiring paramedics, shutting down support functions, and using all paramedic captains on Rescues. This in turn will reduce interest in becoming a paramedic and create systemic staffing issues at AFR that will impact operations.

Should R-25-122 pass, Fire Administration would like to detail the immediate negative effects on Albuquerque Fire Rescue's ability to serve the public. Just a single word change from "firefighters" to "paramedics" will have lasting consequences on our ability to address the fire and EMS needs in Albuquerque. AFR will have difficulty complying with R-25-122 and it will place an undue hardship on the paramedics needed to comply with the resolution. Even if AFR exhausts all possible options, AFR cannot guarantee complete and permanent compliance with the resolution. AFR currently has two stations that are staffed with one paramedic on the Engine and one paramedic on the Rescue at Stations 2 (I25 and Gibson) and Stations 3 (Girard and Central). This resolution will immediately impact service delivery to these two districts when the paramedic on the Engine is moved to a Rescue. These districts will lose half of their advanced life support response.

- AFR relies on EMT-Basics to help fill minimum staffing levels on Rescues when we do not have enough paramedics to fill these positions. AFR always maintains a minimum of one paramedic on transport units (Rescues/Medic units).
    - Year to date if this resolution was enacted there would be violations over 250 times where AFR could not staff a transport unit with two paramedics (these includes the transport units at Stations 2 and 3. 24 of these would have been on other Rescues across the City. A violation means a Rescue that was staffed with one EMT and one paramedic.
    - Since January 2024 to date there would be over 2,000 violations if R-25-122 language was in the current resolution (these include the transport units at Stations 2 and Stations 3). 656 of these violations would have been on other Rescues across the City. A violation means a Rescue that was staffed with one EMT and one paramedic

IPRA Response 000819

    - If this resolution passes, a firefighter paramedic would have to be force hired to work an overtime shift to staff a dual medic Rescue, placing a hardship on paramedics. AFR is concerned that this will decrease interest in becoming a paramedic and will perpetuate the current staffing issues with paramedics.

- AFR is currently short 22 paramedic positions in the field. Full field staffing for paramedics is 141.
    - We send an average of 10-20 firefighters to paramedic school per year. This number fluctuates based on interest in paramedic school and slots available at the local colleges. AFR is working with the colleges on more opportunities for training paramedics.
    - 48 paramedics are currently eligible to retire. Another 45 paramedics are eligible to retire in the next 5 years. More paramedics may be able to retire if they have previous time in PERA prior to working for AFR.
    - With projected retirements, AFR is concerned that there will be more vacancies on the Rescues in the next 5 years. If R-25-122 is passed, paramedics will be force hired at higher rates to maintain the two paramedics on the Rescue, again placing a hardship on paramedics that will reduce firefighter interest in paramedic school.
    - Paramedics that work in divisions such as EMS training or HEART and all Paramedic Captains would have to move from their assignments to staff the two paramedic Rescue to maintain these levels. If this were to happen, the divisions would have to be shut down and these services would be lost.

Another consequence of R-25-122 passing is that AFR will not have the paramedic staffing to build both paramedic and intermediate staffing onto Engines. AFR is transporting to hospitals more frequently and when a Rescue is transporting the total out of service time can last up to two hours. This will leave an Engine in district to cover calls and without a paramedic on the Engine, delay critical care to residents who call 911 with life threatening emergencies.

Albuquerque Fire Rescue

Emily V. Jaramillo, Fire Chief

Dear Councilors,

Please find included AFR's response to many of the inaccurate statements made in the staff write-up regarding R-25-122. I would also like to make it clear that I was not contacted by anyone at Council Services to provide information regarding the proposed resolution.

Thank you.

Chief Jaramillo

--

Brief Summary: This bill involves an amendment to R-16-41 enacted in 2016, which established minimum staffing requirements for AFR Engine Apparatus, Rescue Apparatus, Ladder Apparatus, Hazardous Materials Squads, Heavy Technical Rescue Squads, Quality Assurance Units, Battalion Commander Units And Support Divisions. This amendment applies to Rescue Apparatus and is intended to maintain/codify a minimum of two paramedic firefighters per Rescue Apparatus unit, because rescue units that have two firefighters of the highest level of pre-hospital licensure (paramedic) deliver lifesaving aid as swiftly as possible.

AFR Response: There is no existing evidence that having two paramedics on a single apparatus provides a higher level of care, it likely increases treatment delays and slows decision making.

--

This paired paramedic system is a sought-after standard across the country and the City of Albuquerque is able to maintain these same levels of service as other departments across the nation, including departments in Florida, New Jersey, Arizona, and more who also have paired paramedic systems.

AFR Response: AFR is not able to maintain two paramedic Rescues. The most common model across the country and best practice is having departments staff paramedics on both trucks, helping to gain interest in paramedic training. It is more

common to see two paramedics on Rescues in departments that are primary transport agencies, which AFR is not.

--

Analysis:

Residents and visitors of Albuquerque currently receive a two-paramedic response system for emergency medical calls. Removing two-paramedic units in the City is not a new idea, and is something that has been attempted in the past, but has not been widely implemented.

AFR Response: AFR started implementation of single paramedic units in 2021 first through a department-wide survey and committee work, then a pilot program at Stations 14 and 20. In 2023, with support of the Union, AFR implemented single paramedic units at Stations 2 and 3. Based off of the success of this model, AFR is expanding to additional stations in order to provide the quickest response time.

AFR has a triaged dispatch system, ensuring the right resource goes to the right call. This system prioritizes paramedics to emergency medical dispatches or calls with patients. Non-patient calls are primarily handled by other units in the fleet.

· As a case in point: on a windy night in Albuquerque, an AFR Engine may be dispatched to a downed powerline, keeping the public safe and waiting for PNM to arrive. Common emergencies like these that AFR is responsible for but have no patients, like dumpster fires, would waste the paramedic resource, leaving only one paramedic available for medical events in that area.

AFR Response: Having a paramedic on the Engine will provide a higher level of service. An average of 85% of AFR's calls annually are EMS calls. AFR has a much higher chance of having a Rescue tied up on a call for service than having an Engine tied up on a downed power line or dumpster fire.

In EMS situations with patients, AFR's triaged dispatch response also helps protect trucks and crews across the city by more evenly spreading out call volume and ensuring appropriate resource allocation. Through triage, just as in most medical settings, AFR can assess what level of care is most likely necessary to resolve a situation – leaving critical infrastructure available for higher severity calls.

AFR Response: Where possible, one paramedic on Rescue and one on Engine is the right policy. For example, if a Rescue is tied up on a call and another critical call comes out, the Engine would be dispatched with an out of district Rescue. Having a paramedic on the Engine to start initiating care would help provide a paramedic to the patient faster in this situation.

Moving around a same number of paramedics onto different trucks with different functions in the community, in contrast to a methodical triage-based dispatch system, is not an expansion of service - instead, it changes the structure in which the Department ensures delivery of the best service for each call type.

AFR Response: This statement is inaccurate. By moving one existing paramedic on the Engine, AFR doubles capacity to respond to high acuity calls in these districts, thus providing the quickest response time

--

Fiscal Impact: This bill does not have a direct fiscal impact, but if the Administration's proposed change to staffing requirements is implemented, it could impact AFR's internal rank structure, create pay disparities, and other complications.

AFR Response: This statement is incorrect

· No positions are being cut by moving paramedics onto Engines. All rank structure remains the same. Rank is built into positions at stations and will not change.

· Pay is determined in the CBA. In July 2024, a three-year contract started that gives a 15% pay incentive to all paramedics Captain and below and 5% pay incentive to EMT Intermediates Captain and below. This plan will not create pay disparities as this incentive is added into firefighter base pay.

· AFR was able to successfully implement this policy at Stations 2 and 3 in 2023, and the department is well positioned to address any "complications" regarding future implementation.

--

Key Dates: Firefighters would be moved into this alternate system as early as mid-March if no action is taken. These changes to staffing requirements would impact AFR's operations indefinitely, until further policy or administrative instructions are enacted. Comments: None

AFR Response: Staffing is constantly evolving to the needs of the community and department; R-16-41 in its current form has this flexible language needed for serving the community while keeping firefighters safe.

Hello,

I am your constituent for city council, and I am writing to urge you to vote yes on resolution R-25-122. Ensuring optimal staffing of medics on ambulances is critical to make sure they are equipped to handle all emergencies. I have multiple friends that work for Albuquerque fire rescue, and they highly recommend this gold standard of care across Albuquerque. I've needed ambulance care before too, and as a resident of this city hope that anyone who does need this essential service will have the best care possible. Thank you for your consideration.

Councilor Champine,

Thank you for taking the time to speak with me this evening. I've attached the preliminary proposal we touched on during our

conversation. This is something we have wanted for a long time, something that is much needed, and something we are very excited about the possibility of initiating. While it is a rough proposal, hopefully it will give you a sense of our current challenges and the objectives we aim to achieve. Please don't hesitate to reach out if you have any questions or need further clarification. I look forward to continuing our discussion.

Thank you again,

Jimmy Melek

AFR SAR/HTR Collateral

Mission: To support CABQ Open space operations and demands that relate to rescue and EMS in austere environments that the CABQ and immediate areas present. We would like to start a minimum of 2 year pilot program to support a new process of participating in rescues with on-duty resources and call-in option as Fire chief approves. These individuals will have requirements to maintain status within the collateral program. They will supplement on duty resources when needed

Program Objectives

- ✓ 4 season response
- ✓ Support of Dive Operations
- ✓ Support of River Search and Rescue operations
- ✓ Support of other HTR events
- ✓ All weather response
- ✓ Support REM and HTR programs
- ✓ Safety
- ✓ Physical fitness expectation
- ✓ Joint operations with APD Open space
- ✓ Joint operations with valley partners
- ✓ Technical Rescue
- ✓ Rapid Medical stabilization
- ✓ Rapid technical access
- ✓ Integration with local SAR at NMDPS to provide support and receive support
- ✓ Sustainability
- ✓ Provide AFR level of Rescue and EMS service to all locations and to all citizens

Other organization reports for average years:

- APDOS reports 60 callouts a year (handled by just a few units)
- 20 of those are prolonged callouts per year (joint operations)
- Mountain Rescue reports 41 local Callouts a year
- AFR estimates around 30 Wilderness rescues a year
- BCFD estimates 70 callouts a year
- NMSP Estimates 80 Rescues in the Rio Grande valley, their busiest area. Total in the state 300.

Estimate that this program will support approximately 25 prolonged callouts within CABQ and the surrounding area.

It is the recommendation of HTR Program to move forward.

AFR Spec Ops collateral model

13 members are out fitted and trained and compensated for response. Mirroring APD response.

4 seasons capable for response and IMAS.

Increase in REM capability

Shift commanders can Deploy as needed with on duty resources to support operations.

IPRA Response 000829

For 12-member team	
Comp/Overtime	384 CTA hours for training for each year Additional OT/CTA if utilized as a call in
Initial Investment	$4992 for each member, Compete outfit clothing and gear; $64,896 for initial Gear is reusable when members change
Recurring costs	$1700 for new member clothing $1500/year for consumables $EMS supplies as needed
Level of Service	EMS and Rescue services provided 24/7 and mutual aid request able to be honored. Working along side partner agencies for when we need to call on them.

Questions to clarify for moving forward:

- Will there be comp time given for on-call status of 2-4 individuals?
    - No expectation of on-call status during pilot program. If program shows the need and want for this feature will revisit in the future with C-Suite
- Gear issuing
    - Would be tracked
    - More then half the cost per person is reusable for future participants
- Who gets to be on the collateral program?
    - Members must apply to join and meet criteria laid out in the SOG that would be written, reviewed and approved.
    - Physical fitness assessment. If members do not pass at first go they will have up to 6 months to train and complete before being removed from the team
    - Expected to be Rescue operations level or higher and to achieve their Rescue technician level while in the program
    - Quarterly training requirements
    - It also comes with a 2 year participation expectation.
- Will they receive comp time or over time
    - Yes when called out in a off-duty manner pending Chief or Chiefs designee
- Will they be called out on everything?
    - No, will intend on utilizing these members that are on duty first.
    - If the event is a Mutual aid, or large incident they may be called in pending chief approval per event.
- Who will call them out?
    - We can establish the criteria for automatic call out within the Rio Grande metro river valley by Shift commander, spec ops, HTR1. Wilderness rescue event that cannot be handled by on duty resources or inclement weather.
    - Additional criteria for callouts per shift or DCOps. Such as for out of valley, state/federal requests.
- Equipment demands
    - Members will be issued a determined clothing layout that supports year around all-weather response that is not intended for station use, just event callouts and trainings
    - Members will be issued basic PPE for responding to incidents that will allow them be an safe and effective team member
    - Additional specialty equipment or high value equipment will be stored at station 8 where they can access it when needed
- Will this support and work with Open space?
    - Yes, we will share our training opportunities and disciplines

IPRA Response 000830

    - APD will be LE
    - AFR will be medical
    - We both will do rescue
    - We need a LE component to deploy on some National Disasters via IMAC/EMAC requests
- What are the realistic initial investment costs of this?
    - $64,896 for Clothing and Gear to outfit all the team
        - More then half of this is reusable for future members
        - This is Retail cost and is expected to be an over estimate
    - CTA for training: 384 hours/year. Based on 12 members attending 4 trainings/year at 8 hours each
- How will this affect AFR operations
    - Rare shift relief issues
    - Medium Initial investment costs, with low reoccurring costs
    - Program Admin
    - Support responses
    - Increased training
    - Partner relationships
    - Reduce stress on primary responses
    - Test for collateral program needs and alternate response model
- Will this support other AFR divisions?
    - It can if wanted to, for example all members are red carded and can support the REM or Wildland program needs
    - Other callout requests per Shift/Ops requests for those “who knows what to do needs”
    - Large River Searches that span days
    - Other what ifs
- Funding opportunities
    - City council Approach
    - Fire fund grant with State
    - Direct 110 Operations funding

Subject: AFR Operational Changes Update

Good morning City Councilors,

AFR has been working on some very exciting operational changes that we will be implementing in the coming month. I have included a memo with the background and explanation of how these changes are going to improve our service delivery across Albuquerque using existing resources. This is something that I started working on as a Deputy Chief and thus there are years of research and effort that have been put into these changes that are outlined in this memo. Please reach out to me if you have any questions or need more information.

Respectfully,

Emily Jaramillo

To: City Councilors
From: Emily Jaramillo, Fire Chief
Date: February 25, 2025
Re: AFR Operational Changes Overview

Albuquerque Fire Rescue is in the process of implementing critical operational and staffing changes to better serve residents of Albuquerque. These operational changes help AFR ensure that when a resident calls 911 the chance of a paramedic arriving to provide medical care will increase. I have been working on these changes for several years using input from multiple committees, a department-wide survey conducted over two years ago, EMS response data, and best practices in health care delivery. This staffing model will increase AFR's ability to respond with the highest skilled personnel in areas of the community that need it most, using existing resources. In the memo below, I am providing important background information and an explanation of these operational and staffing changes that will increase and improve our response to the community.

AFR is the largest employer of Emergency Medical Technicians (EMTs) in the State of New Mexico. EMTs are recognized at three different levels within AFR, EMT Basic, EMT Intermediate, and EMT Paramedic. These three levels are differentiated by the clinical skills they have been trained to perform.

Our approximately 341 EMT Basics (captain and below) assigned to field operations are trained healthcare professionals who provide basic life support and emergency medical care to patients at the scene of an incident and during transport to the hospital.

An EMT-Intermediate (EMT-I) is a mid-level emergency medical professional who performs advanced medical procedures like intravenous access and delivering advanced medications. They respond to a variety of medical emergencies, including cardiac, trauma, and respiratory emergencies. AFR began recognizing and providing compensation for this level of licensure with our last CBA with IAFF L244, going into effect July 2024. We currently have 31 intermediates assigned to field operations (captain and below). Our goal is to train at least 24 more by the end of 2025, through a collaboration with UNM's EMS Academy.

An EMT paramedic is the highest level of EMT and can perform even more advanced medical procedures. This includes cardiac monitoring, advanced airway device placement and a broader scope of life saving medications. The current IAFF L244 CBA outlines that all paramedics will receive equal compensation for their licensure, regardless of the apparatus to which they are

IPRA Response 000834

assigned. AFR has approximately 161 Paramedics assigned to field operations (Captain and below). This pay goes into effect July 2025.

Historically, AFR has maintained a staffing model that places two paramedics on each transport capable Rescue (AFR Ambulance). We have maintained this model since the inception of Advanced Life Support (ALS) by AFR in the late 1970s-early 1980s and are the only agency (both EMS or fire department) that uses this model. From that time, until 2015, AFR was only licensed as a Medical Rescue through the NM EMS Bureau. This allowed us to transport patients to the hospital but did not allow us to bill for service. During those years, we would typically transport less than 100 times per year.

In 2015 we obtained our certification through the NM Public Regulation Commission as a certificated ambulance provider which allows us to bill for our transports. Albuquerque Ambulance Service (AAS) is our contracted ambulance provider who performs approximately 95%-97% of the total transports for our system. This agreement helps keep AFR Rescues available for response to their assigned districts.

In just the last 5 years, AFR has seen a dramatic increase in the number of transports that we perform:

- *2020: 478 transports*
- *2021: 1,509 transports*
- *2022: 3,263 transports*
- *2023: 2,271 transports*
- *2024: 2,791 transports*

AAS is also facing the impacts of increasing volume and a taxing of resources. AAS transports for the 911 system in the last 5 years is as follows:

- *2020: 52,960 transports*
- *2021: 55,473 transports*
- *2022: 53,177 transports*
- *2023: 52,544 transports*
- *2024: 54,089 transports*

The EMS environment has changed since the inception of our dual medic Rescue model, and we must adapt to ensure we have the ALS resources available for the citizens we serve.

Over a decade ago, the administration tried to start a similar program, and settled with one ALS Engine, Engine 10. This apparatus has been operating with a single paramedic driver and three EMT-Basics for over 10 years. In 2021, we began expanding our service delivery by staffing our Basic Life Support (BLS) engines with paramedics to meet the need. In conjunction with Engine 10, we incorporated Engines 2 and 3, which are now staffed with an ALS provider to help reduce response times for ALS care and provide earlier lifesaving treatments to acutely ill patients in those districts. This was accomplished by moving one paramedic from the Rescue and replacing them with an EMT basic or intermediate, essentially doubling the ALS response capability for units in those districts. This change has proven to be safe and effective in the delivery of quality clinical care. When we made this change, we entered into an MOU with the IAFF L244 to ensure proper pay for members on these apparatus. It is important to note that the staffing levels of

trained firefighters ***remain the same***, four personnel on the Engine and two personnel on the Rescue.

In 2025, AFR is expanding this strategy to four additional stations under the same model while also incorporating an EMT Intermediate level response at five additional engines. Essentially providing 9 total districts with an expanded scope of ALS/ILS level care for the citizens we serve. Our bid process now includes stations 9, 12, 15 and 20 with Paramedic coverage on an engine, by reallocating a paramedic position from the Rescue. Rescues will continue to be staffed with the two firefighters as required by resolution. Our greatest need is at the paramedic officer level, and we can meet this need by utilizing paramedics at the rank of Captain on transport capable units. These stations were selected as areas with the highest need to expand ALS coverage using transport and ALS intervention data.

Stations 8, 11, 14, 16, and 22 will now have an EMT intermediate firefighter assigned, which will allow for an advanced level of care that has never been operationalized within AFR. Not only can these firefighters deliver a higher level of care, but they will also free up paramedic resources who can then respond to higher acuity calls for service. These stations were also selected using data as well as their distance from the core hospitals in downtown Albuquerque.

The primary goal of these changes is to enhance our service delivery to the public. As demands on EMS services in Albuquerque continue to increase, it is critical that we expand the utilization of our current resources of Paramedics and Intermediates to meet this need. These changes will help ensure that there is critical coverage in areas with the highest need, when AAS units are depleted and AFR Rescues are transporting or on task with other emergency calls.

A secondary benefit to these changes is the increased career longevity through job sharing for our members. Many of our paramedics have not had the opportunity to work on engines or ladders and labor has expressed the need for more prospects for job sharing and avoiding the perception of being "stuck" on a rescue for an entire career. With these changes, members who desire more flexibility and jog sharing will have the chance to bid to one these expanded service stations. Other members whose seniority affords them the option, may bid to station that still has the traditional model if that is their preference. As long as a minimum of one paramedic is assigned to a transport capable unit as well as the ALS engine, there are options to rotate between apparatus to ensure that all members are maintaining proficiency in all aspects of fire suppression and EMS service delivery.

Since 2021, these operational changes have bolstered our members interest in paramedic school. In years past, we had to resort to forcing members to attend this yearlong training. The overwhelming consensus was that the prospect of being able to work on any apparatus and not be forced to remain only on a transport capable unit was the deciding factor in their educational development.

Fire Administration has worked on these changes for years, including multiple committees that were comprised of our frontline personnel, a department wide survey that validated the desire of our firefighters to have more flexibility in job choices, as well a thorough analysis of city-wide data to determine the areas with the highest needs for initial expansion.

I understand that our department is complex and there is often clarification needed to fully understand how and why we are making changes. Please reach out with any questions that you

may have related to our EMS staffing changes. We are very excited to use our existing resources to expand ALS coverage for our residents.

To: "Fiebelkorn, Tammy" <tfiebelkorn@cabq.gov>

Dear Councilor Fiebelkorn,

I was made aware today, via the ICC of a measure (R-25-122) for final action at tonight's City Council meeting which appears to be another "rush job".

I am therefore writing to address my concerns about R-25-122. To be clear, I am not writing with a position on this resolution although I regard it as a highly important issue.

I am unable to articulate a position because I can find no evidence to support or oppose it, no public information on response times, AFR staffing levels or quality standards for EMT or paramedic staffing. I cannot identify when this resolution was first read and find no record of any committee hearings on the matter.

Instead, I learned about it from a letter sent to Neighborhood Associations and Coalitions by concern members of Albuquerque Fire Rescue Field Operations.

I can say from personal experience as one of the over 60 constituents in your district, subject by aging to higher likelihood of an emergency event that effectively reducing or restricting the number of EMT carrying emergency vehicle deployable by Albuquerque Fire Dept. does not appear to serve the public interest.

Yet, here it is on tonight's Council agenda as "Immediate Action." What makes this "immediate?" Where is the evidence that a consequential decision is urgent and unable to be subject to public scrutiny before it is put to Council for Final Action?

This is the same dynamic of Council actions seen with O-24-69, another example of the Council and its leadership pushing significant and costly (in $ and possibly public safety) legislation in a manner which virtually prevents public scrutiny or comment.

For that reason, I request that Council defer this matter and ensure publication of the evidence to support the resolution.

Thank you for your time and leadership.

Jaemes Shanley
Mark Twain Neighborhood

- Will there be comp time given for on-call status of 2-4 individuals?
    - No expectation of on-call status during pilot program. If program shows the need and want for this feature will revisit in the future with C-Suite
- Gear issuing
    - Would be tracked
    - More then half the cost per person is reusable for future participants
- Who gets to be on the collateral program?
    - Members must apply to join and meet criteria laid out in the SOG that would be written, reviewed and approved.
    - Physical fitness assessment. If members do not pass at first go they will have up to 6 months to train and complete before being removed from the team
    - Expected to be Rescue operations level or higher and to achieve their Rescue technician level while in the program
    - Quarterly training requirements
    - It also comes with a 2 year participation expectation.
- Will they receive comp time or over time
    - Yes when called out in a off-duty manner pending Chief or Chiefs designee
- Will they be called out on everything?
    - No, will intend on utilizing these members that are on duty first.
    - If the event is a Mutual aid, or large incident they may be called in pending chief approval per event.
- Who will call them out?
    - We can establish the criteria for automatic call out within the Rio Grande metro river valley by Shift commander, spec ops, HTR1. Wilderness rescue event that cannot be handled by on duty resources or inclement weather.
    - Additional criteria for callouts per shift or DCOps. Such as for out of valley, state/federal requests.
- Equipment demands
    - Members will be issued a determined clothing layout that supports year around all-weather response that is not intended for station use, just event callouts and trainings
    - Members will be issued basic PPE for responding to incidents that will allow them be an safe and effective team member
    - Additional specialty equipment or high value equipment will be stored at station 8 where they can access it when needed
- Will this support and work with Open space?
    - Yes, we will share our training opportunities and disciplines

IPRA Response 000844

    - APD will be LE
    - AFR will be medical
    - We both will do rescue
    - We need a LE component to deploy on some National Disasters via IMAC/EMAC requests
- What are the realistic initial investment costs of this?
    - $64,896 for Clothing and Gear to outfit all the team
        - More then half of this is reusable for future members
        - This is Retail cost and is expected to be an over estimate
    - CTA for training: 384 hours/year. Based on 12 members attending 4 trainings/year at 8 hours each
- How will this affect AFR operations
    - Rare shift relief issues
    - Medium Initial investment costs, with low reoccurring costs
    - Program Admin
    - Support responses
    - Increased training
    - Partner relationships
    - Reduce stress on primary responses
    - Test for collateral program needs and alternate response model
- Will this support other AFR divisions?
    - It can if wanted to, for example all members are red carded and can support the REM or Wildland program needs
    - Other callout requests per Shift/Ops requests for those “who knows what to do needs”
    - Large River Searches that span days
    - Other what ifs
- Funding opportunities
    - City council Approach
    - Fire fund grant with State
    - Direct 110 Operations funding

I do NOT support this proposal. We need two EMTs per ambulance call. I know first hand that two EMTs were required to handle an attempted suicide at my home two years ago. Thank God those two EMTs arrived and were trained to handle the situation.

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

Dear Council Member Fiebelkorn,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

IPRA Response 000856

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Because I am speaking as a private citizen and not on behalf of the Union or the Department, my answers may be limited on specific details. However, I am happy to share my perspectives, opinions, and experiences as a high-ranking firefighter paramedic who has also served as an EMS supervisor for multiple years.

Please feel free to call me at (505) 550-0750. I am available all day before the meeting and will do my best to answer any questions you may have.

Thank you for your time and consideration.

Best regards,
Bryan Breeswine

Dear Council President Bassan,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Dear Council Member Pena,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Because I am speaking as a private citizen and not on behalf of the Union or the Department, my answers may be limited on specific details. However, I am happy to share my perspectives, opinions, and experiences as a high-ranking firefighter paramedic who has also served as an EMS supervisor for multiple years.

Please feel free to call me at (505) 550-0750. I am available all day before the meeting and will do my best to answer any questions you may have.

Thank you for your time and consideration.

Best regards,
Bryan Breeswine

Dear Council Member Sanchez,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

Final Thoughts & Open Communication

Important Considerations Regarding Resolution R-122
Enter Your Message Here
Dear Albuquerque City Council Members,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption,

an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Because I am speaking as a private citizen and not on behalf of the Union or the Department, my answers may be limited on specific details. However, I am happy to share my perspectives, opinions, and experiences as a high-ranking firefighter paramedic who has also served as an EMS supervisor for multiple years.

Dear Council Member Grout,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

IPRA Response 000878

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Because I am speaking as a private citizen and not on behalf of the Union or the Department, my answers may be limited on specific details. However, I am happy to share my perspectives, opinions, and experiences as a high-ranking firefighter paramedic who has also served as an EMS supervisor for multiple years.

Please feel free to call me at (505) 550-0750. I am available all day before the meeting and will do my best to answer any questions you may have.

Thank you for your time and consideration.

Best regards,
Bryan Breeswine

Hi Councilors Baca and Lewis,

Chandler here from News 13. I'm reaching out to see if either of y'all may have some time today to do a quick 5-10 minute interview over Zoom or phone to talk about the AFR staffing resolution. We spoke with the fire chief about the resolution and her concerns earlier today and was hoping to get your side. Feel free to reach me at this email address, or phone number provided below. Thank you for any help you can provide in the meantime, and I look forward to hearing from you!

Keep EMTs available
Enter Your Message Here
I recently heard that AFR had increased the number of available EMTs to respond to an incident. I don't know if the controversy is over cost or staffing. I live near Lomas and Tramway and at least once a week there is a serious accident on my corner. With that possibility and the number of over doses and other things happening, I would hope that the most qualified individuals are available to help. I would hope that the city would support helping current employees to meet the highest qualifications possible.
Thank you fo your service to the city.

TWENTY-SIXTH COUNCIL - TWENTY-SEVENTH MEETING

Public Comment Sign Up for March 3, 2025 City Council Meeting

To provide public comments to the Council, in person or virtually, everyone must sign up by 4:00 pm on the day of the meeting by completing this web form: https://www.cabq.gov/mar-3-2025-comment. For members of the public without internet service, you may call our office at 505-768-3100 for assistance.

The Council will take General Public Comment on any topic and on the meeting's specific agenda items, from up to a maximum of 30 people, on a first-come first-serve basis. Per Council rules, persons signing up to speak before the Council can sign up for General Public Comment and up to two agenda items per meeting. If speaking on a specific agenda item, comments must be germane to the item. Participants will have a maximum of 2 minutes to present, but the time limit can be lowered, per discretion of the Council President.

General Public Comment is near the beginning of the meeting. If you sign up to speak on a specific agenda item, your name will be called when that item is heard.

CITY OF ALBUQUERQUE
CITY COUNCIL

TO: All Councilors

FROM: Isaac Padilla, Director of Council Services
Kevin Morrow, Deputy Director/General Counsel
Julia Coulloudon, Senior Associate Counsel
Jennifer Brokaw, Associate Director of Budget and Finance
Clarissa Gonzales, Council Financial Manager
Jeff Hertz, Council Special Projects Analyst
Laura Rummler, Council Budget Analyst
Abigail Stiles, Senior Council Policy Analyst
Chris Sylvan, Neighborhood Liaison
Dawn Marie Emillio, Policy Analyst
Nathan Molina, Policy Analyst
Matthew Cox, Council Planner

SUBJECT: Staff Write-ups for Council Meeting on Monday, March 3, 2025

DATE: February 28, 2025

---

8. CONSENT AGENDA:

Item A. **EC-25-296** **Approval of Contract for Forensic Interview Solutions LLC** (Chris Sylvan)

[Consent to Withdraw - Withdrawn by Administration]

Item B. **EC-25-297** **Mayor's Recommendation of Award for Fiscal Agent Bank Services & Other Banking Services** (Clarissa Gonzales)

Brief Summary: This Executive Communication requests approval for the Mayor's Recommendation of Award for RFP-2024-551-DFA-EV, which is for "Fiscal Agent Bank Services & Other Banking Services." The approval would allow the Department of Finance and Administration to negotiate with Wells Fargo and enter into a new contract for banking services, as the current contract with Wells Fargo expires December 15, 2025. If not approved, the City would need to extend the current contract and undergo a lengthy re-solicitation process.

Analysis: The project is necessary because the City's current contract with Wells Fargo for fiscal agent services expires December 15, 2025, and a new contract is required. The new contract will cover services like safekeeping, depository services, merchant services, and treasury management.

IPRA Response 000905

Fiscal Impact: Estimated annual cost is $150,000, funded by the General Fund. The current FY 2025 budget has allocated $106,000 for this purpose. Interest and investment earnings could reduce fees. The City can earn interest on deposits, with $6.1 million earned in FY 2024 from liquidity investments.

Key Dates: Contract End Date of Current Fiscal Agent: December 15, 2025.

Question: How will the $44k between the estimated annual cost and what is currently budgeted be covered?

Answer: The $150,000 mentioned is an estimate for the annual fees. City of Albuquerque will not have a definitive number until a contract is finalized with Wells Fargo moving forward.

Item C. **EC-25-320** **FY25, Quarter 2, Office of the City Clerk IPRA Backlog Reduction Plan Report** (Kevin Morrow)

Brief Summary: This EC presents a report of the progress the City Clerk has made to reduce the backlog of IPRA requests that are over 30 days old. The report indicates that there has been a decrease of about 20 such requests in the second quarter of FY 25 from approximately 1150 to approximately 1128. The report also details a 4-part strategy to reduce the number of requests in the backlog.

Analysis: The Clerk's proposed strategy is to: 1) increase staffing levels; 2) reach out to and work with the most frequent requesters; 3) improve the process for responding to requests; and 4) digitize more records to reduce the types of requests, which require manual review and production.

Additionally, the report indicates there's been a 7% reduction in IPRA requests between Q4 of FY24 and Q1 of FY25 but the backlog has been reduced by more than 23%, a significant reduction when compared to the reduction of requests.

Fiscal Impact: None

Key Dates: None

Comments: The report also provides details about the significant increase in IPRA requests received. It says the City received 14,123 requests in FY 24, up from approximately 4500 in 2017. The report also details policy concerns relating to time consuming redaction that are now required by statute and/or case law. The report also details the breakdown of requests by City department. The top three departments were APD with 70% of the requests, Planning with 12% and AFR, which received 5**%** of IPRA requests.

Item D. **EC-25-321** **Q2 FY25 ABQ RIDE Quarterly Security Report with APD, ACS, and Metro Security Data** (Jeff Hertz)

IPRA Response 000906

Brief Summary: The Executive Communication contains a submission of ABQ RIDE's third Quarterly Security Data for Q2 FY/25 as required by O-22-47. The Ordinance requires quarterly statistics reports on calls for service to ABQ RIDE motorcoaches, Sun Van paratransit vehicles, and the bus stops and stations of the City of Albuquerque Transit Department. The EC contains comprehensive security data tables required by O-22-47 and includes ABQ RIDE security data and incident reports from the Albuquerque Police Department, Albuquerque Community Safety, and Albuquerque Metro Security. This report includes data from *October through December 2024* (reporting was due February 1, 2025 and was verified by each Department prior to submission).

With this being the *third quarterly security report* submitted to Council, these Departments now have *three* data sets to compare to assess the impact of the Departments' new multi-pronged approach to addressing security issues.

