INTER-AGENCY COLLABORATION

- LINX – Federal report repository that links multiple jurisdictions into one searchable database for offender and victim research
- RTCC – Incident Management tools that allow APD to interact with other jurisdictions on incidents that require multiple agencies
- CSIS – An interface between Metro Court and APD to allow for case research
- WebEOC – Disaster management tool that integrates all private and local, county, state and federal entities (i.e. APD, BCSO, Local/regional health centers, water authority, FBI, Homeland Security, etc.) to help manage natural disasters.
- WebQuery – an web based tool that other agencies utilize for review crime reports in real time
- Officer + Court Scheduling – an interface that allows the courts and DA’s offices to schedule officer’s for hearing based on their availability
- GANGNET – allows for multiple jurisdictions to provide gang information into one searchable database
- Digital Evidence Management Systems – various databases that collect and share digital evidence with other agencies for case management
- WITS – a searchable database of current warrants within the state
- Computer Aided Dispatching – our CAD system integrates two other agencies into one collective dispatching system. This includes AFD and Aviation Police.
- LEADS – a statewide searchable person verification system
- DNA and Identification Review Systems – a database that houses various DNA and ID results that other agencies can use for their case reviews
- Body Worn Camera Video Sharing – a sharing capability within one digital evidence management systems that allows for other agencies to request videos
- E-Citations – a traffic citation system that allows computer generated tickets to be delivered to the court for ease of case management, payments and hearings.
- IA Pro – A personnel management system that allows reviewing authorities (i.e. CPOA) to review personnel issues.
