

"BY IMPLEMENTING REASONABLE AND SOUND ENERGY EFFICIENCY PROJECTS, THE CITY HAS SAVED MORE THAN FOUR MILLION DOLLARS FROM AVOIDED ENERGY COSTS, PNM REBATES AND REDUCED OPERATING COSTS."

"RATHER THAN SIMPLY TALKING ABOUT RECYCLING, WE HAVE MADE SIGNIFICANT STRIDES WITH A NEW PUBLIC-PRIVATE PARTNERSHIP ON A STATE OF THE ART RECYCLING PROGRAM."

Under Mayor Berry's administration the City has completed **100 energy efficiency projects** — implemented **16.8 million dollars** — and received over **400 thousand dollars** in PNM Rebates.

We estimate these projects have a total avoided energy cost savings of more than **2.8 million dollars**.

We estimate these projects have a total maintenance and operating savings of more than **1.9 million dollars**.

These projects will have continued annual savings with pay-back periods of less than five to ten years.

Previous to 2010, the City had only completed **17 energy projects** for a sum total of **2.4 million dollars** that had a savings of less than **700 thousand dollars**.

Under Mayor Berry's administration, we have completed **five times more energy efficiency projects** than prior to 2010...

2003 - 2009
17 PROJECTS

2010 - 2016
100 PROJECTS

...and implemented **seven times the funding** on energy efficiency projects...

2003 - 2009
\$2.4 MILLION

2010 - 2016
\$16.8 MILLION

...the City has saved more than **six times the dollars** in avoided costs and received nearly **five times more dollars** in PNM rebates.

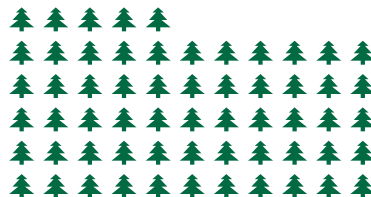

2003 - 2009
\$700,000

2010 - 2016
4.6 million

This translates to reducing the City's carbon footprint (CO2 emissions) by more than **11,703 metric tons** during Mayor Berry's Administration. *That's equivalent to...*

...planting **300,068 trees**

...or taking more than **2,464 cars** off the road

CARBON FOOTPRINT CALCULATOR FROM <http://www.epa.gov/energy-resources/calculator.html>

Under Mayor Berry's administration, the City saw its greatest increase in residential recycling.

To date in FY 2016, residents recycled **26,166 tons** (52,332,000 pounds) through the new recycling program.

FY 2013
24,475 TONS

FY 2014
33,256 TONS

FY 2015
34,206 TONS

FY 2016 to date
26,166 TONS

RICHARD J. BERRY,
MAYOR

3% FOR ENERGY PROJECTS & RECYCLING