Analysis:

- The EC is the result of an effort by Council to require the City to professionalize its Transit Security Data System. Transit Security data is now collected by Metro Security using a CAD dispatching and security reporting software to create call data bases.
- Per O-22-47, Section C(a)(1-4) each quarterly security data report shall include the following data.
  - Calls for service made to the Metro Security Division, the Albuquerque Police Department, and the Albuquerque Community Safety Department.
  - Categorization of the total number of calls for service by type of incident as classified in the Federal Bureau of Investigation's Uniform Crime Reporting System.
  - Number and types of calls for service by route, including on motorcoaches, paratransit vans, at bus stops and transit facilities. (As noted later in this Analysis section, since many bus stops are servicing multiple routes, this complicates statistics when reporting by route.)
- *Across the three quarterly periods (from April 2024 – December 2024), there has been an overall shift in the way that these three City Departments are responding to security calls (away from Metro and towards APD and ACS).* More specifically, there has been an overall:
  - Increase in Class A and Class B APD Reports (including an increase in APD calls for service at bus stops and facilities).
  - Increase in Class A ACS Reports at bus stop and transit centers)
  - Decrease in Class A and Class B ACS Reports (including an increase in ACS calls for service at bus stops and transit facilities).
  - Decrease in Class A and Class B Metro Reports (including an increase in Metro calls for service at bus stops and facilities).
- More specifically, there has been an:
  - Increase in total calls over each three-month period from 3929 to 7044 (79% increase).
  - Increase in reactive calls over each three-month period from 1526 to 2336 (53% increase).
  - Increase in proactive calls over each three-month period from 2403 to 4708 (96% increase).
  - Increase in Class A APD Reports over each three-month period for activities like vandalism (1 to 8), aggravated assault/battery (3 to 5), and fight in progress (2 to 4).

IPRA Response 000907

- Increase in Class B APD Reports over each three-month period for activities like Patrol watch/proactive (557 to 891), onsite suspicious (227 to 1198), and tac plans (7 to 328).
- Increase in Class A ACS Reports at bus stops and transit centers over each three- month period for activities like unsheltered individuals (37 to 52), welfare checks (5 to 8), and wellness checks (17 to 33).
- Decrease in Class A Metro Reports over each three-month period for activities like assault (4 to 3), battery (4 to 2), and narcotics (64 to 12).
- Decrease in Class B Metro Reports over each three-month period for activities like security checks (1846 to 1596), intoxicated (34 to 17), and encampments (11 to 10).
- Increase in events for APD by bus stop (857 to 4317) and facility (259 to 454).
- Increase in events for ACS by bus stop (29 to 54) and transit centers (50 to 59).
- Decrease in events for Metro by bus stop (291 to 80) and facility (2330 to 2024).

- Looking more specifically at the changes in calls for service during this current (third) quarterly reporting period:
  - Total calls per agency from October to December 2024: 1) increased for APD from 1295 to 1798 (but many of these calls are “Proactive” calls that are precautionary before an incident takes place), 2) decreased by more than half for ACS (from 51 to 21), and 3) decreased from 840 to 621 for Metro.
  - From October to December 2024, total monthly proactive calls across all agencies increased from 1447 to 1831. Total monthly reactive calls across all agencies decreased from 739 to 609.
  - APD Class A calls for service related to the following types of calls decreased from October to December 2024: Vandalism (from 3 to 2), Aggravated Assault/Battery (from 3 to 1), Fight in Progress (from 2 to 1), Sex Offense (from 1 to 0), Narcotics (from 1 to 0).

Fiscal Impact: The Cover Analysis for this EC indicated that there is no direct additional cost to the City associated with this EC. It should be noted, however, that the City Council and Administration jointly sponsored the creation of a 24/7 Metro Security Communications Center with eight FTEs and CAD/RMS with a three-fold intent: increase officer safety, improve response time/efficiency and improved data collection. *At the time that the second quarterly report was submitted to Council, Transit had not purchased any additional software or increased personnel. Council staff reached out to Transit to get an update on this as part of the third quarterly report but has not yet heard back.*

Key Dates:

- Per O-22-47, the Transit Department is required to submit security reports to Council on a quarterly basis starting the 4th quarter of FY24. The reporting periods and reporting deadlines for all four of the quarterly reports are as follows:
  - EC-24-193 was the first quarterly security report submitted to Council and accounted for April, May, and June 2024. The reporting deadline was August 1, 2024.
  - EC-24-257 was the second quarterly security report submitted to Council

IPRA Response 000908

and accounted for July, August, and September 2024. The reporting deadline was November 1, 2024.

- EC-25-321 is the third quarterly security report submitted to Council and accounts for October, November, and December 2024. The reporting deadline was February 1, 2025.
- The fourth quarterly security report submitted to Council will account for January, February, and March 2025. The reporting deadline will be May 1, 2025.

Comments:

- It was reported that APD and ACS do not yet supply bus data, but it appears that this will be done in the future.

Questions and Answers: While working on this writeup, Council staff followed up with Transit with the following questions listed below. Transit responded on 2/27 with the following answers (in italics):

- To follow up on the question initially posed from the second quarterly report, what efforts are underway to address the duplication in data reporting between Transit, APD and Metro Security?
  - *ABQ RIDE is in the process of creating a Transit Safety and Security Analysis Coordinator that will be responsible for the collection of all ABQ RIDE, APD, ACS, and Metro Security Data. In addition to collecting the data, this position will also develop one single report to be used for decision making and trend analysis.*
- To follow up on the question initially posed from the second quarterly report, are there any updates on the status of purchasing additional software or increasing personnel (per the Council and Administration's jointly sponsored creation of a 24/7 Metro Security Communications Center with 8 FTE's and CAD/RMS?)
  - *Currently ABQ RIDE relies on APD and Metro to report through their MARC 43 RMS system. At this time ABQ RIDE is not seeking to purchase additional software. In addition to APD Transit Safety Officers (TSO's), ABQ RIDE uses metro at the ATC (6 officers 24/7) as well as Metro Mobile units when TSO's are unavailable. As we continue to increase our TSO position count, both contracted security and Metro security usage should decline, and we will be more reliant on APD reporting.*
- What is the progress of the implementation of the Long-Range Security Plan? Have any of the recommendations included in the Plan been implemented? Are any of the recommendations going to be proposed in the upcoming FY26 Operating Budget?
  - *The Long-Range Security Plan study was completed December 31, 2024. Implementation of the study has begun. To date we have created and filled the Community Safety Ambassador, our official title for this position is Volunteer Coordinator, who is in the process of rolling out the ABQ RIDE Ambassador Program to launch in April 2025; The department is creating a Safety and Security division within Transit including the Creation of the Transit Safety and Security Oversight Manager and the Transit Safety and Security Analysis Coordinator (we plan to make both of these positions budget neutral). We are continuing to work with Parametrix on the implementation of the Long-Range Security Plan; to include the development of SOP's and streamlining data. For the FY26 operating budget we have requested to move funds from fuel savings to continue funding contracted security, with the intent of fully funding the TSO program while reducing contracted security during FY26.*

IPRA Response 000909

Item E. **EC-25-322** **Mayor's appointment of Mr. James D. Souter to the Metropolitan Parks and Recreation Advisory Board** (Dawn Marie Emillio)

Brief Summary: A retired salesman, Jim has a working knowledge of construction as well as experience in developing and controlling budgets. Currently, Jim serves as the president of the Vista Del Norte Alliance, acting as a liaison between the alliance and the City. Jim also represents the alliance as a member of the Council District 4 Coalition. A resident of Council District 4, Mr. James D. Souter will serve the remainder of an unexpired term as the Council District 4 representative; his partial term will expire on September 30, 2025.

Board Description: The Metropolitan Parks & Recreation Advisory Board was established by City Ordinance § 10-1-2-1. This Board is an eleven-member board charged with recommending policies to the Mayor for overall development of the park system. This includes plans for additional parks and recreation facilities involving the joint-use concept with Albuquerque Public Schools and ways and means of financing improvements. Members must be residents of the City and able to attend the monthly meetings.

Current Membership:

Representing	Name	Term	Council District
At Large	Mr. Tony R. Johnson	9/30/2022	3
At Large	Ms. Valerie L. Martinez	9/30/2026	8
Council District 1			
Council District 2	Ms. Julie A. Radoslovich	9/30/2025	2
Council District 3	Dr. Anna N. Nelson	9/30/2025	3

Council District 7	Ms. Cynthia D. Serna	9/30/2024	7
Council District 8			
Council District 9	Mrs. Fredrica K. Bergquist	9/30/2025	9

Item F. **EC-25-323** **Mayor's appointment of Ms. Marie Elizabeth Eszenyi to the Library Advisory Board** (Dawn Marie Emillio)

Brief Summary: Marie Eszenyi is an Albuquerque professional with a background in education and advocacy. Originally from the northern Virginia area, Marie Eszenyi graduated with a B.S. in Communication Studies, a B.A. in Philosophy and Religion, and an M.A. in Communication & Advocacy from James Madison University. After teaching at the university level for many years, she entered the business arena - first in insurance providing workers' compensation policies to assist individuals involved in workplace accidents. She is currently an executive board member (Treasurer) for The Children's Hour - a nationally syndicated children's radio program based in Albuquerque and a big sister in the Mentor 2.0 program with Big Brothers and Big Sisters of Central New Mexico.

IPRA Response 000910

A resident of Council District 4, Ms. Eszenyi will serve as the District 4 representative; her first term will expire on July 31, 2028.

Board Description: The Library Advisory Board was established by City Ordinance § 10-6-1. The Board acts as a liaison between the community and its government to: keep itself informed of library needs and to serve as a forum for discussion; recommend to the Mayor and County Commissioners policies for overall development to include plans for additional library facilities, and ways and means of financing improvements; and to encourage the greatest use of library facilities and programs. The Board consists of two members appointed by the Mayor, nine appointed by the City Council (one from each district), and four members who are appointed by the County Commissioner.

Current Membership:

Library Foundation	Ms. Julia Clarke		2

Item G. **EC-25-324** **Mayor's appointment of Mr. Gabe Gomez to the Arts Board** (Dawn Marie Emillio)

Brief Summary: Gabe Gómez's first poetry collection, The Outer Bands, won the Andres Montoya Poetry Prize and was published by the University of Notre Dame Press in 2007. The book focuses on his experiences and those affected by Hurricane Katrina. His second collection of poetry, The Seed Bank, was published by Mouthfeel Press, who will also publish his third book, Samsara at Quantum Zeno, in 2024. He completed his bachelor's degree in creative writing at the College of Santa Fe. He earned a master's degree in fine arts from Saint Mary's College of California. Gabe has taught at institutions such as Tulane University, the University of New Orleans, and the Institute of American Indian Arts. Gabe is pursuing an Executive MBA at the UNM Anderson School of Management, and he is expected to graduate in the Class of 2024. He serves as the Managing Director of Marketing and Communications at the University of New Mexico

IPRA Response 000911

Foundation and is the editor-at-large for TABLE Magazine New Mexico, where he covers topics related to food, wine, and New Mexico's cultural heritage. Additionally, Gabe is the President of the American Marketing Association, New Mexico Chapter.

A resident of Council District 4, Mr. Gabe Gomez, will replace Mr. Woody Duncan as the Council District 4 representative; his first term will expire July 31, 2027.

Board Description: Established by City Ordinance § 10-5-3, the central objective of the Albuquerque Arts Board is to "promote and encourage private and public programs to further the development and public awareness of, and interest in, the visual arts and fine crafts and cultural properties." This eleven-member board includes people widely known for their professional competence and experience in the visual arts, and knowledgeable lay persons. Each member serves a staggered three-year term. The central responsibility of each member is to serve as Board liaison to Artwork Planning Committees. The full Board makes selection recommendations to the Mayor.

Current Membership:

Representing	Name	Term
1. At Large		
2. At Large	Dr. Bernadine M. Hernandez	7/31/2025
3. District 1		
4. District 2	Ms. Cara Gordon Potter	7/31/2025
5. District 3		
6. District 4	Mr. Woody Duncan	7/31/2024
7. District 5		
8. District 6		
9. District 7	Mr. Caleb Ferganchick	7/31/2027
10. District 8	Ms. Charlotte Coulombe Shoenmann	7/31/2024
11. District 9	Ms. Dorothy Stermer	7/31/2023

Item H. **EC-25-325** **Presentation of FY24 Audit** (Jennifer Brokaw)

Brief Summary: Pursuant to Section 6-66-2L NMSA 1978 and the Office of the State Auditor requirements, the NM Department of Finance Local Government Division requires a copy of the governing body's resolution acknowledging the Fiscal Year 2024 audit findings and accepting management's responses for correcting the findings.

Analysis: The City of Albuquerque's Annual Comprehensive Financial Report (ACFR) presents a narrative overview and analysis of the financial activities for the fiscal year ended June 30, 2024. Below are key financial highlights from the report:

- The City's net position grew by $88.6 million, reaching $3.7 billion by fiscal year-end, while the unrestricted net position was $(689.0) million as if June 30, 2024.
- As of June 30, 2024, the City's governmental funds had a total fund balance of $954.1 million, with $73.4 million available for discretionary spending. (sum of unassigned and assigned fund balance)
- As of June 30, 2024, the General Fund balance was $95.8 million, with unassigned balance of $26.7 million, representing 3.4% of total expenditures of $781.3 million.

IPRA Response 000912

- The City's enterprise funds' net position grew by $42.0 million, reaching $836.1 million as of June 30, 2024.
- The City's governmental long-term obligations rose by $139.5 million, driven by a $147.4 million pension obligation increase, a $43.7 million rise in bonds and notes payable, offset by decreases of $5.5 million in claims reserves and $46.8 million in OPEB obligations.

Fiscal Impact: There is no fiscal impact associated with this EC.

Comments: There were 19 findings noted in the FY/24 Audit. Nine out of the 16 findings noted in FY23 were resolved.

Item I. **OC-25-30** **Re-Appointment of Joshua Hoffman CFE to the Urban Enhancement Trust Fund Citizens Committee for District 4** (Dawn Marie Emillio)

Brief Summary: Raised in Albuquerque, Joshua Hoffman graduated from La Cueva High School and later from the University of New Mexico with a bachelor's degree in art history. After graduation, Mr. Hoffman moved to London, England, where he earned a master's degree in Contemporary Art History with an emphasis on technology-based art. After living and working in the United Kingdom for three years, he moved with his long-time partner, Elizabeth, to Minneapolis, Minnesota, where he worked as an analyst at Wells Fargo's main campus. Soon after he was married, he moved back to Albuquerque to be closer to family and friends. After nearly a decade of working in various financial and accounting positions and earning several professional certifications, Mr. Hoffman began working for the State of New Mexico as a Certified Fraud Examiner in the Tax Fraud Investigations Division of the Taxation and Revenue Department, where he remains today.

A resident of Council District 4 and currently serving as the UETF's Vice Chair, Mr. Hoffman will represent his District on the committee. His second term will expire on February 1, 2026.

Board Description: The Urban Enhancement Trust Fund (UETF) is a public endowment created by the Albuquerque City Council in 1983. UETF is a two-year program with planning, application, review, and selection process. UETF supports projects that enhance and enrich Arts and Culture for city residents. The UETF ordinance provides for an eleven-member board called the UETF Board that is responsible for establishing guidelines. The UETF Board, with Staff input, develops criteria for project selection for each two-year granting cycle, and are responsible for reviewing and scoring each proposal.

10.	District 8		
11.	District 9		

Item J. **R-25-118** **Approving The First Amendment To The South Campus Tax Increment Development District Formation Resolution (Council Bill No. F/S R-21-202 / Enactment No. R-2021-072), Regarding TIDD Governance (Rogers)** (Julia Coulloudon)

Brief Summary: This resolution proposes to amend the South Campus Tax Increment Development District Formation Resolution to (1) change the composition of the TIDD Governing Body by making the City Councilor for District 6 the default representative of the City Council; and (2) allow all TIDD Board members to designate an alternate person to serve in their absence.

Analysis: The South Campus TIDD Board is currently comprised of five members:

1. A representative of Lobo Development Corporation designated by the Board of Regents;

2. A representative of the University of New Mexico designated by the Board of Regents;

3. A representative of the City Council designated by the Council;

4. A representative of the City Administration designated by the Mayor; and

5. The Secretary of the New Mexico Department of Finance and Administration or the Secretary's designee.

The representative designated by the City Council has previously been the Director of Council Services.

When the TIDD Formation Resolution was first adopted, the TIDD boundaries included areas within two City Council Districts: District 2 and District 6. Following the 2020 US Census and the City's redistricting process, the TIDD falls entirely within the boundaries of District 6. This Resolution proposes to amend the TIDD Governance section of the Formation Resolution to make the City Councilor for District 6 the default member representing the City Council.

This Resolution would also allow any of the five members of the TIDD Board to designate an alternate person to serve in their absence during specified meetings. Any alternate would be permitted to vote the member's proxy on any motions requiring approval.

Fiscal Impact: n/a

Comments: The complete TIDD Formation Resolution can be found here: F/S R-21-202.

IPRA Response 000914

Bill History: At FGO on 2/10/2025, this bill received a unanimous “do pass” recommendation and no amendments or substitutes were moved.

13. APPROVALS:

Item A. **EC-25-291** **Mayor's appointment of Ms. Marie E. Coleman to the Old Town Portal Market Advisory Board** (Nathan Molina)

Brief Summary: Ms. Marie Coleman owns Church Street Cafe in Albuquerque and has years of experience in running restaurants. She excels in managing operations, leading staff, and planning finances. Ms. Coleman builds strong community relationships and boosts sales, which has improved customer engagement and service quality. She knows how to plan strategically, control costs, and motivate her team, making her an expert in small business operations.

Ms. Marie Coleman lives in Council District 2 and will take over the role of Merchant/Property Owner representative on the Board, replacing Dr. Sylvia M. Ramos. Her first term will last until June 1, 2027.

Board Description: The Old Town Portal Market Advisory Board was established via Section §13-3-2-7 of the City of Albuquerque Code of Ordinances. The Board advises the Mayor and City Council regarding policies regulating the vendors, issuance of permits, and rules and regulations for the safe administration of §§ 13-3-2-1 et seq. The Old Town Portal Market Advisory Board is comprised of five members, two who are merchants or property owners in Old Town, two who are vendors, and one at large member.

Comments/Questions: None

Current Membership:	**Name**	**Term**
1. At Large	Mrs. Dana D. Sherrill	6/1/2025
2. Merchant/Property Owners	Dr. Sylvia M. Ramos	6/1/2024
3. Merchant/Property Owners	Ms. Charlene G. Kalbfell	6/1/2024
4. Vendors	Ms. Marylin Moquino	6/1/2025
5. Vendors	Mrs. Dagney Townsend	6/1/2026

Item B. **EC-25-317** **Early Head Start Quarterly Board Report for July 2022 through December 2024** (Abigail Stiles)

Brief Summary: This report is not truly a report, but rather a download of documents of information from the Early Head Start program from July 2022 to December 2024. The collection of documents includes attendance sheets, monthly manager’s reports, meeting minutes from Early Head Start Policy Council Meetings, Monthly Program Information Summaries, caseload and enrollment reports, and monthly center-based and home-based reports.

Analysis: The report’s cover page and analysis indicate the report is required by Councill Bill No. O-14-16, however this is incorrect as the Ordinance was amended in 2018 to

IPRA Response 000915

completely replace the section in O-14-16 regarding reports by the committee. Council Bill O-14-16 established the Early Head Start Governance Advisory Committee, and O-18-4 later amended its structure, reducing the required members from seven to five and allowing quarterly meetings instead of monthly ones. The updated ordinance also mandated that the committee review quarterly reports prepared by program staff for the Mayor and City Council. These reports were to include summaries of program performance, school readiness progress, enrollment and attendance data, family engagement activities, and financial information, including subsidies from federal, state, and local sources.

No advisory committee has been active since at least 2019. Although quarterly reports for the Early Head Start program were produced until October 2022, there is no indication that the Governance Advisory Committee ever reviewed them.

Past reports generally followed the ordinance's structure, including enrollment updates, summaries of Early Head Start Policy Council meetings (a separate entity from the Governance Advisory Committee), attendance data, financial details, and aggregate performance metrics.

However, the current report lacks quarterly breakdowns, summary information, analysis, or progress indicators. While it includes Policy Council meeting minutes, it does not synthesize the information. Instead, it is merely a collection of documents without meaningful interpretation.

Fiscal Impact: NA

Key Dates: This "report" covers the time from June 2022 to December of 2024.

Comments:

- This EC does not appear to fulfill the requirements of the Early Head Start Program Governance Advisory Committee Ordinance.
- The City's EHS program has faced numerous challenges over the years, leading to the creation of advisory committees and mandated reports. In 2018, reports of substandard facilities and lack of oversight prompted changes to the advisory committee structure and the implementation of quarterly reporting. The program also struggled to retain teachers and students during the height of the COVID-19 pandemic, and those struggles have continued.
- A key challenge has been teacher recruitment and retention. EHS teachers must meet credentialing requirements similar to those of Albuquerque Public Schools (APS) teachers, but legislative increases in public school salaries have made EHS salaries uncompetitive. Additionally, program leaders have noted that many teachers prefer working with toddlers over infants, further complicating hiring efforts. The City's lengthy hiring process has also deterred potential candidates, who often accept other positions before completing the process. As a result, several EHS sites have closed in recent years, with no plans for reopening. The most recent closures include:
  - **Singing Arrow** (2021)
  - **La Mesa** (2022)

IPRA Response 000916

- **Western Trail** (2023)
- **MacArthur** (2024)

- A number of non-profits operate successful Early Head Start programs in the City. Should the City review having these non-profits assume the City's Early Head Start program?

Item C. **EC-25-318** **Request Authorization of Social Service Agreement with Family Endeavors, Inc, d/b/a Endeavors to Provide Recovery-Focused Services to Individuals Overcoming Opioid Use Disorder and co-occurring Substance Use Disorder** (Abigail Stiles)

Brief Summary: The City of Albuquerque's Department of Health, Housing, and Homelessness issued **RFP-2025-645-HHH-RM** to secure an operator for the Gateway Recovery Community. Family Endeavors, Inc. was awarded the contract to provide housing and support services for up to 50 single adults in early recovery from substance use disorders. The agreement, funded by opioid settlement funds appropriated through **Resolution R-24-29,** spans up to three years with a potential total of $8.1 million, including a prorated first-year allocation of $1.12 million for services from February 1 to June 30, 2025. The department seeks City Council approval for this initiative.

Analysis: This EC outlines an agreement between the City of Albuquerque and Endeavors, a nonprofit organization based in San Antonio, Texas. The agreement focuses on providing recovery-focused shelter services for up to 50 individuals overcoming substance use disorder at the Recovery Gateway micro-community.

Daily services focus on goal setting, coping skills, and stress reduction through group and individual counseling. The micro-community operates 24/7 with at least three shelter care staff per shift. Additional services include intake/discharge coordination, meal distribution, welfare checks, custodial duties, safety monitoring, transportation, and coordination with onsite clinical staff for recovery support. This contract is for site management and care coordination, but the provider will work with other local agencies for substance abuse treatment services.

Fiscal Impact: The known source of funding for this contract, the Opioid Settlement Funds, were appropriated from Fund 201 to HHH's predecessor (the Family and Community Services Department) through R-24-29 which appropriated $5 million to the project. However, the contract approved through this EC is not to exceed $8,100,000 over three years, and this does not account for site construction. From the contract quantities it appears that HHH intends to expend more than the $5,000,000 available from the Opioid funds, but the Department does not in the EC identify how the expenses exceeding $5 million will be paid.

Key Dates: If this EC is approved, the contractor's services will begin on February 1, 2025, and continue through June 30, 2025. The contract may be extended for up to three years, with the second year running from July 1, 2025, to June 30, 2026, and the third year from July 1, 2026, to June 30, 2027.

IPRA Response 000917

Comments:

- In October of 2024 the Administration introduced EC-24-242, which requested authorization of appropriated funds for a social service agreement with Endeavors to provide recovery-focused shelter services to individuals overcoming substance use disorder. Due to questions about procurement, the EC was withdrawn in early December of 2024. Since then, **RFP-2025-645-HHH-RM was solicited and** Endeavors, Inc. was awarded the contract.
- The Gateway to Recovery micro community is located off 3401 Pan American Freeway NE, south of Comanche. Construction for the housing began mid-October.
- This bill passed at FGO on February 10th.

Question:

- What is the estimated cost to renovate the facility that the contractor will occupy?
- What are the fund sources that will be debited to pay for this contract including any construction costs?

14. FINAL ACTIONS:

Item A. **O-24-63** **Repealing Chapter 11, Article 1, Parts 1 And 2 Related To Nuisance Abatement And Replacing It With A New Nuisance Abatement Ordinance (Grout, by request)** (Matthew Cox)

Brief Summary: This ordinance repeals the existing ordinance and replaces it fully. A large part of this ordinance is making the code more efficient through deletion of unnecessary language and addition of language that speeds up the enforcement process. It also brings in other nuisance and enforcement ordinances such as the noise ordinance, food sanitation, humane and ethical animal rules and treatment, etc. (all found on page 3). This also includes any acts or omissions that would be deemed a public nuisance under common law. In this way, all enforcement ordinances fall under the same general rule, eliminating questions of different enforcement processes.

A major change is the elimination of the Temporary Restraining Order provisions. These provisions were complicated and seldom used. This has been replaced in part by allowing for the closure of a business for up to 30 days by administrative hearing. Temporary restraining orders may still be sought in compliance with the New Mexico Rules of Civil Procedure.

Additionally, the fines were increased from $200 at the first notification, $300 at the second notification and $500 at the third notification, to instead making all violations punishable with a $500 fine. The fine is required to be paid in 30 days and violators do have a payment plan option if they can demonstrate hardship, low-income status or indigent status.

Analysis: This ordinance defines “Imminent Hazard,” which was used in the former code but undefined. Imminent hazards are ones that create an immediate and articulable risk of serious injury or death and allow the City to immediately abate a nuisance without

IPRA Response 000918

following the notice provisions. This will help City staff act on dangerous issues immediately.

The ordinance deletes unnecessary definitions like personal property, property, contraband and criminal street gang.

Under Section 11-11-14 Lien for Judgements, it clarifies that the City may initiate the foreclosure process and start the recording with Bernalillo County. The City has always had the ability to start this process, but now this language reaffirms it for clarity purposes.

Fiscal Impact: A FIA was not provided with the ordinance, so it is unclear as to how the fee increase and quicker process will affect the Planning Department or General Fund.

Amendments from Council Meeting 2/3/2025: O-24-63 was amended a number of times at the February 3rd City Council Meeting. The first amendment was to add language that a daily fine of $500 shall only be imposed in the case of an imminent hazard. Imminent Hazard is defined in the ordinance as "a condition where creates an immediate and articulable risk or serious injury or death to persons in the vicinity."

The second amendment strikes through the Weed and Litter Ordinance from the list of relevant ordinances within Article 11. The Councilor's reasoning behind this amendment was to remove the Weed and Litter Ordinance from the list of ordinances that fall under the "Public Nuisance" status if three or more violations occur within 3 months. If someone or their property is deemed a public nuisance that are open to possible jail time.

The third amendment added the language "In no instance shall allowing individuals to camp of store their belongings on private property be deemed a public nuisance," as well as "No person shall be in violation of this ordinance if the nuisance designation is based solely on allowing individuals to camp or store their belongings on private property." These amendments were for the purpose of ensuring that Article 11 is not used to criminalize or punish unsheltered members of our community.

Key Dates: The ordinance would go into effect five days after publication.

Comments: This ordinance has no whereas clauses to clarify the purpose of repealing and amendments.

Item B. **O-25-70** **C/S Amending Ordinance Chapter 2, Article 6, Part 1 Relating To Public Boards, Commissions, And Committees (Bassan)** (Julia Coulloudon)

Brief Summary: This bill proposes to create a new Public Boards, Commissions, and Committees Advisory Task Force ("Task Force") in the City's existing Boards and Commissions Ordinance. The stated purpose of the Task Force is to ensure effective functioning and governance of all City boards, committees, and commissions by conducting annual reviews of ordinances to ensure they remain relevant, efficient, and responsive to the needs of the City. The Task Force would conduct reviews on a rotating three-year cycle and would provide a report of its findings and recommendations,

IPRA Response 000919

including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year.

At FGO, this bill was substituted and amended. The CS leaves the Task Force portion of the bill unchanged but adds two new components within the Boards and Commissions Ordinance: (1) Procedures for appointments to boards that require a Councilor submit two names to the Mayor and the Mayor selects from the two; and (2) new Decorum, Code of Conduct, and Social Media Policies for all Boards and Commission members.

Analysis:

Task Force: The Task Force would be an advisory board tasked with annually reviewing the City's many Boards, Commissions, and Committees by evaluating their effectiveness, structure, and compliance with current policies. The Task Force would consist of four City employees: two members appointed by the Council and two members appointed by the Mayor. Members would serve two-year terms. The Task Force would review 1/3 of the City's Boards, Commissions, and Committees each year to ensure that each entity is reviewed once every three years. For each entity, the Task Force shall:

1. Review the delegation of powers and legal authority for the entity;
2. Assess the effectiveness, structure, and roles of the entity;
3. Evaluate whether any boards, commissions, or councils should be consolidated, eliminated, or modified;
4. Solicit feedback from City support staff and current members, as needed; and
5. Prepare a report of the Task Force's findings and recommendations, including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year.

The Task Force must hold its first meeting within 45 days after all appointments have been made, will elect a Chair at its first meeting, and must meet at least once annually. The City Clerk will provide administrative support and resources to the Task Force.

Appointment Procedures: The approved CS added procedures for appointments to boards that require a Councilor submit two names to the Mayor and the Mayor selects the from the two. The CS codifies the existing process where the Mayor notifies Council of vacancy and provides applicants; the Councilor has 60 days to send two recommended names back to the Mayor; then the Mayor has 30 days to pick from the two and recommend them to Council for final advice and consent. The CS adds that if the Councilor fails to submit two names within 60 days, then the Mayor gets to make the appointment, subject to the advice and consent of the Council. The CS also added that if the Councilor doesn't receive more than one applicant from the Mayor's office, and no one else applies for 3 months following the notification of vacancy, then the Councilor can send just one name to the Mayor. An amendment was approved at FGO that reduced this timeframe from 3 months to 45 days. So, if a Councilor only receives one qualified applicant for an open position with a *45-day period*, the Councilor may submit one name to the Mayor and the Mayor shall submit that name to the Council for final advice and consent.

Decorum, Code of Conduct, and Social Media Policies: The approved CS adds a new section that is applicable to all City Boards, Commissions, and Committees regarding

IPRA Response 000920

Decorum, Code of Conduct, and Social Media Policies for members. These policies are based on the CPOA Board Policies and Procedures that were approved by the Council last fall (OC-24-23).

Fiscal Impact: None

Key Dates: The Task Force would conduct reviews on a rotating three-year cycle and would provide a report of its findings and recommendations, including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year. This bill would go into effect five days after publication by title and general summary.

Bill History: At FGO on 2/10/2025, a Committee Substitute was approved and one amendment to the CS was passed. A Blueline of the amended CS is on OneDrive. FGO voted unanimously to send to the full Council with a recommendation of *Do Pass, as Substituted, as Amended*.

Item C. **R-25-116** **Adjusting Fiscal Year 2025 Appropriations For The Marijuana Equity And Community Reinvestment Fund 202 (Peña, by request)** (Laura Rummler)

Brief Summary: This resolution adjusts Fiscal Year 2025 appropriations by appropriating $4,020,000 to the Marijuana Equity and Community Reinvestment Fund 202 under the Department of Finance and Administrative Services (DFAS). The fund supports programs aimed at equitable community reinvestment and expanding opportunities for populations historically impacted by marijuana criminalization. While formalizing the appropriation, the resolution lacks detailed implementation strategies or measurable program outcomes.

Analysis: The Marijuana Equity and Community Reinvestment Fund 202 is projected to generate $4.02 million annually through marijuana tax revenue. This resolution appropriates the projected amount to DFAS.

Ordinance O-23-87, codified as § 4-12, outlines the fund's permissible uses, including drug education, recovery programs, workforce development, technical assistance for small businesses, and re-entry programs for those impacted by marijuana criminalization. Oversight is assigned to DFAS in coordination with the Office of Equity and Inclusion (OEI), with a focus on benefiting disproportionately impacted communities.

The administration provided the following breakdown of allocations for the $4.02 million:

- Evidence-based drug education, awareness, and prevention programs for youth: $549,000 (14%).
- Evidence-based substance use treatment for youth, including inpatient detoxification: $1,271,092 (31%).
- Recovery housing and supportive aftercare: $179,908 (5%).
- Supplemental income programs & Workforce development/job training: Included in OEI programming ($2,010,000 total for these and other equity initiatives) (50%).
- Technical assistance for small marijuana business owners: $0
- Programs for people re-entering after incarceration: $0

IPRA Response 000921

The administration also provided an implementation timeline:

- Guaranteed Income Disbursements to families from Whittier & Carlos Rey Elementary Schools: First payments begin within one month of fund appropriation and continue for three years.
- Job Training ABQ participants to receive funding by June 2025.
- Programs targeting opportunity youth to receive funding by September 2025.
- OEI's Office of Financial Empowerment to oversee implementation and reporting.
- Health, Housing & Homelessness (HHH) will establish or amend contracts to address ordinance-identified needs.

The administration also confirmed that if Fund 202 revenues fall short of projections, programmatic elements will be revised accordingly.

Certain eligible uses under the ordinance, such as technical assistance for small marijuana businesses and re-entry programs for formerly incarcerated individuals, have been left unfunded.

The administration answered by pointing out that the ordinance makes a suggested use of funding, not a requirement, "The list includes small marijuana business owners and people re-entering society after incarceration along with six other items listed. OEI chose to focus on other purposes and related programs on the list… Given the falling price of marijuana and the lower than projected revenues, utilizing these particular funds for technical assistance would not make as great an impact as more upstream interventions to remediate harms caused by the criminalization of marijuana, such as a guaranteed income projects which affect outcomes such as housing, basic need acquisition, and public safety."

The resolution and administrative cover analysis provide limited information on fund distribution or oversight mechanisms. While the ordinance allows flexibility for various programs, the resolution does not specify which initiatives will be prioritized or how success will be measured. The provided cover analysis states, "The appropriation of funds enables City of Albuquerque stakeholders to provide administration and programming to benefit those harmed by marijuana prohibitions," without identifying who these "stakeholders" are. The clarification was provided per questions from Council Staff by the administration's Government Affairs team.

