4A Class

Annunciation Catholic School
2610 Utah St. NE
Albuquerque, NM 87110

Mr. John Soladay, Director
Solid Waste Department
Albuquerque, NM

Dear Mr. Soladay,
Hi, my name is Alyssa Bendinskas and I am in the 4th grade at Annunciation Catholic School and our class was wondering if we can come to the Recycling Plant and come see what you do with all of the recycled items.

Some things our class has done with recycling was our class created Power Points, and presented them to all of the other classes in the school, from Kindergarten to eighth grade. We have also been collecting the recycling in other rooms and dumping it out in the schools recycling bin.

FIVE STAR

I think the field trip would be great to go on so we can see where all of the recycled items go, how all of the recycled items get sorted, and what happens if the trash gets into the machines

FIVE STAR

Some things our class expects from the feild trip is to learn about stuff that recycles and what does not recycle. Also we want to about the machines and how they work. We hope to learn more about recycling than we already learned at the school.

FIVE STAR

Recycling is important to us as Catholics because God's Creation takes a big part in recycling, it also helps to keep the Earth clean, reduces landfills, helps wildlife, and reduces pollution.

FIVE STAR

Sincerely,
Alyssa Bendinskas
