3 Colored Chrysler

Cibola High School, Grade 11

Digital Photography

Artist Statement

The three colored lights are made from a light wand that switches colors with a push of a button. I didn't want a low angle, so I put my camera on a tripod eye level and shot at that. This took multiple tries as the long exposure was either too long or too short and the lights were weird looking, until I got the perfect wave behind the car. In the end, it is still one of my favorite shots I've taken.