Fiscal Impact: Appropriates $4,020,000 in projected marijuana tax revenue to Fund 202 for Fiscal Year 2025.

No additional funding sources or fiscal details are provided. The resolution does not specify procedures for handling unspent funds in the event of program delays or underutilization.

Comments: The Finance and Administrative Services Department will oversee fund allocation, with input from the Office of Equity and Inclusion. However, transparency regarding fund distribution and reporting remains unclear.

IPRA Response 000922

There is no explanation for why certain eligible program areas under the ordinance such as technical assistance for small marijuana business owners and re-entry programs are receiving no funding.

The administration has confirmed that the Cannabis Equity Tax Guaranteed Income Program will serve families from Whittier & Carlos Rey Elementary Schools, foster care youth aging out of the system, and workforce development participants. The administration provided that MOUs are in place for key stakeholders and contracts are pending appropriation for community organizations.

Committee recommendation: Recommendation of Do Pass.

Questions: Follow-up questions were sent on Monday, Feb. 24, after the FGO meeting. Council Services received the following answers from Government Affairs.

- *Who are the stakeholders listed in the MOUs for the Cannabis Equity Tax Guaranteed Income Program?*
    - Albuquerque Public Schools
    - United Way of North Central New Mexico (UWNCNM)

- *Will the City be issuing contracts for the community organizations administering these programs, or will the Albuquerque Foundation (One Albuquerque Fund) oversee fund distribution?*
    - One Albuquerque will disburse funding to UWNCNM who will serve as fiscal agent for guaranteed income program.

- *What criteria were used to determine the percentage of funding allocated to each program category?*
    - O-23-87 guidance
    - Community input/ Landscape analysis
    - Existing work and CABQ staff capacity

- *Why were no funds allocated to technical assistance for small marijuana business owners or re-entry programs for formerly incarcerated individuals, despite their inclusion in the ordinance?*
    - The ordinance states “The Marijuana Equity and Community Reinvestment Fund may be used for the administration and provision of any or all of the following purposes and related programs…” The list includes small marijuana business owners and people re-entering society after incarceration along with six other items listed. OEI chose to focus on other purposes and related programs on the list.
    - Because there are currently 339 Cannabis Control Division licenses in Albuquerque. Given the falling price of marijuana and the lower than projected revenues, utilizing these particular funds for technical assistance would not make as great an impact as more upstream interventions to remediate harms caused by the criminalization of marijuana, such as a guaranteed income projects which affect outcomes such as housing, basic need acquisition, and public safety.
    - Formerly incarcerated individuals will benefit from the current programming.

- *How will the administration ensure accountability in fund distribution, particularly*

IPRA Response 000923

for the guaranteed income program?

- The guaranteed income program will keep accurate record of participants.
- Disbursement of guaranteed income program funding will be facilitated by UWNCNM.
- UWNCNM will deliver monthly and quarterly reports on operational excellence to ensure timely and accurate distribution of funds.

- *If revenue projections fall short, what specific criteria will be used to determine which programs receive reduced funding*?
  - Priority will be given to works in progress and those that support the needs of at-risk youth.

Item D. **R-25-122** **Establishing minimum staffing requirements for Albuquerque Fire Rescue, Rescue Apparatus (Lewis, Baca)** (Jeff Hertz)

[Immediate Action Requested]

Brief Summary: This bill involves an amendment to R-16-41 enacted in 2016, which established minimum staffing requirements for AFR Engine Apparatus, Rescue Apparatus, Ladder Apparatus, Hazardous Materials Squads, Heavy Technical Rescue Squads, Quality Assurance Units, Battalion Commander Units And Support Divisions.

This amendment applies to Rescue Apparatus and is intended to maintain/codify a minimum of two paramedic firefighters per Rescue Apparatus unit, because rescue units that have two firefighters of the highest level of pre-hospital licensure (paramedic) deliver lifesaving aid as swiftly as possible.

This paired paramedic system is a sought-after standard across the country and the City of Albuquerque is able to maintain these same levels of service as other departments across the nation, including departments in Florida, New Jersey, Arizona, and more who also have paired paramedic systems.

This bill is in response to the Administration's proposed change to reduce the number of paramedics on Rescue Apparatus to one paramedic.

There are four directives in this bill and only one amendment (inclusion of the word "paramedic"):

1. With the exception of temporary exigencies or emergencies, as determined by the Chief, the City of Albuquerque will continue the policy and practice of staffing rank-specific firefighters to all Engine apparatus with a minimum of four (4) firefighters, Rescue apparatus with a minimum of two (2) **[paramedic]** firefighters, Ladder apparatus with a minimum of three (3) firefighters, Hazardous Materials Squads with a minimum of two (2) firefighters, Heavy Technical Rescue Squads with a minimum of four (4) firefighters, Quality Assurance Units with one firefighter, and Battalion Commander Units with one (1) firefighter.
2. The City of Albuquerque will continue to staff firefighters in the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division with adequate staffing levels.

IPRA Response 000924

3. That as the size of the City and call volume for Albuquerque Fire Rescue increases thereafter, the City of Albuquerque shall increase the number of apparatus with categorical staffing levels maintained, and increase firefighter staffing levels of the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division.

4. That in the event of staffing modifications recommended by the Chief, the City of Albuquerque and Albuquerque Area Fire Fighters IAFF Local 244 must meet and confer prior to amending.

Analysis:

- Residents and visitors of Albuquerque currently receive a two-paramedic response system for emergency medical calls. Removing two-paramedic units in the City is not a new idea, and is something that has been attempted in the past, but has not been widely implemented.
- AFR has a triaged dispatch system, ensuring the right resource goes to the right call. This system prioritizes paramedics to emergency medical dispatches or calls with patients. Non-patient calls are primarily handled by other units in the fleet.
    - As a case in point: on a windy night in Albuquerque, an AFR Engine may be dispatched to a downed powerline, keeping the public safe and waiting for PNM to arrive. Common emergencies like these that AFR is responsible for but have no patients, like dumpster fires, would waste the paramedic resource, leaving only one paramedic available for medical events in that area.
- In EMS situations with patients, AFR's triaged dispatch response also helps protect trucks and crews across the city by more evenly spreading out call volume and ensuring appropriate resource allocation. Through triage, just as in most medical settings, AFR can assess what level of care is most likely necessary to resolve a situation – leaving critical infrastructure available for higher severity calls.
- Moving around a same number of paramedics onto different trucks with different functions in the community, in contrast to a methodical triage-based dispatch system, is not an expansion of service - instead, it changes the structure in which the Department ensures delivery of the best service for each call type.

Fiscal Impact: This bill does not have a direct fiscal impact, but if the Administration's proposed change to staffing requirements is implemented, it could impact AFR's internal rank structure, create pay disparities, and other complications.

Key Dates: Firefighters would be moved into this alternate system as early as mid-March if no action is taken. These changes to staffing requirements would impact AFR's operations indefinitely, until further policy or administrative instructions are enacted.

Comments: None

Item E. **R-25-124** **Amending The Adopted Capital Implementation Program Of The City Of Albuquerque By Supplementing Current Appropriations. Be It Resolved By The Council, The Governing Body Of The City Of Albuquerque (Baca, Sanchez)** (Laura Rummler)

IPRA Response 000925

[Immediate Action Requested]

Brief Summary: This resolution reallocates $500,000 in capital funding from the Ken Sanchez Indoor Sports Center to the Albuquerque Rail Trails project.

Analysis: The transfer of funds between these projects is permissible, as both were approved under the 2022 New Mexico Gross Receipts Tax Improvement Revenue Bonds Series. A total of 16 projects were approved by C/S R-22-34 for this series.

Fiscal Impact: This resolution decreases capital funding for the Ken Sanchez Indoor Sports Complex while increasing funding for the Albuquerque Rail Trails project. However, it does not alter the total funding allocated under the 2022 New Mexico GRT Bond.

Comments: This reallocation maintains financial support for the Ken Sanchez Indoor Sports Complex in District 1 while further funding the Rail Trails project in District 2.

Item F. **P-25-7** **Adopting A Proposition To Be Sent To The Voters At The 2025 Regular Local Election, Proposing To Repeal Article XI, Section 7 Of The Charter Of The City Of Albuquerque Regarding A Public Vote On Performing Arts Center (Baca)** (Julia Coulloudon)

Brief Summary: This bill proposes to submit a City Charter amendment question to the voters at the City's regular local election to be held on November 4, 2025. An amendment to the City Charter proposed by the Council must be approved by a vote of a majority of all Councilors plus one (6 votes).

If approved by the Council and the voters, this Charter amendment would repeal a provision that states that before the City can appropriate funds for a performing arts center, a majority of voters must approve the proposed performing arts center in a municipal election.

Analysis: This bill would remove the following text from the City Charter:

~~[Section 7. PUBLIC VOTE ON PERFORMING ARTS CENTER.~~
~~The city shall not appropriate funds for a performing arts center costing more than ten (10) million dollars without prior approval of a majority of votes cast on the proposed performing arts center in a municipal election. The city may, however, appropriate funds to study, to analyze the feasibility of, and to undertake preliminary design of any such center prior to the election required by this section.~~]"

This provision was originally added to the Charter in 1991.

Fiscal Impact: n/a

IPRA Response 000926

Key Dates: Article VI, Section 3 of the City Charter requires the Council to hold at least two public hearings prior to its vote on the proposed Charter Amendment. The Council may revise the proposed amendment as a result of suggestions and recommendations made at the first public hearing, but if such a revision is made at the second of the two public hearings, the Council shall hold a third public hearing on the proposed Charter amendment. Any revisions made shall be posted along with the notice of the next meeting after a review by the City Attorney to ensure the summary is still accurate after the revision.

1. The first public hearing was the **February 19, 2025,** City Council meeting. No amendments were made to the bill.
2. The second public hearing will be the **March 3, 2025,** City Council meeting. If no amendments are made to the bill at this meeting, the Council may take a final vote on the bill on March 3. If the bill is amended at this meeting, the Council must defer the bill and hold a third public hearing before final action.

State law requires that ballot question resolutions be submitted to the County Clerk not less than seventy days before the election. (*See* "companion resolution" R-25-119). P-25-7 and R-25-119 must be approved by the Council no later than August 26, 2025 (70 days before the November 4, 2025, election), including time for required hearings and to resolve any possible veto of the companion resolution.

The State's Local Election Act, NMSA 1978, Section 1-16-3 provides the following:

B. Whenever a local government ballot question is to be submitted to the voters of a local government on a general election or regular local election ballot, not less than seventy days before the election at which the ballot question is proposed to be submitted to the voters, the local government shall file a resolution proposing the ballot question with the county clerk of each county containing any precinct in which votes may be cast for or against the local government ballot question. Not less than sixty-seven days before the election, each county clerk shall certify the local government ballot question to the secretary of state.

Item G. **R-25-119** **Adopting A Proposition To Be Submitted To The Voters At The Next Election To Be Held In The City Of Albuquerque Concerning An Amendment To Article XI, Section 7 Of The Albuquerque City Charter; Providing The Form Of The Question And The Designation Clause For Such Question On The Ballot (Baca)** (Julia Coulloudon)

Brief Summary: This bill is the "companion resolution" to P-25-7, which proposes an amendment to the City Charter. If P-25-7 is approved by the Council, this Resolution directs the City Clerk to place the proposal on the next regular local election ballot. Voters of the City of Albuquerque will be permitted to vote "for" or "against" the proposition at the November 4, 2025 election.

Analysis: This Resolution is required by State law to implement P-25-7 if it is approved by the Council. When a local government ballot question is to be submitted to the voters, State law requires the local government to file a **resolution** proposing the ballot question

IPRA Response 000927

with the county clerk. This Resolution creates the form of the question and the summary of the Charter Amendment that will be placed on the ballot. This Resolution must mirror the language in P-25-7, including any amendments.

Fiscal Impact: n/a

Key Dates: Article VI, Section 3 of the City Charter requires the Council to hold at least two public hearings prior to its vote on the proposed Charter Amendment. The Council may revise the proposed amendment as a result of suggestions and recommendations made at the first public hearing, but if such a revision is made at the second of the two public hearings, the Council shall hold a third public hearing on the proposed Charter amendment. Any revisions made shall be posted along with the notice of the next meeting after a review by the City Attorney to ensure the summary is still accurate after the revision.

1. The first public hearing was the **February 19, 2025,** City Council meeting. No amendments were made to the bill.
2. The second public hearing will be the **March 3, 2025,** City Council meeting. If no amendments are made to the bill at this meeting, the Council may take a final vote on the bill on March 3. If the bill is amended at this meeting, the Council must defer the bill and hold a third public hearing before final action.

State law requires that ballot question resolutions be submitted to the County Clerk not less than seventy days before the election. P-25-7 and R-25-119 must be approved by the Council no later than August 26, 2025 (70 days before the November 4, 2025, election), including time for required hearings and to resolve any possible veto of the companion resolution.

The State's Local Election Act, NMSA 1978, Section 1-16-3 provides the following:

B. Whenever a local government ballot question is to be submitted to the voters of a local government on a general election or regular local election ballot, not less than seventy days before the election at which the ballot question is proposed to be submitted to the voters, the local government shall file a resolution proposing the ballot question with the county clerk of each county containing any precinct in which votes may be cast for or against the local government ballot question. Not less than sixty-seven days before the election, each county clerk shall certify the local government ballot question to the secretary of state.

Comments: This Resolution should be kept on the same legislative timeline as P-25-7. Because P-25-7 requires at least two hearings before final action, this Resolution will need to be deferred to ensure it reaches final action at the same time.

15. OTHER BUSINESS: {Reports, Presentations, and Other Items}

Item A. EC-25-330 Line-Item Veto of R-25-112: Amending The Adopted Capital Implementation Program Of The City Of Albuquerque By Approving New Projects, Supplementing

IPRA Response 000928

Current Appropriations And Changing The Scope Of Existing Projects (Kevin Morrow)

Summary: This EC vetoes the line item below:
Line 17, Ken Sanchez Indoor Sports Complex GRT Interest $1,000,000

Comments: Overriding the veto would require a vote in favor by at least six councilors. A veto override must be heard at the next regularly scheduled meeting following a veto.

If Council does not override the veto, the $1,000,000 would return to the GRT Activity Account. The $500,000 that was allocated to the Rail Trail would need to be appropriated by the Council.

The EC included a draft resolution that would allocate $500,000 from an unspecified City Council set aside to be used for the Ken Sanchez Indoor Sports Complex. That resolution is not a consideration for a potential veto override but is a proposal by the administration that could be considered by the Council at a future meeting.

Fiscal Impact: This EC has no direct fiscal impact because the funds expended would be reallocated.

Important Dates: This veto override would become effective immediately following the meeting.

Having a paramedic on site when I call 911 for my child's three lung diseases has been life saving and life changing for our entire family and our friends. We have to call frequently for emergency intervention for my child to breathe and then get supportive care to the hospital. I have loved the extraordinary support we've received from emergency services here and across the city over the years. Other cities are loads better, though, but they don't have the doctors we have at UNMH. I moved here from the East Coast, and Boston Children's Hospital because of UNMH. We've been to hospitals all over the country. Please don't put my child's life in jeopardy! Feel free to reach out if I can help anymore.

I am writing to ask you to oppose R-22-122. Why does AFR get to have two Paramedics in a busy system when the rest of the state doesn't and gets by just fine? It is way more efficient and has better outcomes, response times, and availability of Paramedics if they are spread out throughout the city/county system.
I worked in Valencia Co. for a year and have since been in a Bernalillo Co. system. I have been in EMS since 2011 and a Paramedic since 2012. I worked in Bernalillo Co. with Albuquerque Ambulance Services (AAS) just under seven years with the rest of my experience & currently at UNMH. I have seen the volume of calls grow, to this day.
I feel like AFR should split up their Paramedics a long time ago. It would have helped with response times, avoiding delays in transport, and help with the shortage of Advanced Life Support (ALS) Paramedics. Also, in my opinion, AFR splitting their Paramedic's will even out their workload. Many times a district will get multiple ALS calls. So, two Paramedics from a district respond, along with AAS. If that same district gets another ALS call, two Paramedics from ANOTHER district have to back fill and then leave their district WITHOUT two Paramedics. It would make more sense, and fall in line with

the rest of the state and country, where you "divide and conquer", so to speak. This allows for faster response times for critical calls in all fire districts. The same districts you and your loved ones live in.

Speaking to the shortage of Paramedics, a possible outcome of allowing EMT-I's to work more closely with a Paramedic may encourage them to become Paramedics with in our community and alleviate this problem even more.

So, as a citizen & an EMS provider I strongly oppose this antiquated system of two Paramedics per Rescue. When one per Rescue and one per Engine would be much more efficient, safer for the people in need of emergency services, and help an already taxed system.

Respectfully and thank you for your time,

Jeremy Pecotte

Dear Councilman Baca,

I have registered to speak via Zoom against R-25-122 at tonight's Albuquerque City Council meeting. I was encouraged to do so after receiving an email from Jimmy Melek, Deputy Chief of Field Operations, Albuquerque Fire Rescue imploring Albuquerque residents to oppose R-25-122. I urge you to oppose this legislation if you have not already done so.

Sincerely,

Cynthia Seyb

Ms Bassan,

We are contacting you in regards to Resolution 122 which will be discussed and potentially voted on Monday March 3.

We urge you to vote yes on this resolution. It is vitally important to clarify the wording of the 2016 resolution to insure two paramedics are retained on each AFR Rescue unit.

The 911 system is set up to triage each call and dispatch the level of critical care necessary for each call. The rescue units with 2 paramedics need to attend to the most critical of these cases. One paramedic and one EMT on a Rescue truck does not provide the same level of expertise that would be necessary on these critical calls. Two paramedics on a Rescue unit is a proven effective combination to save lives.

We urge you to stand by Firefighters who know through experience what works best in the field.

Sincerely,
David and Linda Klosterman

Vote AGAINST R-25-122
Enter Your Message Here
The bill R-25-122 means that AFR will not be able to get a paramedic on every call in these districts, or it will take longer. These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field. Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

Reckless legislation like this directly impacts the people we took an oath to serve.

Paramedics are essential to providing life saving help.

Subject: Urge to stand with Firefighters and pass R-122
Importance: Normal
Sensitivity: None

Councilor Fiebelkorn,

As a recently retired paramedic officer in Albuquerque Fire Rescue, I am writing you today to urge you to stand with the rank-and-file firefighters and pass Resolution R-122, mandating that all AFR Rescue Units remain staffed with two paramedics to ensure the highest quality of care.

I figure that tonight's council meeting will be filled with many members of AFR who are on the front lines every day fighting back against an out of touch Fire Chief who is attempting to change the operations of AFR using 'data' that she has never provided to back up her claims, as well as citing a paramedic staffing shortage crisis that leads AFR to have to trade the 'Cadillac system' of EMS in for a pinto. The issue, however, is that her inexperience and willingness to skew data make for a deadly combination that will only weaken the current EMS system for our community.

Fire Chief Jaramillo was quoted in the press release about these operational changes saying "As a paramedic for almost 20 years…" Fire Chief jaramillo may have been a practicing paramedic, but she has not actually practiced in well over a decade. In her less than twenty year career with AFR, the majority of that time was spent in 'support divisions', not in the field responding to emergency calls. It doesn't surprise me that she depends on data to come up with her plans- she is not able to think of our community in a humanistic way because it has been so long since she responded to an emergency call.

Fire Chief Jaramillo will undoubtedly bring up the issue of the paramedic staffing shortage. The problem with this, is that AFR currently has over 30 paramedics assigned to 'support divisions', where they are collecting a paramedic paycheck and not actually practicing or responding to calls, exactly how Chief Jaramillo did in her career. Many of the jobs these paramedics are doing could be done by any firefighter. For instance, AFR has paramedics in professional development, recruiting, Fire Marshall's office, and public affairs. If the staffing shortage was so critical, these personnel should have been reassigned back to the field to help with the shortage. But Chief Jaramillo would rather completely revamp the whole operational structure of AFR and keep the favored paramedics in positions where they can continue to are bilk the system, just as she did.

Because chief Jaramillo is attempting this change so quickly, she is setting her firefighters up for failure. There has not been any attempt to ensure paramedic Drivers remember the vital job duties on an engine. The pump calculations on the fireground are critical to get our firefighters water at a correct pressure. If a driver hasn't pumped in many years, the community will be less safe. Fire Chief Jaramillo has not attempted to give the personnel refresher training to make sure this is successful. She is rushing this change, and our community will be less safe because of it.

I recently retired because I did not want to practice diluted paramedicine in one of the country's busiest

departments. If Fire Chief jaramillo is successful in this change, I will not be the last paramedic to jump ship, and this will lead to an actual palpable paramedic shortage. I urge you to stand with the rank-and-file firefighters who respond to emergencies on a daily basis, and not with an out of touch Fire Chief who hasn't seen a truck in over a decade. Those on the streets know better. Please pass Resolution R-122, mandating that all AFR Rescue Units remain staffed with two paramedics to ensure the highest quality of care.

Regards,
John C.

I figure that tonight's council meeting will be filled with many members of AFR who are on the front lines every day fighting back against an out of touch Fire Chief who is attempting to change the operations of AFR using 'data' that she has never provided to back up her claims, as well as citing a paramedic staffing shortage crisis that leads AFR to have to trade the 'Cadillac system' of EMS in for a pinto. The issue, however, is that her inexperience and willingness to skew data make for a deadly combination that will only weaken the current EMS system for our community.

Fire Chief Jaramillo was quoted in the press release about these operational changes saying "As a paramedic for almost 20 years…" Fire Chief jaramillo may have been a practicing paramedic, but she has not actually practiced in well over a decade. In her less than twenty year career with AFR, the majority of that time was spent in 'support divisions', not in the field responding to emergency calls. It doesn't surprise me that she depends on data to come up with her plans- she is not able to think of our community in a humanistic way because it has been so long since she responded to an emergency call.

Fire Chief Jaramillo will undoubtedly bring up the issue of the paramedic staffing shortage. The problem with this, is that AFR currently has over 30 paramedics assigned to 'support divisions', where they are collecting a paramedic paycheck and not actually practicing or responding to calls, exactly how Chief Jaramillo did in her career. Many of the jobs these paramedics are doing could be done by any firefighter. For instance, AFR has paramedics in professional development, recruiting, Fire Marshall's office, and public affairs. If the staffing shortage was so critical, these personnel should have been reassigned back to the field to help with the shortage. But Chief Jaramillo would rather completely revamp the whole operational structure of AFR and keep the favored paramedics in positions where they can continue to are bilk the system, just as she did.

Because chief Jaramillo is attempting this change so quickly, she is setting her firefighters up for failure. There has not been any attempt to ensure paramedic Drivers remember the vital job duties on an engine. The pump calculations on the fireground are critical to get our firefighters water at a correct pressure. If a driver hasn't pumped in many years, the community will be less safe. Fire Chief Jaramillo has not attempted to give the personnel refresher training to make sure this is successful. She is rushing this change, and our community will be less safe because of it.

I recently retired because I did not want to practice diluted paramedicine in one of the country's busiest departments. If Fire Chief jaramillo is successful in this change, I will not be the last paramedic to jump ship, and this will lead to an actual palpable paramedic shortage. I urge you to stand with the rank-and-file firefighters who

respond to emergencies on a daily basis, and not with an out of touch Fire Chief who hasn't seen a truck in over a decade. Those on the streets know better. Please pass Resolution R-122, mandating that all AFR Rescue Units remain staffed with two paramedics to ensure the highest quality of care.

Regards,
John C.

Ms Bassan,

We are contacting you in regards to Resolution 122 which will be discussed and potentially voted on Monday March 3.

We urge you to vote yes on this resolution. It is vitally important to clarify the wording of the 2016 resolution to insure two paramedics are retained on each AFR Rescue unit.

The 911 system is set up to triage each call and dispatch the level of critical care necessary for each call. The rescue units with 2 paramedics need to attend to the most critical of these cases. One paramedic and one EMT on a Rescue truck does not provide the same level of expertise that would be necessary on these critical calls. Two paramedics on a Rescue unit is a proven effective combination to save lives.

We urge you to stand by Firefighters who know through experience what works best in the field.

Sincerely,
David and Linda Klosterman

Dear Councilor,

As a resident of Albuquerque and a strong supporter of public safety, I urge you to vote **yes** on **Resolution R-25-122** to support our firefighters.

Our firefighters have made it clear that having **two paramedics on rescues** ensures the highest level of service and safety for our community. We trust their expertise, and it is crucial that we protect this standard of care.

Please vote **yes** to uphold this essential protection.

Respectfully,
Alexandra Gibson

I am writing to ask you to oppose R-22-122. Why does AFR get to have two Paramedics in a busy system when the rest of the state doesn't and gets by just fine? It is way more efficient and has better outcomes, response times, and availability of Paramedics if they are spread out throughout the city/county system.
I worked in Valencia Co. for a year and have since been in a Bernalillo Co. system. I have been in EMS since 2011 and a Paramedic since 2012. I worked in Bernalillo Co. with Albuquerque Ambulance Services (AAS) just under seven years with the rest of my experience & currently at UNMH. I have seen the volume of calls grow, to this day.
I feel like AFR should split up their Paramedics a long time ago. It would have helped with response times, avoiding delays in transport, and help with the shortage of Advanced Life Support (ALS) Paramedics. Also, in my opinion, AFR splitting their Paramedic's will even out their workload. Many times a district will get multiple ALS calls. So, two Paramedics from a district respond, along with AAS. If that same district gets another ALS call, two Paramedics from ANOTHER district have to back fill and then leave their district WITHOUT two Paramedics. It would make more sense, and fall in line with

the rest of the state and country, where you "divide and conquer", so to speak. This allows for faster response times for critical calls in all fire districts. The same districts you and your loved ones live in.

Speaking to the shortage of Paramedics, a possible outcome of allowing EMT-I's to work more closely with a Paramedic may encourage them to become Paramedics with in our community and alleviate this problem even more.

So, as a citizen & an EMS provider I strongly oppose this antiquated system of two Paramedics per Rescue. When one per Rescue and one per Engine would be much more efficient, safer for the people in need of emergency services, and help an already taxed system.

Respectfully and thank you for your time,

Jeremy Pecotte

Dear Councilman Baca,

I have registered to speak via Zoom against R-25-122 at tonight's Albuquerque City Council meeting. I was encouraged to do so after receiving an email from Jimmy Melek, Deputy Chief of Field Operations, Albuquerque Fire Rescue imploring Albuquerque residents to oppose R-25-122. I urge you to oppose this legislation if you have not already done so.

Sincerely,

Cynthia Seyb

Hello, my name is Maurice and I have worked in Albuquerque system as a first responder for 11 years. It is in best interest that paramedics be placed on rescues and engines to help keep a paramedic available. If a rescue gets a call, it has potential to take two paramedics out of service, leaving the station and neighborhood without ACLS coverage. Thank you

As a retired RN, I know the significance of having knowledgeable first responders. Abq citizens need to have these first responders with more education answering our calls for help. Please vote to oppose the legislation R-25-122. We need to retain the Gold Standard as it stands today.

Hello:

I am writing to speak out regarding te R-25-122 proposal that will be voted on very soon. There is no way I would support reducing the staff of paramedics and EMT people for the city of Albuquerque. From what I have learned about this, it seems that city council members are not prioritizing the safety and well-being of Albuquerque residents. We are living in a state that has serious problems with drought and a high risk of fire. Why would anyone support reducing the staff of paramedics and EMT folks?

Cordially,
Carmela Lanza

My ABQ Councilor Baca and your Policy Person Molina,

Please DO Ncut back on **AFR not being able to get a paramedic on every call in these most needed districts.... it will take longer**. "Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills. This staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country. "

I oppose R-25-122. Thank you for listening to me. J

Councilor Fiebelkorn,

I am reaching out to voice my concerns about the process of R-25-122 being introduced and possible vote on such short notice with the exclusion of the Fire Chief from the conversation which is a clear violation of R-16-41, Section 4, which requires a meet and confer for all changes.

For some context on R-16-41 and R-25-122, I urge you to watch Chief Downey speak at the council meeting when R-16-41 was amended and passed in 2016. Chief Downey spoke on the amendment and how it provided flexibility for staffing in the future. That dialogue resulted in the amendment that removed "paramedic" from resolution and replaced it with "firefighter".
The full video is available here and contains the very relevant dialogue between council, the CAO, 244 President and the Fire Chief.

https://cabq.granicus.com/player/clip/151?view_id=2&redirect=true

The amendment of R-16-41 removed the language that resolution R-25-122 is trying to put back in. The Fire Chief at the time met with each councilor prior to the vote over a course of 30 days, about why the ammendment was required and why the paramedic language was not supported. Why would Labor and Council leave the Chief out of the conversation this time? Section 4 of R-16-41 clearly states any changes require a meet and confer. The CAO was also involved in the conversation of R-16-41 and acknowledged the separation of powers argument.

Maybe there is a valid explanation and I am no lawyer, but on the surface this process appears to be problematic. This example also highlights why the Fire Chief should have been involved in this process. This issue deserves way more attention and scrutiny than an immediate action vote.

I tried to include a screen recording but the file
was too big. If you have any questions please reach out to me. 505-321-6868

The debate on firefighter staffing is a worthy one. It is also a conversation worthy of input from the Fire Chief. I do not oppose two-medic rescues, I oppose labor and council circumventing the process to meet and confer with the Fire Chief. I am no lawyer but question the legality of this and if passed, this sets a very dangerous precedent for public safety. At a minimum this is nothing more than a very public attempt of labor to undermine the authority of the Fire Chief and operational response models that have been in place for years and align with the staffing resolution currently in place.

Concerned constituent,

Jason Fejer

I am reaching out to city council to voice my concerns and opposition of R-25-122. With Councilor Sanchez having a background in law enforcement and emergency response I think he will agree that it is problematic for Council to take up legislation that impacts staffing models of emergency services without consulting the Fire Chief. The Fire Chief in charge in 2016 was part of the conversation along with Labor and the CAO when R-16-41 was passed, why would then Fire Chief be excluded now?

For some context on R-16-41 and R-25-122, I urged you to watch Chief Downey speak at the council meeting when R-16-41 was amended and passed. Ms. Fiebelkorn, Please oppose bill R-25-122. This proposal will either delay response times to residents, or make that response less effective at saving lives. This is unacceptable
for the people living in our city and I ask you to vote against this bill. Thank you for your valuable service.

Hello,
Please say no to bill R-25-122. We need the quickest response times from our Fire departments EMTs and paramedics to save lives.
My husband had a stroke in the last year and needed help immediately. Not in a half hour or more. Please think about if it was your family member who needed help immediately. Help out your community please, vote for.
Thank you,
Charla

Opposition of R-25-122
Enter Your Message Here
Hello, I am writing this in hopes of my voice being heard about the resolution being presented to you all today, R-25-122. I am currently a paramedic and have been in EMS for almost 15 years, all of my time in Albuquerque system. I am born and raised here and spent all of my adult career in EMS. I worked for private ambulance for 7 years and currently work for a large hospital system as a paramedic. The shortage of paramedics in Albuquerque is not a new issue, but the gravity of the issue has become much more apparent over the past several years. This is also not unique to New Mexico, as nationwide, ambulance and fire services are feeling the strain of limited paramedic coverage. Unfortunately for New Mexico, our resources are far more limited than a lot of other states because of the health literacy here, lack of funding, etc.

I will acknowledge that as a paramedic, I have an aversion to change in the field and I believe that most others feel the

same. There are very strong personalities in EMS and it's often a necessity given the nature of our job. However, if we are not careful, it can and will hinder progression, movement, and minimize the value of our profession. EMTs and Paramedics are essential and this is demonstrated every single day in what we do in and out of the hospital. The need for ALS care in the prehospital world is at an all-time high. I have the utmost respect for AFR and think that they are one of the most high functioning systems in the state, but the idea that they may not expand the use of their paramedics, is reckless and potentially harmful not only to the citizens of Albuquerque, but to the department itself. The current model of double-paramedic rescues has "worked" for such a long time because it was never challenged or motivated to grow, even when the needs of the system change was/is apparent. Across the state and the nation, medical rescues or ambulances, have one paramedic and one EMT-Basic or Intermediate on every truck, not two paramedics. This includes other local municipalities. Why is AFR the only department in the state that "must have" two paramedics on the rescues, when they employ the highest number of paramedics in the state, but smaller departments and private services are functioning well with one paramedic? If the department can nearly double the ALS coverage in the city, why wouldn't they do that? And why would anybody oppose it? I can empathize with the feeling that it's not a perfect system just like any other, BUT, splitting the rescues will undoubtedly expand coverage and it moves the department into a more modern approach to EMS response.

If we want to be effective for the people we serve in the community, we must be able to accept change, even if we do not "like" it. While the double-paramedic rescues may be more comfortable for SOME of the AFR staff, it is an old model being utilized for a new and changing system. The model is not the best utilization of resources, it does not have the best public interest in mind and it is outdated. I will never insult the work of City Council; I thoroughly believe that you all are doing what you truly believe is best for the people you serve. I believe that councilor Lewis and Baca are trying to do what's best for the citizens of Albuquerque with the information they have. But, I also believe the information they have is one-sided, and unless you weigh ALL options, you cannot make a truly informed decision. The R-25-122 proposal is regressive and not forward thinking. I hope that you all will do what's best for the citizens, especially those that suffer most in underserved areas. Thank you for your consideration.

Opposition of R-25-122
Enter Your Message Here
To Whom It May Concern:
I would like to voice my concern and opposition to R-25-122. I have a background in EMS and have worked within the Albuquerque/Bernalillo County system and believe that this bill is damaging to the citizens of Albuquerque. There are other major services, such as Albuquerque Ambulance Service (AAS) and Bernalillo County Fire Department, that are local to the same locale that do not staff 2 paramedics on the rescue units. Also, with this being a 2 tier system, with AAS responding as the transport agency, will come with a paramedic on that unit as well. Staffing 2 paramedics on each rescue is not the most efficient use of resources in an already stretched system. Being able to effectively double the ALS (Advanced Life Support) coverage in the system would help ensure safe, effective, timely care to the population, including areas that could be considered under-served. In closing, the current staffing model is an outdated way of thinking and the citizens of Albuquerque would be better served with R-25-122 not being passed. Thank you for your time and attention.

Subject: Opposition to R-25-122 and Support for Fire Chief's Authority
Importance: Normal
Sensitivity: None

Dear Ms. Grout,

I am writing to express my opposition to Resolution R-25-122, which is scheduled for a vote by the council on Monday. I strongly oppose this bill, as it was introduced without proper consultation with the Fire Chief, a clear violation of existing resolution protocols.

Emergency response decisions should be made by first responders, not elected officials, as they possess the knowledge and expertise necessary for effective decision-making in critical situations. The Fire Chief is the one who understands the operational response models and EMS licensure requirements, and it is her authority that should guide these matters not the union or council.

Additionally, with the expanded model at Station 12, which includes a paramedic on both the rescue and the engine, we significantly improve the likelihood of a paramedic arriving first on scene in our neighborhood. This is a crucial step forward in enhancing response times and overall community safety.

However, this resolution undermines the ability of the Albuquerque Fire Rescue (AFR) to adopt a more flexible and sustainable staffing model. If passed, it could potentially delay the response time of paramedics and hinder the AFR's ability to adapt to the growing needs of our community.

I strongly urge you to oppose R-25-122 and to stand in support of the Fire Chief's authority in determining the best operational response models for our city.

Thank you for your attention to this important issue.

Rose Koch

The citizens of Albuquerque deserve the best possible outcome in emergency life threatening circumstances. The AFRD personnel responding in the time of emergencies should know they are putting thier best feet forward as a team of professionals. Why should there be doubt.

Dear councilor Fiebelkorn,

I am writing to you today to express my opposition to resolution R-122 mandating that all AFR rescues are staffed with two paramedics. AFR is the 26th busiest Fire Department in call volume in the nation and the busiest per capita. We have been able to do this with less staffing than similar sized cities. This has created challenges for us to deliver a high level of EMS services to the citizens of our city. I have been with AFR since 2011 and have been a paramedic since 2014. Since I have been in the department, our call volume has increased by 50,000 calls a year and we have decreased by one fire station. Since that time frame the department has been working on expanding advanced lifesaving (ALS) care due to the increase in call volume. The only way to do this is to build more stations and add more trucks, which is obviously an expensive solution, or relocate the current paramedics that we have and change our staffing model to do so.

When I was promoted to the rank of paramedic driver, I was assigned to ALS E4. I was the sole paramedic responding to district 4 without a transport capable AFR unit in the district. I was able to start treatment and stabilize critical patients while we waited for our transport unit to arrive. The model worked well. The IAFF union president was a Lieutenant at the station and can attribute to the success of having a paramedic on an engine. With the help of the council we have added rescues to 21 of our 22 stations, and added Medic units along the busy central corridor, but unfortunately we are facing more challenges to deliver a high level of care to our citizens.

AFR has always partnered with UNM to provide a path for our members to become paramedics and increase our staffing levels, but unfortunately under AFR Fire Chief Dow's tenure he stopped this agreement leading to a decrease in the number of paramedics and changed the city ordinance to read that a rescue needs to be staffed by two firefighters, not paramedics. Since this we have been behind the curve and are struggling to keep up with paramedic staffing. And, on a regular basis we have had to force paramedics into mandatory overtime to staff our trucks. We are also transporting more now than we have in the past. The transports for the following years are as follows, for 2022 – 3,279 transports, 2023- 2,271 transports, 2024- 2,791 transports, and every transport lasts on average for over an hour, taking that patient to the hospital, turning over patient care to the hospital, travel time getting back in district and restocking the truck to run another call. For every transport AFR does, we are stripping ALS coverage for that district, which in turn causes a neighboring district to send their rescues to other districts when needed. For the past 6 years I have been the Rescue Lieutenant at station 7 at Central and 57th, which responds to council districts 1,2 and 3. I can tell you numerous times that I have had to respond north or Coors and Paseo Del Norte for ALS calls as the other units on the westside were transporting or on other calls.

With the new staffing model that Fire Chief Jaramillo is implementing, this will increase the number of calls that paramedics are on, increasing the level of medical care to the citizens of Albuquerque. If the rescue is on another call or transporting, there will be a paramedic on another Fire apparatus that is able to start and stabilize a patient with ALS level of care. This new staffing model has slowly been tested and implanted over the past few years, with stations 2, 3 and 10 where the model has proved to be beneficial. For the rescues that have shown the most time on task for ALS medical procedures they are staying a two-paramedic rescue and, for the first time in our department's history, recognizing the level of EMT Intermediate and adding that staffing to the Engine for that increased level of care.

The two-paramedic staffing model on a rescue is the gold standard, unfortunately it is a model that we cannot maintain due to the reasons I have listed above. For half of my 11 years as a paramedic for AFR, I have operated as a single paramedic on an apparatus due to our paramedic staffing shortage. We are trained to operate as a single capacity out of paramedic school. With our dynamic dispatch model, we will still have two paramedics on our most

critical calls, the same as it is now. Every Fire Department across the country is moving to a more dynamic staffing model with a single paramedic on every truck, in fact, former Chief Dow now works for a department that has a paramedic on every truck. With Resolution R-122 we will not be moving forward in our level of care, will be doing things how they have always been done and in turn will be delaying ALS care to the citizens of Albuquerque.

Respectfully,

Jonathan Dean

I can tell you numerous times that I have had to respond north or Coors and Paseo Del Norte for ALS calls as the other units on the westside were transporting or on other calls.

With the new staffing model that Fire Chief Jaramillo is implementing, this will increase the number of calls that paramedics are on, increasing the level of medical care to the citizens of Albuquerque. If the rescue is on another call or transporting, there will be a paramedic on another Fire apparatus that is able to start and stabilize a patient with ALS level of care. This new staffing model has slowly been tested and implanted over the past few years, with stations 2, 3 and 10 where the model has proved to be beneficial. For the rescues that have shown the most time on task for ALS medical procedures they are staying a two-paramedic rescue and, for the first time in our department's history, recognizing the level of EMT Intermediate and adding that staffing to the Engine for that increased level of care.

The two-paramedic staffing model on a rescue is the gold standard, unfortunately it is a model that we cannot maintain due to the reasons I have listed above. For half of my 11 years as a paramedic for AFR, I have operated as a single paramedic on an apparatus due our paramedic staffing shortage. We are trained to operate as a single capacity out of paramedic school. With our dynamic dispatch model, we will still have two paramedics on our most critical calls, the same as it is now. Every Fire Department across the country is moving to a more dynamic staffing model with a single paramedic on every truck, in fact, former Chief Dow now works for a department that has a paramedic on every

truck. With Resolution R-122 we will not be moving forward in our level of care, will be doing things how they have always been done and in turn will be delaying ALS care to the citizens of Albuquerque.

Respectfully,

Jonathan Dean

Dear councilman Baca,

I am writing to you today to express my opposition to resolution R-122 mandating that all AFR rescues are staffed with two paramedics. AFR is the 26th busiest Fire Department in call volume in the nation and the busiest per capita. We have been able to do this with less staffing than similar sized cities. This has created challenges for us to deliver a high level of EMS services to the citizens of our city. I have been with AFR since 2011 and have been a paramedic since 2014. Since I have been in the department, our call volume has increased by 50,000 calls a year and we have decreased by one fire station. Since that time frame the department has been working on expanding advanced lifesaving (ALS) care due to the increase in call volume. The only way to do this is to build more stations and add more trucks, which is obviously an expensive solution, or relocate the current paramedics that we have and change our staffing model to do so.

When I was promoted to the rank of paramedic driver, I was assigned to ALS E4. I was the sole paramedic responding to district 4 without a transport capable AFR unit in the district. I was able to start treatment and stabilize critical patients while we waited for our transport unit to arrive. The model worked well. The IAFF union president was a Lieutenant at the station and can attribute to the success of having a paramedic on an engine. With the help of the council we have added rescues to 21 of our 22 stations, and added Medic units along the busy central corridor, but unfortunately we are facing more challenges to deliver a high level of care to our citizens.

AFR has always partnered with UNM to provide a path for our members to become paramedics and increase our staffing levels, but unfortunately under AFR Fire Chief Dow's tenure he stopped this agreement leading to a decrease in the number of paramedics and changed the city ordinance to read that a rescue needs to be staffed by two firefighters, not paramedics. Since this we have been behind the curve and are struggling to keep up with paramedic staffing. And, on a regular basis we have had to force paramedics into mandatory overtime to staff our trucks. We are also transporting more now than we have in the past. The transports for the following years are as follows, for 2022 – 3,279 transports, 2023- 2,271 transports, 2024- 2,791 transports, and every transport lasts on average for over an hour, taking that patient to the hospital, turning over patient care to the hospital, travel time getting back in district and restocking the truck to run another call. For every transport AFR does, we are stripping ALS coverage for that district, which in turn causes a neighboring district to send their rescues to other districts when needed. For the past 6 years I have been the Rescue Lieutenant at station 7 at Central and 57th, which responds to council districts 1,2 and 3. I can tell you numerous times that I have had to respond north or Coors and Paseo Del Norte for ALS calls as the other units on the westside were transporting or on other calls.

With the new staffing model that Fire Chief Jaramillo is implementing, this will increase the number of calls that paramedics are on, increasing the level of medical care to the citizens of Albuquerque. If the rescue is on another call or transporting, there will be a paramedic on another Fire apparatus that is able to start and stabilize a patient with ALS level of care. ONE ALBUQUERQUE city of albuquerque

ALBUQUERQUE POLICE

APD NORTHEAST AREA COMMAND NEWSLETTER for DECE 2024

COMMANDER'S CORNER

Greetings,

As we approach the end of the year, we want to take a moment to reflect on the primary concern heard from the community and share the steps we're taking to address them.
One of the most significant challenges we face is the issue of the unhoused population and the criminal activity. This is not unique to our community—cities across the nation are grappling with concerns. Addressing homelessness is a complex issue that requires a coordinated effort betwe enforcement, city services, and the community.

Resources and Reporting

Our city has many resources available to assist those experiencing homelessness, and we are working with partner organizations to provide support while addressing any illegal activity. If you encampments or unlawful behavior in your area, please report it by calling 311 or 505-242-COPS Your reports help us respond effectively and ensure the appropriate resources are brought to be situation.

Holiday Safety Tact Plan

As the holiday season continues, our Holiday Tact Plan is in full effect. This initiative is focus maintaining safety in our shopping areas, providing increased officer presence, and deterring crim this busy time of year.
We encourage you to stay vigilant while out and about. If you see anything suspicious, please don to report it. Your observations are invaluable in helping us maintain a secure environment for ev

Thank you for your continued partnership and support as we work together to address these challe keep our community safe. Wishing you a safe and joyous holiday season.

-Commander Ryan Nelson

Message from Chief Medina:

Hello Albuquerque! I hope everyone had a wonderful holiday enjoying time with family and friends. There is so much to be thankful for and I'm grateful for the wonderful community that we serve.

Our department is gearing up for a very busy season with many events. This upcoming weekend will be our 30th annual Cops for Kids event, a huge accomplishment for our department giving back to our community for the last 30 years. Thank you to everyone who contributed to this year's event so we can make it extra special for underprivileged children in our city.

As the 2025 60-day Legislative Session is just around the corner, our staff is also diligently working on several critical legislative asks. At the top of that list are enhancements to the Reckless Driving statute. Reckless driving is a serious

issue in our community and we have listened to victims, survivors and our officers who investigate these crashes acknowledging there are challenges with the law when it comes to charges.

On the enforcement side, last month we kicked off ongoing operations in our Southeast Area Command to tackle issues with crime while also assisting homeless individuals. In all, six units are working alongside the Southeast PRT and Southeast Field Officers.

Below are results from the first month of operations.

·Felony Arrests: 114

-Felony Warrants Cleared: 28

·Misdemeanor Citations: 62

·Recovered Firearms: 1

·Written Reports: 45

·Traffic Stops: 47

·Traffic Citations: 720

·Calls for Service: 47

·On sites (self-initiated calls, i.e . officer responds to a call for service then sees criminal activity taking place) 565

We continue to work on ongoing challenges facing our community and we appreciate the community's support as we strive to make our city safer for everyone.

I hope everyone enjoys the upcoming holiday season with family and friends as we gear up for the New Year.

Thank you, and stay safe Albuquerque!

- Chief Harold Medina

CRIME STATS FOR NOVEMBER 2024

This information is pulled from daily Calls for Service, which reflects all calls made to APD's 911 Emergency Communic
It does not reflect all crimes that police investigate, nor the final outcome of crimes investigated. Furthermore it may n
true location of crimes as they may have occurred in a different location from which they are reported.

To put that into perspective, APD receives about 500,000 calls for service each year. By contrast, about 120,000 police
generated each year, which is more reflective of actual crimes. For that reason, the information illustrated should not
determine crime trends.

Property Crimes

Larceny (All Types) – 123
Auto Burglaries – 39
Residential Burglaries – 22
Commercial Burglaries – 26
Auto Thefts - 96
Disturbance – 555

Person Crimes

Albuquerque City Council

Draft Only

Dear Members of the City Council,

I am writing to express my strong support for the changes being implemented by the AFR Chief, Emily Jaramillo, specifically the opportunity for medics to step off the rescue and utilize their skill set on an ALS pumper. Having been a part of the fire department for 24 years and serving on the rescue since 2006, I have seen firsthand how important it is for our personnel to be able to leverage their training and experience in the most effective way possible. This new approach excites me, and I am grateful for the opportunity it brings.

This year, I was fortunate enough to bid for a position on a fire truck, and I jumped at the opportunity for change. It brings a sense of excitement and renewal to my work, and I firmly believe that the model the Chief is implementing will provide a better service to the community we serve. By having a medic on every emergency, we ensure that critical medical care is immediately available, which is crucial for the safety and well-being of those we respond to.

The opportunity for medics to expand their roles and contribute to both fire and medical responses creates a more dynamic, efficient, and responsive team. I have no doubt that this will ultimately enhance the level of care and support we are able to provide to our community members.

I strongly oppose the resolution R-25-122, which would undermine the valuable role medics can play in this new system and prevent us from fully utilizing our skills. Additionally, it would deny me the chance to take on a new and exciting opportunity that aligns with both my personal career goals and the greater mission of our department.

Thank you for your time and consideration of this matter. I hope you will join me in supporting these positive changes that will benefit both the department and the citizens we serve.

Sincerely,

James Perez

Support the 2024 Bikeways and Trail Facilities Plan
Enter Your Message Here
Cycling communities across the region support the proposed 2024 Bikeways and Trail Facility Update vision of bicycling infrastructure in Albuquerque. We are counting on you, Albuquerque City Council to approve the plan and take strong efforts to provide the funding and staffing to ensure its implementation and maintenance. A comprehensive accessible bicycle network across Albuquerque will improve the quality of life for both visitors and all Burqueños!

I'm deeply disappointed in Councilor Lewis' resolution for the Albuquerque City fire department staffing - as it stymes the already-limited flexibility of an essential service even he needs.

I hope Mr. Lewis will vote for the support of the Rail Trail completion with critical funding. Please don't force us into bake-sale mode because you think it'll help anything. It will not.

Why would the City Councils vote against life-saving infrastructure that the AFR already has in existence? And surely the state can afford this wonderful arrangement. Please maintain paramedic status as it presently exists on AFR calls. This should not be difficult call as it involves saving peoples lives.

Thank you,
Mrs. Meeks

Hi Councilors Baca and Lewis,

Chandler here from News 13. I'm reaching out to see if either of y'all may have some time today to do a quick 5-10 minute interview over Zoom or phone to talk about the AFR staffing resolution. We spoke with the fire chief about the resolution and her concerns earlier today and was hoping to get your side. Feel free to reach me at this email address, or phone number provided below. Thank you for any help you can provide in the meantime, and I

look forward to hearing from you!

Subject: Re: Let's support our 1st Responders-including teachers, social workers and others
Importance: Normal
Sensitivity: None

Good morning!
I recently had the opportunity to tour the Bernalillo County Emergency Service Center. I was extremely impressed by the responsibilities and use of technology perform the work-the employees there are truly "First-Responders." I was even more impressed by the dedication and morale of the staff in such a high-stress, demanding work environment. The staffing for the County Center is at about 83%; I understand the City's center is in the 40's. I attribute a big part of the ability of the County to recruit and retain employees to the strong and intentional program of emotional support offered by the Administration to its employees (mental health counselor, therapy dogs, recreational opportunities etc.).

Similarly, the County Commission recently unanimously approved an agreement with the IAFF to allow the use of cannabis for off-duty firefighters. The Union and individual members made a strong case for the benefit of allowing the use of cannabis as a treatment for their physical and mental health issues arising from their work.

Both of these professions, along with law enforcement, face difficult and stressful situations on a daily basis that comes from the harsh reality of life-situations that most of us would not be able to, or would not want to, endure. I am glad that, as a society, we are recognizing the importance of mental health support for our First Responders and that we are doing something about it. That support, along with proper compensation, is necessary to allow them to continue performing their duties at the high level that we have come to expect.

My question is what are we doing for the other important "front-line" professions? I have had much experience and exposure to the work of teachers and social workers. The situations that they face daily are truly challenging. So many individuals that I speak to in these environments get burned out and discouraged and eventually drop out. This of course, leads to a decline in performance and ultimately shortages of workers.

I have previously written about my experience with CYFD which led my opinion to change from being a harsh critic to being sympathetic due to learning about the extreme situations and the emotional toll they face daily in doing their jobs. We all know that some of the biggest challenge in schools today are absenteeism, disruptive behavior and lack of supportive parents-the word stressful is an understatement.

There are many other governmental jobs that fall into this realm besides those I mentioned, including jail guards and animal care workers. I have only recently begun to become aware of their challenges and needs and my question now is what are we doing for them?

I truly hope that as a society we will begin thinking about and devising programs of support for all of our First Responders/front-line workers! I hope that the County continues to be a leader in this regard.

P.s. For the newcomers to this email list, please note that this is an opportunity for me to vent frustrations, to promote events and sometimes to attempt to affect public policy as often these thoughts get converted into letters sent to the editor and to other blogs and methods of distribution. Thanks for reading!

Subject: Re: CYFD-a simpler solution

Good morning,

I recently read about a bill circulating in the legislature to add oversight to the CYFD process. I am not familiar with the details, so I can't comment on whether I believe that another layer of bureaucracy will be of benefit to improving outcomes for children.

I am, however, familiar with CYFD. In the first job of my career, I represented children in CYFD custody, I also represented parents whose kids were in their custody, and I was eventually hired by CYFD to represent the agency in cases. In the last job of my career job, I worked closely with CYFD as I prosecuted crimes against children. I understand the challenges that social work professionals face day in and day out.

A simpler solution? More social workers. The challenges they face day in, and day out are not something most of us would be willing to tolerate. Much like teachers, who face the challenges of absenteeism, behavioral issues and lack of parental support, the work and work environment social workers face are not only challenging but often de-moralizing.

I am working with an organization, the New Mexico Social Work Alliance, that is committed to increasing the number of highly trained and qualified professionals, to retain and support them and to fully compensate them for their challenging work.

I have previously mentioned an upcoming conference organized by Cornerstone for Excellence for social workers to gain valuable knowledge and professional credits. Attendees will also be able to hear the insightful comments of Dr. John Vigil and Dr. Paul Romo, both Board Certified Addictionologists. I am glad that a few of you have expressed interest.

Let's increase the number of social workers (and teachers) by fully supporting and compensating them. Once their workload is under control, they can devote the time necessary to the children and their families such that we can then justifiably expect better outcomes for our children and adults.

Subject: Re: SB 268

Good morning!

This is a subject that at first blush is a little different than what I normally advocate for but I think it is not and it is very important! Sen. Moe Maestas introduced Senate bill 268 to give UNM and NMSU $2.5 million each for their NIL fund. For those of you not familiar with NIL, it is a program that allows student athletes to be paid for the use of their name, image and likeness in advertising and for personal appearances.

I think this is extremely important for 2 reasons:

1. It is totally appropriate for student-athletes to be fully compensated for their talent and hard work. Young artists, work-study students and other students are routinely compensated for their time, effort and talent-why should athletes not be, especially since their career is almost always shorter than other categories of talented individuals?
2. A healthy sports environment contributes to the vitality of an educational institution and is a huge part of creating a dynamic atmosphere that attracts and retains non-athlete students.

I believe that we need to get over the "poverty mentality" in this state and to be willing to fully compensate our residents for their work and that includes teachers, first-responders, healthcare professionals, blue-collar workers, service workers etc. In order to have a healthy and vibrant community, we need to recognize that people need to be fully compensated! Isn't having a good paying job the best way to combat some of the social issues that we face in this community?

I would ask my friends in the legislature to support this bill and others to contact their legislators to ask for their support!

Have a great weekend!

Subject: Re: Letter to the Editor

Good evening!

I recently wrote a Letter to the Editor in response to the Journal's recently published opinion which unfairly criticizing the new Bernalillo County Manager, Cindy Chavez for just doing her job. I was also concerned about the Journal seeming to reinforce the "poverty mentality" in this state by insinuating that public servants are not entitled to be paid at the market rate. I submitted the attached letter this past week which has not been printed and so I thought I would at least distribute it to my friends and colleagues.

I truly believe public service is an honorable profession and those who make it a career should be paid what those in other jurisdictions are paid. I also found the opportunity to squeeze in a prop for financial literacy which is, in my opinion, the key to bringing so many working people above basis subsistence living and/or to build generational wealth.

For what its worth, the letter is attached.

Good morning!
I hope everyone had a safe and enjoyable holiday! I now understand why I could not include more people to my swearing in ceremony as the Commission chambers is not as big as I thought and there were many others being sworn in including judges and officials from the Treasurers' and Clerk's office.

In any event, I wanted to share with you my written speech. If I had more time, I certainly would have recognized more people by name including a true mentor and inspiration, former County Commissioner Orlando Vigil and my paid campaign staff, manager Victor Lopez and field operations director Art Sanchez.

In any event, I hope everyone realizes I am available and welcome your calls and emails about issues that are important to you and our community. I am cc'ing my assistant, Maika Padilla and policy analysis Alicia Maldonado as others on my team to communicate with. Hope all is well!

Hasta pronto!

Subject: Re: My Agenda as County Commissioner for District 2

Hello friends and family!
This email list you are on is a compilation of several lists, from those involved in my campaign, to a group of educators who I have communicated with in the past to various elected officials in the area. But the common denominator is that everyone receiving this has some interest in and ability to affect change in our community!

I do not want it to be a secret that I am focusing on certain issues but, of course, I will always be open to discussion about other subjects that are important to you. My short list of priorities are as follows:

1. **Infrastructure**-there are many needs within the district, especially residential roads, drainage, lighting, parks etc.-all are on my radar, and many are projects that I have already been working on. It is also of vital importance to me that the community is engaged in the planning process, from beginning to end.
2. **The confluence of addiction, mental health, homelessness and crime**-these are issues that we all face and are important to everyone. I am a big advocate of the work of local Addictionologist Dr. John Vigil and his book The Four Pillars of Recovery (spiritual/personal acceptance, family/social support, personal goals and treatment), which has given me great insight into the problem and also solutions. I am currently trying to compile as much information as possible about treatment options and to understand the plans and systems in place to effectively distribute funds to fill the "gaps."
3. **Education**-Is another topic that everyone should have on top of their list. I am still a staunch supporter of mandatory financial literacy in high schools, as the other methods of providing it do not ensure that those who need it most are getting the information. I am also quite curious about the general educational approach taken by Rio Rancho that gives them high national marks (intervention and enrichment). In addition, I recently read about the use of AI to tailor curriculum to individual students. Not being an educator, I will seek information about innovative and practical solutions, especially from those who are in or who recently have been in the classroom.

I will opine and speak up on these subjects from time to time and will seek support and input from you and the community on specific initiatives. We are all in this together and no one should take ownership of the problem, but we should all take responsibility for improvement. It is a cliche, but we must all be part of the solution and it begins with a discussion of the issues followed by executing a plan of action. We must all be accountable.

I look forward to hearing from you. Hasta pronto!

[EXTERNAL]\line Forward to phishing@cabq.gov and delete if an email causes any concern.

Dear Council President Dassan,

I am writing to you today as my district representative to express my opposition to resolution R-122 mandating that all AFR rescues are staffed with two paramedics. AFR is the 26th busiest Fire Department in call volume in the nation and the busiest per capita. We have been able to do this with less staffing than similar sized cities. This has created challenges for us to deliver a high level of EMS services to the citizens of our city. I have been with AFR since 2011 and have been a paramedic since 2014. Since I have been in the department, our call volume has increased by 50,000 calls a year and we have decreased by one fire station. Since that time frame the department has been working on expanding advanced lifesaving (ALS) care due to the increase in call volume. The only way to do this is to build more stations and add more trucks, which is obviously an expensive solution, or relocate the current paramedics that we have and change our staffing model to do so.

When I was promoted to the rank of paramedic driver, I was assigned to ALS E4. I was the sole paramedic responding to district 4 without a transport capable AFR unit in the district. I was able to start treatment and stabilize critical patients while we waited for our transport unit to arrive. The model worked well. The IAFF union president was a Lieutenant at the station and can attribute to the success of having a paramedic on an engine. With the help of the council we have added rescues to 21 of our 22 stations, and added Medic units along the busy central corridor, but unfortunately we are facing more challenges to deliver a high level of care to our citizens.

AFR has always partnered with UNM to provide a path for our members to become paramedics and increase our staffing levels, but unfortunately under AFR Fire Chief Dow's tenure he stopped this agreement leading to a decrease in the number of paramedics and changed the city ordinance to read that a rescue needs to be staffed by two firefighters, not paramedics. Since this we have been behind the curve and are struggling to keep up with paramedic staffing. And, on a regular basis we have had to force paramedics into mandatory overtime to staff our trucks. We are also transporting more now than we have in the past. The transports for the following years are as follows, for 2022 – 3,279 transports, 2023- 2,271 transports, 2024- 2,791 transports, and every transport lasts on average for over an hour, taking that patient to the hospital, turning over patient care to the hospital, travel time getting back in district and restocking the truck to run another call. For every transport AFR does, we are stripping ALS coverage for that district, which in turn causes a neighboring district to send their rescues to other districts when needed. For the past 6 years I have been the Rescue Lieutenant at station 7 at Central and 57th, which responds to council districts 1,2 and 3. I can tell you numerous times that I have had to respond north or Coors and Paseo Del Norte for ALS calls as the other units on the westside were transporting or on other calls.

With the new staffing model that Fire Chief Jaramillo is implementing, this will increase the number of calls that paramedics are on, increasing the level of medical care to the citizens of Albuquerque. If the rescue is on another call or transporting, there will be a paramedic on another Fire apparatus that is able to start and stabilize a patient with ALS level of care. This new staffing model has slowly been tested and implanted over the past few years, with stations 2, 3 and 10 where the model has proved to be beneficial. For the rescues that have shown the most time on task for ALS medical procedures they are staying a two-paramedic rescue and, for the first time in our department's history, recognizing the level of EMT Intermediate and adding that staffing to the Engine for that increased level of care.

The two-paramedic staffing model on a rescue is the gold standard, unfortunately it is a model that we cannot maintain due to the reasons I have listed above. For half of my 11 years as a paramedic for AFR, I have operated as a single paramedic on an apparatus due to our paramedic staffing shortage. We are trained to operate as a single capacity out of paramedic school. With our dynamic dispatch model, we will still have two paramedics on our most critical calls, the same as it is now. Every Fire Department across the country is moving to a more dynamic staffing model with a single paramedic on every truck, in fact, former Chief Dow now works for a department that has a paramedic on every truck. With Resolution R-122 we will not be moving forward in our level of care, will be doing things how they have always been done and in turn will be delaying ALS care to the citizens of Albuquerque.

Respectfully,

Jonathan Dean

Subject: Ordinance proposal data

Talking points and data

- This is an ordinance we can not guarantee we are able to follow.
- We have been staffing this way since 2023.
- We are violating the ordinance today if it passes and would need to move personnel from their spots.
- If resolution was in place:
    - YTD violations over 250 times.
    - YTD - even if staffing was changed to put 2 paramedics on every rescue, 24 would have been unavoidable. (This removes Station 2 and 3 staffing)
    - Since 2024 -ordinance violations would be over 2,000 violations.
    - Since 2024 - even if staffing was changed to put 2 paramedics on every rescue, 656 violations would have been unavoidable. (This removes station 2 and 3 staffing)

- Field Paramedic positions daily at 141.
    - Backfill needs to be added to numbers for when paramedics are off vacation, sick, FMLA, PLF, or for training. Historically we have used a multiplier of 1.33 to the needed positions to ensure we are able to meet staffing needs. Adding this means we need 187 firefighters assigned to field to ensure coverage on a daily basis.
    - We have 161 paramedics assigned to the field including all Captains.
        - We would still be short 22 paramedics short. This would need to be covered by overtime/support fill.
        - This would cause us to shut down support divisions to ensure staffing is met.
            - Support Paramedics at 30. Includes paramedics in HEART, RMS, Training Academy, Pharmacy, PAO, Professional Development, Alarm, FMO
            - Non paramedic positions support paramedics at 8 (this includes captains who promoted to their positions)
            - Removing captains (ensuring services/departments are not disrupted) gives 5 paramedics that could be reassigned to the field.
            - 2 paramedic lieutenants currently in the field not in the system because they took suppression exam. Moving them to ALS units would violate past practice and policies/CBA.
- Would need to fill shortages with overtime and/or support fill. Support fill is not an option on nights or weekends. Support fill takes personnel from their regular job duties resulting in loss of services.
    - Paramedic support fill last year was 60% of total support fill.
        - Paramedic support fill last year was used to cover 100 shifts in paramedic positions
        - Some non paramedics were used on Rescues/Medic units to equitably utilize support personnel so this number would have been higher for paramedics.
- Average paramedics added each year vary from around15 to 20
- Paramedic Retirements
    - 48 paramedics are currently eligible to retire.
    - 47 paramedics are eligible to retire in the next 5 years.

Albuquerque City Council

RE: Preserving Albuquerque Fire Rescue's Two-Paramedic Rescue Units

Dear Councilor Peña,

I am writing to express my strong support for retaining the two-paramedic Rescue units within the Albuquerque Fire Rescue (AFR) Department. As a retired Albuquerque Fire Chief with extensive experience in emergency response operations, I urge the City Council to oppose any proposal that would split the two-paramedic Rescue, as doing so would significantly dilute the effectiveness of our Advanced Life Support (ALS) system.

AFR's current model—staffing Rescues with two paramedics—ensures the highest level of pre-hospital emergency care for the residents and visitors of Albuquerque. This structure aligns with best practices used by leading fire and EMS agencies nationwide, ensuring rapid, expert medical intervention in critical situations.

The proposal to separate paramedics and distribute them across different units under the pretense of increasing service does not account for the operational realities of emergency medical response. Instead of improving patient care, this change would fragment ALS expertise, diminish the critical mentorship that experienced paramedics provide to new recruits, and compromise the efficiency of AFR's well-established response system. The presence of two paramedics on a Rescue unit allows for advanced, coordinated care on scene—something that cannot be replicated by merely placing single paramedics on various units.

Furthermore, the existing model strikes a balance between strong leadership, best patient care practices, and operational efficiency. The pairing of paramedics ensures that life-saving interventions can be executed without hesitation or delay. It also enhances professional development, as less experienced paramedics benefit from hands-on training and mentorship from seasoned colleagues in high-pressure environments.

Splitting these Rescue units is not a viable solution to the challenges facing AFR. The real answer to increasing service capacity lies in expanding the number of paramedics and ensuring adequate resources are allocated to meet the growing demands on our EMS system—not in weakening a proven system that already delivers exceptional care.

While I no longer reside in Albuquerque, my parents, grandmother and other relatives do still live there. I urge the City Council to reject any proposal that diminishes AFR's ability to provide the best emergency medical care possible. Please support Resolution R-25-122 and preserving the Albuquerque two-paramedic Rescue model.

Sincerely,

Paul Dow
Retired Fire Chief
Albuquerque Fire Rescue

Councilor:

Regarding the clinic for first responders that you are working on with AFD. If you don't mind I can give you a few tips on facility planning. At Council we have done the facility assessment planning for AFR for two Fire stations we also recently did the planning for the Youth Shelter and the Asian Pacific Center and balloon landing fields and were involved community center plans. A couple of things we have learned.

1. It very helpful to do a facility plan being that:
    a. You get the facility you were seeking,
    b. Reduces the amount changes in the design process,
    c. Provides an accurate cost estimate which in turn
    d. Makes sure you plan for what is possible, which in turn
    e. provides your funding benefactors with knowledge of what the funding target is and that this
       is a solid workable project not just an idea.

2. To accomplish the above the facility planning process usually proceeds as follows.
    a. Works with all the stake holders to identify the goal, what level of services that will be offered.
    b. Analyzes who the client base is and inventories the needs they would

have for such a facility

c. Then categorizes the needs into the types of service that are required to address the need.
d. Takes each service and determines the interior space needed to deliver that service and the equipment that is required and the HVAC, plumbing, high voltage electrical and low voltage electrical that is required. (This in critical in medical buildings and science labs as some times the majority of the cost

   Can be the electrical or the HVAC, the equipment and the cost of those functions varies widely with the type of services that are offered) .
e. Provides a recommendation on how the interior of the building should be arranged.

   Identifies staffing levels (which can also include staffing costs)
f. The shell of the building is usually left to the design process, but sometimes the report will provide example of shells for other types of facilities.
g. Determines the size of propriety that is needed.
h. Identifies potential locations.
i. Conducts and analysis on whether the facility should be built from the ground up, or should an existing building be renovated, should suites be rented in an existing structure, or in your case should there be a partnership with an existing medical providers
j. Determines a turn-key cost to design and construct
k. Provides phasing options.
l. Then the report can cover whether staffing should be in-house, or should a contractor be used.

3. The facility plan is then used to raise funds, in the GO bond capital outlay, congressional earmark and grant writing domain as the project has moved up from an idea, to an already started project

Hope this helps. If you need a firm to do this, we have DPS on contract and they have done last two large medical towers in the City.

Tom

March 2, 2025

Albuquerque City Council

Dear Members of the City Council,

I am writing you to express my support for the staffing changes made by Fire Chief Jaramillo. I started my career with AFD/AFR May of 2005 and I have served as a paramedic for more than half of my career. Eight of those years I have served as a Rescue Lieutenant, assigned to R5, R11, R9, R19, and R15. During the 2023 bid process Fire administration chose to grant paramedic lieutenants the opportunity to bid to an engine rather than a rescue. I was lucky enough to bid as the paramedic officer on Engine 2.

This has been an opportunity of a lifetime that I feel has breathed new life into me and my family. The opportunity to engage and embrace a different role along with the responsibility of providing Advanced Life Support (ALS) within this amazing community and Fire Department has made me feel like my career has come full circle. Prior to the opportunity of working on Engine 2 my intentions were to retire as soon as I reached retirement eligibility. With this staffing model I have the intention of serving the community beyond this date.

Claims have been made that this model dilutes or decreases ALS service, compromising life saving treatment to the public. In contrast my experience has been the exact opposite. Engine 2 is staffed with 1 paramedic officer and 3 EMT's and Rescue 2 is staffed with 1 paramedic driver and 1 EMT officer. This staffing model has increased our ability to provide ALS care with earlier lifesaving treatments to acutely ill patients in station 2's district. One case in point that exemplifies the highest level of care we have provided was in June of 2024. Engine 2 and Rescue 2 responded to the Sunport pool for reports of a cardiac arrest/drowning. We arrived on scene to find a male in his 60's that was not breathing and did not have a pulse. We worked diligently and were able to regain breathing with pulses. We transported this patient to UNMH were he received definitive care and walked out of the hospital one week later. He is still alive today absent of any neurological deficits. This is just one of many examples of the exceptional service we provide.

I strongly appose the resolution R-25-122 that is being considered not only because of my firsthand experience providing these lifesaving measures, but also because it will impact the recruitment and retention of paramedics within our organization. Based on our recent Collective Bargaining Agreement (CBA) there in no longer an incentive to become a paramedic if restricted to rescues only.

Thank you for your consideration in this matter.

Sincerely,
Lieutenant Jeremy Gonzales
Albuquerque Fire Rescue

TWENTY-SIXTH COUNCIL - TWENTY-SEVENTH MEETING

Public Comment Sign Up for March 3, 2025 City Council Meeting

To provide public comments to the Council, in person or virtually, everyone must sign up by 4:00 pm on the day of the meeting by completing this web form: https://www.cabq.gov/mar-3-2025-comment. For members of the public without internet service, you may call our office at 505-768-3100 for assistance.

The Council will take General Public Comment on any topic and on the meeting's specific agenda items, from up to a maximum of 30 people, on a first-come first-serve basis. Per Council rules, persons signing up to speak before the Council can sign up for General Public Comment and up to two agenda items per meeting. If speaking on a specific agenda item, comments must be germane to the item. Participants will have a maximum of 2 minutes to present, but the time limit can be lowered, per discretion of the Council President.

General Public Comment is near the beginning of the meeting. If you sign up to speak on a specific agenda item, your name will be called when that item is heard.

Item B. **EC-25-297** **Mayor's Recommendation of Award for Fiscal Agent Bank Services & Other Banking Services** (Clarissa Gonzales)

Brief Summary: This Executive Communication requests approval for the Mayor's Recommendation of Award for RFP-2024-551-DFA-EV, which is for "Fiscal Agent Bank Services & Other Banking Services." The approval would allow the Department of Finance and Administration to negotiate with Wells Fargo and enter into a new contract for banking services, as the current contract with Wells Fargo expires December 15, 2025. If not approved, the City would need to extend the current contract and undergo a lengthy re-solicitation process.

Analysis: The project is necessary because the City's current contract with Wells Fargo for fiscal agent services expires December 15, 2025, and a new contract is required. The new contract will cover services like safekeeping, depository services, merchant services, and treasury management.

IPRA Response 001095

Fiscal Impact: Estimated annual cost is $150,000, funded by the General Fund. The current FY 2025 budget has allocated $106,000 for this purpose. Interest and investment earnings could reduce fees. The City can earn interest on deposits, with $6.1 million earned in FY 2024 from liquidity investments.

Key Dates: Contract End Date of Current Fiscal Agent: December 15, 2025.

Question: How will the $44k between the estimated annual cost and what is currently budgeted be covered?

Answer: The $150,000 mentioned is an estimate for the annual fees. City of Albuquerque will not have a definitive number until a contract is finalized with Wells Fargo moving forward.

Item C. **EC-25-320** **FY25, Quarter 2, Office of the City Clerk IPRA Backlog Reduction Plan Report** (Kevin Morrow)

Brief Summary: This EC presents a report of the progress the City Clerk has made to reduce the backlog of IPRA requests that are over 30 days old. The report indicates that there has been a decrease of about 20 such requests in the second quarter of FY 25 from approximately 1150 to approximately 1128. The report also details a 4-part strategy to reduce the number of requests in the backlog.

Analysis: The Clerk's proposed strategy is to: 1) increase staffing levels; 2) reach out to and work with the most frequent requesters; 3) improve the process for responding to requests; and 4) digitize more records to reduce the types of requests, which require manual review and production.

Additionally, the report indicates there's been a 7% reduction in IPRA requests between Q4 of FY24 and Q1 of FY25 but the backlog has been reduced by more than 23%, a significant reduction when compared to the reduction of requests.

Fiscal Impact: None

Key Dates: None

Comments: The report also provides details about the significant increase in IPRA requests received. It says the City received 14,123 requests in FY 24, up from approximately 4500 in 2017. The report also details policy concerns relating to time consuming redaction that are now required by statute and/or case law. The report also details the breakdown of requests by City department. The top three departments were APD with 70% of the requests, Planning with 12% and AFR, which received 5**%** of IPRA requests.

Item D. **EC-25-321** **Q2 FY25 ABQ RIDE Quarterly Security Report with APD, ACS, and Metro Security Data** (Jeff Hertz)

IPRA Response 001096

Brief Summary: The Executive Communication contains a submission of ABQ RIDE's third Quarterly Security Data for Q2 FY/25 as required by O-22-47. The Ordinance requires quarterly statistics reports on calls for service to ABQ RIDE motorcoaches, Sun Van paratransit vehicles, and the bus stops and stations of the City of Albuquerque Transit Department. The EC contains comprehensive security data tables required by O-22-47 and includes ABQ RIDE security data and incident reports from the Albuquerque Police Department, Albuquerque Community Safety, and Albuquerque Metro Security. This report includes data from *October through December 2024* (reporting was due February 1, 2025 and was verified by each Department prior to submission).

With this being the *third quarterly security report* submitted to Council, these Departments now have *three* data sets to compare to assess the impact of the Departments' new multi-pronged approach to addressing security issues.

Analysis:

- The EC is the result of an effort by Council to require the City to professionalize its Transit Security Data System. Transit Security data is now collected by Metro Security using a CAD dispatching and security reporting software to create call data bases.
- Per O-22-47, Section C(a)(1-4) each quarterly security data report shall include the following data.
  - Calls for service made to the Metro Security Division, the Albuquerque Police Department, and the Albuquerque Community Safety Department.
  - Categorization of the total number of calls for service by type of incident as classified in the Federal Bureau of Investigation's Uniform Crime Reporting System.
  - Number and types of calls for service by route, including on motorcoaches, paratransit vans, at bus stops and transit facilities. (As noted later in this Analysis section, since many bus stops are servicing multiple routes, this complicates statistics when reporting by route.)
- *Across the three quarterly periods (from April 2024 – December 2024), there has been an overall shift in the way that these three City Departments are responding to security calls (away from Metro and towards APD and ACS).* More specifically, there has been an overall:
  - Increase in Class A and Class B APD Reports (including an increase in APD calls for service at bus stops and facilities).
  - Increase in Class A ACS Reports at bus stop and transit centers)
  - Decrease in Class A and Class B ACS Reports (including an increase in ACS calls for service at bus stops and transit facilities).
  - Decrease in Class A and Class B Metro Reports (including an increase in Metro calls for service at bus stops and facilities).
- More specifically, there has been an:
  - Increase in total calls over each three-month period from 3929 to 7044 (79% increase).
  - Increase in reactive calls over each three-month period from 1526 to 2336 (53% increase).
  - Increase in proactive calls over each three-month period from 2403 to 4708 (96% increase).
  - Increase in Class A APD Reports over each three-month period for activities like vandalism (1 to 8), aggravated assault/battery (3 to 5), and fight in progress (2 to 4).

IPRA Response 001097

- Increase in Class B APD Reports over each three-month period for activities like Patrol watch/proactive (557 to 891), onsite suspicious (227 to 1198), and tac plans (7 to 328).
- Increase in Class A ACS Reports at bus stops and transit centers over each three- month period for activities like unsheltered individuals (37 to 52), welfare checks (5 to 8), and wellness checks (17 to 33).
- Decrease in Class A Metro Reports over each three-month period for activities like assault (4 to 3), battery (4 to 2), and narcotics (64 to 12).
- Decrease in Class B Metro Reports over each three-month period for activities like security checks (1846 to 1596), intoxicated (34 to 17), and encampments (11 to 10).
- Increase in events for APD by bus stop (857 to 4317) and facility (259 to 454).
- Increase in events for ACS by bus stop (29 to 54) and transit centers (50 to 59).
- Decrease in events for Metro by bus stop (291 to 80) and facility (2330 to 2024).

- Looking more specifically at the changes in calls for service during this current (third) quarterly reporting period:
  - Total calls per agency from October to December 2024: 1) increased for APD from 1295 to 1798 (but many of these calls are “Proactive” calls that are precautionary before an incident takes place), 2) decreased by more than half for ACS (from 51 to 21), and 3) decreased from 840 to 621 for Metro.
  - From October to December 2024, total monthly proactive calls across all agencies increased from 1447 to 1831. Total monthly reactive calls across all agencies decreased from 739 to 609.
  - APD Class A calls for service related to the following types of calls decreased from October to December 2024: Vandalism (from 3 to 2), Aggravated Assault/Battery (from 3 to 1), Fight in Progress (from 2 to 1), Sex Offense (from 1 to 0), Narcotics (from 1 to 0).

Fiscal Impact: The Cover Analysis for this EC indicated that there is no direct additional cost to the City associated with this EC. It should be noted, however, that the City Council and Administration jointly sponsored the creation of a 24/7 Metro Security Communications Center with eight FTEs and CAD/RMS with a three-fold intent: increase officer safety, improve response time/efficiency and improved data collection. *At the time that the second quarterly report was submitted to Council, Transit had not purchased any additional software or increased personnel. Council staff reached out to Transit to get an update on this as part of the third quarterly report but has not yet heard back.*

Key Dates:

- Per O-22-47, the Transit Department is required to submit security reports to Council on a quarterly basis starting the 4th quarter of FY24. The reporting periods and reporting deadlines for all four of the quarterly reports are as follows:
  - EC-24-193 was the first quarterly security report submitted to Council and accounted for April, May, and June 2024. The reporting deadline was August 1, 2024.
  - EC-24-257 was the second quarterly security report submitted to Council

IPRA Response 001098

and accounted for July, August, and September 2024. The reporting deadline was November 1, 2024.

- EC-25-321 is the third quarterly security report submitted to Council and accounts for October, November, and December 2024. The reporting deadline was February 1, 2025.
- The fourth quarterly security report submitted to Council will account for January, February, and March 2025. The reporting deadline will be May 1, 2025.

Comments:

- It was reported that APD and ACS do not yet supply bus data, but it appears that this will be done in the future.

Questions and Answers: While working on this writeup, Council staff followed up with Transit with the following questions listed below. Transit responded on 2/27 with the following answers (in italics):

- To follow up on the question initially posed from the second quarterly report, what efforts are underway to address the duplication in data reporting between Transit, APD and Metro Security?
  - *ABQ RIDE is in the process of creating a Transit Safety and Security Analysis Coordinator that will be responsible for the collection of all ABQ RIDE, APD, ACS, and Metro Security Data. In addition to collecting the data, this position will also develop one single report to be used for decision making and trend analysis.*
- To follow up on the question initially posed from the second quarterly report, are there any updates on the status of purchasing additional software or increasing personnel (per the Council and Administration's jointly sponsored creation of a 24/7 Metro Security Communications Center with 8 FTE's and CAD/RMS?)
  - *Currently ABQ RIDE relies on APD and Metro to report through their MARC 43 RMS system. At this time ABQ RIDE is not seeking to purchase additional software. In addition to APD Transit Safety Officers (TSO's), ABQ RIDE uses metro at the ATC (6 officers 24/7) as well as Metro Mobile units when TSO's are unavailable. As we continue to increase our TSO position count, both contracted security and Metro security usage should decline, and we will be more reliant on APD reporting.*
- What is the progress of the implementation of the Long-Range Security Plan? Have any of the recommendations included in the Plan been implemented? Are any of the recommendations going to be proposed in the upcoming FY26 Operating Budget?
  - *The Long-Range Security Plan study was completed December 31, 2024. Implementation of the study has begun. To date we have created and filled the Community Safety Ambassador, our official title for this position is Volunteer Coordinator, who is in the process of rolling out the ABQ RIDE Ambassador Program to launch in April 2025; The department is creating a Safety and Security division within Transit including the Creation of the Transit Safety and Security Oversight Manager and the Transit Safety and Security Analysis Coordinator (we plan to make both of these positions budget neutral). We are continuing to work with Parametrix on the implementation of the Long-Range Security Plan; to include the development of SOP's and streamlining data. For the FY26 operating budget we have requested to move funds from fuel savings to continue funding contracted security, with the intent of fully funding the TSO program while reducing contracted security during FY26.*

IPRA Response 001099

Item E. **EC-25-322** **Mayor's appointment of Mr. James D. Souter to the Metropolitan Parks and Recreation Advisory Board** (Dawn Marie Emillio)

Brief Summary: A retired salesman, Jim has a working knowledge of construction as well as experience in developing and controlling budgets. Currently, Jim serves as the president of the Vista Del Norte Alliance, acting as a liaison between the alliance and the City. Jim also represents the alliance as a member of the Council District 4 Coalition. A resident of Council District 4, Mr. James D. Souter will serve the remainder of an unexpired term as the Council District 4 representative; his partial term will expire on September 30, 2025.

Board Description: The Metropolitan Parks & Recreation Advisory Board was established by City Ordinance § 10-1-2-1. This Board is an eleven-member board charged with recommending policies to the Mayor for overall development of the park system. This includes plans for additional parks and recreation facilities involving the joint-use concept with Albuquerque Public Schools and ways and means of financing improvements. Members must be residents of the City and able to attend the monthly meetings.

Current Membership:

Representing	Name	Term	Council District
At Large	Mr. Tony R. Johnson	9/30/2022	3
At Large	Ms. Valerie L. Martinez	9/30/2026	8
Council District 1

Council District 8			
Council District 9	Mrs. Fredrica K. Bergquist	9/30/2025	9

Item F. **EC-25-323** **Mayor's appointment of Ms. Marie Elizabeth Eszenyi to the Library Advisory Board** (Dawn Marie Emillio)

Brief Summary: Marie Eszenyi is an Albuquerque professional with a background in education and advocacy. Originally from the northern Virginia area, Marie Eszenyi graduated with a B.S. in Communication Studies, a B.A. in Philosophy and Religion, and an M.A. in Communication & Advocacy from James Madison University. After teaching at the university level for many years, she entered the business arena - first in insurance providing workers' compensation policies to assist individuals involved in workplace accidents. She is currently an executive board member (Treasurer) for The Children's Hour - a nationally syndicated children's radio program based in Albuquerque and a big sister in the Mentor 2.0 program with Big Brothers and Big Sisters of Central New Mexico.

IPRA Response 001100

A resident of Council District 4, Ms. Eszenyi will serve as the District 4 representative; her first term will expire on July 31, 2028.

Board Description: The Library Advisory Board was established by City Ordinance § 10-6-1. The Board acts as a liaison between the community and its government to: keep itself informed of library needs and to serve as a forum for discussion; recommend to the Mayor and County Commissioners policies for overall development to include plans for additional library facilities, and ways and means of financing improvements; and to encourage the greatest use of library facilities and programs. The Board consists of two members appointed by the Mayor, nine appointed by the City Council (one from each district), and four members who are appointed by the County Commissioner.

Item G. **EC-25-324** **Mayor's appointment of Mr. Gabe Gomez to the Arts Board** (Dawn Marie Emillio)

Brief Summary: Gabe Gómez's first poetry collection, The Outer Bands, won the Andres Montoya Poetry Prize and was published by the University of Notre Dame Press in 2007. The book focuses on his experiences and those affected by Hurricane Katrina. His second collection of poetry, The Seed Bank, was published by Mouthfeel Press, who will also publish his third book, Samsara at Quantum Zeno, in 2024. He completed his bachelor's degree in creative writing at the College of Santa Fe. He earned a master's degree in fine arts from Saint Mary's College of California. Gabe has taught at institutions such as Tulane University, the University of New Orleans, and the Institute of American Indian Arts. Gabe is pursuing an Executive MBA at the UNM Anderson School of Management, and he is expected to graduate in the Class of 2024. He serves as the Managing Director of Marketing and Communications at the University of New Mexico

IPRA Response 001101

Foundation and is the editor-at-large for TABLE Magazine New Mexico, where he covers topics related to food, wine, and New Mexico's cultural heritage. Additionally, Gabe is the President of the American Marketing Association, New Mexico Chapter.

A resident of Council District 4, Mr. Gabe Gomez, will replace Mr. Woody Duncan as the Council District 4 representative; his first term will expire July 31, 2027.

Board Description: Established by City Ordinance § 10-5-3, the central objective of the Albuquerque Arts Board is to "promote and encourage private and public programs to further the development and public awareness of, and interest in, the visual arts and fine crafts and cultural properties." This eleven-member board includes people widely known for their professional competence and experience in the visual arts, and knowledgeable lay persons. Each member serves a staggered three-year term. The central responsibility of each member is to serve as Board liaison to Artwork Planning Committees. The full Board makes selection recommendations to the Mayor.

Current Membership:

Representing	Name	Term
1. At Large		
2. At Large	Dr. Bernadine M. Hernandez	7/31/2025
3. District 1		
4. District 2	Ms. Cara Gordon Potter	7/31/2025
5. District 3		
6. District 4	Mr. Woody Duncan	7/31/2024
7. District 5

9. District 7	Mr. Caleb Ferganchick	7/31/2027
10. District 8	Ms. Charlotte Coulombe Shoenmann	7/31/2024
11. District 9	Ms. Dorothy Stermer	7/31/2023

Item H. **EC-25-325** **Presentation of FY24 Audit** (Jennifer Brokaw)

Brief Summary: Pursuant to Section 6-66-2L NMSA 1978 and the Office of the State Auditor requirements, the NM Department of Finance Local Government Division requires a copy of the governing body's resolution acknowledging the Fiscal Year 2024 audit findings and accepting management's responses for correcting the findings.

Analysis: The City of Albuquerque's Annual Comprehensive Financial Report (ACFR) presents a narrative overview and analysis of the financial activities for the fiscal year ended June 30, 2024. Below are key financial highlights from the report:

- The City's net position grew by $88.6 million, reaching $3.7 billion by fiscal year-end, while the unrestricted net position was $(689.0) million as if June 30, 2024.
- As of June 30, 2024, the City's governmental funds had a total fund balance of $954.1 million, with $73.4 million available for discretionary spending. (sum of unassigned and assigned fund balance)
- As of June 30, 2024, the General Fund balance was $95.8 million, with unassigned balance of $26.7 million, representing 3.4% of total expenditures of $781.3 million.

IPRA Response 001102

- The City's enterprise funds' net position grew by $42.0 million, reaching $836.1 million as of June 30, 2024.
- The City's governmental long-term obligations rose by $139.5 million, driven by a $147.4 million pension obligation increase, a $43.7 million rise in bonds and notes payable, offset by decreases of $5.5 million in claims reserves and $46.8 million in OPEB obligations.

Fiscal Impact: There is no fiscal impact associated with this EC.

Comments: There were 19 findings noted in the FY/24 Audit. Nine out of the 16 findings noted in FY23 were resolved.

Item I. **OC-25-30** **Re-Appointment of Joshua Hoffman CFE to the Urban Enhancement Trust Fund Citizens Committee for District 4** (Dawn Marie Emillio)

Brief Summary: Raised in Albuquerque, Joshua Hoffman graduated from La Cueva High School and later from the University of New Mexico with a bachelor's degree in art history. After graduation, Mr. Hoffman moved to London, England, where he earned a master's degree in Contemporary Art History with an emphasis on technology-based art. After living and working in the United Kingdom for three years, he moved with his long-time partner, Elizabeth, to Minneapolis, Minnesota, where he worked as an analyst at Wells Fargo's main campus. Soon after he was married, he moved back to Albuquerque to be closer to family and friends. After nearly a decade of working in various financial and accounting positions and earning several professional certifications, Mr. Hoffman began working for the State of New Mexico as a Certified Fraud Examiner in the Tax Fraud Investigations Division of the Taxation and Revenue Department, where he remains today.

A resident of Council District 4 and currently serving as the UETF's Vice Chair, Mr. Hoffman will represent his District on the committee. His second term will expire on February 1, 2026.

Board Description: The Urban Enhancement Trust Fund (UETF) is a public endowment created by the Albuquerque City Council in 1983. UETF is a two-year program with planning, application, review, and selection process. UETF supports projects that enhance and enrich Arts and Culture for city residents. The UETF ordinance provides for an eleven-member board called the UETF Board that is responsible for establishing guidelines. The UETF Board, with Staff input, develops criteria for project selection for each two-year granting cycle, and are responsible for reviewing and scoring each proposal.

Current Membership:

Representing	Name	Term
1. At Large	Mr. John "Jerry" Matthews	2/2/2026
2. At Large	Ms. Mary Schmidt	2/1/2026

10.	District 8		
11.	District 9		

Item J. **R-25-118** **Approving The First Amendment To The South Campus Tax Increment Development District Formation Resolution (Council Bill No. F/S R-21-202 / Enactment No. R-2021-072), Regarding TIDD Governance (Rogers)** (Julia Coulloudon)

Brief Summary: This resolution proposes to amend the South Campus Tax Increment Development District Formation Resolution to (1) change the composition of the TIDD Governing Body by making the City Councilor for District 6 the default representative of the City Council; and (2) allow all TIDD Board members to designate an alternate person to serve in their absence.

Analysis: The South Campus TIDD Board is currently comprised of five members:

1. A representative of Lobo Development Corporation designated by the Board of Regents;

2. A representative of the University of New Mexico designated by the Board of Regents;

3. A representative of the City Council designated by the Council;

4. A representative of the City Administration designated by the Mayor; and

5. The Secretary of the New Mexico Department of Finance and Administration or the Secretary's designee.

The representative designated by the City Council has previously been the Director of Council Services.

When the TIDD Formation Resolution was first adopted, the TIDD boundaries included areas within two City Council Districts: District 2 and District 6. Following the 2020 US Census and the City's redistricting process, the TIDD falls entirely within the boundaries of District 6. This Resolution proposes to amend the TIDD Governance section of the Formation Resolution to make the City Councilor for District 6 the default member representing the City Council.

This Resolution would also allow any of the five members of the TIDD Board to designate an alternate person to serve in their absence during specified meetings. Any alternate would be permitted to vote the member's proxy on any motions requiring approval.

Fiscal Impact: n/a

Comments: The complete TIDD Formation Resolution can be found here: F/S R-21-202.

IPRA Response 001104

Bill History: At FGO on 2/10/2025, this bill received a unanimous “do pass” recommendation and no amendments or substitutes were moved.

13. APPROVALS:

Item A. **EC-25-291** **Mayor's appointment of Ms. Marie E. Coleman to the Old Town Portal Market Advisory Board** (Nathan Molina)

Brief Summary: Ms. Marie Coleman owns Church Street Cafe in Albuquerque and has years of experience in running restaurants. She excels in managing operations, leading staff, and planning finances. Ms. Coleman builds strong community relationships and boosts sales, which has improved customer engagement and service quality. She knows how to plan strategically, control costs, and motivate her team, making her an expert in small business operations.

Ms. Marie Coleman lives in Council District 2 and will take over the role of Merchant/Property Owner representative on the Board, replacing Dr. Sylvia M. Ramos. Her first term will last until June 1, 2027.

Board Description: The Old Town Portal Market Advisory Board was established via Section §13-3-2-7 of the City of Albuquerque Code of Ordinances. The Board advises the Mayor and City Council regarding policies regulating the vendors, issuance of permits, and rules and regulations for the safe administration of §§ 13-3-2-1 et seq. The Old Town Portal Market Advisory Board is comprised of five members, two who are merchants or property owners in Old Town, two who are vendors, and one at large member.

Comments/Questions: None

Current Membership:	**Name**	**Term**
1. At Large	Mrs. Dana D. Sherrill	6/1/2025
2. Merchant/Property Owners	Dr. Sylvia M. Ramos	6/1/2024
3. Merchant/Property Owners	Ms. Charlene G. Kalbfell	6/1/2024
4. Vendors	Ms. Marylin Moquino	6/1/2025
5. Vendors	Mrs. Dagney Townsend	6/1/2026

Item B. **EC-25-317** **Early Head Start Quarterly Board Report for July 2022 through December 2024** (Abigail Stiles)

Brief Summary: This report is not truly a report, but rather a download of documents of information from the Early Head Start program from July 2022 to December 2024. The collection of documents includes attendance sheets, monthly manager’s reports, meeting minutes from Early Head Start Policy Council Meetings, Monthly Program Information Summaries, caseload and enrollment reports, and monthly center-based and home-based reports.

Analysis: The report’s cover page and analysis indicate the report is required by Councill Bill No. O-14-16, however this is incorrect as the Ordinance was amended in 2018 to

IPRA Response 001105

completely replace the section in O-14-16 regarding reports by the committee. Council Bill O-14-16 established the Early Head Start Governance Advisory Committee, and O-18-4 later amended its structure, reducing the required members from seven to five and allowing quarterly meetings instead of monthly ones. The updated ordinance also mandated that the committee review quarterly reports prepared by program staff for the Mayor and City Council. These reports were to include summaries of program performance, school readiness progress, enrollment and attendance data, family engagement activities, and financial information, including subsidies from federal, state, and local sources.

No advisory committee has been active since at least 2019. Although quarterly reports for the Early Head Start program were produced until October 2022, there is no indication that the Governance Advisory Committee ever reviewed them.

Past reports generally followed the ordinance's structure, including enrollment updates, summaries of Early Head Start Policy Council meetings (a separate entity from the Governance Advisory Committee), attendance data, financial details, and aggregate performance metrics.

However, the current report lacks quarterly breakdowns, summary information, analysis, or progress indicators. While it includes Policy Council meeting minutes, it does not synthesize the information. Instead, it is merely a collection of documents without meaningful interpretation.

Fiscal Impact: NA

Key Dates: This "report" covers the time from June 2022 to December of 2024.

Comments:

- This EC does not appear to fulfill the requirements of the Early Head Start Program Governance Advisory Committee Ordinance.
- The City's EHS program has faced numerous challenges over the years, leading to the creation of advisory committees and mandated reports. In 2018, reports of substandard facilities and lack of oversight prompted changes to the advisory committee structure and the implementation of quarterly reporting. The program also struggled to retain teachers and students during the height of the COVID-19 pandemic, and those struggles have continued.
- A key challenge has been teacher recruitment and retention. EHS teachers must meet credentialing requirements similar to those of Albuquerque Public Schools (APS) teachers, but legislative increases in public school salaries have made EHS salaries uncompetitive. Additionally, program leaders have noted that many teachers prefer working with toddlers over infants, further complicating hiring efforts. The City's lengthy hiring process has also deterred potential candidates, who often accept other positions before completing the process. As a result, several EHS sites have closed in recent years, with no plans for reopening. The most recent closures include:
  - **Singing Arrow** (2021)
  - **La Mesa** (2022)

IPRA Response 001106

- **Western Trail** (2023)
- **MacArthur** (2024)

- A number of non-profits operate successful Early Head Start programs in the City. Should the City review having these non-profits assume the City's Early Head Start program?

Item C. **EC-25-318** **Request Authorization of Social Service Agreement with Family Endeavors, Inc, d/b/a Endeavors to Provide Recovery-Focused Services to Individuals Overcoming Opioid Use Disorder and co-occurring Substance Use Disorder** (Abigail Stiles)

Brief Summary: The City of Albuquerque's Department of Health, Housing, and Homelessness issued **RFP-2025-645-HHH-RM** to secure an operator for the Gateway Recovery Community. Family Endeavors, Inc. was awarded the contract to provide housing and support services for up to 50 single adults in early recovery from substance use disorders. The agreement, funded by opioid settlement funds appropriated through **Resolution R-24-29,** spans up to three years with a potential total of $8.1 million, including a prorated first-year allocation of $1.12 million for services from February 1 to June 30, 2025. The department seeks City Council approval for this initiative.

Analysis: This EC outlines an agreement between the City of Albuquerque and Endeavors, a nonprofit organization based in San Antonio, Texas. The agreement focuses on providing recovery-focused shelter services for up to 50 individuals overcoming substance use disorder at the Recovery Gateway micro-community.

Daily services focus on goal setting, coping skills, and stress reduction through group and individual counseling. The micro-community operates 24/7 with at least three shelter care staff per shift. Additional services include intake/discharge coordination, meal distribution, welfare checks, custodial duties, safety monitoring, transportation, and coordination with onsite clinical staff for recovery support. This contract is for site management and care coordination, but the provider will work with other local agencies for substance abuse treatment services.

Fiscal Impact: The known source of funding for this contract, the Opioid Settlement Funds, were appropriated from Fund 201 to HHH's predecessor (the Family and Community Services Department) through R-24-29 which appropriated $5 million to the project. However, the contract approved through this EC is not to exceed $8,100,000 over three years, and this does not account for site construction. From the contract quantities it appears that HHH intends to expend more than the $5,000,000 available from the Opioid funds, but the Department does not in the EC identify how the expenses exceeding $5 million will be paid.

Key Dates: If this EC is approved, the contractor's services will begin on February 1, 2025, and continue through June 30, 2025. The contract may be extended for up to three years, with the second year running from July 1, 2025, to June 30, 2026, and the third year from July 1, 2026, to June 30, 2027.

IPRA Response 001107

Comments:

- In October of 2024 the Administration introduced EC-24-242, which requested authorization of appropriated funds for a social service agreement with Endeavors to provide recovery-focused shelter services to individuals overcoming substance use disorder. Due to questions about procurement, the EC was withdrawn in early December of 2024. Since then, **RFP-2025-645-HHH-RM was solicited and** Endeavors, Inc. was awarded the contract.
- The Gateway to Recovery micro community is located off 3401 Pan American Freeway NE, south of Comanche. Construction for the housing began mid-October.
- This bill passed at FGO on February 10th.

Question:

- What is the estimated cost to renovate the facility that the contractor will occupy?
- What are the fund sources that will be debited to pay for this contract including any construction costs?

14. FINAL ACTIONS:

Item A. **O-24-63** **Repealing Chapter 11, Article 1, Parts 1 And 2 Related To Nuisance Abatement And Replacing It With A New Nuisance Abatement Ordinance (Grout, by request)** (Matthew Cox)

Brief Summary: This ordinance repeals the existing ordinance and replaces it fully. A large part of this ordinance is making the code more efficient through deletion of unnecessary language and addition of language that speeds up the enforcement process. It also brings in other nuisance and enforcement ordinances such as the noise ordinance, food sanitation, humane and ethical animal rules and treatment, etc. (all found on page 3). This also includes any acts or omissions that would be deemed a public nuisance under common law. In this way, all enforcement ordinances fall under the same general rule, eliminating questions of different enforcement processes.

A major change is the elimination of the Temporary Restraining Order provisions. These provisions were complicated and seldom used. This has been replaced in part by allowing for the closure of a business for up to 30 days by administrative hearing. Temporary restraining orders may still be sought in compliance with the New Mexico Rules of Civil Procedure.

Additionally, the fines were increased from $200 at the first notification, $300 at the second notification and $500 at the third notification, to instead making all violations punishable with a $500 fine. The fine is required to be paid in 30 days and violators do have a payment plan option if they can demonstrate hardship, low-income status or indigent status.

Analysis: This ordinance defines “Imminent Hazard,” which was used in the former code but undefined. Imminent hazards are ones that create an immediate and articulable risk of serious injury or death and allow the City to immediately abate a nuisance without

IPRA Response 001108

following the notice provisions. This will help City staff act on dangerous issues immediately.

The ordinance deletes unnecessary definitions like personal property, property, contraband and criminal street gang.

Under Section 11-11-14 Lien for Judgements, it clarifies that the City may initiate the foreclosure process and start the recording with Bernalillo County. The City has always had the ability to start this process, but now this language reaffirms it for clarity purposes.

Fiscal Impact: A FIA was not provided with the ordinance, so it is unclear as to how the fee increase and quicker process will affect the Planning Department or General Fund.

Amendments from Council Meeting 2/3/2025: O-24-63 was amended a number of times at the February 3rd City Council Meeting. The first amendment was to add language that a daily fine of $500 shall only be imposed in the case of an imminent hazard. Imminent Hazard is defined in the ordinance as "a condition where creates an immediate and articulable risk or serious injury or death to persons in the vicinity."

The second amendment strikes through the Weed and Litter Ordinance from the list of relevant ordinances within Article 11. The Councilor's reasoning behind this amendment was to remove the Weed and Litter Ordinance from the list of ordinances that fall under the "Public Nuisance" status if three or more violations occur within 3 months. If someone or their property is deemed a public nuisance that are open to possible jail time.

The third amendment added the language "In no instance shall allowing individuals to camp of store their belongings on private property be deemed a public nuisance," as well as "No person shall be in violation of this ordinance if the nuisance designation is based solely on allowing individuals to camp or store their belongings on private property." These amendments were for the purpose of ensuring that Article 11 is not used to criminalize or punish unsheltered members of our community.

Key Dates: The ordinance would go into effect five days after publication.

Comments: This ordinance has no whereas clauses to clarify the purpose of repealing and amendments.

Item B. **O-25-70** **C/S Amending Ordinance Chapter 2, Article 6, Part 1 Relating To Public Boards, Commissions, And Committees (Bassan)** (Julia Coulloudon)

Brief Summary: This bill proposes to create a new Public Boards, Commissions, and Committees Advisory Task Force ("Task Force") in the City's existing Boards and Commissions Ordinance. The stated purpose of the Task Force is to ensure effective functioning and governance of all City boards, committees, and commissions by conducting annual reviews of ordinances to ensure they remain relevant, efficient, and responsive to the needs of the City. The Task Force would conduct reviews on a rotating three-year cycle and would provide a report of its findings and recommendations,

IPRA Response 001109

including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year.

At FGO, this bill was substituted and amended. The CS leaves the Task Force portion of the bill unchanged but adds two new components within the Boards and Commissions Ordinance: (1) Procedures for appointments to boards that require a Councilor submit two names to the Mayor and the Mayor selects from the two; and (2) new Decorum, Code of Conduct, and Social Media Policies for all Boards and Commission members.

Analysis:

Task Force: The Task Force would be an advisory board tasked with annually reviewing the City's many Boards, Commissions, and Committees by evaluating their effectiveness, structure, and compliance with current policies. The Task Force would consist of four City employees: two members appointed by the Council and two members appointed by the Mayor. Members would serve two-year terms. The Task Force would review 1/3 of the City's Boards, Commissions, and Committees each year to ensure that each entity is reviewed once every three years. For each entity, the Task Force shall:

1. Review the delegation of powers and legal authority for the entity;
2. Assess the effectiveness, structure, and roles of the entity;
3. Evaluate whether any boards, commissions, or councils should be consolidated, eliminated, or modified;
4. Solicit feedback from City support staff and current members, as needed; and
5. Prepare a report of the Task Force's findings and recommendations, including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year.

The Task Force must hold its first meeting within 45 days after all appointments have been made, will elect a Chair at its first meeting, and must meet at least once annually. The City Clerk will provide administrative support and resources to the Task Force.

Appointment Procedures: The approved CS added procedures for appointments to boards that require a Councilor submit two names to the Mayor and the Mayor selects the from the two. The CS codifies the existing process where the Mayor notifies Council of vacancy and provides applicants; the Councilor has 60 days to send two recommended names back to the Mayor; then the Mayor has 30 days to pick from the two and recommend them to Council for final advice and consent. The CS adds that if the Councilor fails to submit two names within 60 days, then the Mayor gets to make the appointment, subject to the advice and consent of the Council. The CS also added that if the Councilor doesn't receive more than one applicant from the Mayor's office, and no one else applies for 3 months following the notification of vacancy, then the Councilor can send just one name to the Mayor. An amendment was approved at FGO that reduced this timeframe from 3 months to 45 days. So, if a Councilor only receives one qualified applicant for an open position with a *45-day period*, the Councilor may submit one name to the Mayor and the Mayor shall submit that name to the Council for final advice and consent.

Decorum, Code of Conduct, and Social Media Policies: The approved CS adds a new section that is applicable to all City Boards, Commissions, and Committees regarding

IPRA Response 001110

Decorum, Code of Conduct, and Social Media Policies for members. These policies are based on the CPOA Board Policies and Procedures that were approved by the Council last fall (OC-24-23).

Fiscal Impact: None

Key Dates: The Task Force would conduct reviews on a rotating three-year cycle and would provide a report of its findings and recommendations, including any proposed ordinance amendments, to the City Council and Mayor by December 31 of each year. This bill would go into effect five days after publication by title and general summary.

Bill History: At FGO on 2/10/2025, a Committee Substitute was approved and one amendment to the CS was passed. A Blueline of the amended CS is on OneDrive. FGO voted unanimously to send to the full Council with a recommendation of *Do Pass, as Substituted, as Amended*.

Item C. **R-25-116** **Adjusting Fiscal Year 2025 Appropriations For The Marijuana Equity And Community Reinvestment Fund 202 (Peña, by request)** (Laura Rummler)

Brief Summary: This resolution adjusts Fiscal Year 2025 appropriations by appropriating $4,020,000 to the Marijuana Equity and Community Reinvestment Fund 202 under the Department of Finance and Administrative Services (DFAS). The fund supports programs aimed at equitable community reinvestment and expanding opportunities for populations historically impacted by marijuana criminalization. While formalizing the appropriation, the resolution lacks detailed implementation strategies or measurable program outcomes.

Analysis: The Marijuana Equity and Community Reinvestment Fund 202 is projected to generate $4.02 million annually through marijuana tax revenue. This resolution appropriates the projected amount to DFAS.

Ordinance O-23-87, codified as § 4-12, outlines the fund's permissible uses, including drug education, recovery programs, workforce development, technical assistance for small businesses, and re-entry programs for those impacted by marijuana criminalization. Oversight is assigned to DFAS in coordination with the Office of Equity and Inclusion (OEI), with a focus on benefiting disproportionately impacted communities.

The administration provided the following breakdown of allocations for the $4.02 million:

- Evidence-based drug education, awareness, and prevention programs for youth: $549,000 (14%).
- Evidence-based substance use treatment for youth, including inpatient detoxification: $1,271,092 (31%).
- Recovery housing and supportive aftercare: $179,908 (5%).
- Supplemental income programs & Workforce development/job training: Included in OEI programming ($2,010,000 total for these and other equity initiatives) (50%).
- Technical assistance for small marijuana business owners: $0
- Programs for people re-entering after incarceration: $0

IPRA Response 001111

The administration also provided an implementation timeline:

- Guaranteed Income Disbursements to families from Whittier & Carlos Rey Elementary Schools: First payments begin within one month of fund appropriation and continue for three years.
- Job Training ABQ participants to receive funding by June 2025.
- Programs targeting opportunity youth to receive funding by September 2025.
- OEI's Office of Financial Empowerment to oversee implementation and reporting.
- Health, Housing & Homelessness (HHH) will establish or amend contracts to address ordinance-identified needs.

The administration also confirmed that if Fund 202 revenues fall short of projections, programmatic elements will be revised accordingly.

Certain eligible uses under the ordinance, such as technical assistance for small marijuana businesses and re-entry programs for formerly incarcerated individuals, have been left unfunded.

The administration answered by pointing out that the ordinance makes a suggested use of funding, not a requirement, "The list includes small marijuana business owners and people re-entering society after incarceration along with six other items listed. OEI chose to focus on other purposes and related programs on the list… Given the falling price of marijuana and the lower than projected revenues, utilizing these particular funds for technical assistance would not make as great an impact as more upstream interventions to remediate harms caused by the criminalization of marijuana, such as a guaranteed income projects which affect outcomes such as housing, basic need acquisition, and public safety."

The resolution and administrative cover analysis provide limited information on fund distribution or oversight mechanisms. While the ordinance allows flexibility for various programs, the resolution does not specify which initiatives will be prioritized or how success will be measured. The provided cover analysis states, "The appropriation of funds enables City of Albuquerque stakeholders to provide administration and programming to benefit those harmed by marijuana prohibitions," without identifying who these "stakeholders" are. The clarification was provided per questions from Council Staff by the administration's Government Affairs team.

Fiscal Impact: Appropriates $4,020,000 in projected marijuana tax revenue to Fund 202 for Fiscal Year 2025.

No additional funding sources or fiscal details are provided. The resolution does not specify procedures for handling unspent funds in the event of program delays or underutilization.

Comments: The Finance and Administrative Services Department will oversee fund allocation, with input from the Office of Equity and Inclusion. However, transparency regarding fund distribution and reporting remains unclear.

IPRA Response 001112

There is no explanation for why certain eligible program areas under the ordinance such as technical assistance for small marijuana business owners and re-entry programs are receiving no funding.

The administration has confirmed that the Cannabis Equity Tax Guaranteed Income Program will serve families from Whittier & Carlos Rey Elementary Schools, foster care youth aging out of the system, and workforce development participants. The administration provided that MOUs are in place for key stakeholders and contracts are pending appropriation for community organizations.

Committee recommendation: Recommendation of Do Pass.

Questions: Follow-up questions were sent on Monday, Feb. 24, after the FGO meeting. Council Services received the following answers from Government Affairs.

- *Who are the stakeholders listed in the MOUs for the Cannabis Equity Tax Guaranteed Income Program?*
    - Albuquerque Public Schools
    - United Way of North Central New Mexico (UWNCNM)

- *Will the City be issuing contracts for the community organizations administering these programs, or will the Albuquerque Foundation (One Albuquerque Fund) oversee fund distribution?*
    - One Albuquerque will disburse funding to UWNCNM who will serve as fiscal agent for guaranteed income program.

- *What criteria were used to determine the percentage of funding allocated to each program category?*
    - O-23-87 guidance
    - Community input/ Landscape analysis
    - Existing work and CABQ staff capacity

- *Why were no funds allocated to technical assistance for small marijuana business owners or re-entry programs for formerly incarcerated individuals, despite their inclusion in the ordinance?*
    - The ordinance states “The Marijuana Equity and Community Reinvestment Fund may be used for the administration and provision of any or all of the following purposes and related programs…” The list includes small marijuana business owners and people re-entering society after incarceration along with six other items listed. OEI chose to focus on other purposes and related programs on the list.
    - Because there are currently 339 Cannabis Control Division licenses in Albuquerque. Given the falling price of marijuana and the lower than projected revenues, utilizing these particular funds for technical assistance would not make as great an impact as more upstream interventions to remediate harms caused by the criminalization of marijuana, such as a guaranteed income projects which affect outcomes such as housing, basic need acquisition, and public safety.
    - Formerly incarcerated individuals will benefit from the current programming.

- *How will the administration ensure accountability in fund distribution, particularly*

IPRA Response 001113

for the guaranteed income program?

- The guaranteed income program will keep accurate record of participants.
- Disbursement of guaranteed income program funding will be facilitated by UWNCNM.
- UWNCNM will deliver monthly and quarterly reports on operational excellence to ensure timely and accurate distribution of funds.

- *If revenue projections fall short, what specific criteria will be used to determine which programs receive reduced funding*?
  - Priority will be given to works in progress and those that support the needs of at-risk youth.

Item D. **R-25-122** **Establishing minimum staffing requirements for Albuquerque Fire Rescue, Rescue Apparatus (Lewis, Baca)** (Jeff Hertz)

[Immediate Action Requested]

Brief Summary: This bill involves an amendment to R-16-41 enacted in 2016, which established minimum staffing requirements for AFR Engine Apparatus, Rescue Apparatus, Ladder Apparatus, Hazardous Materials Squads, Heavy Technical Rescue Squads, Quality Assurance Units, Battalion Commander Units And Support Divisions.

This amendment applies to Rescue Apparatus and is intended to maintain/codify a minimum of two paramedic firefighters per Rescue Apparatus unit, because rescue units that have two firefighters of the highest level of pre-hospital licensure (paramedic) deliver lifesaving aid as swiftly as possible.

This paired paramedic system is a sought-after standard across the country and the City of Albuquerque is able to maintain these same levels of service as other departments across the nation, including departments in Florida, New Jersey, Arizona, and more who also have paired paramedic systems.

This bill is in response to the Administration's proposed change to reduce the number of paramedics on Rescue Apparatus to one paramedic.

There are four directives in this bill and only one amendment (inclusion of the word "paramedic"):

1. With the exception of temporary exigencies or emergencies, as determined by the Chief, the City of Albuquerque will continue the policy and practice of staffing rank-specific firefighters to all Engine apparatus with a minimum of four (4) firefighters, Rescue apparatus with a minimum of two (2) **[paramedic]** firefighters, Ladder apparatus with a minimum of three (3) firefighters, Hazardous Materials Squads with a minimum of two (2) firefighters, Heavy Technical Rescue Squads with a minimum of four (4) firefighters, Quality Assurance Units with one firefighter, and Battalion Commander Units with one (1) firefighter.
2. The City of Albuquerque will continue to staff firefighters in the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division with adequate staffing levels.

IPRA Response 001114

3. That as the size of the City and call volume for Albuquerque Fire Rescue increases thereafter, the City of Albuquerque shall increase the number of apparatus with categorical staffing levels maintained, and increase firefighter staffing levels of the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division.

4. That in the event of staffing modifications recommended by the Chief, the City of Albuquerque and Albuquerque Area Fire Fighters IAFF Local 244 must meet and confer prior to amending.

Analysis:

- Residents and visitors of Albuquerque currently receive a two-paramedic response system for emergency medical calls. Removing two-paramedic units in the City is not a new idea, and is something that has been attempted in the past, but has not been widely implemented.
- AFR has a triaged dispatch system, ensuring the right resource goes to the right call. This system prioritizes paramedics to emergency medical dispatches or calls with patients. Non-patient calls are primarily handled by other units in the fleet.
    - As a case in point: on a windy night in Albuquerque, an AFR Engine may be dispatched to a downed powerline, keeping the public safe and waiting for PNM to arrive. Common emergencies like these that AFR is responsible for but have no patients, like dumpster fires, would waste the paramedic resource, leaving only one paramedic available for medical events in that area.
- In EMS situations with patients, AFR's triaged dispatch response also helps protect trucks and crews across the city by more evenly spreading out call volume and ensuring appropriate resource allocation. Through triage, just as in most medical settings, AFR can assess what level of care is most likely necessary to resolve a situation – leaving critical infrastructure available for higher severity calls.
- Moving around a same number of paramedics onto different trucks with different functions in the community, in contrast to a methodical triage-based dispatch system, is not an expansion of service - instead, it changes the structure in which the Department ensures delivery of the best service for each call type.

Fiscal Impact: This bill does not have a direct fiscal impact, but if the Administration's proposed change to staffing requirements is implemented, it could impact AFR's internal rank structure, create pay disparities, and other complications.

Key Dates: Firefighters would be moved into this alternate system as early as mid-March if no action is taken. These changes to staffing requirements would impact AFR's operations indefinitely, until further policy or administrative instructions are enacted.

Comments: None

Item E. **R-25-124** **Amending The Adopted Capital Implementation Program Of The City Of Albuquerque By Supplementing Current Appropriations. Be It Resolved By The Council, The Governing Body Of The City Of Albuquerque (Baca, Sanchez)** (Laura Rummler)

IPRA Response 001115

[Immediate Action Requested]

Brief Summary: This resolution reallocates $500,000 in capital funding from the Ken Sanchez Indoor Sports Center to the Albuquerque Rail Trails project.

Analysis: The transfer of funds between these projects is permissible, as both were approved under the 2022 New Mexico Gross Receipts Tax Improvement Revenue Bonds Series. A total of 16 projects were approved by C/S R-22-34 for this series.

Fiscal Impact: This resolution decreases capital funding for the Ken Sanchez Indoor Sports Complex while increasing funding for the Albuquerque Rail Trails project. However, it does not alter the total funding allocated under the 2022 New Mexico GRT Bond.

Comments: This reallocation maintains financial support for the Ken Sanchez Indoor Sports Complex in District 1 while further funding the Rail Trails project in District 2.

Item F. **P-25-7** **Adopting A Proposition To Be Sent To The Voters At The 2025 Regular Local Election, Proposing To Repeal Article XI, Section 7 Of The Charter Of The City Of Albuquerque Regarding A Public Vote On Performing Arts Center (Baca)** (Julia Coulloudon)

Brief Summary: This bill proposes to submit a City Charter amendment question to the voters at the City's regular local election to be held on November 4, 2025. An amendment to the City Charter proposed by the Council must be approved by a vote of a majority of all Councilors plus one (6 votes).

If approved by the Council and the voters, this Charter amendment would repeal a provision that states that before the City can appropriate funds for a performing arts center, a majority of voters must approve the proposed performing arts center in a municipal election.

Analysis: This bill would remove the following text from the City Charter:

~~[Section 7. PUBLIC VOTE ON PERFORMING ARTS CENTER.~~
~~The city shall not appropriate funds for a performing arts center costing more than ten (10) million dollars without prior approval of a majority of votes cast on the proposed performing arts center in a municipal election. The city may, however, appropriate funds to study, to analyze the feasibility of, and to undertake preliminary design of any such center prior to the election required by this section.~~]"

This provision was originally added to the Charter in 1991.

Fiscal Impact: n/a

IPRA Response 001116

Key Dates: Article VI, Section 3 of the City Charter requires the Council to hold at least two public hearings prior to its vote on the proposed Charter Amendment. The Council may revise the proposed amendment as a result of suggestions and recommendations made at the first public hearing, but if such a revision is made at the second of the two public hearings, the Council shall hold a third public hearing on the proposed Charter amendment. Any revisions made shall be posted along with the notice of the next meeting after a review by the City Attorney to ensure the summary is still accurate after the revision.

1. The first public hearing was the **February 19, 2025,** City Council meeting. No amendments were made to the bill.
2. The second public hearing will be the **March 3, 2025,** City Council meeting. If no amendments are made to the bill at this meeting, the Council may take a final vote on the bill on March 3. If the bill is amended at this meeting, the Council must defer the bill and hold a third public hearing before final action.

State law requires that ballot question resolutions be submitted to the County Clerk not less than seventy days before the election. (*See* "companion resolution" R-25-119). P-25-7 and R-25-119 must be approved by the Council no later than August 26, 2025 (70 days before the November 4, 2025, election), including time for required hearings and to resolve any possible veto of the companion resolution.

The State's Local Election Act, NMSA 1978, Section 1-16-3 provides the following:

B. Whenever a local government ballot question is to be submitted to the voters of a local government on a general election or regular local election ballot, not less than seventy days before the election at which the ballot question is proposed to be submitted to the voters, the local government shall file a resolution proposing the ballot question with the county clerk of each county containing any precinct in which votes may be cast for or against the local government ballot question. Not less than sixty-seven days before the election, each county clerk shall certify the local government ballot question to the secretary of state.

Item G. **R-25-119** **Adopting A Proposition To Be Submitted To The Voters At The Next Election To Be Held In The City Of Albuquerque Concerning An Amendment To Article XI, Section 7 Of The Albuquerque City Charter; Providing The Form Of The Question And The Designation Clause For Such Question On The Ballot (Baca)** (Julia Coulloudon)

Brief Summary: This bill is the "companion resolution" to P-25-7, which proposes an amendment to the City Charter. If P-25-7 is approved by the Council, this Resolution directs the City Clerk to place the proposal on the next regular local election ballot. Voters of the City of Albuquerque will be permitted to vote "for" or "against" the proposition at the November 4, 2025 election.

Analysis: This Resolution is required by State law to implement P-25-7 if it is approved by the Council. When a local government ballot question is to be submitted to the voters, State law requires the local government to file a **resolution** proposing the ballot question

IPRA Response 001117

with the county clerk. This Resolution creates the form of the question and the summary of the Charter Amendment that will be placed on the ballot. This Resolution must mirror the language in P-25-7, including any amendments.

Fiscal Impact: n/a

Key Dates: Article VI, Section 3 of the City Charter requires the Council to hold at least two public hearings prior to its vote on the proposed Charter Amendment. The Council may revise the proposed amendment as a result of suggestions and recommendations made at the first public hearing, but if such a revision is made at the second of the two public hearings, the Council shall hold a third public hearing on the proposed Charter amendment. Any revisions made shall be posted along with the notice of the next meeting after a review by the City Attorney to ensure the summary is still accurate after the revision.

1. The first public hearing was the **February 19, 2025,** City Council meeting. No amendments were made to the bill.
2. The second public hearing will be the **March 3, 2025,** City Council meeting. If no amendments are made to the bill at this meeting, the Council may take a final vote on the bill on March 3. If the bill is amended at this meeting, the Council must defer the bill and hold a third public hearing before final action.

State law requires that ballot question resolutions be submitted to the County Clerk not less than seventy days before the election. P-25-7 and R-25-119 must be approved by the Council no later than August 26, 2025 (70 days before the November 4, 2025, election), including time for required hearings and to resolve any possible veto of the companion resolution.

The State's Local Election Act, NMSA 1978, Section 1-16-3 provides the following:

B. Whenever a local government ballot question is to be submitted to the voters of a local government on a general election or regular local election ballot, not less than seventy days before the election at which the ballot question is proposed to be submitted to the voters, the local government shall file a resolution proposing the ballot question with the county clerk of each county containing any precinct in which votes may be cast for or against the local government ballot question. Not less than sixty-seven days before the election, each county clerk shall certify the local government ballot question to the secretary of state.

Comments: This Resolution should be kept on the same legislative timeline as P-25-7. Because P-25-7 requires at least two hearings before final action, this Resolution will need to be deferred to ensure it reaches final action at the same time.

15. OTHER BUSINESS: {Reports, Presentations, and Other Items}

Item A. EC-25-330 Line-Item Veto of R-25-112: Amending The Adopted Capital Implementation Program Of The City Of Albuquerque By Approving New Projects, Supplementing

IPRA Response 001118

Current Appropriations And Changing The Scope Of Existing Projects (Kevin Morrow)

Summary: This EC vetoes the line item below:
Line 17, Ken Sanchez Indoor Sports Complex GRT Interest $1,000,000

Comments: Overriding the veto would require a vote in favor by at least six councilors. A veto override must be heard at the next regularly scheduled meeting following a veto.

If Council does not override the veto, the $1,000,000 would return to the GRT Activity Account. The $500,000 that was allocated to the Rail Trail would need to be appropriated by the Council.

The EC included a draft resolution that would allocate $500,000 from an unspecified City Council set aside to be used for the Ken Sanchez Indoor Sports Complex. That resolution is not a consideration for a potential veto override but is a proposal by the administration that could be considered by the Council at a future meeting.

Fiscal Impact: This EC has no direct fiscal impact because the funds expended would be reallocated.

Important Dates: This veto override would become effective immediately following the meeting.

Having a paramedic on site when I call 911 for my child's three lung diseases has been life saving and life changing for our entire family and our friends. We have to call frequently for emergency intervention for my child to breathe and then get supportive care to the hospital. I have loved the extraordinary support we've received from emergency services here and across the city over the years. Other cities are loads better, though, but they don't have the doctors we have at UNMH. I moved here from the East Coast, and Boston Children's Hospital because of UNMH. We've been to hospitals all over the country. Please don't put my child's life in jeopardy! Feel free to reach out if I can help anymore.

City Councilor Baca, I am a retired firefighter. I worked for nearly 23 years for AFD now called AFR. Worked in my old neighborhood of Barelas. Grew up in Barelas. I chose the romantic route as opposed to the movida route to being a Bombero. Rode a Ladder truck with a San Jose Bombero, an Old Town Bombero and the Barelas kid. We covered our friends and family. My wife is an elementary school teacher in Barelas. You are my and my wife's City Councilor. I worked with Miguel Tittman. I worked with Diego Arencon. I worked with Emily Jaramillo, the very first WOMAN to ever hold the position of Fire Chief in the history of this department and the very first Chief to ever be excluded from a staffing resolution. Sounds about right for 2025. I'm sure Dan Lewis is excited. I have been to plenty of city council meetings and have seen enough of his interactions with woman to see this action coming from him. But, from my city councilor? I was just made aware by the firefighters on social media rightly speaking out over how this will weaken the position of the First Woman Fire Chief in the history of this department. Weaken the position in this precedent action being taken. Now, I am a UNION Man through and through. I also know that Chief Emily Jaramillo is a Union supporting Chief. Movidas like this are not the way. I saw your quote that Local 244 released. I saw Dan's quote. He lied. Under Mayor Berry he submitted a budget substitute to cut my pay by more than what the Mayor cut it by. Lewis recommended up to a 6.5% cut for top earners. So. He hasn't "always" supported working families. Former Chief Dow was also quoted. Known as the education chief. Diego Arencon liked to brag that he placed his buddy in the chiefs position. Movidas. Dow recommended an educational policy that tied promotions to education. Eliminating many of his and his buddies competition to rise up the ranks. We lost many great firefighters when their dreams of promotion was snatched from them almost overnight. A certain group shot up the ranks and now ran the department. Dow worked as a teacher for cnm. His program at cnm would now be getting an influx of firefighters who would be trying to regain their ability to promote within the department. Seems like a conflict of interest to me. Movidas. I am not happy with my city councilors part in these latest movidas. I am for keeping the paramedics together. I am for you letting the Union and the Fire Chief know that they should lock themselves in a room and work it out. What I am not for is a bunch of men getting together to take the first Woman Fire Chief in the history of this department out at the knees. Fire Chief Emily Jaramillo is a talented, hard working, smart and very qualified public servant that got to her position through her hard work and not by the movidas she made.

Please do not limit the affected this Of Albuquerque fire department. We don't need fewer paramedics we need more help. We do not need to lower the response sign after making a 911 call. The city is filled with senior citizens who probably need to call 911 and ask for an ambulance more than the average citizen. Please do not risk our lives by making the changes you were proposing to make.

I was disappointed to learn a vote was going forward on R-25-122 without crucial buy-in from Albuquerque Fire Rescue or consideration of the successful outcomes they've had by including EMTs at the basic and paramedic levels on all Fire Rescue vehicles. This feels short-sided and dangerous for our community, and I urge you to reconsider this bill. It reduces the Fire Department's effectiveness by ignoring best practices which are already implemented around the state. Please oppose R-25-122. Sincerely, Lauren C. Teffeau

Hello,
I have come to understand that the AFR began a pilot program that placed one paramedic on AFR Rescues alongside one EMT basic, which was very effective in doubling the response capability of highly trained paramedic professionals in our community. This change has proven to be safe and effective in the delivery of quality clinical care, and most importantly, means you will receive a faster response from a paramedic when you need it most.

Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills. This model is used by departments across the State of New Mexico. We want this best practice employed by many other cities across the

country, to stay in place in New Mexico. For it will help more people with greater effectiveness. Please keep in place what the Fire fighters and EMTs want. They want it to better serve and protect New Mexican's.

Thank you,

Cheta Balizer

Dear Councilor Bassan - please oppose R-25-122. The changes that would be imposed by this bill is not needed and was created without the consultation of AFR Leadership, which is an extremely reckless way to introduce legislation. It would undo an effective and proven staffing system established by AFR, essentially telling them that their expertise and knowledge means nothing and that City Council knows best for AFR.

Thank you for your opposition to R-25-122.

Subject: Please vote "NO" on R-25-122: Minimum Staffing Requirements
Importance: Normal
Sensitivity: None

Dear President and Councilors,

Please reject the above Resolution regarding staffing requirements for paramedic personnel on fire rescue operations. I have no idea why an issue that involves a difference of opinion on how to staff between the Fire Marshall and the union is anything that the city council needs to weigh in on or has the expertise to weigh in on. Ideally decisions by management are made with collaboration with the union, with both sides bringing their expertise and needs to bear. From what I understand, the two sides are at cross-purposes. Bring in a mediator, not 9 city council members. The city council is setting bad precedent by getting involved in these types of issues.

Respectfully,

Terry Storch
Council District 2

Subject: Please vote against Bill R-25-122
Importance: Normal
Sensitivity: None

Dear Councilman Baca;

Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills.

The City Council is set to hear legislation tomorrow that would undo this progress. The bill R-25-122 means that **AFR will not be able to get a paramedic on every call in these districts, or it will take longer**.

These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field.

Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

Proposal R-25-122
Enter Your Message Here
Yesterday, KRQE TV presented a story on their local news program regarding Albuquerque Fire and Rescue's Chief Emily Jaramillo voicing concerns about City Council Proposal R-25-122. I have the utmost respect for our local Fire Fighting community. Quite frequently I hear news reports detailing incidents involving fires, traffic events, and life-saving emergency situations in our city that are mitigated by AFR. In my opinion our city Fire Fighters are overworked and grossly underpaid for the risks they take each day to keep Albuquerque safe. A large part of the AFR's success can be attributed to the good leadership provided by the Chief. While I don't understand all aspects of the proposed staffing requirements presented in R-25-122, I do think it is an egregious act of disrespect that the Albuquerque City Council never reached out to the AFR Chief to discuss and get a better understanding of any possible ramifications of their proposed resolution. (The Fire Chief inadvertently found out about this proposal through the City Council website. Not a straight forward way to inform the Chief of any impending legislation that may impact her organization. One has to wonder why the Chief was left out of the discussion loop.) The AFR Chief would know first-hand the staffing protocol issues and

the impact to her department.

I also read the article in the Sunday Journal on March 2, 2025 entitled “ABQ fire chief, union split over paramedic staffing proposal”, It was very under-handed that Councilors Baca and Lewis did not have any discussions with the AFR fire chief before introducing the resolution. Communication and transparency are fundamental elements of good governance. It permits the exchange of information, the development of trust, and the maintenance of positive relationships in the City of Albuquerque government.

City Councilors should vote NO on Resolution R-25-122 until all implications to AFR are discussed and resolved by all pertinent parties.

Subject: Public Safety Medical Facility
Importance: Normal
Sensitivity: None

Councilor:

Regarding the clinic for first responders that you are working on with AFD. If you don't mind I can give you a few tips on facility planning. At Council we have done the facility assessment planning for AFR for two Fire stations we also recently did the planning for the Youth Shelter and the Asian Pacific Center and balloon landing fields and were involved community center plans. A couple of things we have learned.

1. It very helpful to do a facility plan being that:
    a. You get the facility you were seeking,
    b. Reduces the amount changes in the design process,
    c. Provides an accurate cost estimate which in turn
    d. Makes sure you plan for what is possible, which in turn
    e. provides your funding benefactors with knowledge of what the funding target is and that this
       is a solid workable project not just an idea.

2. To accomplish the above the facility planning process usually proceeds as follows.
    a. Works with all the stake holders to identify the goal, what level of services that will be offered.
    b. Analyzes who the client base is and inventories the needs they would have for such a facility
    c. Then categorizes the needs into the types of service that are required to address the need.
    d. Takes each service and determines the interior space needed to deliver that service and the equipment that is required and the HVAC, plumbing, high voltage electrical and low voltage electrical that is required. (This in critical in medical buildings and science labs as some times the majority of the cost
       Can be the electrical or the HVAC, the equipment and the cost of those functions varies widely with the type of services that are offered) .
    e. Provides a recommendation on how the interior of the building should be arranged.
       Identifies staffing levels (which can also include staffing costs)
    f. The shell of the building is usually left to the design process, but sometimes the report will provide example of shells for other types of facilities.

g. Determines the size of propriety that is needed.
h. Identifies potential locations.
i. Conducts and analysis on whether the facility should be built from the ground up, or should an existing building be renovated, should suites be rented in an existing structure, or in your case should there be a partnership with an existing medical providers
j. Determines a turn-key cost to design and construct
k. Provides phasing options.
l. Then the report can cover whether staffing should be in-house, or should a contractor be used.

3. The facility plan is then used to raise funds, in the GO bond capital outlay, congressional earmark and grant writing domain as the project has moved up from an idea, to an already started project

Hope this helps. If you need a firm to do this, we have DPS on contract and they have done last two large medical towers in the City.

Tom

March 3, 2025 Council Questions

Presentation – Human Trafficking Training (Ian Stoker, HR Director)

- Mr. Stoker, R-24-42 asked the Administration to educate City employees on the signs and indicators of human trafficking and the property protocols for reporting suspected cases.
  - I took the training and the video did a good job of describing the problem of human trafficking but I didn't see where it described what we should do if we see it.
- The Resolution also asked the Administration to collaborate with local ant-trafficking organizations and law enforcement. Could you please explain how you collaborated on this training?
- Have you developed and distributed outreach materials to City employees?
- The information about human trafficking on the HR website is excellent. How is that information being distributed to employees?
- Thank you for taking this on. We have staff in City Council Services who are passionate about stopping human trafficking, and they would love to help.
- We also have contacts in the community who have offered to help develop a training with a specific focus on Albuquerque.
- We have an opportunity to address a horrible problem in our city. I think we can make this training even more impactful. Will you please work with our staff on this?

Admin Q&A

-

Approvals

EC-25-317 Early Head Start Quarterly Report

- According to the Ordinance, this is supposed to be a report from the Early Head Start Governance Advisory Committee.
  - It looks like you have a policy council but not the Governance Committee that the Ordinance calls for.
  - Does this include a report on program performance and school readiness?

    - Is there any attendance data or financial information?
    - Does the report include any analysis?
- Do you feel like you've done your best work here?
- This is a data dump, and it doesn't meet the requirements of the Ordinance.
- I understand that it's been a challenge to hire and retain teachers, especially for the youngest children.
    - Can we explore the idea of hiring a non-profit contractor to do this work?
    - Could the grant funding that the City gets be spent on ?

EC-25-318

- R-24-29 allocated $5 million in opioid settlement money to this project.
- This EC says this contract "shall not to exceed $8.1 million not including construction"
- Where's the other $3 million coming from?

<u>Final Actions</u>

O-24-63 Nuisance Abatement

- Ask Matt Cox to give the highlights of the proposed changes
- The Administration asked for some amendments so I'll introduce those now…
- Ask Lauren Keefe why she thinks the new ordinance is necessary.
- Vacant and dilapidated properties are a problem in our city. They bring down entire neighborhoods.
    - We need to adapt to current conditions with the resources we have, and I believe that this new Ordinance does that.
    - And I urge your support.
- *(If anyone asks why you didn't put in any whereas clauses: They're not required, and you wanted to have an open discussion about it)*

O-25-116 Marijuana Equity

- How will people be chosen to receive the guaranteed income?

IPRA Response 001141

        - The writeup says that Whittier and Carlos Rey Elementary Schools were chosen. Were these schools especially impacted by marijuana prohibition?
    - What can the guaranteed income grants be used for?
    - Most grant programs require an application and a budget, and a report at the end of the grant period to show how the money was spent and measured outcomes. Will these grants have similar requirements?
    - The money will go through the One Albuquerque Fund, then to the United Way. Why the round-about method?
    - Is the United Way charging overhead to distribute these funds? If so how much?
    - Why aren't we using this money for technical assistance for cannabis microbusiness owners or reentry after incarceration?

R-25-122 AFR Staffing

Renee and Rachel,

Thank you so much for taking the time to meet with me today. Here are the 3 questions please, plus anything else that you may have.

Have you worked with the union any of these issues that were brought up today regarding paramedics and staffing?

Labor is referring to the AFR 2 paramedic system as the gold standard in EMS, do you agree? Why would you want to move away from that?

What will be the effects at AFR if this resolution passes, can you follow it?

I appreciate you very much.

Respectfully,

Emily Jaramillo

Dear Councilor Baca,
Having a paramedic on-site in medical emergencies can make a big difference in outcomes. This is a very reasonable move on the part of Albuquerque Fire and Rescue. Please oppose R 25-122 which aims to eliminate or reduce the presence of paramedics in favor only less highly trained EMTs.

It seems that this bill has not been properly vetted with no input from AFD, therefore, reckless. AFD should have a chance to participate. Thank you.

Renee.

I received an email today referencing this bill #R-25-122 from Jimmy Melek, AFR deputy chief of fire operations. I know you closely study each bill, and vote for the best service for people of Albuquerque. I am concerned when an expert, especially in fire and rescue, takes the time to send a comment that states this bill will decrease safety and response to residents. Please solicit further information from experts before voting for this bill. Of course I am not the expert, but I am trained in safety at many leverls. To me it appears this bill requires further explanation.

Mr Melek claims: The City Council is set to hear legislation today that would undo this progress. The bill R-25-122 means that AFR will not be able to get a paramedic on every call in these districts, or it will take longer. These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field. Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

Regards,
Brenda Olson

Please vote against this resolution. There appears to be many unanswered questions and coordination with AFR is lacking. I am not a firefighter nor am I associated with any level of AFR, as appears the counselors making this proposal have NO qualifications to make such a proposal. Why was this proposal brought up? The justification is lacking.

Hello,

I am your constituent for city council, and I am writing to urge you to vote yes on resolution R-25-122. Ensuring optimal staffing of medics on ambulances is critical to make sure they are equipped to handle all emergencies. I have multiple friends that work for Albuquerque fire rescue, and they highly recommend this gold standard of care across Albuquerque. I've needed ambulance care before too, and as a resident of this city hope that anyone who does need this essential service will have the best care possible. Thank you for your consideration.

Please oppose Bill R-25-122. Our communities need reliable EMT and paramedic responses from AFR. As you know, most calls require a paramedic and limiting them is only causing harm, and potentially death if our neighbors cannot receive emergency care.

Thank you for standing up for us!!

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

Dear Councilor Sanchez,

I am writing to address my concerns about R-25-122. To be clear, I am not writing with a position on this resolution although I regard it as a highly important issue.

I am unable to articulate a position because I can find no evidence to support or oppose it, no public information on response times, AFR staffing levels or quality standards for EMT or paramedic staffing. I cannot identify when this resolution was first read and find no record of any committee hearings on the matter.

Instead, I learned about it from a letter to the SFVNA and from reading media reports.

Yet, I find it on tonight's Council agenda as "Immediate Action." What makes this "immediate?" Where is the evidence that a consequential decision is urgent and unable to be subject public scrutiny before it is put to Council for Final Action?

This is the same dynamic of Council actions seen with O-24-69, another example of the Council and its leadership pushing significant and costly legislation in a manner which virtually prevents public scrutiny or comment.

For that reason, I request that Council defer this matter and ensure publication of the evidence to support the resolution.

Thank you for your time and leadership.

Jane Baechle

I ask that you vote no to legislation R-25-122. If this dangerous legislation is passed, Albuquerque Fire Rescue will not be able to get a paramedic on every call or it will take longer. The present system is working well and should not be changed. The current staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country. Additionally, the legislation does not appear to have been vetted against potential legal challenges. Please vote no to R-25-122. Thank you.

Ms. Bassan,

I am urging you not to support this. I feel it will compromise safety in our City. Paramedics saved my mother's life, and this resolution will compromise AFR's ability to provide such help. I have been following this on the news and object to the fact that the people directly involved were not consulted before this was put forward. Never a good idea. Please vote against this resolution.

I ask that yo oppose this bill. There are valid points on both sides of the debate, but Dan Lewis for some reason is trying yo cramps it down everyone's throats without being fully vetted. For that reason alone I think it needs to be defeated.

I would encourage you to vote against R-25-122, or move/vote to table it pending consultation with AFR leadership to secure input from those tasked with providing fire and rescue service to the city. It is one thing for a governing body to establish aspirational goals, but it is an entirely different thing for a service delivery unit to operationalize those goals under less than ideal circumstances.

I don't have an opinion on R-25-122. I am unable to educate myself on this issue as it was introduced in the Letter of Introduction by the president of the Council and put on the agenda for final action at the same meeting. It was of course not sent to a Council committee. It troubles me greatly that bills are not being sent to a Council committee where the public can participate in the process. I am also horrified that a bill would be introduced and voted on at the same meeting. I urge you to delay this bill or vote it down. How can the Councilors understand the merits of bills if they are rushed through like this.

Dear Councilor Bassan,

Please - vote "No" on R-25-122 tonight, and allow AFR staffing and operational decisions to be determined by professionals in that department. As a constituent of your district who has received emergency services by AFR, I believe they are best suited to make staffing decisions rather than City Councilors. Thank you.

We live in your City Council District in Sawmill Crossing subdivision. It has come to our attention that you have proposed legislation (R-25-122) that will impact the staffing of AFR. We request that you withdraw this harmful legislation before anyone dies due to your uniformed decision. Any future staffing concerns should be addressed through AFR who are the subject matter experts.
Respectfully,
Dianne M. Jones

My family lives in Taylor Ranch, and we have a child and an elder who have special needs. Since 2021 when the new staffing was implemented at AFR we've had to call on AFR for at least six different instances. This operating and staffing model is every efficient. Please do not repeal this.

Dear Councilors,
I am writing to urge you not to pass R-25-122 in regards to staffing of AFR Rescue vehicles.
Legislation that concerns a City department's operations, especially one as critical to safety as AFR, should take into consideration the expertise, comprehensive perspective and informed plans of the head of the department in question, which was not the case here. While also key, only one constituency (the union) was consulted.
Mandating two paramedics on every AFR Rescue vehicle may sound beneficial to the community, but would in reality have the opposite effect by concentrating paramedics on fewer vehicles and perversely stretching available staff more thinly across time and space. People in need are likely to suffer.
Best Regards,
Carol Toffaleti

Dear Councilman Sanchez

As you know, Albuquerque Fire Rescue (AFR) recently announced new operational and staffing changes to better serve Albuquerque residents and improve response times in high demand areas. I understand that these changes were made after substantial consideration to ensure increased response capabilities that will demonstrate better outcomes for residents.

There is now a city council proposal to roll this effort back. My understanding on this proposal is that is was not developed by people with appropriate experience. This proposal will either delay response times to residents, or make that response less effective at saving lives. This is not a win for Albuquerque residents.

This type of staffing has been used in other areas and has proven to be safe and effective in the delivery of quality clinical

care.

My husband and I ask you to oppose R-25-122.

Thank you,
Cynthia Gefvert

I am writing to oppose R-25-122 as I cannot attend the City Council meeting. This legislation appears to me to be simply an effort to reduce costs in the AFD by not providing needed EMT or paramedic support during fire calls. Not providing this coverage will increase the time to get needed care to people who are calling the fire department for help. I appreciate your help in relaying this message.
Thanks very much.

Categories: Green Category

Good evening Chief Jaramillo,

Thank you for your flexibility.

Please do not hesitate to reach out should you need anything in the meantime or if the meeting needs to be amended.

Thank you,

Tanya Jackson

I got the letter from Jimmy Melek today and am VERY concerned about it's contents.
I know people's opinions are biased and there may be "more to the story". But if he's right - that the City Council is proposing this "... without any consultation of AFR leadership and the Councilors proposing this have no background in the field." That's just pure stupidity.
And I hope that would not be the case with our elected officials.
Please make sure this bill has been properly discussed and all the stakeholders are at the table.

We always hope we never have to utilize paramedics and firefighters. Last year my family had to utilize paramedics and firefighters during a family emergency with our mom. Without having the paramedics fast response time I am not sure if the results would be the same. Please remember these people save lives daily. We need to ensure the safety of community. You really never know if your family will be the one in need! Please vote against R-25-122!

Thank you for your commitment to Albuquerque, truly. We trust AFR's leadership to optimize coverage and protect our lives. They've been there for us in a major car accident and prevented 4 fires on our block from taking homes and lives - all in our short 5 years as residents. Please oppose this roll back.

Councilor Baca,
I am dismayed that you would sponsor R-25-122 to change AFR's recently announced staffing and operational changes to better serve Albuquerque residents and improve response times in high demand areas. This staffing model is used by departments across New Mexico and is a best practice employed by many other cities across the country. To rollback these changes will either delay response times to residents or make the response less effective in saving lives. Where is your expertise in deciding how AFR should be staffed to best serve Albuquerque residents? VOTE NO ON R-25-122 AND LEAVE AFR STAFFING AND OPERATIONAL DECISIONS UP TO THAT DEPARTMENT SO THAT ALBUQUERQUE RESIDENTS RECEIVE THE BEST SERVICE AND RESPONSE TIMES FROM AFR.

Dear Councilor Sanchez,

It has come to our attention that there is another one of those "fly it under the public's radar and maybe we can push it through" situations where the public is not aware and is not allowed to have any input in this seemingly rash and potentially harmful matter. We speak of Bill R-25-122.

We are asking for you to move to defer this and allow for informed public comment and require it to be deferred to the applicable Council Committee prior to a full vote.

We need to understand exactly what it is that a few Councilors are trying to ram through without the public understanding exactly what this bill means to the citizens of Albuquerque.

We appreciate your support in this matter.

Sincerely,
Catherine and Gil Slegl

I urge you to oppose this irresponsible bill that will curtail the fire department's ability to serve the public in emergency situations. Two years ago I had a heart attack and the first responders arrived within 5 minutes of my phone call. They were efficient, polite and knew just what to do. I have extolled their skills ever since. Who knows, YOU may need them some day.

Councillor Baca,
I am emailing to express my opposition to R-25-122, a bill being considered in City Council tomorrow, that you are co-sponsoring this bill.
The current staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country. The bill under consideration was made without any consultation of ABQ Fire Rescue leadership.
I oppose R-24-122.

Dear Councilor Baca,

I'm writing to express my opposition to R-25-122. I trust that AFR has the experience and expertise to determine how to staff emergency vehicles to best serve our community. I want experts in the field of public safety making these calls rather than government employees with no direct experience.

Marie Landau

Please vote no on R-25-122. I must work with the fire department frequently with the fire department in my job and I support their decisions. They seem to be well organized and able to address all issues, respond quickly, and provide excellent information. Do not override their decisions as I believe the department is well managed. Thank you!

I'm writing in opposition to this measure. The current program affords broader coverage by AFR and affords basic EMT level personnel the opportunity to work with higher-level paramedic-certified personnel and move that much closer to their own certification. Also, this should never have been undertaken without consultation of AFR's Chief. I urge you to drop this proposal. I am your constituent and also voted for you in the last election. Please give me reasons to continue to vote for you. This is definitely not one of them.
Regards,
Dan Ripley

[EXTERNAL] Forward to phishing@cabq.gov and delete if an email causes any concern.

For some context on R-16-41 and R-25-122, attached is a short screen recording of Fire Chief Downey at the council meeting when R-16-41 was amended and passed. Chief Downey spoke on the amendment and how it provided flexibility for staffing in the future. That dialogue resulted in the amendment that removed "paramedic" from resolution and replaced it with "firefighter". The full video is available here.

https://cabq.granicus.com/player/clip/151?view_id=2&redirect=true

The amendment of R-16-41 removed the language that resolution R-25-122 is trying to put back in. The Fire Chief at the time met with each councilor prior to the vote over a course of 30 days, about why the ammendment was required and why the paramedic language was not supported. Why would Labor and Council leave the Chief out of the conversation this time? Section 4 of R-16-41 clearly states any changes require a meet and confer.

Maybe there is a valid explanation and I am no lawyer, but on the surface this process appears to be problematic. This example also highlights why the Fire Chief should have been involved in this process. This issue deserves way more attention and scrutiny than an immediate action vote.

Concerned constituent,

Jason Fejer

Outlook-AFR Maltes.png

Councilor Baca,

I was disappointed to find the resolution you co-sponsored for ***immediate*** action at the Council meeting on Monday without any consultation with me or my command staff. When I accepted the position as Fire Chief, I made it clear to Mayor Keller that my line of integrity was having elected officials influencing any directive that I felt compromised public safety or the safety of AFR firefighters. It is incredibly concerning that I found out about a resolution dictating fire department staffing and operations when it was uploaded on the website on Friday and set for a vote three days later.

Beyond the lack of communication, I have serious concerns about how this resolution will impact our service delivery and internal operations. I have been a firefighter paramedic in AFR for 20 years and have a background in public health. I was also a member of our union during the politics that surrounded the failed attempt to pass this language in the 2016 resolution; I have a very deep understanding of exactly what is going on.

It is my job to advocate for the public safety of our residents and ensure that firefighters are fully trained and able to operate safely on all emergency calls. This resolution will decrease AFR's service delivery. I have always been open for direct communication from all councilors and have never refused a call or ignored an email. I am incredibly disappointed and concerned that you did not contact me, the Fire Chief, to discuss the implications of an operational resolution before co-sponsoring it for immediate action.

Respectfully,

Emily Jaramillo

Re: AFR Operational Changes Overview

It is Fire Administration's stance that we will not have the ability to comply with R-25-122 without increasing rates of force hiring paramedics, shutting down support functions, and using all paramedic captains on Rescues. This in turn will reduce interest in becoming a paramedic and create systemic staffing issues at AFR that will impact operations.

Should R-25-122 pass, Fire Administration would like to detail the immediate negative effects on Albuquerque Fire Rescue's ability to serve the public. Just a single word change from "firefighters" to "paramedics" will have lasting consequences on our ability to address the fire and EMS needs in Albuquerque. AFR will have difficulty complying with R-25-122 and it will place an undue hardship on the paramedics needed to comply with the resolution. Even if AFR exhausts all possible options, AFR cannot guarantee complete and permanent compliance with the resolution. AFR currently has two stations that are staffed with one paramedic on the Engine and one paramedic on the Rescue at Stations 2 (I25 and Gibson) and Stations 3 (Girard and Central). This resolution will immediately impact service delivery to these two districts when the paramedic on the Engine is moved to a Rescue. These districts will lose half of their advanced life support response.

- AFR relies on EMT-Basics to help fill minimum staffing levels on Rescues when we do not have enough paramedics to fill these positions. AFR always maintains a minimum of one paramedic on transport units (Rescues/Medic units).
    - Year to date if this resolution was enacted there would be violations over 250 times where AFR could not staff a transport unit with two paramedics (these includes the transport units at Stations 2 and 3. 24 of these would have been on other Rescues across the City. A violation means a Rescue that was staffed with one EMT and one paramedic.
    - Since January 2024 to date there would be over 2,000 violations if R-25-122 language was in the current resolution (these include the transport units at Stations 2 and Stations 3). 656 of these violations would have been on other Rescues across the City. A violation means a Rescue that was staffed with one EMT and one paramedic

IPRA Response 001186

    - If this resolution passes, a firefighter paramedic would have to be force hired to work an overtime shift to staff a dual medic Rescue, placing a hardship on paramedics. AFR is concerned that this will decrease interest in becoming a paramedic and will perpetuate the current staffing issues with paramedics.

- AFR is currently short 22 paramedic positions in the field. Full field staffing for paramedics is 141.
    - We send an average of 10-20 firefighters to paramedic school per year. This number fluctuates based on interest in paramedic school and slots available at the local colleges. AFR is working with the colleges on more opportunities for training paramedics.
    - 48 paramedics are currently eligible to retire. Another 45 paramedics are eligible to retire in the next 5 years. More paramedics may be able to retire if they have previous time in PERA prior to working for AFR.
    - With projected retirements, AFR is concerned that there will be more vacancies on the Rescues in the next 5 years. If R-25-122 is passed, paramedics will be force hired at higher rates to maintain the two paramedics on the Rescue, again placing a hardship on paramedics that will reduce firefighter interest in paramedic school.
    - Paramedics that work in divisions such as EMS training or HEART and all Paramedic Captains would have to move from their assignments to staff the two paramedic Rescue to maintain these levels. If this were to happen, the divisions would have to be shut down and these services would be lost.

Another consequence of R-25-122 passing is that AFR will not have the paramedic staffing to build both paramedic and intermediate staffing onto Engines. AFR is transporting to hospitals more frequently and when a Rescue is transporting the total out of service time can last up to two hours. This will leave an Engine in district to cover calls and without a paramedic on the Engine, delay critical care to residents who call 911 with life threatening emergencies.

If R-25-122 is passed, paramedics will be force hired at higher rates to maintain the two paramedics on the Rescue, again placing a hardship on paramedics that will reduce firefighter interest in paramedic school.
    - Paramedics that work in divisions such as EMS training or HEART and all Paramedic Captains would have to move from their assignments to staff the two paramedic Rescue to maintain these levels. If this were to happen, the divisions would have to be shut down and these services would be lost.

Another consequence of R-25-122 passing is that AFR will not have the paramedic staffing to build both paramedic and intermediate staffing onto Engines. AFR is transporting to hospitals more frequently and when a Rescue is transporting the total out of service time can last up to two hours. This will leave an Engine in district to cover calls and without a paramedic on the Engine, delay critical care to residents who call 911 with life threatening emergencies.

Councilors,

I have attached a memo outlining our concerns, compliance issues, and the AFR operational changes that would occur if R-25-122 is passed. Thank you for your time. I am available to address any questions you may have or if you would like more information.

Thank you,

Jimmy Melek

R-25-122 Opposition
Enter Your Message Here
Good Afternoon Councilors,

I have served as a paramedic firefighter for the Albuquerque Fire Rescue for over 20 years. The department provided me the opportunity to attend paramedic school in 2007 and it was the best decision that I could have ever made for my family and career. I am writing in opposition of R-25-122 which is a resolution that would require all AFR Rescues to be staffed with two paramedics. AFR is the largest employer of EMS professionals in the state and we pride ourselves on quality clinical care and customer service. The exceptional pre hospital care that we provide comes from the training and quality assurance processes the AFR EMS Division has implemented over the last decade. Our field providers are better trained and equipped to respond to medical emergencies than at any period since the departments inception of EMS. The landscape in EMS has changed exponentially over the years and the profession is now facing challenges that were

previously unknown. The recruitment and retention of pre hospital providers has proven challenging for not only the fire service but also in the private sector. 911 has become the primary healthcare provider for many in our community and is leading to unprecedented volumes. These volumes are also reflected in the emergency departments around the city. Emergency room wait times are exceeding 72 hours in some cases, thus making it more difficult for the 911 volume to be able to turn over patients and causes long out of service times for the transporting units. AFR and Albuquerque ambulance , Our contracted ambulance provider have worked tirelessly to create operational changes to try and address the issue. However, this is a more systemic problem of the healthcare system that cannot be solely addressed by first responders. Albuquerque Fire Rescue, his transporting more than we ever have in the history of our department. With our two medic rescue system, a transport of any acuity removes that unit from their response district for typically over an hour or more. The result is that neighboring districts must then respond in to that Station‘s area in order to cover the 911 calls that come in. If contracted Ambulance services are not available in that moment and we are required to transport this then leaves two adjacent districts without advanced life support coverage. By slowly implementing change to include having a paramedic on an engine And one on the rescue, it will help ensure that there is redundancy in terms of ALS response coverage. Furthermore, since there are no major changes to the response configuration, all high acuity calls such as heart attacks and cardiac arrest will still receive a two unit response with an engine and rescue meaning there will be two paramedics at least on every scene. In addition, Albuquerque ambulance responds along with us and brings ALS providers as well. AFR has more paramedics than any agency in the state, however, it is our operational use of paramedics that leads to us feeling the shortage. There are significant challenges to be able to train firefighters to the paramedic level in the state. The number of paramedic instructors to teach courses, coupled with the limited opportunities within the educational institutions leads to deliver classes leads to higher competition for seats. Over the next five years, we have somewhere in the range of 60+ paramedics who are eligible to retire, our inability to create medics at that rate will push us into the red. Operational changes, the chief has outlined have proven to increase interest in paramedic school with our members as they no longer feel like their career path is stagnant by being on one apparatus for a 25 year career I could write 10 more pages as to why these operational changes are needed and are a good thing. I am simply asking that you take the time to sit down and learn more about our system prior to proposing resolutions that could hamstring are organization in the future. Thank you.

Dear Sir,
I am in favor of this bill. My father was a firefighter, had some basic first aid training, and was able to triage the majority of situations that arose (administration of NAR CAN, as well as basic CPR, compression for bleeding, etc) I believe it is overkill and expensive to have a paramedic alongside, the ambulance is called out in addition, thank you for looking for ways to save tax payer money for issues that are most important to us.

Albuquerque Fire Rescue

Emily V. Jaramillo, Fire Chief

Dear Councilors,

Please find included AFR's response to many of the inaccurate statements made in the staff write-up regarding R-25-122. I would also like to make it clear that I was not contacted by anyone at Council Services to provide information regarding the proposed resolution.

Thank you.

Chief Jaramillo

--

Brief Summary: This bill involves an amendment to R-16-41 enacted in 2016, which established minimum staffing requirements for AFR Engine Apparatus, Rescue Apparatus, Ladder Apparatus, Hazardous Materials Squads, Heavy Technical Rescue Squads, Quality Assurance Units, Battalion Commander Units And Support Divisions. This amendment applies to Rescue Apparatus and is intended to maintain/codify a minimum of two paramedic firefighters per Rescue Apparatus unit, because rescue units that have two firefighters of the highest level of pre-hospital licensure (paramedic) deliver lifesaving aid as swiftly as possible.

AFR Response: There is no existing evidence that having two paramedics on a single apparatus provides a higher level of care, it likely increases treatment delays and slows decision making.

--

This paired paramedic system is a sought-after standard across the country and the City of Albuquerque is able to maintain these same levels of service as other departments across the nation, including departments in Florida, New Jersey, Arizona, and more who also have paired paramedic systems.

AFR Response: AFR is not able to maintain two paramedic Rescues. The most common model across the country and best practice is having departments staff paramedics on both trucks, helping to gain interest in paramedic training. It is more

common to see two paramedics on Rescues in departments that are primary transport agencies, which AFR is not.

--

Analysis:

Residents and visitors of Albuquerque currently receive a two-paramedic response system for emergency medical calls. Removing two-paramedic units in the City is not a new idea, and is something that has been attempted in the past, but has not been widely implemented.

AFR Response: AFR started implementation of single paramedic units in 2021 first through a department-wide survey and committee work, then a pilot program at Stations 14 and 20. In 2023, with support of the Union, AFR implemented single paramedic units at Stations 2 and 3. Based off of the success of this model, AFR is expanding to additional stations in order to provide the quickest response time.

AFR has a triaged dispatch system, ensuring the right resource goes to the right call. This system prioritizes paramedics to emergency medical dispatches or calls with patients. Non-patient calls are primarily handled by other units in the fleet.

· As a case in point: on a windy night in Albuquerque, an AFR Engine may be dispatched to a downed powerline, keeping the public safe and waiting for PNM to arrive. Common emergencies like these that AFR is responsible for but have no patients, like dumpster fires, would waste the paramedic resource, leaving only one paramedic available for medical events in that area.

AFR Response: Having a paramedic on the Engine will provide a higher level of service. An average of 85% of AFR's calls annually are EMS calls. AFR has a much higher chance of having a Rescue tied up on a call for service than having an Engine tied up on a downed power line or dumpster fire.

In EMS situations with patients, AFR's triaged dispatch response also helps protect trucks and crews across the city by more evenly spreading out call volume and ensuring appropriate resource allocation. Through triage, just as in most medical settings, AFR can assess what level of care is most likely necessary to resolve a situation – leaving critical infrastructure available for higher severity calls.

AFR Response: Where possible, one paramedic on Rescue and one on Engine is the right policy. For example, if a Rescue is tied up on a call and another critical call comes out, the Engine would be dispatched with an out of district Rescue. Having a paramedic on the Engine to start initiating care would help provide a paramedic to the patient faster in this situation.

Moving around a same number of paramedics onto different trucks with different functions in the community, in contrast to a methodical triage-based dispatch system, is not an expansion of service - instead, it changes the structure in which the Department ensures delivery of the best service for each call type.

AFR Response: This statement is inaccurate. By moving one existing paramedic on the Engine, AFR doubles capacity to respond to high acuity calls in these districts, thus providing the quickest response time

--

Fiscal Impact: This bill does not have a direct fiscal impact, but if the Administration's proposed change to staffing requirements is implemented, it could impact AFR's internal rank structure, create pay disparities, and other complications.

AFR Response: This statement is incorrect

· No positions are being cut by moving paramedics onto Engines. All rank structure remains the same. Rank is built into positions at stations and will not change.

· Pay is determined in the CBA. In July 2024, a three-year contract started that gives a 15% pay incentive to all paramedics Captain and below and 5% pay incentive to EMT Intermediates Captain and below. This plan will not create pay disparities as this incentive is added into firefighter base pay.

· AFR was able to successfully implement this policy at Stations 2 and 3 in 2023, and the department is well positioned to address any "complications" regarding future implementation.

--

Key Dates: Firefighters would be moved into this alternate system as early as mid-March if no action is taken. These changes to staffing requirements would impact AFR's operations indefinitely, until further policy or administrative instructions are enacted. Comments: None

AFR Response: Staffing is constantly evolving to the needs of the community and department; R-16-41 in its current form has this flexible language needed for serving the community while keeping firefighters safe.

Councilor Baca,
I am writing again to ask you to VOTE NO on R-25-122 when it's heard in tonight's city council meeting. I don't understand why: 1) the city council thinks it has the expertise to make staffing and operational decisions for AFR and 2) why you wouldn't discuss your concerns with AFR before proposing this legislation. To put forward legislation with this impact with no notice and no consultation with AFR is very poor governing, and I am disappointed in your support of this approach and this legislation. It's a typical MO for Dan Lewis but I thought you were better. VOTE NO TONIGHT ON R-25-122.

Dear Councilor Fiebelkorn,

I was made aware today, via the ICC of a measure (R-25-122) for final action at tonight's City Council meeting which appears to be another "rush job".

I am therefore writing to address my concerns about R-25-122. To be clear, I am not writing with a position on this resolution although I regard it as a highly important issue.

I am unable to articulate a position because I can find no evidence to support or oppose it, no public information on response times, AFR staffing levels or quality standards for EMT or paramedic staffing. I cannot identify when this resolution was first read and find no record of any committee hearings on the matter.

Instead, I learned about it from a letter sent to Neighborhood Associations and Coalitions by concern members of Albuquerque Fire Rescue Field Operations.

I can say from personal experience as one of the over 60 constituents in your district, subject by aging to higher likelihood of an emergency event that effectively reducing or restricting the number of EMT carrying emergency vehicle deployable by Albuquerque Fire Dept. does not appear to serve the public interest.

Yet, here it is on tonight's Council agenda as "Immediate Action." What makes this "immediate?" Where is the evidence that a consequential decision is urgent and unable to be subject to public scrutiny before it is put to Council for Final Action?

This is the same dynamic of Council actions seen with O-24-69, another example of the Council and its leadership pushing significant and costly (in $ and possibly public safety) legislation in a manner which virtually prevents public scrutiny or comment.

For that reason, I request that Council defer this matter and ensure publication of the evidence to support the resolution.

Thank you for your time and leadership.

Jaemes Shanley
Mark Twain Neighborhood

My name is John McGee and I serve as a Paramedic Lieutenant within ABQ Fire Rescue. I am submitting this email in opposition to Resolution R-122.

In my opinion, and based upon my experience, the best solution to ensure reliable, premium EMS service to the citizens of Albuquerque requires AFR to adopt the staffing model proposed by Fire Chief Emily Jaramillo. Throughout my 18 year career with AFR, I have served in a number of strategic roles including our paramedic response, staffing, education and recruiting. I am the longest tenured EMS educator at AFR, and one of five individuals with the Instructor II certification required to lead our EMT-Basic and Paramedic programs. Additionally, I designed and initiated our current EMT-Basic program, and a founder of the previous, outgoing, Paramedic program. From an educational viewpoint, the expectation of an entry-level paramedic is to be able to operate independently after successfully completing their precepted internship. With our two-tiered, multi-unit response model, no paramedic working in ABQ responds alone.

Currently, I serve as AFR's official recruiter, but I began my career with a local transport agency in 2005, hired by AFR in 2007, and attended paramedic school in 2008. As a rookie firefighter contemplating p-school, I was warned by my mentors that doing so was equivalent to "career suicide". In those days, that was the predominant belief and culture surrounding paramedic training, so AFD (at the time) forced select rookies to attend paramedic school....and I was one of those rookies.

In the subsequent 18 years, I have trained with fire departments, paramedics, medical directors and EMS agencies from across the U.S., and many of them eclipse our call volume and staffing numbers. Most, if not all of these departments and agencies have been forced to address the same paramedic staffing shortages affecting AFR, with the vast majority adopting a "1 medic per apparatus" staffing model.

I've waited my entire career to see AFR offer paramedics the same job opportunities and flexibility afforded to the EMT-Basics in our department. AFR will continue to struggle with training and recruiting paramedics, until we change our attitude and staffing model to a more fair and balanced format, that doesn't resign paramedics to a "life sentence" on the Rescue.

Thank you all for your time and attention on this crucial issue.

Lt. John McGee

Staffing for fire rescue, it seems that having an EMT and a paramedic is a good use on rescue calls.
When callling 911 or 311 people usually can identify the need and the rescue responders will send the appropriate staff if they are available.
If not available the service supplied will be delayed and/or not sufficient. I think this bill needs more study.

Good morning,

Unfortunately the latest report we have is October. The firefighter who put the report together for me retired so we are a little behind getting November and December together. We will be sending those over to Council once they are complete and will also be working on our annual report.

Please let me know if there is anything else I can assist with.

Thank you,

Subject: RE: AFR October Monthly Information Report

Hi Chief Jaramillo,

I hope this message finds you well. I remember you previously shared your monthly information report for October. Could you send us a report covering the last year? If that's too extensive, just the most recent report you can provide would be great.

Councilor Rogers wants to address this at the State of the District 6 event this Saturday.

Thank you for your assistance!

Best regards,

Good morning,

I hope everyone had a wonderful Thanksgiving holiday. Please find AFR's October Monthly Information Report attached.

AFR had zero atypical engines in the month of October (even with all of the time dedicated to Balloon Fiesta!). Please let me know if you have any questions.

Thank you,

Good morning,

Unfortunately the latest report we have is October. The firefighter who put the report together for me retired so we are a little behind getting November and December together. We will be sending those over to Council once they are complete and will also be working on our annual report.

Please let me know if there is anything else I can assist with.

Dear City Councilors,

As a fire wife, I hear a lot of "behind the scenes" that many people in our city don't think about such as how the fire department operates. Currently, AFR operates with 2 paramedic levels on the rescues. This is the gold standard for EMS throughout the country preferred more to any other model. AFR administration would like to switch to 1 paramedic and 1 basic emt on the rescues. The plan is intended to spread out the paramedics and was proposed after upper administration began to fear the retirement of paramedics in upcoming years— and there's not enough paramedics in the department. The split does not add or take away from the amount of paramedics the department has, it just moves one paramedic to another seat on a different truck. The sale is "a paramedic is on every apparatus" or "improved response times" but from those in the field, not at a desk, it isn't a benefit for the department or the community. A paramedic doesn't need to run a 2 am call for "my fridge light bulb isn't working" —true story. And a basic emt is not as much help to a paramedic in need of someone with equal training to bounce ideas during an intense call or a medical anomaly or mentor a new paramedic in the field. Imagine the pressure to brand new paramedics— not only could it be their first day as a paramedic, but they're left to their own limited scope of training if things get crazy instead of having another experienced paramedic to mentor them through it. With the current system, 911 calls are triaged for the reason of the call so that the appropriate level of care is dispatched. AFR is one of few departments to have sworn uniformed members dispatching calls. The department has already improved response times, arrival times, and time on-scene standards and continues to do so. The system in place is gold standard for a reason. Firefighters on the ground, doing the work, helping the community, don't want the change. AFR administration has had the opportunity to discuss concerns and different approaches with the body of personnel and they continue to ignore the body's concerns to push their own agenda. For these reasons, I ask that you please vote yes to pass resolution R-25-122. Thank you.

[EXTERNAL]\line Forward to phishing@cabq.gov and delete if an email causes any concern.

I'm assuming the proposed bill to roll back the presence of paramedics and EMTs on Fire Trucks is a budget issue, and if it is, allow me to say as one of your constituents, that it's worth the expense.

Faster assistance, *better* assistance, to a family that has just lost their home, who may be injured and is most certainly in shock, is

more important than just about anything else that money could be spent on.

Take some from the police budget if you need to. While there is an eternal debate about whether cops stop crime or have a duty to protect and serve (legally, they do not), fire fighters fight fires and EMTs and paramedics save lives.

Your duty as a city Councillor is put the effort into ensuring that your constituents are provided for. Not letting their houses burn down is a good start and have medical professionals on hand as fast as possible is an extremely important next step.

Cheers,
Aki Grisham

Change in EMTs on emergency calls

Enter Your Message Here

Ms. Hassan,

I do not support the City Council's proposed change to how ambulances and fire trucks are staffed with regard to paramedics. As one of your retired constituents, if I had a serious emergency, called 911, and an EMT-basic showed up, I'm pretty sure I'd be toast. Would you want the same for your family?

Furthermore, this proposed change seems to have been dreamed up with absolutely no input from the people who actually respond to emergency calls; why was that? That is certainly not an example of transparency.

I assume this was someone's idea of a way to save money, but I believe emergency response is not the place to do that and urge you to vote against this change.

Thank you,

Mike Goodrich

Dear Council President Bassan,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating

paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

Final Thoughts & Open Communication

I urge you to take the time to fully investigate Resolution R-122 instead of quickly moving through the vote. What may seem like a minor wording change could have serious, long-term consequences on how our department operates—not just today, but for years to come.

I will also be speaking during the Open Comment period at the Council meeting and am happy to answer any questions at that time. Because I am speaking as a private citizen and not on behalf of the Union or the Department, my answers may be limited on specific details. However, I am happy to share my perspectives, opinions, and experiences as a high-ranking firefighter paramedic who has also served as an EMS supervisor for multiple years.

Please feel free to call me at (505) 550-0750. I am available all day before the meeting and will do my best to answer any questions you may have.

Thank you for your time and consideration.

Best regards,
Bryan Breeswine

Dear Council President Bassan,

My name is Bryan Breeswine, and I am reaching out as a private citizen of Albuquerque and a firefighter paramedic who has served this community for over 13 years in both the fire service and the private ambulance sector. I appreciate the time and effort you dedicate to ensuring our city is well-served, and I want to share some critical considerations regarding Resolution R-122 and its potential impact on Albuquerque Fire Rescue's staffing model.

The Importance of Flexibility in EMS Staffing

In 2016, the City Council passed a resolution setting minimum staffing levels for the fire department. Before its adoption, an amendment was made to remove the word "paramedic" from the rescue staffing requirement. That amendment had the support of the Council, Fire Administration, City Administration, and the Union. While I don't know all the details behind that agreement, I do know that removing the paramedic requirement allowed for the flexibility needed to adapt to EMS staffing challenges—challenges that have only increased in the years since.

That flexibility has enabled us to try different staffing models at different stations for different reasons—models that otherwise would not have been possible. We have been able to implement BLS rescues, ALS engines, and rescue and medic units staffed with both a paramedic and a non-paramedic. These trials, and in some cases permanent staffing models, have helped us navigate the ongoing challenges of maintaining paramedic staffing levels to serve our city.

However, staffing has always been a challenge, and today, that challenge is greater than ever—not just here, but across the nation. The paramedic shortage is worsening, and now is not the time to impose rigid staffing requirements that limit our ability to adapt. In fact, we need to be more creative today than ever before to ensure we can continue to meet the needs of our citizens.

Why the Two-Paramedic Model is Not the Best Fit for Albuquerque

Throughout my career, I have seen a division between the traditional suppression side of AFR (non-paramedics) and the traditional EMS side (paramedics). This division has created challenges, particularly in encouraging personnel to pursue paramedic training. Many members have hesitated to become paramedics because they felt it would limit them to only working on a rescue.

We have historically maintained the two-paramedic model on rescues, and while it is a good model, it is not the best model for our situation in Albuquerque. If both AFR and Albuquerque Ambulance had consistent and fully staffed ALS coverage, then two paramedics on every rescue might work well. However, that is not our reality.

Our rescues are transporting more than ever before, often leaving their districts for extended periods while transporting patients to hospitals. This creates coverage gaps—because engines, which traditionally do not have paramedics, are left without ALS capabilities until another rescue or Albuquerque Ambulance arrives. This can result in long delays in providing ALS care, especially when multiple rescues are tied up on transports.

By placing one paramedic on the rescue and one on the engine, we can ensure that ALS care remains available in the district even when a rescue is transporting. This model is currently in place at Station 2 and Station 3, where we have been able to provide faster ALS response by ensuring that paramedics remain available on engines.

If Resolution R-122 were passed and enforced, Station 2 could lose one of its two ALS-capable units, and Station 3 could lose one of its three. The freedom and flexibility provided by the 2016 amendment allow us to explore innovative solutions like these to better serve the community while also creating more career growth opportunities for our members. This is a benefit that should be preserved—or at the very least, explored further before making a change.

The Value of Mentorship and Career Development

One of the benefits of the two-paramedic model has been the opportunity for mentorship between two paramedics on one rescue—often pairing a senior paramedic with a newer or less experienced paramedic. Many EMS agencies and fire departments across the country implement a structured mentorship period similar to on-the-job training for police officers. This is something we should formally explore as a department, offering new or developing paramedics a designated period on a two-medic rescue to build confidence and experience.

However, it's important to recognize that mentorship isn't limited to rescues. By allowing more flexibility in where paramedics are assigned, we can expand mentorship opportunities throughout the department. Rotating

paramedics, EMT-Basics, and EMT-Intermediates between rescues and engines creates more interaction, more learning opportunities, and broader exposure to different aspects of patient care and emergency response.

Under a more flexible staffing model, EMT-Basics and Intermediates would have more opportunities to work alongside paramedics, gaining exposure to ALS calls, learning new skills, and developing a stronger foundation for their careers. This kind of hands-on experience could encourage more EMTs to pursue advanced training, helping address our ongoing paramedic shortage.

We should not limit mentorship opportunities to one specific apparatus, nor should we assume that the only way to train new paramedics is by keeping them solely on rescues. Instead, we should look at mentorship as a department-wide initiative—one that allows for skill development across multiple apparatus types, encourages career progression, and provides an engaging learning environment for all members of AFR.

The Need to Explore EMT-Intermediate Solutions

Additionally, Resolution R-122 does not address one of the most promising solutions to our ALS staffing challenges—the implementation of EMT-Intermediates. EMT-Intermediates serve as a crucial middle ground between EMT-Basics and Paramedics, providing a higher level of care without requiring full paramedic training.

If we staffed rescues with one paramedic and one intermediate while placing a paramedic on the engine, nearly every call would receive timely ALS-level care. This approach is worth serious exploration, but if Resolution R-122 passes, it will prevent us from pursuing this model and other potential innovations. We should not be making decisions that hinder progress—we should be moving toward new, effective ways to provide care.

I support the firefighters and medics - the experts in the field who overwhelmingly disagree with the Chief who wants to dilute our staffing by splitting up medics on a rescue. There's a lot of misinformation out there on what the Chief is wanting to do and what my bill does. I'm simply codifying the staffing system that is already in place and provides the best possible service to our city.

Subject: Important Update from Albuquerque Fire Rescue
To: <gjavachip@gmail.com>

Dear friends & neighbors,

As one our city's firefighters, I would like to take a moment and share an important update from the City of Albuquerque's fire department. Albuquerque Fire Rescue (AFR) recently announced new operational and staffing changes to better serve Albuquerque residents and improve response times in high demand areas. These changes were made to ensure increased response capabilities lead to better outcomes for residents. Unfortunately, there is city council proposal to roll this effort back, **which will either delay response times to residents, or make that response less effective at saving lives.**

AFR Engines have traditionally been staffed with four personnel at the EMT-Basic level. AFR Rescues (ambulances) have been staffed with two personnel at the EMT-Paramedic level. In 2021, AFR began a pilot program that placed one paramedic on AFR Rescues alongside one EMT basic, effectively doubling the response capability of highly trained paramedic professionals in our community. This change has proven to be safe and effective in the delivery of quality clinical care, and most importantly, means you will receive a faster response from a paramedic when you need it most.

Neighborhoods across Albuquerque will benefit by expanding paramedic and intermediate level EMTs across several districts. These changes allow AFR to send paramedics to more calls in critical areas while also creating the opportunity for firefighters to rotate into different positions to maintain both their fire and EMS skills. This staffing model is used by departments across the State of New Mexico and is a best practice employed by many other cities across the country.

The City Council is set to hear legislation tomorrow that would undo this progress. The bill R-25-122 means that **AFR will not be able to get a paramedic on every call in these districts, or it will take longer**. These changes were made without any consultation of AFR leadership and the Councilors proposing this have no background in the field. Additionally, the legislation, which is slated for immediate action, does not appear to have been vetted against potential legal challenges.

We humbly ask for your support and to make your voice heard by signing up for public comment and opposing R-25-122. Reckless legislation like this directly impacts the people we

took an oath to serve. If you cannot sign up for public comment, you can call and email your Councilor here.

Councilor:

Regarding the clinic for first responders that you are working on with AFD. If you don't mind I can give you a few tips on facility planning. At Council we have done the facility assessment planning for AFR for two Fire stations we also recently did the planning for the Youth Shelter and the Asian Pacific Center and balloon landing fields and were involved community center plans. A couple of things we have learned.

1. It very helpful to do a facility plan being that:
    a. You get the facility you were seeking,
    b. Reduces the amount changes in the design process,
    c. Provides an accurate cost estimate which in turn
    d. Makes sure you plan for what is possible, which in turn
    e. provides your funding benefactors with knowledge of what the funding target is and that this
       is a solid workable project not just an idea.

2. To accomplish the above the facility planning process usually proceeds as follows.
    a. Works with all the stake holders to identify the goal, what level of services that will be offered.

b. Analyzes who the client base is and inventories the needs they would have for such a facility
c. Then categorizes the needs into the types of service that are required to address the need.
d. Takes each service and determines the interior space needed to deliver that service and the equipment that is required and the HVAC, plumbing, high voltage electrical and low voltage electrical that is required. (This in critical in medical buildings and science labs as some times the majority of the cost
   Can be the electrical or the HVAC, the equipment and the cost of those functions varies widely with the type of services that are offered) .
e. Provides a recommendation on how the interior of the building should be arranged.
   Identifies staffing levels (which can also include staffing costs)
f. The shell of the building is usually left to the design process, but sometimes the report will provide example of shells for other types of facilities.
g. Determines the size of propriety that is needed.
h. Identifies potential locations.
i. Conducts and analysis on whether the facility should be built from the ground up, or should an existing building be renovated, should suites be rented in an existing structure, or in your case should there be a partnership with an existing medical providers
j. Determines a turn-key cost to design and construct
k. Provides phasing options.
l. Then the report can cover whether staffing should be in-house, or should a contractor be used.

3. The facility plan is then used to raise funds, in the GO bond capital outlay, congressional earmark and grant writing domain as the project has moved up from an idea, to an already started project

Hope this helps. If you need a firm to do this, we have DPS on contract and they have done last two large medical towers in the City.

Tom

Renee and Rachel,

Thank you so much for taking the time to meet with me today. Here are the 3 questions please, plus anything else that you may have.

Have you worked with the union any of these issues that were brought up today regarding paramedics and staffing?

Labor is referring to the AFR 2 paramedic system as the gold standard in EMS, do you agree? Why would you want to move away from that?

What will be the effects at AFR if this resolution passes, can you follow it?

I appreciate you very much.

Respectfully,

Emily Jaramillo

Dear Tanya: Thank you for taking on the job of City Councilor. I'm an elder living with my son and his wife near Lomas and Washington. He's a firefighter and has emailed me relating to the upcoming vote affecting the organization of the department.
I would urge, if possible, to delay passing this change so that further negotiations can take place. It sounds like the firefighters are solidly against this change, and that the conversation has been going on for some time now. Undoubtedly the City Council has budgetary issues to deal with also.
This would be my initial thought, not knowing the details involved.
Thank you again for "stepping up": to the challenge to work through these issues.
Take Care, Walt Epley

Good afternoon,

R-25-122 was introduced by Councilors Baca and Lewis. I did not introduce it as the Council President, nor did I delegate it to skip committee. The sponsors requested immediate action on the bill, and it is customary to allow this opportunity to the request. Per Parliamentary procedure, the Council will now have to vote to suspend the rules for immediate action, and need a super majority vote (6) in order to hear this bill at tonight's meeting.

I don't have an opinion on R-25-122. I am unable to educate myself on this issue as it was introduced in the Letter of Introduction by the president of the Council and put on the agenda for final action at the same meeting. It was of course not sent to a Council committee. It troubles me greatly that bills are not being sent to a Council committee where the public can participate in the process. I am also horrified that a bill would be introduced and voted on at the same meeting. I urge you to delay this bill or vote it down. How can the Councilors understand the merits of bills if they are rushed through like this.

Dear Councilor Bassan,

Please - vote "No" on R-25-122 tonight, and allow AFR staffing and operational decisions to be determined by professionals in that department. As a constituent of your district who has received emergency services by AFR, I believe they are best suited to make staffing decisions rather than City Councilors. Thank you.

Chief,

I honestly had no idea you expected a conversation about this before we introduced it. I did not go out of my way to not discuss it with you. Honestly it's been a while since I've heard from you at all. I've had long conversations with many chiefs over the years regarding two-paramedic staffing on rescues, as you know I sponsored the staffing resolution in 2016 and supported the current system of medics. I also did not know you had plans to make any changes. If I had known those plans I certainly would have thought of discussing this with you.

I heard you scheduled a press conference and complained that you were blindsided by this. I wish you would have been as eager to discuss your proposed changes with me as you were to complain to the press. I'm sure that was on the advice of all of your PIOs.

I'm always glad to discuss and certainly respect your experience and expertise.

Councilor Lewis,

I was disappointed to find the resolution you sponsored for ***immediate*** action at the Council meeting on Monday without any consultation with me or my command staff. When I accepted the position as Fire Chief, I made it clear to Mayor Keller that my line of integrity was having elected officials influencing any directive that I felt compromised public safety or the safety of AFR firefighters. It is incredibly concerning that I found out about a resolution dictating fire department staffing and operations when it was uploaded on the website on Friday and set for a vote three days later.

Beyond the lack of communication, I have serious concerns about how this resolution will impact our service delivery and internal operations. I have been a firefighter paramedic in AFR for 20 years and have a background in public health. I was also a member of our union during the politics that surrounded the failed attempt to pass this language in the 2016 resolution; I have a very deep understanding of exactly what is going on.

It is my job to advocate for the public safety of our residents and ensure that firefighters are fully trained and able to operate safely on all emergency calls. This resolution will decrease AFR's service delivery. I have always been open for direct communication from all councilors and have never refused a call or ignored an email. I am incredibly disappointed and concerned that you did not contact me, the Fire Chief, to discuss the implications of an operational resolution before sponsoring it for immediate action.

Respectfully,

Emily Jaramillo

My name is John McGee and I serve as a Paramedic Lieutenant within ABQ Fire Rescue. I am submitting this email in opposition to Resolution R-122.

In my opinion, and based upon my experience, the best solution to ensure reliable, premium EMS service to the citizens of Albuquerque requires AFR to adopt the staffing model proposed by Fire Chief Emily Jaramillo. Throughout my 18 year career with AFR, I have served in a number of strategic roles including our paramedic response, staffing, education and recruiting. I am the longest tenured EMS educator at AFR, and one of five individuals with the Instructor II certification required to lead our EMT-Basic and Paramedic programs. Additionally, I designed and initiated our current EMT-Basic program, and a founder of the previous, outgoing, Paramedic program. From an educational viewpoint, the expectation of an entry-level paramedic is to be able to operate independently after successfully completing their precepted internship. With our two-tiered, multi-unit response model, no paramedic working in ABQ responds alone.

Currently, I serve as AFR's official recruiter, but I began my career with a local transport agency in 2005, hired by AFR in 2007, and attended paramedic school in 2008. As a rookie firefighter contemplating p-school, I was warned by my mentors that doing so was equivalent to "career suicide". In those days, that was the predominant belief and culture surrounding paramedic training, so AFD (at the time) forced select rookies to attend paramedic school....and I was one of those rookies.

In the subsequent 18 years, I have trained with fire departments, paramedics, medical directors and EMS agencies from across the U.S., and many of them eclipse our call volume and staffing numbers. Most, if not all of these departments and agencies have been forced to address the same paramedic staffing shortages affecting AFR, with the vast majority adopting a "1 medic per apparatus" staffing model.

I've waited my entire career to see AFR offer paramedics the same job opportunities and flexibility afforded to the EMT-Basics in our department. AFR will continue to struggle with training and recruiting paramedics, until we change our attitude and staffing model to a more fair and balanced format, that doesn't resign paramedics to a "life sentence" on the Rescue.

Thank you all for your time and attention on this crucial issue.

Lt. John McGee

Resolution R-122

Enter Your Message Here

Dear Members of City Council,

I am writing to voice my support of the changes made to our staffing change by Albuquerque Fire Chief Emily Jaramillo. I will keep this short and to the point. The argument that we are somehow diminishing the level of emergency medical care available to residents by making this change just does not make sense. By making this change we will greatly be INCREASING the level of medical care to residents by having a paramedic on each and every call. I will illustrate this so it makes more sense. I am a paramedic currently staffed on a 2 paramedic rescue. There are numerous times we are transporting a completely stable/non emergent patient to the hospital for an extended period of time essentially taking us out of service for anyone else in our district. That period can sometimes extend beyond an hour. In fact, as many of you are aware, calls out to the Westside Homeless Shelter can go well beyond an hour if transport is needed by an AFR unit. During that time our district has no paramedics available in district and must rely on stations that are much further away than the normal response in district. With the Fire Chiefs changes this problem is no longer a problem because a medic will be available on any truck, not stuck at the hospital with a stable patient. Having both paramedics stuck at the hospital is diminished service to someone having a life threatening emergency in that district. To me this is not a complicated issue, it just makes sense to have paramedics available on every call. If it was my family that needed help now I would prefer having the highest level of service available on each unit. Ask yourself if it was your spouse, child, or parent who needed ALS intervention what would be most beneficial to them? Would it be having both of the Paramedics closest to your house being at the hospital with a stable patient, or would you prefer having a Paramedic available for your family as fast as possible? Again I am opposed to Resolution R-122 and I strongly agree with Chief Jaramillo's changes. They just make sense.

Sincerely,

Stephen Sanchez
Paramedic Driver
Albuquerque Fire Rescue

Resolution R-122

Enter Your Message Here

Dear Members of City Council,

I am writing to voice my support of the changes made to our staffing change by Albuquerque Fire Chief Emily Jaramillo. I will keep this short and to the point. The argument that we are somehow diminishing the level of emergency medical care available to residents by making this change just does not make sense. By making this change we will greatly be INCREASING the level of medical care to residents by having a paramedic on each and every call. I will illustrate this so it makes more sense. I am a paramedic currently staffed on a 2 paramedic rescue. There are numerous times we are transporting a completely stable/non emergent patient to the hospital for an extended period of time essentially taking us out of service for anyone else in our district. That period can sometimes extend beyond an hour. In fact, as many of you are aware, calls out to the Westside Homeless Shelter can go well beyond an hour if transport is needed by an AFR unit. During that time our district has no paramedics available in district and must rely on stations that are much further away than the normal response in district. With the Fire Chiefs changes this problem is no longer a problem because a medic will be available on any truck, not stuck at the hospital with a stable patient. Having both paramedics stuck at the hospital is diminished service to someone having a life threatening emergency in that district. To me this is not a complicated issue, it just makes sense to have paramedics available on every call. If it was my family that needed help now I would prefer having the highest level of service available on each unit. Ask yourself if it was your spouse, child, or parent who needed ALS intervention what would be most beneficial to them? Would it be having both of the Paramedics closest to your house being at the hospital with a stable patient, or would you prefer having a Paramedic available for your family as fast as possible? Again I am opposed to Resolution R-122 and I strongly agree with Chief Jaramillo's changes. They just make sense.

Sincerely,

Stephen Sanchez
Paramedic Driver
Albuquerque Fire Rescue

Albuquerque City Council

Dear Members of the City Council,

I am writing to express my strong support for the changes being implemented by the AFR Chief, Emily Jaramillo, specifically the opportunity for medics to step off the rescue and utilize their skill set on an ALS pumper. Having been a part of the fire department for 24 years and serving on the rescue since 2006, I have seen firsthand how important it is for our personnel to be able to leverage their training and experience in the most effective way possible. This new approach excites me, and I am grateful for the opportunity it brings.

This year, I was fortunate enough to bid for a position on a fire truck, and I jumped at the opportunity for change. It brings a sense of excitement and renewal to my work, and I firmly believe that the model the Chief is implementing will provide a better service to the community we serve. By having a medic on every emergency, we ensure that critical medical care is immediately available, which is crucial for the safety and well-being of those we respond to.

The opportunity for medics to expand their roles and contribute to both fire and medical responses creates a more dynamic, efficient, and responsive team. I have no doubt that this will ultimately enhance the level of care and support we are able to provide to our community members.

I strongly oppose the resolution R-25-122, which would undermine the valuable role medics can play in this new system and prevent us from fully utilizing our skills. Additionally, it would deny me the chance to take on a new and exciting opportunity that aligns with both my personal career goals and the greater mission of our department.

Thank you for your time and consideration of this matter. I hope you will join me in supporting these positive changes that will benefit both the department and the citizens we serve.

Sincerely,
James Perez
Lt. Paramedic

Importance: Normal
Sensitivity: None

ONE ALBUQUERQUE city of albuquerque

FOR IMMEDIATE RELEASE

Contact: Jason Fejer | 505-934-1021

October 22, 2024

Construction of Fire Station 12 Kicks into Gear on Route 66

New, modern station will replace firehouse built in 1960

ALBUQUERQUE – Today, Mayor Tim Keller, Fire Chief Emily Jaramillo, City Councilor Renee Grout and community members gathered to celebrate the construction of Fire Station 12 with a site clearing ceremony. The $12 million, three-bay station, will replace the current two-bay station built in 1960. The old station sits just north of the new site. Funding was secured from multiple sources including GO Bonds, Gross Receipt taxes and State Capital Outlay.

Fire Station 12 is consistently one of AFR's busiest houses. Station 12 has a response area of 8.1 square miles which includes Interstate 40, the commercial occupancies of the East Central Corridor, and many neighborhoods including Four Hills, Buena Ventura and South Juan Tabo. It is home to Engine 12, AFR's 2nd busiest engine company, and Rescue 12, AFR's busiest rescue company. In 2023, Station 12 answered almost 9,000 calls for service.

AFR continues to modernize old stations and build new ones to serve the growing city. The brand-new Station 23 currently being built to take calls in southwest Albuquerque, the fastest growing part of town. In addition to Station 12, the Station 4 groundbreaking is expected to take place in December.

“Securing a suitable site to modernize Station 12 was a tough climb, but the need was clear so giving up on it was never an option,” **said Mayor Tim Keller. “**A renewed AFR presence here will bring new life to East Central as we continue building a safer, better future for our families.”

“With today’s groundbreaking ceremony, we lay the foundation to rebuild Fire Station 12, we was originally constructed in 1960,” **said Fire Chief Emily Jaramillo.** “This is one of Albuquerque’s busiest areas and the new station will serve as a crucial lifeline, ensuring quality service and protection for our community.”

“Fire Station 12, one of the busiest stations in Albuquerque, is long overdue for an expansion and upgrade,” **said Senator Mimi Stewart**. “This year I was proud to contribute capital funds to keep this

project on track. We can all look forward to a state-of-the-art station that offers greater capacity and opportunity for more services to better serve our community".

"This new building for Station 12 is important for public safety," **said City Councilor Renee Grout, District 9.** "It's also an important piece of a larger redevelopment effort for this stretch of Central Avenue near Juan Tabo. I am looking forward to seeing this beautiful new fire station, along with the additional development that is sure to follow."

"House District 21 covers the historic and challenging east Central corridor," **said Representative Debra Sariana**. "Supporting the rebuilding of Station 12 to improve public safety and promote the redevelopment of this area is something I am proud to be a part of."

Albuquerque Fire Rescue continues to be one of the busiest and most active departments in the nation. Established in June of 1900, it now has 22 fire stations, 760 full-time firefighters and 39 civilian personnel. In addition to fire suppression, AFR provides emergency medical services, emergency dispatch services, fire prevention, arson investigation, special operations response, community paramedicine, and public education.

March 2, 2025

Albuquerque City Council

Dear Members of the City Council,

I am writing you to express my support for the staffing changes made by Fire Chief Jaramillo. I started my career with AFD/AFR May of 2005 and I have served as a paramedic for more than half of my career. Eight of those years I have served as a Rescue Lieutenant, assigned to R5, R11, R9, R19, and R15. During the 2023 bid process Fire administration chose to grant paramedic lieutenants the opportunity to bid to an engine rather than a rescue. I was lucky enough to bid as the paramedic officer on Engine 2.

This has been an opportunity of a lifetime that I feel has breathed new life into me and my family. The opportunity to engage and embrace a different role along with the responsibility of providing Advanced Life Support (ALS) within this amazing community and Fire Department has made me feel like my career has come full circle. Prior to the opportunity of working on Engine 2 my intentions were to retire as soon as I reached retirement eligibility. With this staffing model I have the intention of serving the community beyond this date.

Claims have been made that this model dilutes or decreases ALS service, compromising life saving treatment to the public. In contrast my experience has been the exact opposite. Engine 2 is staffed with 1 paramedic officer and 3 EMT's and Rescue 2 is staffed with 1 paramedic driver and 1 EMT officer. This staffing model has increased our ability to provide ALS care with earlier lifesaving treatments to acutely ill patients in station 2's district. One case in point that exemplifies the highest level of care we have provided was in June of 2024. Engine 2 and Rescue 2 responded to the Sunport pool for reports of a cardiac arrest/drowning. We arrived on scene to find a male in his 60's that was not breathing and did not have a pulse. We worked diligently and were able to regain breathing with pulses. We transported this patient to UNMH were he received definitive care and walked out of the hospital one week later. He is still alive today absent of any neurological deficits. This is just one of many examples of the exceptional service we provide.

I strongly appose the resolution R-25-122 that is being considered not only because of my firsthand experience providing these lifesaving measures, but also because it will impact the recruitment and retention of paramedics within our organization. Based on our recent Collective Bargaining Agreement (CBA) there in no longer an incentive to become a paramedic if restricted to rescues only.

Thank you for your consideration in this matter.

Sincerely,
Lieutenant Jeremy Gonzales
Albuquerque Fire Rescue

?Dear Councilor,

As a resident of Albuquerque and an avid supporter of public safety, I urge you to support our Firefighter by voting yes to Resolution R-25-122. Our Firefighters are telling us that 2 paramedics on Rescues gives us the best service and we should trust them. I trust them. 2 Paramedics on Rescues should be protected.

Please vote yes, ,

Respectfully,
Abraham Juarez

Dear City Councilors,
As a Fire wife of a Lieutenant Paramedic, and an emergency room RN, I feel I have a huge insight that others don't have about the proposed change within AFR. As you are hopefully aware, each rescue unit operates with 2 Paramedics, which is the EMS gold standard across the US. AFR administration is wanting to change this by putting one Paramedic on each apparatus, leaving the rescue unit limited with a Paramedic and an EMT-Basic.
An EMT-B has a very limited scope of practice, compared to a Paramedic. In the event of a high acuity call or trauma, the Paramedic is the only reliable resource in this situation as the EMT-B does not have the skills or the knowledge of a Paramedic, which gives the patient a higher risk of a negative outcome. 100% of the time, it takes two Paramedics to transport a critical patient, which is a HUGE delay in patient care when only one Paramedic is available. This risk increases even more as, 95% of the time AAS does not have a unit to respond. And the excuse of "an engine will

respond, because that apparatus has a Paramedic" does not work because due to the high level of calls, that truck is most likely out of service due to a different medical call. Units that are in higher risk districts for traumas such as station 5, 11 and 12, it's important to have two Paramedics on the rescue as they are valuable resources for each other to give the proper medical treatment.

There's also a safety concern for new Paramedics who aren't as experienced and unfamiliar with Paramedic protocols within the department, as they won't have a seasoned Paramedic to mentor them or have that resource immediately available for them. Changing this policy not only does the citizens of Albuquerque a disservice but also puts licensed personnel at risk of losing their license due to unsafe situations, and having MORE of a shortage of Paramedics. AFR has not taken the opportunity to speak with their own about a better solution, and is ignoring the concerns for their own benefit. I ask you to please vote YES to resolution R-25-122

Resolution R-122
Enter Your Message Here
Dear Members of City Council,

I am writing to voice my support of the changes made to our staffing change by Albuquerque Fire Chief Emily Jaramillo. I will keep this short and to the point. The argument that we are somehow diminishing the level of emergency medical care available to residents by making this change just does not make sense. By making this change we will greatly be INCREASING the level of medical care to residents by having a paramedic on each and every call. I will illustrate this so it makes more sense. I am a paramedic currently staffed on a 2 paramedic rescue. There are numerous times we are

transporting a completely stable/non emergent patient to the hospital for an extended period of time essentially taking us out of service for anyone else in our district. That period can sometimes extend beyond an hour. In fact, as many of you are aware, calls out to the Westside Homeless Shelter can go well beyond an hour if transport is needed by an AFR unit. During that time our district has no paramedics available in district and must rely on stations that are much further away than the normal response in district. With the Fire Chiefs changes this problem is no longer a problem because a medic will be available on any truck, not stuck at the hospital with a stable patient. Having both paramedics stuck at the hospital is diminished service to someone having a life threatening emergency in that district. To me this is not a complicated issue, it just makes sense to have paramedics available on every call. If it was my family that needed help now I would prefer having the highest level of service available on each unit. Ask yourself if it was your spouse, child, or parent who needed ALS intervention what would be most beneficial to them? Would it be having both of the Paramedics closest to your house being at the hospital with a stable patient, or would you prefer having a Paramedic available for your family as fast as possible? Again I am opposed to Resolution R-122 and I strongly agree with Chief Jaramillo's changes. They just make sense.

Sincerely,

Stephen Sanchez

Staffing resolution .docx

Here is the bill for Lewis. Baca agreed to be a cosponsor.

It has been approved for immediate action for the March 3 Meeting.

Isaac Padilla
Director of Council Services
iepadilla@cabq.gov
Office: 505-768-3324
Mobile: 505-717-5315

CITY of ALBUQUERQUE
TWENTY FIFTH COUNCIL

COUNCIL BILL NO. _____ ENACTMENT NO. _____

SPONSORED BY:

RESOLUTION

Establishing minimum staffing requirements for Albuquerque Fire Rescue, Rescue Apparatus.

WHEREAS, Albuquerque Fire Rescue has a proud tradition of providing excellent emergency response services to the citizens and visitors of the City of Albuquerque; and

WHEREAS, Albuquerque Fire Rescue operates a triaged response that prioritizes paramedics for emergency medical calls rather than non-patient related emergencies; and

WHEREAS, prompt and coordinated care is essential for maximizing positive patient outcomes in medical emergencies, especially heart attacks, trauma-related incidents requiring immediate transport, and multi-casualty accidents; and

WHEREAS, two paramedic Rescue apparatus provide a higher standard of care, particularly in complex medical emergencies, by reducing treatment delays, improving patient monitoring, and enhancing on-scene decision making; and

WHEREAS, two paramedics working in tandem and responding on the same apparatus provide increased crew cohesion, checks and balances for complex EMS protocol interpretation, leading to increased positive patient outcomes and ultimately saving lives; and

WHEREAS, Albuquerque Fire Rescue's two paramedic Rescue apparatus system offers beneficial professional mentorship and peer support to paramedics new and old; and

WHEREAS, the City of Albuquerque has repeatedly fought trends to diminish and dilute service delivery to constituents; and

[Bracketed/Underscored Material] - New
[~~Bracketed/Strikethrough Material~~] - Deletion

IPRA Response 001300

WHEREAS, the City of Albuquerque has a responsibility to prioritize public health and safety by ensuring its emergency medical services are equipped to effectively respond to life-threatening situations, and deploying two paramedics on rescues significantly improves service delivery and patient care outcomes; and

WHEREAS, the City of Albuquerque is committed to supporting the efforts of our firefighters to provide our citizens and visitors with the best possible service in the most efficient and effective manner, and to provide our firefighters with a reasonable level of safety while performing their assigned duties.

BE IT RESOLVED BY THE COUNCIL, THE GOVERNING BODY OF THE CITY OF ALBUQUERQUE:

Section 1. That, with the exception of temporary exigencies or emergencies, as determined by the Chief, the City of Albuquerque will continue the policy and practice of staffing rank-specific firefighters to all Engine apparatus with a minimum of four (4) firefighters, Rescue apparatus with a minimum of two (2) [paramedic] firefighters, Ladder apparatus with a minimum of three (3) firefighters, Hazardous Materials Squads with a minimum of two (2) firefighters, Heavy Technical Rescue Squads with a minimum of four (4) firefighters, Quality Assurance Units with one firefighter, and Battalion Commander Units with one (1) firefighter.

Section 2. The City of Albuquerque will continue to staff firefighters in the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division with adequate staffing levels.

Section 3. That as the size of the City and call volume for Albuquerque Fire Rescue increases thereafter, the City of Albuquerque shall increase the number of apparatus with categorical staffing levels maintained, and increase firefighter staffing levels of the Fire Marshal's Office, Arson Investigation Division, Communications and Dispatch Division, and Training Division.

Section 4. That in the event of staffing modifications recommended by the Chief, the City of Albuquerque and Albuquerque Area Fire Fighters IAFF Local 244 must meet and confer prior to amending.

Albuquerque City Council

Dear Members of the City Council,

I am writing to express my strong support for the changes being implemented by the AFR Chief, Emily Jaramillo, specifically the opportunity for medics to step off the rescue and utilize their skill set on an ALS pumper. Having been a part of the fire department for 24 years and serving on the rescue since 2006, I have seen firsthand how important it is for our personnel to be able to leverage their training and experience in the most effective way possible. This new approach excites me, and I am grateful for the opportunity it brings.

This year, I was fortunate enough to bid for a position on a fire truck, and I jumped at the opportunity for change. It brings a sense of excitement and renewal to my work, and I firmly believe that the model the Chief is implementing will provide a better service to the community we serve. By having a medic on every emergency, we ensure that critical medical care is immediately available, which is crucial for the safety and well-being of those we respond to.

The opportunity for medics to expand their roles and contribute to both fire and medical responses creates a more dynamic, efficient, and responsive team. I have no doubt that this will ultimately enhance the level of care and support we are able to provide to our community members.

I strongly oppose the resolution R-25-122, which would undermine the valuable role medics can play in this new system and prevent us from fully utilizing our skills. Additionally, it would deny me the chance to take on a new and exciting opportunity that aligns with both my personal career goals and the greater mission of our department.

Thank you for your time and consideration of this matter. I hope you will join me in supporting these positive changes that will benefit both the department and the citizens we serve.

Sincerely,

James Perez

Lt. Paramedic

Why would the City Councils vote against life-saving infrastructure that the AFR already has in existence? And surely the state can afford this wonderful arrangement. Please maintain paramedic status as it presently exists on AFR calls. This should not be difficult call as it involves saving peoples lives.

Thank you,
Mrs. Meeks
